Language and Change in the Arab Middle East Ami Ayalon 1987 Middle Eastern society experienced sudden and profound change in the 19th century under the impact of European expansion and influence. But as Western ideas about politics, technology, and culture began to infiltrate Arab society, the old language proved to be an inadequate vehicle for transmitting these alien concepts from abroad. In this study of the rise of modern Arabic, Ayalon examines 19th-century linguistic change in the Eastern Arab world as a mirror of changing Arab perceptions and responses to the West as well as a guide to the emergence of modern Arabic concepts, institutions, and practices. Focusing on the realm of political discourse, Ayalon looks at a wide array of evidence--local chronicles, travel accounts, translations of European writings, Arab political treatises, newspapers and periodicals, and dictionaries--to show how shifts in the color, tone, and meaning of the Arab vocabulary reflected a new socio-political and cultural reality.

A Grammar of Eton Mark L.O. Van de Velde 2008-08-27 A Grammar of Eton is the first description of the Cameroonian Bantu language Eton. It is also one of the few complete descriptions of a North-western Bantu language. The complex tonology of Eton is carefully analysed and presented in a simple and consistent descriptive framework, which permits the reader to keep track of Eton's many tonal morphemes. Phonologists will be especially interested in the analysis of stem initial prominence, which manifests itself in a number of logically independent phenomena, including length of the onset consonant, phonotactic skewing and number of tonal attachment sites. Typologists and Africanists

working on morphosyntax will find useful analyses of, among others, gender and agreement; tense, aspect, mood and negation; and verbal derivation. They will encounter many morphosyntactic differences between Eton and the better known Eastern and Southern Bantu languages, often due to evolutions shaped by maximality constraints on stems. The chapters on clause structure and complex constructions provide data hardly found in sources on the languages of the region, including descriptions of non-verbal clauses, focus, quasi-auxiliaries and adverbial clauses.

The Arabic Dialect of the Jews of Baghdad Assaf Bar-Moshe 2019-02-13 The Jewish community in Baghdad used to speak its own dialect of Arabic, which was distinct from the one spoken by its Muslim and Christian neighbors. This dialect served as their mother tongue for centuries, up until the massive immigration of Iraqi Jews to Israel following its establishment. Today, a few thousand native speakers of the dialect are still alive, but, unfortunately, in the next few decades this ancient dialect will evidently become extinct. To commemorate this historical community, this volume glances into its language and culture. It provides the reader with a firsthand opportunity to read transcriptions and translations of original oral texts by native speakers. The texts cover different aspects of the community's lives, including its history, traditions, cuisine, folk stories, personal stories of immigration, absorption difficulties in Israel, and even a collection of small talks. The volume opens with a grammatical sketch of the phonological and morphological system of the dialect. It focuses on the most important features to enable readers a fluent reading.
