**The Bird Is a Raven** Benjamin Lebert 2007-12-18 Henry and Paul are strangers when they find themselves sharing a sleeping compartment on a night train from Munich to Berlin. When they begin to talk, their stories appear to be variations on the same theme: young guys adrift in the big city, relationships gone wrong, broken

hearts. Henry is running away from a triangle of friendship gone sour; Paul is running away too, but as the night unfolds and the train speeds north across the German landscape, his story turns ominous. What he finally reveals to his unsuspecting traveling companion goes into the darkest sphere of human behavior. Shocking and raw, *The Bird is a Raven* is the work of a writer at the beginning of a stellar career.

**Logic of Experimentation** Paulo de Assis 2018-10-29 *Logic of Experimentation* offers several innovative and ground-breaking perspectives on music performance, music ontology, research methodologies and ethics of performance. It proposes new modes of thinking and exposing past musical works to contemporary audiences, arguing for a new kind of performer, emancipated from authoritative texts and traditions, whose creativity is propelled by intensive research and inventive imagination. Moving beyond the work-concept, *Logic of Experimentation* presents a new image of musical works, based upon the notions of strata, assemblage and diagram, advancing innovative practice-based methodologies that integrate archival and musicological research into the creative process leading to a performance. Beyond representational modes of performance--be it mainstream or historically informed performance practices--*Logic of Experimentation* creates an ontological, methodological and ethical space for experimental performance practices, arguing for a new mode of performance. Written in an experimental style, its eight chapters appropriate music performance concepts from post-structural philosophy, psychoanalysis, science and technology studies, epistemology, and semiotics, displaying how transdisciplinarity is central to artistic research. An indispensable contribution to artistic research in music, *Logic of Experimentation* is compelling reading for music performers, composers, musicologists, philosophers and artist researchers alike.

**Thinking Without a Banister** Hannah Arendt 2021-02-23 Hannah Arendt was born in Germany in 1906 and lived in America from 1941 until her death in 1975. Thus her life spanned the tumultuous years of the twentieth century, as did her thought. She did not consider herself a philosopher, though she studied and maintained close relationships with two great philosophers--Karl Jaspers and Martin Heidegger--throughout their lives. She was a thinker, in search not of metaphysical truth but of the meaning of appearances and events. She was a questioner rather than an answerer, and she wrote what she thought, principally to encourage others to think for themselves. Fearless of the consequences of thinking, Arendt found courage woven in each and every strand of human freedom. In 1951 she published *The Origins of Totalitarianism*, in 1958 *The Human Condition*, in 1961 *Between Past and Future*, in 1963 *On Revolution* and *Eichmann in Jerusalem*, in 1968 *Men in Dark Times*, in 1970 *On Violence*, in 1972 *Crises of the Republic*, and in 1978, posthumously, *The Life of the Mind*. Starting at the turn of the twenty-first century, Schocken Books has published a series of collections of Arendt's unpublished and uncollected writings, of which *Thinking Without a Banister* is the fifth volume. The title refers to Arendt's description of her experience of thinking, an activity she indulged without any of the traditional religious, moral, political, or philosophic pillars of support. The book's contents are varied: the essays, lectures, reviews, interviews, speeches, and editorials, taken together, manifest the relentless activity of her mind as well as her character, acquainting the reader with the person Arendt was, and who has hardly yet been appreciated or understood. (Edited and with an introduction by Jerome Kohn)

**Rethinking Boucher** François Boucher 2006 François Boucher (1703-1770) has suffered a curious fate: to have been so identified with the French Rococo as to have lost his visibility as an artist in his own right. *Rethinking Boucher* reclaims the artist's individuality, revealing not only the diversity of his talents but also the variety of visual and intellectual traditions with which he engaged. Part one, "The Various Boucher," examines the artist's identity in relation to his portraits and self-portraits, his ingenious genre scenes, and his overlooked religious paintings. Part two, "The Unexpected Boucher," focuses on the network of social and cultural contexts in which the artist functioned, including the commercial print market, the theaters of Paris, and the contemporary textual explorations of the exotic. The final part, "The Enlightened Boucher," discusses Boucher's work as a vehicle for Enlightenment visions of the body, whether conjured by Denis Diderot and Jean-Jacques Rousseau or Madame de Pompadour, Boucher's most famous patron.

**Journey to Italy** Heinrich Heine 1998 Translated by Charles Leland; Introduction by Phillip Lopate The Italian Journey contains celebrated examples of Heine's wit, combining street scenes and art masterpieces with scathing attacks against religious bigotry and reactionary politics. The Baths of Lucca intertwines irony and the expression of romantic sentiments to capture the restlessness that heralded the birth of the modern world. Freud included some of Heine's anecdotes in his own writings on humor and its relation to the unconscious.

**Religious Individualisation** Martin Fuchs 2019-12-16 This volume brings together key findings of the long-term research project 'Religious Individualisation in Historical Perspective' (Max Weber Centre for Advanced Cultural and Social Studies, Erfurt University). Combining a wide range of disciplinary approaches, methods and theories, the volume assembles over 50 contributions that explore and compare processes of religious individualisation in different religious environments and historical periods, in particular in Asia, the Mediterranean, and Europe from antiquity to the recent past. Contrary to standard theories of modernisation, which tend to regard religious individualisation as a specifically modern or early modern as well as an essentially Western or Christian phenomenon, the chapters reveal processes of religious individualisation in a large variety of non-Western and pre-modern scenarios. Furthermore, the volume challenges prevalent views that regard religions primarily as collective phenomena and provides nuanced perspectives on the appropriation of religious agency, the pluralisation of religious options, dynamics of de-traditionalisation and privatisation, the development of elaborated notions of the self, the facilitation of religious deviance, and on the notion of dividuality.

Design Ethnography Francis Müller 2020-12-14 This open access book describes methods for research on and research through design. It posits that ethnography is an appropriate method for design research because it constantly orients itself, like design projects, towards social realities. In research processes, designers acquire project-specific knowledge, which happens mostly intuitively in practice. When this knowledge becomes the subject of reflection and explication, it strengthens the discipline of design and makes it more open to interdisciplinary dialogue. Through the use of the ethnographic method in design, this book shows how design researchers can question the certainties of the everyday world, deconstruct reality into singular aesthetic and semantic phenomena, and reconfigure them into new contexts of signification. It shows that design ethnography is a process in which the epistemic and creative elements flow into one another in iterative loops. The goal of design ethnography is not to colonize the discipline of design with a positivist and objectivist scientific ethos, but rather to reinforce and reflect upon the explorative and searching methods that are inherent to it. This innovative book is of interest to design researchers and professionals, including graphic artists, ethnographers, visual anthropologists and others involved with creative arts/media.

The anthology "Spectra of Transformation" gathers a variety of perspectives on the question of the research on aesthetics, artistic and cultural education, which were discussed by international participants and speakers at the Winter School 2017 in Nuremberg.

**The Patient Ferment of the Early Church** Alan Kreider 2016-03-29 How and why did the early church grow in the first four hundred years despite disincentives, harassment, and occasional persecution? In this unique historical study, veteran scholar Alan Kreider delivers the fruit of a lifetime of study as he tells the amazing story of the spread of Christianity in the Roman Empire. Challenging traditional understandings, Kreider contends the church grew because the virtue of patience was of central importance in the life and witness of the early Christians. They wrote about patience, not evangelism, and reflected on prayer, catechesis, and worship, yet the church grew--not by specific strategies but by patient ferment.

They represent the permanent interaction between humans and their environment, shaping the surface of the earth. This important step has led to enhanced international and national recognition. The present volume aims to contribute to enhanced protection and management of cultural landscapes around the world. It furthermore highlights in a truly interdisciplinary approach some of the most outstanding cultural landscapes of universal value in their geocultural and environmental context.

**Liquid Spaces** Sofia Borges 2015-03 It is not a paradox that today—in the era of digitalization and e-commerce—the creation of tangible spaces is gaining in importance. A personal encounter triggers profound thoughts, strong feelings, and memories that last. In other words, the foundation of a meaningful relationship between artist and audience, museum and visitor, shop and customer, or brands and their communities is based upon an unforgettable experience. Yet all these groups are more discerning than ever before: They want a personalized moment, want to be informed and entertained, pampered, surprised, and inspired. *Liquid Spaces* shows the many different ways in which this desired effect can be achieved. Galleries, museums, temporary events, pop-up shops, and flagship stores provide the settings for a wide spectrum of unconventional architecture and interior design, where playfully experimental installations or complex productions can be presented. Surprising materials, colors, shapes, and surfaces provide the props, which alongside innovative smells, sounds, and lighting concepts come together in expansive, stage-like gestures with sculptural details. High-end cars are presented like works of art. Art is displayed in laboratories. Workshops become sacred sites of authenticity. The line between art and commerce is fluid; the quality of the experience is all that matters.

**Handbook of Economic Sociology for the 21st Century** Andrea Maurer 2021-05-08 This handbook provides an overview on major developments that occurred in the field of economic sociology after its rebirth since the 1980s in the US. It offers new insights on the uniqueness of European economic sociology compared to US economic sociology which emerged at the end of the 20th century. The handbook presents economic sociology as a developing field which started with certain foundations as new economic sociology, widening the perspective by introducing social factors thereby focusing more on general belief systems, social forms of coordination and the relationships between society and the economy. It offers an outstanding portrait of the research field helping to identify major foundations and trajectories as well as new research perspectives for a globalized economic sociology. This makes the handbook appeal to specialized researchers of the field, researchers from other disciplines interested in economic phenomena, as well as graduate and postgraduate students.
