On the Border of Language and Dialect Marjatta Palander 2018-04-23 This volume considers the linguistic borders between languages and dialects, as well as the administrative, cultural and mental borders that reflect or affect linguistic ones; it comprises eight articles examining the mental borders between dialects, dialect continua and areas of mixed dialect, language ideologies, language mixing and contact-induced language change. The book opens with Dennis R. Preston's review article on perceptual dialectology, showing how this field of study provides insights on laymen's perceptions about dialect boundaries, and how such perceptions explain regional and social variation. Johanna Laakso problematizes the common notion of languages as having clear-cut boundaries and stresses the artificialness and conventionality of linguistic borders. Vesa Koivisto introduces the Border Karelian dialects as an example of language and dialect mixing. Marjatta Palander and Helka Riionheimo's article examines the mental boundaries between Finnish and Karelian, demonstrated by the informants when recalling their fading memories of a lost mother tongue. Niina Kunnas focuses on how speakers of White Sea Karelian perceive the boundaries between their language and other varieties. Within the framework of language ideology, Tamás Péter Szabó highlights the ways in which linguistic borders are interactionally (co)constructed in the school environment in Hungary and Finland. Anna-Riitta Lindgren and Leena Niiranen present a contact-linguistic study investigating the vocabulary of Kven, a variety lying on the fuzzy boundary of a language and a dialect. Finally, Vesa Jarva and Jenni Mikkonen approach demographically manifested linguistic boundaries by examining the Old Helsinki slang, a mixture of lexical features derived from Finnish and Swedish. Together, the articles paint a picture of a multidimensional, multilingual, variable and ever-changing linguistic reality where diverse borders, boundaries and barriers meet, intertwine and cross each other. As a whole, the articles also seek to cross disciplinary and methodological boundaries and present new perspectives on earlier studies.

Profiling Grammar Paul Fletcher 2016-02-02 This book brings together twelve previously unpublished language profiles based on the original Language Assessment, Remediation and Screening Procedure (LARSP). The languages featured are: Afrikaans, Bulgarian, Cantonese, Finnish, Greek, Hindi, Hungarian, Japanese, Kannada, Korean, Malay and Swedish. Each chapter includes a grammatical sketch of the language, details of typical language development in speakers of the language, as well as a description of and justification for the profile itself. The book will be an invaluable resource for speech-language pathologists and others wishing to analyse the grammatical abilities of individuals speaking one of these languages. This new collection complements a previous book in this series on the same theme: *Assessing Grammar: The Languages of LARSP* (Ball et al., 2012,).

The Diachrony of Classification Systems William B. McGregor 2018-05-14 Classification is a popular topic in typological, descriptive and theoretical linguistics. This volume is the first to deal specifically with the diachrony of linguistic systems of classification. It comprises original papers that examine the ways in which linguistic classification systems arise, change, and dissipate in both natural circumstances and in circumstances of attrition. The role of diffusion in such processes is explored, as well as the question of what can be diffused. The volume is not restricted to nominal systems of classification, but also includes papers dealing with the less well-known phenomenon of verbal classification. Languages from a wide spread of world regions are examined, including Africa, Amazonia, Australia, Eurasia, Oceania, and Mesoamerica. The volume will be of interest to linguistic typologists, descriptive linguists, historical linguists, and grammaticalization theorists.

The Acquisition of Swedish Grammar Gunlög Josefsson 2004-05-28 This book provides a number of studies of different aspects of Swedish child language. Some of the thematic chapters present original, unpublished data: on the acquisition of tense, on the range and frequency of different word order patterns in early child Swedish, related to the input, meaning the language of adults talking to the children or in the presence of the children. The remaining chapters present overviews of previous research: on the acquisition of word formation rules, the noun phrase, and wh-questions. The introduction to this volume contains a concise overview of the basic features of Swedish grammar and a comprehensive overview of different Swedish child language corpora. The main body of research proceeds within a generative framework, but the text is designed to be accessible to researchers of different theoretical paradigms.

Making Sense of "Bad English" Elizabeth Peterson 2019-10-17 Why is it that some ways of using English are considered "good" and others are considered "bad"? Why are certain forms of language termed elegant, eloquent or refined, whereas others are deemed uneducated, coarse, or inappropriate? Making Sense of "Bad English" is an accessible introduction to attitudes and ideologies towards the use of English in different settings around the world. Outlining how perceptions about what constitutes "good" and "bad" English have been shaped, this book shows how these principles are based on social factors rather than linguistic issues and highlights some of the real-life consequences of these perceptions. Features include: an overview of attitudes towards English and how they came about, as well as real-life consequences and benefits of using "bad" English; explicit links between different English language systems, including child's English, English as a lingua franca, African American English, Singlish, and New

Delhi English; examples taken from classic names in the field of sociolinguistics, including Labov, Trudgill, Baugh, and Lambert, as well as rising stars and more recent cutting-edge research; links to relevant social parallels, including cultural outputs such as holiday myths, to help readers engage in a new way with the notion of Standard English; supporting online material for students which features worksheets, links to audio and news files, further examples and discussion questions, and background on key issues from the book. Making Sense of "Bad English" provides an engaging and thought-provoking overview of this topic and is essential reading for any student studying sociolinguistics within a global setting.

The Usage-based Study of Language Learning and Multilingualism Lourdes Ortega 2016-05-16 Usage-based linguistics, which is currently very popular, bases its understanding of language on two key points: Languages are cognitive-social constructs (i.e., learned vs genetically endowed), and, in order for communication and meaning to happen, speakers must find a way to meet/understand each other, overcoming various differences (lexicon, social, register, etc.) to arrive there. In this book, high-level contributors combine research from various usage-based perspectives to explore these questions: How do proficient speakers accomplish 'mental contact' or communication through the available semiotic linguistic resources they share with other members of their discourse community? How do young children learn to accomplish this? And how do speakers of multiple languages learn to accomplish this across languages?

The Nordic Languages Oskar Bandle 2002 The handbook is not tied to a particular methodology but keeps in principle to a pronounced methodological pluralism, encompassing all aspects of actual methodology. Moreover it combines diachronic with synchronic-systematic aspects, longitudinal sections with cross-sections (periods such as Old Norse, transition from Old Norse to Early Modern Nordic, Early Modern Nordic 1550-1800 and so on). The description of Nordic language history is built upon a comprehensive collection of linguistic data; it consists of more than 200 articles written by a multitude of authors from Scandinavian and German and English speaking countries. The organization of the book combines a central part on the detailed chronological developments and some chapters of a more general character: chapters on theory and methodology in the beginning and on overlapping spatio-temporal topics in the end.

The Growth and Maintenance of Linguistic Complexity Östen Dahl 2004-08-31 This book studies linguistic complexity and the processes by which it arises and is maintained, focusing not so much on what one can say in a language as how it is said. Complexity is not seen as synonymous with “difficulty” but as an objective property of a system – a measure of the amount of information needed to describe or reconstruct it. Grammatical complexity is the result of historical processes often subsumed under the rubric of grammaticalization and involves what can be called mature linguistic phenomena, that is, features that take time to develop. The nature and characteristics of such processes are discussed in detail, as well as the external and internal factors that favor or disfavor stability and change in language.

This book is targeted at everyone with an interest in lexicography, computational lexicography, lexical typology, lexical semantics, linguistics, computational linguistics and related fields. Common Swedish Verbs David Hensleigh 2001

Language and Nationality Pietro Bortone 2021-09-23 What role does language play in the formation and perpetuation of our ideas about nationality and other social categories? And what role does it play in the formation and perpetuation of nations themselves, and of other human groups? *Language and Nationality* considers these questions and examines the consequences of the notion that a language and a nationality are intrinsically connected. Pietro Bortone illustrates how our use of language reveals more about us than we think, is constantly judged, and marks group insiders and group outsiders. Casting doubt on several assumptions common among academics and non-academics alike, he highlights how languages significantly differ among themselves in structure, vocabulary, and social use, in ways that are often untranslatable and can imply a particular culture. Nevertheless, he argues, this does not warrant the way language has been used for promoting a national outlook and for teaching us to identify with a nation. Above all, the common belief that languages indicate nationalities reflects our intellectual and political history, and has had a tremendous social cost. Bortone elucidates how the development of standardized national languages – while having merits – has fostered an unrealistic image of nations and has created new social inequalities. He also shows how it has obscured the history of many languages, artificially altered their fundamental features, and distorted the public understanding of what a language is.

Narrative Development in a Multilingual Context Ludo Th Verhoeven 2001-01-01 In this volume, the results of a number of empirical studies of the development of narrative construction within a multilingual context are presented and discussed. It is explored what operating principles underlie the process of narrative production in L1 and L2. Developmental relations between form and function will be studied across a broad range of functional categories, such as temporality, perspective, connectivity, and narrative coherence. Moreover, a variety of language contact situations is considered with broad variation in the typological distances between the languages in order to enable cross-linguistic comparison. The analysis of learner data in various cross-linguistic settings may thus offer new information on the role of the structural properties of unrelated languages on the process of narrative acquisition. In the present volume, an attempt is also made to find out how transfer from one language to the other is facilitated. Finally, the effects of input on narrative construction in children's first and second language are examined in several studies.
