Hidden Christmas Timothy Keller 2016-10-25 From pastor and New York Times bestselling author Timothy Keller comes the perfect gift for the Christmas holiday—a profoundly moving and intellectually provocative examination of the nativity story. Even people who are not practicing Christians think they are familiar with the story of the nativity. Every Christmas displays of Baby Jesus resting in a manger, decorate lawns and churchyards, and songs about shepherds and angels fill the air. Yet despite the abundance of these Christian references in popular culture, how many of us have examined the hard edges of this biblical story? In his new book Timothy Keller takes readers on an illuminating journey into the surprising background of the nativity. By understanding the message of hope and salvation within the Bible's account of Jesus' birth, readers will experience the redeeming power of God's grace in a deeper and more meaningful way.

Look Again! Judy Serritella 2002-01-01 There are many resources for bulletin board ideas, but only this resource offers over 200 bulletin board ideas for the underserved high school audience. The clever and creative bulletin boards presented in this sourcebook help students gain understanding, inspiration, and amusement--while encouraging reading and library use at the same time. Each innovative idea is simple enough for the busy high-school media specialist or teacher to generate and includes a handy list of materials. Plus many of the ideas are clearly illustrated to ensure successful execution. While the concepts are aimed specifically at the high-school level, most can be adapted for use at a different grade level. Media specialists from all over the world contributed their ideas to this book, which fills the void for bulletin board ideas aimed at older students. Its creative suggestions will transform any high-school bulletin board into a practical teaching tool "

You Are a Social Detective! Michelle Garcia Winner 2021-01-04 The social world is a big, complicated place! We are all social detectives as we observe, gather, and make sense of the clues within different social contexts (settings, situations, and the people in them) to figure out the hidden rules for expected behaviors. This leads us toward understanding how we each feel and think about others in a situation and how we choose to respond to each other's actions and reactions. We are good Social Detectives when we use our eyes, ears, hearts, and brains to figure out what others are planning to do next or are presently doing and what they mean by their words and actions. This revised, expanded 2nd edition of the awarding-winning storybook teaches from the social learner's perspective about the power of observation, reading context, and interpreting clues before choosing how to respond in ways that meet their social goals. A new structured approach to observation, new illustrations reflecting a broader range of inclusion and diversity in characters, practice pages and activities for deeper learning, specific teaching tips, and a glossary of Social Thinking Vocabulary and concepts are just some of the new material you'll find inside. This is the first book in the Superflex® series. It guides readers on a journey of discovery where they can:

- Learn formulas for gathering clues by observing a setting, situation, and people in it
- Be empowered to figure out how the social world works through their own detective lens
- Learn to identify feelings and emotions and connect them to behaviors
- Understand that all feelings are okay, even uncomfortable ones, and we can still learn and grow
- Get support from emojis and special word banks
- Find core Social Thinking® Vocabulary words highlighted throughout to support and strengthen key learning concepts
- Have numerous opportunities to make smart guesses about hidden social rules in various situations
- See examples and tips for school, home, and community life
- Celebrate how all of us are social observers who are affected by others' actions and reactions

encourages positive behavior by using the concept of an invisible bucket to show children how easy and rewarding it is to express kindness, appreciation and love by "filling buckets." Updated and revised, this 10th anniversary edition will help readers better understand that "bucket dipping" is a negative behavior, not a permanent label. It also explains that it's possible to fill or dip into our own buckets.

The Dot Peter H. Reynolds 2013-09-10 Features an audio read-along! With a simple, witty story and free-spirited illustrations, Peter H. Reynolds entices even the stubbornly uncreative among us to make a mark -- and follow where it takes us. Her teacher smiled. "Just make a mark and see where it takes you." Art class is over, but Vashti is sitting glued to her chair in front of a blank piece of paper. The words of her teacher are a gentle invitation to express herself. But Vashti can't draw - she's no artist. To prove her point, Vashti jabs at a blank sheet of paper to make an unremarkable and angry mark. "There!" she says. That one little dot marks the beginning of Vashti's journey of surprise and self-discovery. That special moment is the core of Peter H. Reynolds's delicate fable about the creative spirit in all of us.

unfolds. Every moment matters. Each of us has an invisible bucket. When our bucket is full, we feel great. When it's empty, we feel awful. Yet most children (and many adults) don't realize the importance of having a full bucket throughout the day. In *How Full Is Your Bucket? For Kids*, Felix begins to see how every interaction in a day either fills or empties his bucket. Felix then realizes that everything he says or does to other people fills or empties their buckets as well. Follow along with Felix as he learns how easy it can be to fill the buckets of his classmates, teachers and family members. Before the day is over, you'll see how Felix learns to be a great bucket filler, and in the process, discovers that filling someone else's bucket also fills his own.

The Zones of Regulation Leah M. Kuypers 2011 "... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called "zones," with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD."--Publisher's website.

Science Teaching Reconsidered National Research Council 1997-03-12 Effective science teaching requires creativity, imagination, and innovation. In light of concerns about American science literacy, scientists and educators have struggled to teach this discipline more effectively. Science Teaching Reconsidered provides undergraduate science educators with a path to understanding students, accommodating their individual differences, and helping them grasp the methods--and the wonder--of science. What impact does teaching style have? How do I plan a course curriculum? How do I make lectures, classes, and laboratories more effective? How can I tell what students are thinking? Why don't they understand? This handbook provides productive approaches to these and other questions. Written by scientists who are also educators, the handbook offers suggestions for having a greater impact in the classroom and provides resources for further research.

How to Lose All Your Friends Nancy L. Carlson 2009-07-10 Offers advice on the kinds of things to do if you don't want to have any friends

How to Get Families More Involved in the Nursing Home Tammy La Brake 2014-04-23 Health care providers and social workers at nursing homes may feel they have little time to design programs for the family members of their residents, yet you will learn in *How to Get Families More Involved in the Nursing Home* that the benefits of such programs are immense and the time investment will pay off. You learn of four family programs that can be put into use immediately or can be changed or expanded to fit the needs of an individual setting. In addition, you will witness how educational workshops, support groups, family councils, and holiday socials increase family involvement in the nursing home, which in turn improves the quality of care and life that long-term residents experience. In the daily bustle of trying to meet the needs of all residents, staff members do not generally have time to devote to family members who often feel awkward during their visits and do not realize their help would be welcomed. Nursing home coordinators and social workers can use the model support groups and workshops this book provides to open the lines of communication between staff and families and enable them to work together to assess and meet residents' needs. Implementation of these programs encourages families to take an active role in the operation of the nursing home and to participate in the decisions

and events that affect the residents' lives. *How to Get Families More Involved in the Nursing Home* provides easy, step-by-step procedures for the installation of family programs without overtaxing social workers and directors already under pressure. In addition to the four model programs developed and presented by author Tammy LaBrake, a Public Health Social Work Consultant, this book examines research findings on the lack of family participation in nursing homes despite the offering of family programs. You learn how to overcome barriers to communication and collaboration between staff members and family members and capitalize on the amount of participation that does exist within a nursing home. You also learn how to convey to families that they are equally responsible for the well-being of their resident and that their input and assistance are necessary to correct problems that cannot be remedied by staff members alone. Finally, *How to Get Families More Involved in the Nursing Home* demonstrates that workshops, social gatherings, and councils do contribute to the formation of a community where family members and staffers find the mutual support necessary to provide excellent health care and soften the institutional atmosphere.
