Planting the Trees of Kenya Claire A. Nivola 2008-04 Watercolor illustrations and lyrical prose combine to tell the remarkable true story of Wangari Maathai, the winner of the 2004 Nobel Peace Prize, who changed the fate of her village in the highlands of Kenya by teaching her people how to care for it. 15,000 first printing.

Place Names in Africa Liora Bigon 2016-06-06 This volume examines the discursive relations between indigenous, colonial and post-colonial legacies of place-naming in Africa in terms of the production of urban space and place. It is conducted by tracing and analysing place-naming processes, particularly in sub-Saharan Africa during colonial times (British, French, Belgian, Portuguese), with a considerable attention to both the pre-colonial and post-colonial situations. By combining in-depth area studies research – some of the

contributions are of ethnographic quality – with colonial history, planning history and geography, the authors intend to show that culture matters in research on place names. This volume goes beyond the recent understanding obtained in critical studies of nomenclature, normally based on lists of official names, that place naming reflects the power of political regimes, nationalism, and ideology.

Water and Power Mart A. Stewart 2018-12-12 This book brings together a talented international group of scholars, policy practitioners, and NGO professionals that explores a range of issues relating to environmental, developmental, and governing challenges on the Mekong, one of the world's greatest rivers and, alas, one of the most endangered. The book is divided into three sections devoted in turn to historical perspectives on the Lower Mekong Basin. Issues relate to livelihood strategies, environmental threats, and adaptation strategies; and various aspects of river governance, with individual authors treating questions of governance at different levels of refraction and in different registers. The result is a fresh and innovative collection of essays, which, taken together, provide much-needed new perspectives on some of the most important and seemingly intractable environmental and development issues in contemporary Asia.

A Tale of Trees Derek Niemann 2013-10-03 We are a nation that loves its ancient woods and trees. But in the space of just 40 years, more than a third of our ancient woods were destroyed. How and why did this happen? A Tale of Trees is the untold story of how we nearly lost our greatest national treasure.

American Forestry 1922

Cell Biology, Genetics, Molecular Biology, Evolution and Ecology PS Verma | VK Agarwal 2004-09 The revised edition of this bestselling textbook provides latest and detailed account of vital topics in biology, namely, Cell Biology, Genetics, Molecular Biology, Evolution and Ecology . The treatment is very exhaustive as the book devotes exclusive parts to each topic, yet in a simple, lucid and concise manner. Simplified and well labelled diagrams and pictures make the subject interesting and easy to understand. It is developed for students of B.Sc. Pass and Honours courses, primarily. However, it is equally useful for students of M.Sc. Zoology, Botany and Biosciences. Aspirants of medical entrance and civil services examinations would also find the book extremely useful.

management shifted from an integrated conservation model to a bifurcated system of timber plantations and protected areas.

The Road to Freedom Albert Tang 2021-02-23 Albert Tang was only five years old, but he can still vividly recall that day in 1970 when he opened the front door to his home in Cambodia. He saw a group of armed soldiers had arrived to guard the perimeter of the school where he and his family lived. This signaled the beginning of the Cambodian civil war—as well as the atrocities and genocide by dictator Pol Pot's communist regime. In this memoir, Albert provides the perspective of a young boy who witnessed the brutal Khmer Rouge in action and who suffered under the communists. Their actions not only devastated the adults living under the regime but also the children who were robbed of the opportunity to go to school. Many Cambodians fled their country and became refugees in Thailand. Many of them never returned home. But with determination, perseverance, a positive attitude, hard work, and some luck, some of these refugees found the chance to start a new life. Join Albert as he shares an inspiring story of endurance, courage, and hope in *The Road to Freedom*.

Chinese Research Perspectives on the Environment, Volume 1 Dongping YANG 2013-03-01 Chinese Research Perspectives on the Environment (formerly The China Environment Yearbook), Volume 1, was written and produced by China's first environmental non-profit organization, Friends of Nature. This edition combines two years of reports on China's environment from the view of civil society.

Neem National Research Council 1992-02-01 The neem tree, one of the most promising of all plants, may eventually benefit every person on the planet. Probably no other plant yields as many varied products or has as many exploitable by-products. Indeed, as foreseen by some scientists, this tree may usher in a new era in pest control; provide millions with inexpensive medicines; cut the rate of population growth; and perhaps even reduce erosion, deforestation, and the excessive temperature of an overheated globe. On the other hand, although the enthusiasm may be justified, it is largely founded on exploratory investigations and empirical and anecdotal evidence. The purpose of this book is to marshal the various facts about this little-known species, to help illuminate its future promise, and to speed realization of its potential.

Social Forestry Experiences Over a Decade Ram Prasad 1995 In the last decade there has been a surge of interest in implementing social forestry programmes in almost every country of Asia and the Pacific. In India, in particular, social forestry in eighties was adopted in a big way. It aroused a lot of interest among foresters, the state Government official and the people. The establishment of village woodlots, Strip plantations, Farm Forestry, and raising of nurseries by school children were among the many components of social forestry in India. The experience in implementing this programme has been very diverse. It opened up many issues. The most common question was whether it was able to enlist people's participation and if it has met the approval of villagers in its design, contents implementations and benefits. Many of these issues have been discussed in this book.

The Overstory Book Craig R. Elevation 2004 Whether in a small backyard or a larger farm or forest, trees are vital to the web of life. Protecting and planting trees can restore wildlife habitat, heal degraded land, conserve soil, protect watersheds, diversify farm or garden products, beautify landscapes, and enhance the economic and ecological viability of land use systems. Careful planning and sound information is needed to reach these goals. The Overstory Book distills essential information about working with trees into 134 short, easy-to-read, single-subject chapters. Each chapter shares key concepts and useful information, so readers can get back to planting and protecting more trees, gardens, and forests, more effectively. * Discover time-tested agricultural and conservation techniques from indigenous and traditional peoples * Work with beneficial microorganisms, from mycorrhizal fungi to nitrogen-fixing bacteria and more * Create abundance with fruit trees, timber trees, vine crops, vegetables, mushrooms, and more * Form alliances with animals, from wildlife, birds, and insects to integrated, free-range livestock * Design effective tree-based windbreaks, noise barriers, live fences, and erosion buffers * Understand how to grow or obtain the highest quality seeds, seedlings, and plant materials * Restore fertility, productivity, and biodiversity with trees * Work with multipurpose plants including trees, palms,

The Economics of Project Appraisal and the Environment John Weiss 1994 A group of economists have prepared these papers to address issues relating to project appraisal and environment effects in developing countries. Adopting no single approach, the papers in this collection show the advantages of alternative approaches to environmental appraisal. This work illustrates the current state of knowledge on this subject and should be of interest to both academic and professional development economists.
