Philosophy In The Flesh George Lakoff 1999-10-08 What are human beings like? How is knowledge possible? What is truth? Where do moral values come from? Questions like these have stood at the center of Western philosophy for centuries. In addressing them, philosophers have made certain fundamental assumptions—that we can know our own minds by introspection, that most of our thinking about the world is literal, and that reason is disembodied and universal—that are now called into question by well-established results of cognitive science. It has been shown empirically that: Most thought is unconscious. We have no direct conscious access to the mechanisms of thought and language. Our ideas go by too quickly and at too deep a level for us to observe them in any simple way. Abstract concepts are mostly metaphorical. Much of the subject matter of philosophy, such as the nature of time, morality, causation, the mind, and the self, relies heavily on basic metaphors derived from bodily experience. What is literal in our reasoning about such concepts is minimal and conceptually impoverished. All the richness comes from metaphor. For instance, we have two mutually incompatible metaphors for time, both of which represent it as movement through space: in one it is a flow past us and in the other a spatial dimension we move along. Mind is embodied. Thought requires a body—not in the trivial sense that you need a physical brain to think with, but in the profound sense that the very structure of our thoughts comes from the nature of the body. Nearly all of our unconscious metaphors are based on common bodily experiences. Most of the central themes of the Western philosophical tradition are called into question by these findings. The Cartesian person, with a mind wholly separate from the body, does not exist. The Kantian person, capable of moral action according to the dictates of a universal reason, does not exist. The phenomenological person, capable of knowing his or her mind entirely through introspection alone, does not exist. The utilitarian person, the Chomskian person, the poststructuralist person, the computational person, and the person defined by analytic philosophy all do not exist. Then what does? Lakoff and Johnson show that a philosophy responsible to the science of mind offers radically new and detailed understandings of what a person is. After first describing the philosophical stance that must follow from taking cognitive science seriously, they re-examine the basic concepts of the mind, time, causation, morality, and the self: then they rethink a host of philosophical traditions, from the classical Greeks through Kantian morality through modern analytic philosophy. They reveal the metaphorical structure underlying each mode of thought and show how the metaphysics of each theory

flows from its metaphors. Finally, they take on two major issues of twentieth-century philosophy: how we conceive rationality, and how we conceive language.

Perspektiven des Verbandsmanagements Astrid Heilmair 2011-03-31 In diesem Band präsentieren Expertinnen und Experten aus Wissenschaft und Praxis Beiträge zu den wesentlichen Teilbereichen des Verbandsmanagements.

Smart. 3 : Grundkurs : Coursebook Frank Haß 2011

The Search Eric Heuvel 2009-10-13 After recounting her experience as a Jewish girl living in Amsterdam during the Holocaust, Esther, helped by her grandson, embarks on a search to discover what happened to her parents before they died in a concentration camp.

Storytime: Batmouse Steve Smallman 2014-07-07 When Pip the mouse sees a bat flying over his home, he has a big idea – when he grows up, he's going to be a BAT! Pip makes himself some cardboard wings, and prepares for take-off. But flying is harder than it looks. Sleeping upside down isn't easy either, and what on earth do bats eat? It's not long before Pip makes friends with a real bat... and decides he'd rather be a mouse after all! But he still really, really wants to fly. Pip's new friend comes to the rescue and flies him all the way home. All is well until Pip has another big idea. When he grows up, he's going to be a mole! This Storytime title is perfect for children who are enthusiastic about what they'll become when they grow up.

KS3 Maths Progress Student Book Delta 2 Nick Asker 2014-08-27 Highly motivating differentiated Student Books develop confidence, fluency and problem-solving, supporting progression: * Full ability range: Alpha (Access), Pi (Tier 1), Theta (Tier 2) and Delta (Tier 3) * Unit structure based on mastery lessons, formative test, consolidation and extension lessons and a summative unit test * Reflection (metacognition) is explicitly encouraged to build perseverance and confidence * STEM and Finance lessons highlight these important links to using maths in real life * Reasoning and Problem-solving are nurtured in preparation for progressing to GCSE

From Know-How to Do-How David Corbet 2013-05-16 If know-how is knowing what to do to make change happen, do-how is doing what needs to be done - there's a big difference. Everybody knows that change can be difficult. Sometimes you feel yourself stuck going round in circles as you revisit the same challenges again and again. But there is a way to change things and it doesn't have to be complicated. In this highly practical book, Dave Corbet and Ian Roberts show just how quickly you can move forward once you recognize that the key to change is not your know-how - understanding how to make change happen in theory - but your do-how - the shifts in behavior that will deliver the changes you want, whether this be at home or work. Dispensing with academic jargon, and illustrated throughout with real-life examples and case studies, the book draws together diverse aspects of change into one simple, tried-and-tested roadmap, allowing you to develop the do-how you need to achieve breakthrough change: change that sticks, and delivers results. - Transform the culture of your organization - Proactively manage an underperforming team member - Reignite and develop your career - Improve relationships with partners or children - Learn to say no

Thy Father's Instruction Naomi Feuchtwanger-Sarig 2021-12-06 The Nuremberg Miscellany [Germanisches Nationalmuseum Nürnberg, Bibliothek, 8° Hs. 7058 (RI. 203)] is a unique work of scribal art and illumination. Its costly parchment leaves are richly adorned and illustrated with multicolour paint and powdered gold. It was penned and illustrated in southern Germany – probably Swabia – in 1589 and is signed by a certain Eliezer b. Mordechai the Martyr. The Miscellany is a relatively thin manuscript. In its present state, it holds a total of 46 folios, 44 of which are part of the original codex and an additional bifolio that was attached to it immediately or soon after its production. The book is a compilation of various Hebrew texts, most of which pertain to religious life. Others are home liturgies, Biblical exegeses, comments on rites and customs, moralistic texts, homiletic and ethical discourses, and an extensive collection of home liturgies, its major part being dedicated to the life cycle. The unparalleled text compilation of the Nuremberg Miscellany on the one hand, and the naïve, untrained illustrations on the other hand, are puzzling. Its illustrations are hardly mindful of volume, depth or perspective, and their folk-art nature suggests that an unprofessional artist, possibly even the scribe himself, may have executed them. Whoever the illustrator was, his vast knowledge of Jewish lore unfolds layer after layer in a most intricate way. His sharp eye for detail renders the images he executed a valid representation of contemporary visual culture. The iconography of the Nuremberg Miscellany, with its 55 decorated leaves, featuring 25 text illustrations, falls into two main categories: biblical themes, and depictions of daily life, both sacred and mundane. While the biblical illustrations rely largely on artistic rendering and interpretation of texts, the depictions of daily life are founded mainly on current furnishings and accoutrements in Jewish homes. The customs and rituals portrayed in the miscellany attest not only to the local Jewish Minhag, but also to the influence and adaptation of local Germanic or Christian rites. They thus offer first-hand insights to the interrelations between the Jews and their neighbors. Examined as historical documents, the images in the Nuremberg Miscellany are an invaluable resource for reconstructing Jewish daily life in Ashkenaz in the early modern period. In a period from which only scanty relics of Jewish material culture have survived, retrieving the pictorial data from images incorporated in literary sources is of vital importance in providing the missing link. Corroborated by similar objects from the host society and with descriptions in contemporary Jewish and Christian written sources, the household objects, as well as the ceremonial implements depicted in the manuscript can serve as effective mirrors for the material culture of an affluent German Jewish family in the Early Modern period. The complete Nuremberg Miscellany is reproduced in the appendix of this book.

NATURWISSENSCHAFTEN entsteht unter Federführung des Erlanger Forschungszentrums für Literatur- und Naturwissenschaften (ELINAS). Experten unterschiedlicher Fachkulturen führen darin ihre Methoden zusammen und fragen sowohl nach den Funktionen der Sprache in der naturwissenschaftlichen Forschung als auch nach den Verfahren der Modellierung naturwissenschaftlicher Erkenntnisse in der Literatur. Die Reihe versteht sich als ein interdisziplinäres Forum zur Reflexion der kulturellen Bedeutung natur- und literaturwissenschaftlicher Forschung sowie zur Ethik und Rhetorik wissenschaftlicher Argumentation.

Teaching As A Reflective Practice Ian Westbury 2012-08-06 This volume presents a mix of translations of classical and modern papers from the German Didaktik tradition, newly prepared essays by German scholars and practitioners writing from within the tradition, and interpretive essays by U.S. scholars. It brings this tradition, which virtually dominated German curricular thought and teacher education until the 1960s when American curriculum theory entered Germany--and which is now experiencing a renaissance--to the English-speaking world, where it has been essentially unknown. The intent is to capture in one volume the core (at least) of the tradition of Didaktik and to communicate its potential relevance to English-language curricularists and teacher educators. It introduces a theoretical tradition which, although very different in almost every respect from those we know, offers a set of approaches that suggest ways of thinking about problems of reflection on curricular and teaching praxis (the core focus of the tradition) which the editors believe are accessible to North American readers--with appropriate "translation." These ways of thinking and related praxis are very relevant to notions such as reflective teaching and the discourse on teachers as professionals. By raising the possibility that the "new" tradition of Didaktik can be highly suggestive for thinking through issues related to a number of central ideas within contemporary discourse--and for exploring the implications of these ideas for both teacher education and for a curriculum theory appropriate to these new contexts for theorizing, this book opens up a gold mine of theoretical and practical possibilities.

Psychospiele der Pädagogen 1 Marcus Damm 2014-10-01 Kinder, Jugendliche und auch die Professionellen bringen unbewusst zahlreiche Verhaltensmuster mit biografischem Hintergrund mit in die alltägliche pädagogische Praxis ein. Diese Tatsache hat Auswirkungen auf der Beziehungsebene (Sympathie bzw. Antipathie). Die daraus resultierenden zwischenmenschlichen Erwartungshaltungen (Schemata) sind wahrnehmungsverzerrt. Trotzdem beeinflussen sie den Erziehungs- und Bildungsauftrag sowie die Teamarbeit im Kollegium. Die Unkenntnis dieser Phänomene ist die Regel in sozialpädagogischen und Bildungsinstitutionen. Grund: Wir Pädagogen bleiben in Hinsicht auf neuere neuropsychologische und psychotherapeutische Erkenntnisse ungeschult. Die Schemapädagogik® will diese Fachkompetenzlücke schließen. Zur Förderung der Selbst-, Sozial- und Fachkompetenz wird der Fokus gelegt auf typische Schemata von Professionellen und die damit verbundenen Ich-Anteile (sog. Schemamodi) im Falle einer Aktivierung. Ferner geht es um charakteristische interaktionelle Strategien (Images, Tests, Psychospiele, Appelle). Der vorliegende Band gibt Pädagogen eine Einführung an die Hand, die es ihnen ermöglicht, das eigene Persönlichkeitskonzept schematheoretisch zu „beleuchten“ (nach J. Young). Das beiliegende Arbeitsmaterial hilft dabei, den Umgang mit Heranwachsenden und Kollegen zu reflektieren und ggf. zu verbessern. Folgende Schemata sind vor dem Hintergrund der Schematherapie relevant: Emotionale Vernachlässigung, Verlassenheit, Misstrauen, Isolation, Unzulänglichkeit, Erfolglosigkeit, Abhängigkeit, Verletzbarkeit, Verstrickung. Dieses Buch wird ergänzt durch die Publikation Psychospiele der Pädagogen 2. Konfliktlösungen in der schulischen Teamarbeit mit Narzissten, Passiv-Aggressiven, Perfektionisten.

Beyond Fragmentation: Didactics, Learning and Teaching in Europe Meinert Meyer 2011-05-30
There is great diversity in teacher education systems and approaches to learning and teaching practice across Europe, even though the practical everyday problems of the various national education systems may be very similar. Against this background, in the field of research on didactics, learning and teaching it is important to overcome fragmentation and to find common ground. In this book the editors demonstrate how far we have come over recent years in advancing research in the field which has the ultimate aim of improving learning and teaching. The editors recognise the diverging national and local practices as a starting point in searching for common ground and in creating shared understandings. The book is organised in six parts with 26 chapters in which the authors examine whether there is a paradigmatic shift from teaching to learning, take a closer look at various teacher education models and their empirical basis, discuss the importance of subject didactics, curriculum work and lesson planning, and analyse the impact of Information and Communication Technologies on didactical design. Finally, they relate the empirical findings to theory construction and offer proposals to further advance this vital field by increasing levels of international co-operation.

English G 21. Ausgabe D 2. Wordmaster Wolfgang Neudecker 2007

Alltags- und Lebensökonomie Michael-Burkhard Piorkowsky 2011-06-16 Viele Studien belegen, dass das ökonomische Wissen und Können in der Bevölkerung unzureichend ist, sogar bei Jugendlichen, die in Wirtschaftskunde unterrichtet worden sind. Die real existierende, ökonomisch bestimmte Lebenswelt wird in diesem Band als Alltags- und Lebensökonomie bezeichnet; die Menschen in ihren primären Kontexten von Haushalt und Familie werden als Akteure und Ressourcen bei der Gestaltung ihrer Lebenslage gesehen. Dies gilt besonders für freiheitlich verfasste Marktgesellschaften. Die herkömmliche ökonomische Bildung nimmt dies mit ihrer Orientierung an der volkswirtschaftlichen Standardlehre nicht angemessen wahr. Michael-Burkhard Piorkowsky stellt die erweiterten mikroökonomischen Grundlagen, die empirische Fundierung und ausformulierte Bildungskonzepte umfassend dar. Die Erweiterungen stammen aus der Institutionenökonomik, der Haushalts- und Familienökonomik, der Verbändeökonomik, der Evolutorischen Ökonomik, der Verhaltensökonomik, der Umweltökonomik und der Ökologischen Ökonomik. Das Buch liefert damit die Grundlage für eine Neuorientierung in der ökonomischen Bildung. The book provides a new approach in economic education that is called real life economics. Several studies evaluate an inadequate knowledge and a lack of skills for addressing the economic needs. This holds true for the population in general as well as for adolescents with an economic education in school. One reason can be seen in the conventional economic education that is grounded on the economic standard theory which is not appropriate for the real life economy. In real life people are embeded in the primary context of the household and family. They are basic actors as well as basic resources to design the everyday living in an economic dimension of the life process. This is especially true for liberal market economies. With an expanded micro economic theory, empirical data and formulated educational concepts a new foundation for economic education is developed. The expansions come from institutional economics, household and family economics, economics of associations, evolutionary economics, behavioral economics, environmental economics and ecological economics.

Mental Spaces Gilles Fauconnier 1994-08-26 First published in 1985 (MIT Press), Fauconnier's influential book, *Mental Spaces*, was instrumental in shaping the new field of cognitive linguistics. The concept of mental spaces--that we develop constructs during discourse that are distinct from linguistic constructs but are established by linguistic expressions--provides a powerful new approach to problems in philosophy and cognitive science concerning thought and language. It includes a new preface that provides context for the theory, and a new foreword by George Lakoff and Eve Sweetser (both of U.C. Berkeley).

Facing the Congo Jeffrey Tayler 2001-10-09 Faced with an identity crisis in his work and his life, seasoned traveler and journalist Jeffrey Tayler made a bold decision. He would leave behind his mundane existence in Moscow to re-create the legendary British explorer Henry Stanley's trip down the Congo in a dugout canoe, stocked with food, medicine, and even a gun-toting guide. But once his tiny boat pushed off the banks of this mysterious river, Tayler realized he was in a place where maps and supplies would have no bearing on his survival. As Tayler navigates this immense waterway, he encounters a land of smothering heat and intense rains, wary villagers, corrupt officials and dead-eyed soldiers demanding bribes, jungle animals, mosquitoes, and, surprisingly, breathtaking natural beauty. Filled with honesty and rich description, *Facing the Congo* is a sophisticated depiction of today's Democratic Republic of the Congo, a country brought to its knees by a succession of despotic leaders. But most important, Tayler's stunning narrative is a deeply satisfying personal journey of fear and awakening, with a message that will resonate with anyone who has ever felt compelled, whether in life or in fantasy, to truly explore and experience our world.
