Taking the EU to Court Emmanuelle Mathieu 2020-10-08 This open access book provides an exhaustive picture of the role that annulment conflicts play in the EU multilevel system. Based on a rich dataset of annulment actions since the 1960s and a number of in-depth case studies, it explores the political dimension of annulment litigation, which has become an increasingly relevant judicial tool in the struggle over policy content and decision-making competences. The book covers the motivations of actors to turn policy conflicts into annulment actions, the emergence of multilevel actors' litigant configurations, the impact of actors' constellations on success in court, as well as the impact of annulment actions on the multilevel policy conflicts they originate from. Putinomics Albrecht Rothacher 2021-05-20 This book sheds new light on the political economy of Russia under Putin's rule. The author, a former EU diplomat, presents a historical review of the Russian economy and 60 years of state-communist mismanagement, followed by oligarchic privatization. The book offers profound insights into Putin's rule and the power mechanics of the state-dominated management of the Russian economy. It identifies and assesses the lack of rule of law, together with an arbitrary and often corrupt administration that systematically discourages entrepreneurship and the emergence of an independent middle class. Furthermore, the book discusses Russia's budgetary policy, its dependence on the export of natural resources, state-owned enterprises and their privileges, and Russia's external trade. This hard-hitting, substantial analysis debunks the myth of Russia's economic might and is a must read for anyone seeking to understand the economic realities of the Eurasian continent, or considering doing business with Russia.

Lobbying the European Union David Coen 2009-06-04 It is universally accepted that there has been a huge growth in EU lobbying over the past few decades. There is now a dense EU interest group system. This entirely new volume, inspired by Mazey & Richardson's 1993 book *Lobbying in the European Community*, seeks to understand the role of interest groups in the policy process from agenda-setting to implementation. Specifically, the book is interested in observing how interest groups organise to influence the EU institutions and how they select different coalitions along the policy process and in different policy domains. In looking at

20 years of change, the book captures processes of institutional and actor learning, professionalisation of lobbying, and the possible emergence of a distinct EU public policy style. More specifically, from the actors' perspective, the editors are interested in assessing how the rise of direct lobbying and the emergence of fluid issue-based coalitions has changed the logic of collective action, and what is the potential impact of 'venue-shopping' on reputation and influence. From an institutional perspective, the contributors explore resource and legitimacy demands, and the practical impact of consultation processes on the emergence of a distinct EU lobbying relationship. It will be essential reading for academics and practitioners alike.

Power and Gas Asset Management Miguel Moreira da Silva 2020-01-01 This book offers meaningful insights into an impending challenge for the energy industry, namely the increasing role of asset management amongst the utilities' core operations. In the aftermath of energy digitalization, power and gas companies will be able to seize asset productivity—through risk-based operation and maintenance—and better balance capital and operational expenditures. By addressing the asset management of both power and gas infrastructures, and by adopting a comprehensive approach—including regulation and business models, as well as a solid technology background—this book offers a unique perspective on the energy utilities' transformation journey and the road to optimal decision-making for both asset portfolio expansion and replacement. The asset management end-to-end mission requires appropriate internal governance—depending on the business framework—and the development of decision aid models (for asset replacement and maintenance), supported on probabilistic risk and reliability indexes. This book advocates systematically digitalizing the power and gas assets, addressing both data governance and infrastructure, alongside real-time equipment condition monitoring. It also provides a meaningful methodology for designing data-centric asset management and predictive operation and maintenance, using artificial intelligence and engineering-based approaches. As such, it provides valuable strategy, methods and models—illustrated by case studies and proofs of concept—for a wide range of stakeholders, including utilities and industry professionals, regulators, policy-makers, researchers and students.

European Civil Service in (Times of) Crisis Didier Georgakakis 2017-08-30 This book, part of the new wave of political sociology in EU studies, examines the dialectics of construction/deconstruction of the European civil service through a succession of empirically grounded case studies. Breaking with the usual representations of 'Eurocrats', it sheds light on a hidden aspect of the current European crisis: a crisis of social reproduction which affects the European civil service in a heavy context of management reforms, enlargements, institutional changes and the euro crisis. This in turn has a number of consequences in terms of internal tensions, power, and more broadly, the capacity of EU institutions to create convergence between diverging national and economic interests, and to embody a European future. *European Civil Service in (Times of) Crisis* will be of interest to students and scholars across a wide range of disciplines, including politics, sociology and public administration, to practitioners working in and with the EU institutions, as well as those wishing to know more about the EU.

Teaching and Learning the European Union Stefania Baroncelli 2013-10-04 This volume examines the EU's changing educational context and its challenges. Based on an extensive survey of more than 2000 European Studies courses in 30 European countries, it maps and analyses the features of teaching methodologies as they emerge from both disciplinary as well as interdisciplinary curricula. It presents a series of case studies on some of the most-used innovative teaching tools emerging in the field such as simulation games, e-learning, problem based learning, blended learning, and learning through the use of social networks. Based on the contributors' own experiences and academic research, the book examines both strengths and possible pitfalls of these increasingly popular methods. The book's critical approach will inspire educators and scholars committed to improving the teaching methods and tools in the area of European Studies and other programmes of higher education facing similar challenges.

Abstract Reasoning MCQ for European Institution Competitions Emmanuel Hetru 2013 This brand new, revised and expanded edition is aimed at all candidates planning to sit European institution competitions and who wish to prepare as effectively as possible for the abstract reasoning test. Abstract reasoning questions are presented as series of diagrams containing geometric shapes which are repeated or modified according to a logical sequence. Candidates have to identify the underlying logic and find the diagram that completes the series. Abstract reasoning tests call for skills that candidates do not normally use in everyday life: the ability to visualise geometric transformations (rotations, symmetries, etc), an aptitude to spot similarities between complex shapes, etc. We are all capable of developing these skills. It is not a question of intelligence, but of learning. Entry competitions for European institutions are highly selective. Success in the abstract reasoning test is, above all, a matter of method and training. This book can significantly increase your chances of success. It includes: - a detailed methodology illustrated with numerous examples; - 9 tests of 20 questions each, arranged by level of difficulty; - a detailed explanation of the answer to each question. The questions in this book are similar to those set in the competitions run by EPSO since 2015. They are different from those in previous editions and from our online test questions.

Music and Riddle Culture in the Renaissance Katelijne Schiltz 2015-04-23 Throughout the Renaissance,

composers often expressed themselves in a language of riddles and puzzles, which they embedded within the music and lyrics of their compositions. This is the first book on the theory, practice and cultural context of musical riddles during the period. Katelijne Schiltz focuses on the compositional, notational, practical, social and theoretical aspects of musical riddle culture c.1450–1620, from the works of Antoine Busnoys, Jacob Obrecht and Josquin des Prez to Lodovico Zacconi's manuscript collection of *Canoni musicali*. Schiltz reveals how the riddle both invites and resists interpretation, the ways in which riddles imply a process of transformation and the consequences of these aspects for the riddle's conception, performance and reception. Lavishly illustrated and including a comprehensive catalogue by Bonnie J. Blackburn of enigmatic inscriptions, this book will be of interest to scholars of music, literature, art history, theology and the history of ideas.

Improving Healthcare Quality in Europe Characteristics, Effectiveness and Implementation of Different Strategies OECD 2019-10-17 This volume, developed by the Observatory together with OECD, provides an overall conceptual framework for understanding and applying strategies aimed at improving quality of care. Crucially, it summarizes available evidence on different quality strategies and provides recommendations for their implementation. This book is intended to help policy-makers to understand concepts of quality and to support them to evaluate single strategies and combinations of strategies.

Translating for the European Union Institutions Emma Wagner 2014-04-23 The institutions of the European Union employ hundreds of translators. Why? What do they do? What sort of translation problems do they have to tackle? Has the language policy of the European Union been affected by the recent inclusion of new Member States? This book answers all those questions. Written by three experienced translators from the European Commission, it aims to help general readers, translation students and freelance translators to understand the European Union institutions and their work. Although it deals with written rather than spoken translation, much of the information it gives will be of interest to interpreters too. This second edition has been updated to reflect the new composition of the EU and changes to recruitment procedures.

Translation Issues in Language and Law F. Olsen 2009-03-19 With contributions from world-class specialists this first book-length work looks at translation issues in forensic linguistics, where accuracy and cultural understandings play a prominent part in the legal process.

Technology and Testing Fritz Drasgow 2015-08-20 From early answer sheets filled in with number 2 pencils, to tests administered by mainframe computers, to assessments wholly constructed by computers, it is clear that technology is changing the field of educational and psychological measurement. The numerous and rapid

advances have immediate impact on test creators, assessment professionals, and those who implement and analyze assessments. This comprehensive new volume brings together leading experts on the issues posed by technological applications in testing, with chapters on game-based assessment, testing with simulations, video assessment, computerized test development, large-scale test delivery, model choice, validity, and error issues. Including an overview of existing literature and ground-breaking research, each chapter considers the technological, practical, and ethical considerations of this rapidly-changing area. Ideal for researchers and professionals in testing and assessment, *Technology and Testing* provides a critical and in-depth look at one of the most pressing topics in educational testing today. European Court Procedure Viktor Luszcz 2020-10-29 "More than just another new theoretical study, this book really is a practical and useful tool that I sincerely recommend." From the foreword by Mr Marc van der Woude, President of the General Court of the European Union The new Rules of Procedure of the General Court, in force as of 2015, as well as the reform of the General Court and the re-establishment of a two-tier EU judiciary in September 2016 are the last bricks in the post-Lisbon legal structure governing litigation before the EU Courts. This work covers the already sizeable case-law developed after the completion of these reforms and explains the changes in the Courts' practice entailed by them. Written by experienced EU Court and Commission insiders, it gives a detailed and practice-oriented overview of the whole spectrum of litigation procedure before the EU judiciary. It also presents the entire system of judicial avenues that enable litigants to enforce their rights under EU law against European institutions, Member States or private parties. The book is thus a comprehensive reference tool for practising lawyers and helps them present their cases effectively, while at the same time offering valuable guidance to national judges dealing with cases raising points of EU law. Moreover, it provides insights into the reasoning process of the EU Courts, which will be of interest to scholars in the field, and is built around a structure that facilitates its use as a teaching material.
