**Autonomy Requirements Engineering for Space Missions** Emil Vassev 2014-08-27  
Advanced space exploration is performed by unmanned missions with integrated autonomy in both flight and ground systems. Risk and feasibility are major factors supporting the use of unmanned craft and the use of automation and robotic technologies where possible. Autonomy in space helps to increase the amount of science data returned from missions, perform new science, and reduce mission costs. Elicitation and expression of autonomy requirements is one of the most significant challenges the autonomous spacecraft engineers need to overcome today. This book discusses the Autonomy Requirements Engineering (ARE) approach, intended to help software engineers properly elicit, express, verify, and validate autonomy requirements. Moreover, a comprehensive state-of-the-art of software engineering for aerospace is presented to outline the problems handled by ARE along with a proof-of-concept case study on the ESA's BepiColombo Mission demonstrating the ARE's ability to handle autonomy requirements.

*The Seventeen Secrets of the Karma Club* Karen McCombie 2009-05-01 Kezzy and Nell have their own club: a secret society for acts of kindness. Monobloc 2022-01-24 A visual history of the world's most famous and ubiquitous chair The Monobloc is the bestselling piece of furniture of all time: an estimated one billion copies of this white plastic chair are in circulation all over the world. This book arises from a documentary by German film director Hauke Wendler, who spent eight years filming on five continents to explore the impact of the Monobloc on a global scale. Combining archival documentation with images from Wendler's film (to be released in 2022), this book complicates the narrative and mystery of the Monobloc's popularity. Embracing its ubiquity, it

also addresses the chair's environmental, economic and aesthetic impacts. How does the Monobloc threaten our environment and good taste? Finally, how has it become indispensable to millions of people for whom a chair is a chair and nothing more? This book offers insight, through film, photography and design history, into the story of how an unremarkable, stackable chair conquered the world.

**Key Questions on Patent Disclosure Requirements for Genetic Resources and Traditional Knowledge** 2017-06-16 "Transparency through the disclosure of patented inventions has been a defining feature of the modern patent system since its inception. As modern innovation continues to build upon and further advances the diversity of genetic resources, recent discussions have identified questions as to whether existing patent disclosure requirements should be additionally expanded through specific disclosure requirements for genetic resources and traditional knowledge to further improve the transparency and efficacy of the patent system....The current publication is an update and improvement of the original WIPO Technical Study from 2004, incorporating the latest practical and empirical information provided by Member States and stakeholders. It provides a purely technical account of the legal and operational questions that have been identified as arising in the context of patent disclosure requirements related to genetic resources and traditional knowledge, and does not promote or propose any particular position, approach or perspective on this matter. The study looks at the key questions identified from the point of view of the patent system and in relation to other relevant legal and policy frameworks"--Page 5.

**Presence** Jürg Berthold 2016 The politicization of the arts today is the subject of this important and timely publication examining three exhibitions that explore how a resistive art might be imagined, despite being enmeshed in the economic structures it counters; what other knowledge and communities art can foster; and what tools and weapons art can supply. Each project Unrest of Form: Imagining the Political Subject from the Wiener Festwochen in Vienna; Monday Begins on Saturday, part of the Bergen Assembly; and Giving Form to the Impatience of Liberty at the Wu'rttembergischer Kunstverein Stuttgart probes the relations between art, politics and the knowledge generation. Extensive photographic documentation of each exhibition and related essays together make for a blunt discussion about the social role art should play in the 21st century to be effective in creating change rather than being merely elitist and

market driven. Featured artists include Alice Creischer, Carlfriedrich Claus, Jimmie Durham, Tim Etchells, Dora GarciaLa, Francis Hunger, Ilya and Emilia Kabakov, Kathrin RoNggla and Clemens von Wedemeyer.

*Environmental Process and Production Methods (PPMs) in WTO Law* David Sifonios 2018-01-30 This book examines the conditions under which PPM measures may be adopted under WTO law de lege lata and de lege ferenda. It analyses in detail the complex case law in this field and its evolution in the last 25 years, as well as the many doctrinal debates around PPM measures and their relevance in the light of the evolution of case law, both under the GATT and the TBT Agreement. Further, it also suggests an original approach to the interpretation of the relevant provisions of the GATT and the TBT Agreement in the context of PPM measures. The PPM issue has been one of the most debated topics in the trade and environment debate. Even though the US-Shrimp case showed that PPM measures are not prohibited per se under the GATT, many questions remain unanswered when it comes to the precise conditions under which environmental PPM measures are justifiable under WTO law, for example in the field of trade measures relating to climate change mitigation efforts, natural resources management policies and biodiversity conservation measures.

**The Happy Christian** David Murray 2015-02-24 A unique combination of biblical teaching, scientific research, and personal biography shows those who follow Jesus how to live joyful, purposeful lives. Hopelessness has invaded much of our culture, even reaching deep into the church. But while the world is awash in negativity, Christians have resources to live differently. In *The Happy Christian*, professor and pastor David Murray blends the best of modern science and psychology with the timeless truths of Scripture to create a solid, credible guide to positivity. The author of the acclaimed *Christians Get Depressed Too*, Murray exposes modern negativity's insidious roots and presents ten perspective-changing ways to remain optimistic in a world that keeps trying to drag us down. *The Happy Christian* invites readers to shed negativity and become countercultural missionaries by demonstrating the positive power of the gospel in their lives.

**"Fingerprints" of Climate Change** G.-R. Walther 2012-11-09 In recent years an increasing number of studies have been published reporting observations of adapted behaviour and shifting species ranges of plant and animal species due to recent climate warming. Are these 'fingerprints' of climate change? An international conference was organised to bring together scientists from different continents with different expertise but sharing the same issue of climate change impact studies. Ecologists, zoologists, and botanists exchanged

and discussed the findings from their individual field of research. The present book is an international collection of biological signs of recent climate warming, neither based only on computer models nor on prediction for the future, but mainly on actually occurring changes in the biosphere such as adapted behaviour or shifts in the ranges of species. 'Fingerprints' of Climate Change presents ecological evidence that organisms are responding to recent global warming. The observed changes may foreshadow the types of impacts likely to become more frequent and widespread with continued warming.

**Giger's Tarot. Ediz. Inglese** Akron 2000 This collectable group of 22 beautifully designed Tarot cards is available in a handsome boxed set in either German or English language. Each card is a careful reproduction of one of Giger's paintings, and is interpreted by philosopher-magician Akron in a booklet of instructions, included with the set. To Akron Tarot is like an inexhaustible mine of symbols, suited to manifest Giger's aesthetics of apocalypse in literary style. Akron resorts to the tradition of the Tarot in order to convey the messages of Baphomet - a medieval secret symbol -- which is of special significance in Giger's work. H.R. Giger is a painter, Oscar-award winner and cult figure of an international artistic community, for which his aesthetics of the apocalypse represent inspiration and spiritual healing. His pictures are gripping, indeed sometimes shocking visions - they shake us from our unconsciousness as they relentlessly point to the hidden inner world of all things. The art of Giger is a journey to the most ancient destination of mankind: to birth and death, love and war, hope and the destruction of life.

**Labour Law in Switzerland** Alexandre Berenstein 2018-01-30 Derived from the renowned multi-volume International Encyclopaedia of Laws, this monograph on Switzerland not only describes and analyses the legal aspects of labour relations, but also examines labour relations practices and developing trends. It provides a survey of the subject that is both usefully brief and sufficiently detailed to answer most questions likely to arise in any pertinent legal setting. Both individual and collective labour relations are covered in ample detail, with attention to such underlying and pervasive factors as employment contracts, suspension of the contracts, dismissal laws and covenant of non-competition, as well as international private law. The author describes all important details of the law governing hours and wages, benefits, intellectual property implications, trade union activity, employers' associations, workers' participation, collective bargaining, industrial disputes, and much more. Building on a clear overview of labour law and labour relations, the book offers practical guidance on which sound preliminary decisions may be based. It will find a ready readership among lawyers representing parties with interests in Switzerland, and academics and researchers will appreciate its value in the study of comparative trends in laws affecting labour and labour relations.

Consensus Building Versus Irreconcilable Conflicts Emanuela Saporito 2016-06-25

This book aims to identify ways of overcoming the limitations of the communicative tradition in understanding participatory spatial planning. Three conceptual models that offer different perspectives on public and civic participation in complex urban planning processes are presented and reviewed: the consensual model, which conceives of planning as a collective decision-making practice geared toward consensus building and conflict resolution; the conflictual model, which views planning as a social mobilization practice addressed at empowerment of marginalized groups; and the trading zone model, which reframes collaborative planning as a coordination activity with respect to practical proposals in the presence of unstable and conflicting rationalities and values. The controversial story of the Integrated Intervention Program "PII Isola Lunetta" in Milan is examined through the interpretative lenses of these models, with detailed interpretation of how each model performs in the field. The book concludes by offering critical reflections on the reframing of participatory spatial planning, highlighting the value of trading zones/trading languages and boundary objects as tools for understanding and addressing collaborative practices in complex and conflictual urban planning processes.

**Benedict XVI: His Life and Thought** Elio Guierro 2018-12-17 In these pages Benedict XVI shares his reasons for retiring from the papacy in 2013 in an interview with the author. Many saw his astonishing retirement as a sign of the Church's decline, but he intended it as a seed sown in the hope of bringing the Church a younger, more vigorous leadership in the face of daunting challenges. Among those challenges are the financial and sexual scandals that continue to undermine the Church's mission. When Ratzinger was elected Pope in 2005, he opened a path of purification for the Church, while calling upon the Western world to return to its Christian roots and to build a new humanism for the twenty-first century, and his call for renewal is still relevant. Widely recognized as one of the most important theologians and spiritual leaders of our time, Joseph Ratzinger served throughout the papacy of John Paul II as the Prefect of the Congregation for the Doctrine of the Faith. Both men had witnessed how atheistic philosophies and war had ravaged twentieth-century Europe, and they shared in the effort of revealing to modern man his need for God, for redemption in Jesus Christ.

*Global Innovation Index 2017* Cornell University ; INSEAD ; World Intellectual Property Organization 2017-06-15 The Global Innovation Index provides detailed metrics about the innovation performance of 127 countries and economies around the world. Ecology and Evolutionary Biology of Clonal Plants Josef F. Stuefer 2013-06-29  
Spontaneous self-cloning or clonality is a widespread phenomenon in the plant kingdom, and has a wide array of ecological and evolutionary implications. This volume is the outcome of an international workshop on clonal plant biology aimed at illustrating current progress and recent developments in the scientific study of clonality in plants. The first section of this book includes a collection of original research articles which demonstrate the wide variety of approaches and scientific challenges linked to clonality in plants. The topics covered in this section include ecological and evolutionary implications of sexual versus asexual propagation, including life-history evolution and sex-ratio dynamics, the importance of internal resource transport and remobilization of storage products for the invasiveness and competitiveness of clonal plants, a survey of clonal growth forms in grassland communities, and studies on the interactions between clonal plants and animals and fungi. The approaches used range from experimental studies on a broad variety of systems to mathematical modeling of clonal growth and its consequences. The second part features discussion and review papers on a diverse array of subjects, ranging from developmental considerations of clonality, principles of selection and evolution in clonal plants, a survey of clonality in algae, to potential implications of clonality for plant mating, and beyond. This part of the volume aims at presenting novel ideas and hypotheses, and at summarizing existing knowledge in previously under-researched areas, thereby providing directions for future research initiatives. This book captures ongoing cutting-edge research in the field of clonal plant ecology and evolution. It is directed to anyone from the undergraduate to specialist level who is interested in the biology of the intriguing phenomenon of asexual propagation in plants.

**Shareholder Activism by Hedge Funds: Motivations and Market's Perceptions of Hedge Fund Interventions** Mihaela Butu 2013 In recent years, hedge funds' successful interventions in some large public companies have revealed their critical role in the corporate governance landscape in the United States and Europe. Due to public opinion, this new form of shareholder activism is accompanied by much polemic. This study examines the nature of hedge fund activism, the types of them, and the market's perception of interventions in the United States. Starting with a distinction between shareholder activism by traditional institutions, and activism performed by hedge funds, the study elucidates why the latter may be more effective in monitoring management, and reduce agency costs. Analysing the Schedules 13D filed with the U.S. Securities and Exchange Commission, the study provides a classification of activists' demands into ten distinct categories, arguing that hostile forms of activism are not central for hedge funds, and some more aggressive types of activism are possibly used as a negotiating tool to achieve the activist's agenda. Using the event study methodology, the author estimates the stock returns around the announcement date. For a better understanding of hedge fund activism, and their demands on target companies, the reader will find two original Schedule 13D filings accompanied by letters to the management. Finally, the paper concludes on a view of the subject through the prism of the 2007/ 2008 financial crisis, outlining some trends in the aftermath of the financial market turmoil.

*No Good Deed* John Niven 2017-06-29 \*\*\*Now available for preorder: KILL 'EM ALL, the stunning sequel to KILL YOUR FRIENDS\*\*\* The viciously funny novel by John Niven, bestselling author of Kill Your Friends and Straight White Male. What do you do when a homeless man knows your name? How about when he turns out to be a friend you haven't seen in twenty years? Do you treat him to a hot meal and see him on his way? Give him a wad of middle-class guilt money? Or take him in and get him back on his feet? For Alan, there's no question - only natural that he'd want to see his old mate Craig off the streets, even if only for a few nights, and into some clean clothes. But what if the successful life you've made for yourself - good job, happy marriage, lovely kids, grand Victorian house (you did well out of the property boom, thank you very much) - is one that that your old pal would quite like to have too? Even if it means taking it from you? Following the divergent lives of two childhood friends, *No Good Deed* is a funny and painful examination of friendship, the strange currents of ambition, loathing, pity and affection that flow between people over the decades, and of men getting older as they fail and succeed.

**Somewhere I Have Never Travelled** Wolfram Fleischhauer 2013-08-28 In a similar vein as John Fowles in "The French Lieutenant's Woman," best selling author Wolfram Fleischhauer (*Fatal Tango*) has created two converging suspense stories from the past and the present that turn out to be one. Historical court-room-drama as well as a gripping present-day love-story, "Somewhere I Have Never Travelled" is a highly original and deeply moving work that ingeniously blends historical and contemporary fiction. Paris in the spring of 1867 A few days before the official inauguration of the World Fair, the dead body of a child is found in the river Seine. The mother is arrested and accused of infanticide. She denies having killed her child and claims to have left it at a hospital for treatment a few days before. But nobody in the hospital remembers anything... Paris in the spring of 1992 What mystery surrounds a young French woman in a library in Paris who obsessively researches this long forgotten case of infanticide? Bruno, a 27-year-old architect who is looking for material for his thesis on the 1867 World Fair, needs some of the books the young woman is reading. Reluctantly, she agrees to share some of the material with him. Bruno soon falls in the love with her, but she refuses his advances. Until he starts

taking an interest in the strange case she is determined to uncover.
