Readers will also be able to take advantage of the new website that was designed to complement this book. *Global Health* is essential reading for students and researchers of global health, public health and development studies.

[Ageing, Diversity and Equality: Social Justice Perspectives \(Open Access\)](#) Sue Westwood 2018-10-31

Current understandings of ageing and diversity are impoverished in three main ways. Firstly, with regards to thinking about what inequalities operate in later life there has been an excessive preoccupation with economic resources. On the other hand, less attention has been paid to cultural norms and values, other resources, wider social processes, political participation and community engagement. Secondly, in terms of thinking about the 'who' of inequality, this has so far been limited to a very narrow range of minority populations. Finally, when considering the 'how' of inequality, social gerontology's theoretical analyses remain under-developed. The overall effect of these issues is that social gerontology remains deeply embedded in normative assumptions which serve to exclude a wide range of older people. Ageing, Diversity and Equality aims to challenge and provoke the above described normativity and offer an alternative approach which highlights the heterogeneity and diversity of ageing, associated inequalities and their intersections. Cognition, Language and Aging Heather Harris Wright 2016-03-16 Age-related changes in cognitive and language functions have been extensively researched over the past half-century. The older adult represents a unique population for studying cognition and language because of the many challenges that are presented with investigating this population, including individual differences in education, life experiences, health issues, social identity, as well as gender. The purpose of this book is to provide an advanced text that considers these unique challenges and assembles in one source current information regarding (a) language in the aging population and (b) current theories accounting for age-related changes in language function. A thoughtful and comprehensive review of current research spanning different disciplines that study aging will achieve this purpose. Such disciplines include linguistics, psychology, sociolinguistics, neurosciences, cognitive sciences, and communication sciences. As of January 2019, this e-book is freely available, thanks to the support of libraries working with Knowledge Unlatched.

A Vision for the Aging Church James M. Houston 2011-10-10 James M. Houston and Michael Parker believe now is the time for the church to offer ministry to its increasing numbers of seniors and to benefit

from ministry they can offer. They issue an urgent call to reconceive the place and part of the elderly in the local congregation, showing that seniors aren't the problem--they are the solution.

Social Gerontology Nancy R. Hooyman 2011 This textbook provides a survey of the field of social gerontology, taking a multi-disciplinary approach to the social aspects of aging and/or working with older adults. The authors demonstrate how age-related changes in the biological, functional, and psychological

domains can influence the older person's interactions with his/her social and physical environment. They offer a view that presents aging positively, portraying concepts of active aging and resiliency, and defining "productive aging" by elaborating on the numerous ways elders contribute to society and their families. Based on the latest research findings, it offers understanding to critical issues of aging, attending to differences by age and cohort, gender, ethnic minority status, sexual orientation, and socio-economic status.

Global Health Complications of Obesity Jahangir Moini 2020-04-01 **Global Health Complications of Obesity** presents a valuable resource for research scientists and clinicians by covering the burden of obesity and related diseases and serving as a starting point for in-depth discussions in academic settings and for obesity-treatment specialists. Obesity is associated with a statistically higher risk of heart disease, hypertension, insulin resistance, type 2 diabetes and many other diseases. This succinct resource focuses on the current data, research and management of obesity. It is essential reading for healthcare professionals, endocrinologists, nutritionists, public health students and medical students. Presents clinical cases, key terms and targeted references Addresses diseases including diabetes, cancer, hypertension, osteoarthritis, fatty liver disease, infertility, renal failure and depression Provides a link to new knowledge that is ideal for both researchers and clinicians

Aging, Technology and Health Richard Pak 2018-03-15 *Aging, Health and Technology* takes a problem-centered approach to examine how older adults use technology for health. It examines the many ways in which technology is being used by older adults, focusing on challenges, solutions and perspectives of the older user. Using aging-health technology as a lens, the book examines issues of technology adoption, basic human factors, cognitive aging, mental health, aging and usability, privacy, trust and automation. Each chapter takes a case study approach to summarize lessons learned from unique examples that can be applied to similar projects, while also providing general information about older adults and technology. Discusses human factors design challenges specific to older adults Covers the wide range of health-related uses for technology—from fitness to leading a more engaged life Utilizes a case study approach for practical application Envisions what the future will hold for technology and older adults Employs a roster of interdisciplinary contributors

Health, Illness, and Optimal Aging Carolyn M. Aldwin 2004 The authors undertake the difficult task of assembling an objective and holistic picture of human aging, including the physical aspects of aging, chronic disease and health promotion in the later years, for students and professionals.

Living Through Loss Nancy R. Hooyman 2021-08-31 *Living Through Loss* provides a foundational identification of the many ways in which people experience loss over the life course, from childhood to old age. It examines the interventions most effective at each phase of life, combining theory, sound clinical practice, and empirical research with insights emerging from powerful accounts of personal experience. The authors emphasize that loss and grief are universal yet highly individualized. Loss comes in many forms and can include not only a loved one's death but also divorce, adoption, living with chronic illness, caregiving, retirement and relocation, or being abused, assaulted, or otherwise traumatized. They approach the topic from the perspective of the resilience model, which acknowledges people's capacity to find meaning in their losses and integrate grief into their lives. The book explores the varying roles of age, race, culture, sexual orientation, gender, and spirituality in responses to loss. Presenting a variety of models, approaches, and resources, *Living Through Loss* offers invaluable lessons that can be applied in any practice setting by a wide range of human service and health care professionals. This second edition features new and expanded content on diversity and trauma, including discussions of gun violence, police brutality, suicide, and an added focus on systemic racism.

Occupational Therapy Practice Framework American Occupational Therapy Association 2008-01-01 The Framework, an official AOTA document, presents a summary of interrelated constructs that define and guide occupational therapy practice. The Framework was developed to articulate occupational therapy's contribution to promoting the health and participation of people, organizations, and populations through engagement in occupation. The revisions included in this second edition are intended to refine the document and include language and concepts relevant to current and emerging occupational therapy practice. Implicit within this summary are the profession's core beliefs in the positive relationship between occupation and health and its view of people as occupational beings. Numerous resource materials include a glossary, references and a bibliography, as well as a table of changes between the editions.

Researching Ageing Maria Źuszczyska 2020-06-07 This book explores the diversity of methodological approaches to researching ageing, considering which methodological paradigm best captures the phenomenon. Interdisciplinary in scope, it brings together research from scholars from Austria, Canada, France, Hong Kong, Israel, Poland, UK and USA to uncover the conditions under which qualitative and quantitative approaches to research on ageing can best be reconciled and rendered complementary. Presenting international reflection on methods for studying old age from a variety of research backgrounds, *Researching Ageing* showcases the latest research in the field and will appeal to scholars across the social sciences, including sociology, demography, psychology, economics and geography, with interests in gerontology, ageing and later life.

Ageing and COVID-19 Maria Źuszczyska 2021-11-29 The Open Access version of this book, available at www.taylorfrancis.com, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license. This volume presents a range of research approaches to the exploration of ageing during a pandemic situation. One of the first collections of its kind, it offers an array of studies employing research methodologies that lend themselves to replication in similar contexts by those seeking to understand the effects of epidemics on older people. Thematically organised, it shows how to reconcile qualitative and quantitative approaches, thus rendering them complementary, bringing together studies from around the world to offer an international perspective on ageing as it relates to an unprecedented epidemiological phenomenon. As such, it will appeal to researchers in the field of gerontology, as well as sociologists of medicine and clinicians seeking to understand the disruptive effects of the recent coronavirus outbreak on later life.

The Psychology of Ageing Ian Stuart-Hamilton 2012-05-15 This well-established and accessible text has been completely revised in this expanded fifth edition. Each chapter has been updated, often extensively, to reflect current thinking, and an important new chapter on death, dying and bereavement has been added. Providing a comprehensive overview of the psychological processes of ageing, the text examines what constitutes older age, and presents the latest theory and research in a variety of domains, including

intellectual change in later life; ageing and memory; ageing and language; ageing, personality and lifestyle; and mental health and ageing. Consideration is given to the problems inherent in measuring the psychological status of older people, and the author looks to the future to answer the question “what will constitute 'being old'?” This new edition is essential reading for all those working or training to work with older people, and a key text for students.

Multidisciplinary Coordinated Caregiving Ronda C. Talley 2013-11-19 Effective, meaningful caregiving requires a well-coordinated and informed effort guided by various highly skilled specialists across several interrelated professions, including psychologists, social workers, and occupational therapists. **Multidisciplinary Coordinated Caregiving** addresses the information needs of these interrelated professionals, contributing to the direct care of individuals and serving as an essential resource for those who ultimately create collaborative approaches to contemporary caregiving plans. In addition, the volume provides a wealth of evidence-based research findings to facilitate ongoing dialogue about multidisciplinary and interdisciplinary perspectives on and interventions for the complex challenge of caregiving in America. Key areas of coverage include: The status of professional caregiving in the United States. Nursing perspectives on the state of family caregiving. Psychological aspects of caregiving. A human development, lifespan perspective on caregiving during late life. Public health contributions to caregiving. **Multidisciplinary Coordinated Caregiving** offers a wealth of insights for those researchers, practitioners, and graduate students who seek to optimize the care of individuals across such fields as psychology, social work, public health, geriatrics and gerontology, and medicine as well as public and educational policy making.

The substantially revised Fifth Edition includes new topics and updated research, tables, and figures to help answer key questions about the evolution and utilization of programs for older adults and the challenges that service providers face.

Morality and Spirituality in the Contemporary World Chandana Chakrabarti 2012-12-07 The contemporary world faces a number of problems that are both deep-seated and interrelated, since they arise from the very nature of technological society. The environment upon which all life depends is seriously threatened by climate change, rising sea levels, pollution, overpopulation, resource depletion and increased risks of droughts, forest fires, floods and other extreme weather events. Environmental degradation is intimately connected to the consumer lifestyle of developed countries. This lifestyle promotes materialism, entertainment and hedonistic superficiality that ultimately lead to moral corruption. Our insensitive and destructive attitude towards nature is not isolated, or unrelated to other problems of social justice. The environmental crisis reflects human structures of domination that include political and economic exploitation, racism, sexism and ageism. These challenges are immense, and solutions to them will require a renewed dedication to moral reflection and a commitment to social justice. This book discusses the challenges in connection with topics such as human rights, economic exploitation and inequality, environmental protection, globalization, global food justice, technology, gender equality and ageism. It provides a plurality of moral and spiritual perspectives including Hinduism, Buddhism, Daoism and Christianity that offer guidance in finding responses that are both possible and reasonable.

Musical Imaginations David Hargreaves 2012 Musical imagination and creativity are amongst the most abstract and complex aspects of musical behaviour. Older Women: Current and Future Challenges of Professionals with an Aging Population Teresa Kilbane

2016-10-14 Older Women: Current and Future Challenges of Professionals With An Aging Population is about older women and the unique challenges they face now and in coming decades. Elderly women face problems that require response from multiple service providers in the social welfare, health care and legal sectors. Due to the complexity of the various issues and the multi-systemic responses required to address these problems among diverse groups, an interdisciplinary perspective in a multicultural context needs to be examined. This book is an attempt to explain the multidisciplinary facets of social work with elderly women. Readers are also introduced to the ethical issues and challenges caused by economic disparities and are also provided with guidelines on potential responses and intervention strategies to such difficulties. Readers are also introduced to the concept of cultural competence in terms of working with aged women. The integration of theory, research and practice in this book makes it a valuable resource for academicians and working professionals who are or will be in frequent contact with older adults.

Handbook of Health Social Work Sarah Gehlert 2006-03-20 The Handbook of Health Social Work provides a comprehensive and evidence-based overview of contemporary social work practice in health care.

Written from a wellness perspective, the chapters cover the spectrum of health social work settings with contributions from a wide range of experts. The Adult Learner Malcolm S. Knowles 2020-12-21 How do you tailor education to the learning needs of adults? Do they learn differently from children? How does their life experience inform their learning processes? These were the questions at the heart of Malcolm Knowles' pioneering theory of andragogy which transformed education theory in the 1970s. The resulting principles of a self-directed, experiential, problem-centred approach to learning have been hugely influential and are still the basis of the learning practices we use today. Understanding these principles is the cornerstone of increasing motivation and enabling adult learners to achieve. The 9th edition of The Adult Learner has been revised to include: Updates to the book to reflect the very latest advancements in the field. The addition of two new chapters on diversity and inclusion in adult learning, and andragogy and the online adult learner. An updated supporting website. This website for the 9th edition of The Adult Learner will provide basic instructor aids. For each chapter, there will be a PowerPoint presentation, learning exercises, and added study questions. Revisions throughout to make it more readable and relevant to your practices. If you are a researcher, practitioner, or student in education, an adult learning practitioner, training manager, or involved in human resource development, this is the definitive book in adult learning you should not be without.

Aging Harry R. Moody 2017-01-12 Presenting current research in an innovative text-reader format, *Aging: Concepts and Controversies*, Ninth Edition encourages students to become involved and take an informed stand on the major aging issues we face as a society. Not simply a summary of research literature, Harry R. Moody and Jennifer R. Sasser's text focuses on controversies and questions, rather than on assimilating facts or arriving at a single "correct" view about aging and older people. Drawing on their extensive expertise, the authors first provide an overview of aging in three domains: aging over the life course, health care, and the socioeconomic aspects of aging. Each section is followed by a series of edited readings, offering different perspectives from experts and specialists on that subject. New readings focus on whether current federal spending on the elderly is sustainable and fair to other groups, how older consumers are reshaping the business landscape, and the challenges of marketing and selling to customers 60 and over. More emphasis is placed on how social class and inequality earlier in life can shape our final years and the number of older Americans living in poverty. The section on Aging and Health Care has been thoroughly updated to reflect the latest data about chronic diseases that affect the elderly, government spending on health care, and policy changes to programs like Medicaid and Medicare. The section on the Social and Economic Outlook for an Aging Society gives the most current picture of the racial and ethnic diversity of older Americans, their participation in the labor force, and their income and wealth.

Handbook of Geriatric Care Management Cathy Jo Cress 2006-09 This cutting-edge book on geriatric care management is designed to meet a growing area that spans across the continuum of health care, and is the essential reference for the geriatric care management profession. It gives health care delivery systems, private and public health care practitioners, business people, and schools of nursing, social work, and related health care fields the definitive book on geriatric care management. Handbook of Geriatric Care Management defines the work of the geriatric care manager. It offers an overview of what geriatric care management is, defines duties and procedures, and specifies the organizations that use a geriatric care manager. It provides guidelines for setting up a geriatric care management practice independently or as part of a larger health care delivery system or business, and contains key elements for marketing the practice. Several case studies are included.

Communities in Action National Academies of Sciences, Engineering, and Medicine 2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Health Literacy Among Older Adults Dr. Karen Kopera-Frye 2016-09-28 The first graduate text to address health literacy in the aging population Low health literacy is a critical issue among adults, with over one-third found to have difficulty understanding such basic information as that found on prescription bottles. This is the first graduate textbook to address key health literacy issues as they affect the health and wellbeing of the aging population. Embracing a topic spanning numerous disciplines, it features a dynamic, multiple contextual systems approach and includes contributions from renowned scholars and practitioners in gerontology, public health, social work, nursing, and other related fields. The text emphasizes increasing health literacy among older adults through the use of technological tools and features the most current research, evidence-based programs, and practices. The book provides expansive coverage of the intersection of technology and health literacy, highlighting innovative approaches and discussing how to use technology with resource-limited groups. The text gives special consideration to rural, impoverished, culturally diverse, and low literacy elders and presents gold standard intervention programs and models. Also covered are the policy implications of programs focusing on increasing health literacy and future directions for meeting the Healthy People 2020 initiative. Case studies, review questions, accompanying powerpoint lectures, learning objectives, will reinforce learning.

Key Features: Provides a one-of-a-kind, multidisciplinary survey of the key health literacy issues of older adults Focuses on increasing health literacy across the disciplines Addresses a priority area of Healthy People 2020 Incorporates research and practice from gerontology, psychology, public health, social work, sociology, medicine, and nursing Includes case studies, review questions, learning objectives, and PowerPoint slides for assisting instructors.
