The Biopolitics of Gender Jemima Repo 2016 This title provides a theoretically and methodologically new and distinct approach to gender through the frameworks of biopolitics and genealogy, theorising it as a historically specific apparatus of biopower. Through the use of a diverse mix of historical and contemporary documents, the book explores how the problematisation of intersex infant genitalia in 1950s psychiatry propelled the emergence of the gender apparatus in order to socialise sexed individuals into the ideal productive and reproductive subjects of White, middle-class postwar America.

Liberating Grace Leonardo Boff 2005-12-20 'Liberating Grace' is an important book on God's presence to human life that relates the new liberationist perspective to the best of the great theological tradition. The author unfolds the meaning of Christian grace in the light of the Latin American experience of dependency and exploitation. He shows that the turn to political involvement does not produce a detachment from the religious roots. --Gregory Baum McGill University Leonardo Boff's 'Liberating Grace' is a remarkable work. Against the background of traditional interpretations which may have fit the medieval or ancient world, Boff insists that grace must be understood within history and in terms of the kinds of experience we have today. Grace is no longer thought of as a substance but is discovered in the experience of relationships. God's liberating presence in the world permeates both personal and social relations, and this points to the political and economic arenas as keys to understanding God's free gift of love for humanity. Theology from Brazil has the aroma, flavor, and stimulation of something genuine, a grace which permeates all aspects of personal and social experience within the natural world. Boff works this view into various aspects of doctrine, including views of the Incarnation, Holy Spirit, and the Trinity. Chiefly, however, he makes 'grace' into a relevant doctrine for twentieth century living in the Third and other worlds. --Randolph Crump Miller Horace Bushnell Professor of Christian Nurture Yale University Divinity School

Value Creation in International Business Svetla Marinova 2016-11-29 The edited collection brings into focus the meanings, interpretations and the process of value creation in international business. Exploring value creation in the context of emerging and developed economies, Volume 2 takes the perspective of small and medium sized enterprises and examines various approaches to value creation in the process of firm internationalization. Providing theoretical and practical insights, the authors open an intellectual debate into what value is, and how it is created through the internationalization activities of firms. Value Creation in International Business is a pioneering two volume work intended to provoke theoretical and empirical development in International Business research. Moreover, it is intended as a bridge between concepts derived from general business firm-level research agendas such as value creation and business model, and internationalization approaches and activities of firms.

Literature After Feminism Rita Felski 2003-07 Recent commentators have portrayed feminist critics as grim-faced ideologues who are destroying the study of literature. Feminists, they claim, reduce art to politics and are hostile to any form of aesthetic pleasure. *Literature after Feminism* is the first work to comprehensively rebut such caricatures, while also offering a clear-eyed assessment of the relative merits of various feminist approaches to literature. Spelling out her main arguments clearly and succinctly, Rita Felski explains how feminism has changed the ways people read and think about literature. She organizes her book around four key questions: Do women and men read differently? How have feminist critics imagined the female author? What does plot have to do with gender? And what do feminists have to say about the relationship between literary and political value? Interweaving incisive commentary with literary examples, Felski advocates a double critical vision that can do justice to the social and political meanings of literature without dismissing or scanting the aesthetic.

Omnia disce - Medieval Studies in Memory of Leonard Boyle, O.P. Joan Greatrex 2017-09-08 The eighteen studies included here reflect three particular aspects of Leonard Boyle's remarkable impact on teaching and scholarship. His abiding interest in the early history and architecture of the basilica of San Clemente in Rome forms the focus of Part I; his profound contribution to the theory and practice of palaeography is reflected in Part II; and his creative work on clerical education, pastoral care, and the Dominican Order, inspires Part III. In all these areas, Fr Boyle combined remarkable attention to detail with the humane ability to bring clarity to complex issues. This book commemorates his inspiration, but also reflects his favourite maxim, derived from the twelfth-century teacher-theologian, Hugh of St-Victor, to 'Learn everything', for 'afterwards you will find that nothing is superfluous.' The fourth section is devoted to Fr Leonard as friend, scholar, and Prefect of the Vatican Library, and it ends, fittingly, with what may be regarded as his own scholarly valediction, 'St Thomas Aquinas and the Third Millennium'.

The Rejection of Consequentialism Samuel Scheffler 1994-08-11 In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available

outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

The Legal Protection of Databases Mark J. Davison 2003-06-26 Mark Davison examines several legal models designed to protect databases, considering in particular the EU Directive, the history of its adoption and its transposition into national laws. He compares the Directive with a range of American legislative proposals, as well as the principles of misappropriation that underpin them. In addition, the book also contains a commentary on the appropriateness of the various models in the context of moves for an international agreement on the topic. This book will be of interest to academics and practitioners, including those involved with databases and other forms of new media.

Cognitive and Neuropsychological Approaches to Mental Imagery M. Denis 2012-12-06 The locus of concreteness effects in memory for verbal materials has been described here in terms of the processing of shared and distinctive information. This theoretical view is consistent with a variety of findings previously taken as support for dual coding, insofar as both verbal and perceptual information may be involved in comprehending high-imagery sentences and in learning lists of concrete words. But going beyond previous accounts of imagery, this view also can provide explanations for several findings that appear contradictory to the thesis that concrete and abstract materials differ in the form of their storage in long-term memory. Although this does not rule out a role for imagery in list learning or text comprehension, it is clear that the complex processes involved in comprehension and memory for language go beyond mechanisms supplied by a theory based on the availability of modality-specific mental representations. The task now is to determine the viability of the theory in other domains. Several domains of imagery research presented at EWIC provided fertile ground for evaluating my theoretical viewpoint. Although not all provide a basis for distinguishing representational theories of imagery from the imagery as process view, there are data in several areas that are more consistent with the latter than the former. In other cases, there are at least potential sources of evidence that would allow such a distinction.

Leonardo Rena F. LaCaria 2004-10-01 Was the Shroud of Turin used to bury Jesus? Doubtful. In this compelling, thought-provoking, well-researched non-fiction expose', the author unravels her very own exploration of the Shroud with incontrovertible proof that the Shroud was created by none other than Leonardo Da Vinci. Full of pictures, many color, and a very detailed explanation of how Da Vinci did it! But was he deliberately perpetrating a fraud? No. He was an artist, engineer, and scientist. It is the author's belief that Da Vinci was perhaps creating something entirely different. When the Shroud was found, it was the finder who believed it to be the burial cloth of Jesus. This book is worth the price.
