**Animal Beauty** Christiane Nusslein-Volhard 2019-05-14 An illustrated exploration of colors and patterns in the animal kingdom, what they communicate, and how they function in the social life of animals. Are animals able to appreciate what humans refer to as “beauty”? The term scarcely ever appears nowadays in a scientific description of living things, but we humans may nonetheless find the colors, patterns, and songs of animals to be beautiful in apparently the same way that we see beauty in works of art. In *Animal Beauty*, Nobel Prize–winning biologist Christiane Nüsslein-Volhard describes how the colors and patterns displayed by animals arise, what they communicate, and how they function in the social life of animals. Watercolor drawings illustrate these amazing instances of animal beauty. Darwin addressed the topic of ornament in his 1871 book *The Descent of Man and Selection in Relation to Sex*, and did not hesitate to engage with criteria of beauty, convinced that animals experienced color and ornament as attractive and agreeable in the same way that we do, and that the role this played in mate choice pointed to a “sexual selection” distinct from natural selection. Nüsslein-Volhard examines key examples of ornament and sexual selection in the animal kingdom and lays the groundwork for biological aesthetics. Noting that color patterns have not been a research priority—perhaps because they appeared to be nonessential luxuries rather than functional necessities—Nüsslein-Volhard looks at recent scientific developments on the topic. In part because of Nüsslein-Volhard's own research on the zebrafish, it is now possible to decipher the

molecular genetic mechanisms that lead to production of colors in animal skin and its appendages and control its pattern and distribution.

**Blumenberg** Sibylle Lewitscharoff 2017 One night, German philosopher Hans Blumenberg returns to his study to find a shocking sight--a lion lying on the floor as if it's the most natural thing in the world. The lion stretches comfortably on the Turkmen rug, eyes resting on Blumenberg. The philosopher with some effort retains his composure, even when the next day during his lecture the lion makes another appearance, ambling slowly down the center aisle. Blumenberg glances around; the seats are full, but none of his students seem to see the lion. What is going on here? Blumenberg is the captivating and witty fictional tale of this likable philosopher and the handful of students who come under the spell of the supernatural lion--including skinny Gerhard Optatus Baur, a promising young Blumenbergian, and the delicate, haughty Isa, who falls head over heels in love with the wrong man. Written by Sibylle Lewitscharoff, whom *Die Welt* called the "most dazzling stylist of contemporary German literature," Blumenberg will delight English readers.

**Women Seeing Women** Lothar Schirmer 2002 This anthology is dedicated to pictures of women taken by women. It begins with photographs by the two great female photographers of the 19th century, Clementina Lady Hawarden and Julia Margaret Cameron, and covers a period of over 100 years to the present day. Some 160 images by 90 photographers present us with the entire spectrum of female self-definition both behind and in front of the camera. As such, the four major themes of social reality, the family, the female body and virtual reality come to the fore with their multifarious pictures from the worlds of art, literature, fashion, dance and show business. There are self-portraits as well as female photographers' portraits of female photographers, daughters, mothers and, of course, several important female figures including Virginia Woolf, Greta Garbo, Martha Graham, Simone de Beauvoir, Maria Callas, Madonna, Hillary Clinton, and even Her Majesty the Queen.

**Introduction To Mindfulness** IntroBooks Team Mindfulness is the elementary human aptitude to feel own

presence, i.e., being conscious of the point of the existence of self and the corresponding boundary of performance, posing complete rejection to the undue recognition or excessive activities, revolving around alarmingly. Awakening to the 3-pronged internal functional structure of the physical, mental and spiritual processes, lying dormant in an individual is the prime objective of mindfulness. Mindfulness is naturally present in a person's mind and soul, but it warrants a steadfast practice and exertion that should be included in daily chores. Then only, this abstract element can be viewed as a tangible object and mindfulness will complete its full circle. Sometimes, knowledge is taken as lessons of what a person observes straight through senses or thoughts and perceptions. This indicates that a particular person is mindful. Experiments are always on the path of an impulsive run in displaying that an individual is reshaping the brain's physical framework when the brain is educated to be mindful.

**The Greatest Treasure Hunt in History: The Story of the Monuments Men (Scholastic Focus)** Robert M. Edsel 2019-01-29 Robert M. Edsel brings the story of his #1 NYT bestseller for adults The Monuments Men to young readers for the first time in this dynamic, narrative nonfiction project packed with photos. Robert M. Edsel, #1 New York Times bestselling author of The Monuments Men, brings this story to young readers for the first time in a sweeping, dynamic adventure detailing history's greatest treasure hunt. As the most destructive war in history ravaged Europe, many of the world's most cherished cultural objects were in harm's way. The Greatest Treasure Hunt in History recounts the astonishing true story of 11 men and one woman who risked their lives amidst the bloodshed of World War II to preserve churches, libraries, monuments, and works of art that for centuries defined the heritage of Western civilization. As the war raged, these American and British volunteers -- museum curators, art scholars and educators, architects, archivists, and artists, known as the Monuments Men -- found themselves in a desperate race against time to locate and save the many priceless treasures and works of art stolen by Adolf Hitler and the Nazis.

Couchsurfing in Iran Stephan Orth 2018-05-01 A modern-day glimpse into the surprising reality of life in Iran. Iran: A destination that is seldom seen by westerners yet often misunderstood. A country that simultaneously "enchants and enrages" those who visit it. A place where leading a double life has become the norm. In Couchsurfing in Iran, award-winning author Stephan Orth spends sixty-two days on the road in this mysterious Islamic republic to provide a revealing, behind-the-scenes look at life in one of the world's most closed societies. Through the unsurpassed hospitality of twenty-two hosts, he skips the guidebooks and tourist attractions and travels from Persian carpet to bed to cot, covering more than 8,400 kilometers to recount "this world's hidden doings." Experiencing daily what he calls the "two Irans" that

coexist side by side—the “theocracy, where people mourn their martyrs” in mausoleums, and the “hide-and-seek-ocracy, where people hold secret parties and seek worldly thrills instead of spiritual bliss”—he learns that Iranians have become experts in navigating around their country’s strict laws. Though couchsurfing is officially prohibited in Iran—the state fears spies would be able to travel undetected through the country—more than a hundred thousand Iranians are registered with online couchsurfing portals. And thanks to these hospitable, English-speaking strangers, Orth gets up close and personal with locals, peering behind closed doors and blank windows to uncover the inner workings of a country where public show and private reality are strikingly opposed.

**Sex/machine** Patrick D. Hopkins 1998 . . . discusses the complex connections between gender and technology . . . an intriguing and enlightening book, the latest in an outstanding . . . series by Indiana University Press. --Bruce Hilton, Scripps Howard News Service How does technology influence gender roles? From personal computers and cyberspace to artificial wombs and sex reassignment surgery, technology has opened up the possibility that sex roles as well as the gendered notions we have of human identity are subject to radical change. This engaging anthology examines long-standing stereotypical associations of men with technology and women with nature and assesses the impact of technologies that have necessarily blurred distinctions between the sexes and altered traditional views of gender.

*Empire and history writing in Britain c.1750–2012* Joanna de Groot 2016-05-16 This wide-ranging and accessible book examines the effects of British imperial involvements on history writing in Britain since 1750. It provides a chronological account of the development of history writing in its social, political, and cultural contexts, and an analysis of the structural links between those involvements and the dominant concerns of that writing. The author looks at the impact of imperial and global expansion on the treatment of government, of social structures and changes and of national and ethnic identity in scholarly and popular works, in school histories, and in ‘famous’ history books. In a clear and student-friendly way, the book argues that involvement in empire played a transformative and central role within history writing as whole, reframing its basic assumptions and language, and sustaining a significant ‘imperial’ influence across generations of writers and diverse types of historical text.

Earth Is My Witness Art Wolfe 2017-10-03 Art Wolfe’s definitive opus, *Earth Is My Witness* represents forty years of expeditionary photography. For the first time, Wolfe presents the three subjects at the heart of his work—landscapes, wildlife, and cultures on the edge of extinction—in a single masterpiece that takes us through the world’s ecosystems and geographical regions in a vivid display of the fragility and interconnectivity of life on Earth, while simultaneously exploring his evolution as an artist and the techniques he uses to capture the nuances and rhythms of nature. *Earth Is My Witness* is the most extensive collection of Art Wolfe photography ever compiled. This lavishly produced work spans the globe, bringing the beauty of the planet’s fast-disappearing landscapes, wildlife, and cultures into stunning focus. Containing unpublished work from throughout Wolfe’s widely celebrated career, *Earth Is My Witness* offers a riveting and comprehensive look at the world’s ecosystems and geographical regions. Here Wolfe presents an encyclopedic selection of his photography along with intimate stories that exemplify his boundless curiosity. From the rich sights and smells of the Pushkar Camel Fair to the exact moment when a polar bear and her cubs leave their Arctic den, these images represent what Wolfe has lived for: moments when circumstance, light, and subject miraculously collide to form an iconic image. These photographs and the stories behind them explore the delicate interconnectivity of life across our planet. Setting the stage for this fascinating journey is award-winning author Wade Davis. Together, photographer and author present a world that borders on the fantastic but is all the more precious for its fragility. At the heart of Wolfe’s work is the appeal for environmental, cultural, and wildlife preservation, which he makes

with beautiful, far-reaching precision in this definitive opus.

**The Impact of Tablet PCs and Pen-based Technology on Education** Dave A. Berque 2006 The tablet PC and similar pen-based devices are being embraced by a wide variety of disciplines as tools for the radical enhancement of teaching and learning. Deployments of Tablet PCs span all the K-12, higher education, and graduate levels and deal with an amazingly diverse range of subject areas, including geology, writing, mathematics, computer science, Japanese language, physics, engineering, business, economics, and technical communications. Despite the diversity of content areas, many deployments generate a singular passion among students and teachers. In April of 2006, a group of educators gathered to exchange ideas at the First Workshop on the Impact of Pen-based Technology on Education (WIPTE). The editors have selected a subset of papers that were presented at WIPTE for inclusion in this book. The papers have been selected for their broad appeal, diverse content, and insightful evaluations. The collective experiences of these authors will help the reader to identify best practices with regard to the educational use of pen-based computing.

**Set Phasers to Teach!** Stefan Rabitsch 2018-07-10 For 50 years, Star Trek has been an inspiration to its fans around the world, helping them to dream of a better future. This inspiration has entered our culture and helped to shape much of the technology of the early 21st Century. The contributors to this volume are researchers and teachers in a wide variety of disciplines; from Astrophysics to Ethnology, from English and History to Medicine and Video Games, and from American Studies to the study of Collective Computing Systems. What the authors have in common is that some version of Star Trek has inspired them, not only in their dreams of what may be, but in the ways in which they work - and teach others to work - here in the real world. Introduced with references to Star Trek films and television shows, and illustrated with original cartoons, each of the 15 chapters included in this volume provides insights into

research and teaching in this range of academic fields.

**Palace of Flies** Walter Kappacher 2022-05-03 "One of those rare biographical novels that bring a whole world to life in a way that lingers in memory." --Jay Parini, author of *Borges and Me* This absorbing, sensitive novel portrays a famed author in a moment of crisis: an aging Hugo von Hofmannsthal returns to a summer resort outside of Salzburg that he visited as a child. But in the spa town where he once thrilled to the joys of youth, he now feels unproductive and uninspired, adrift in the modern world born after World War One. Over ten days in 1924 in a ramshackle inn that has been renamed the Grand Hotel, Hofmannsthal fruitlessly attempts to complete a play he's long been wrestling with. The writer is plagued by feelings of loneliness and failure that echo in a buzz of inner monologues, imaginary conversations and nostalgic memories of relationships with glittering cultural figures. *Palace of Flies* conjures up an individual state of distress and disruption at a time of fundamental societal transformation that speaks eloquently to our own age.

Evaluating Computer-assisted Language Learning Jonathan Leakey 2011 Schools, colleges and universities are investing a great deal in the purchase of computer resources for the teaching of modern languages, but whether these resources make a measurable difference to the learning of language students is still unclear. In this book the author outlines the existing evidence for the impact of computers on language learning and makes the case for an integrated approach to the evaluation of computer-assisted language learning (CALL). Drawing on current and past research linked to CALL and e-learning, the author builds a comprehensive model for evaluating not just the software used in language learning,

but also the teaching and learning that takes place in computer-based environments, and the digital platforms themselves. This book will be of interest not only to language teachers and CALL researchers, but also to those interested in e-learning and general research methodology, as well as designers of educational software, digital labs, virtual learning environments (VLEs) and institutional budget holders.
