**Media, War, and Terrorism** Peter van der Veer 2004 Media, War and Terrorism analyses, for the first time, responses to the events of 9/11 and it's repercussions from the point of view of Asian and Middle Eastern countries. Perhaps controversially, the contributors argue that while the US, and to an extent European, media seems largely unified in their coverage and silence in public debate of the events surrounding the attacks on the World Trade Centre, there exists open, critical debate in other parts of the world. By examining the use of media as an instrument of warfare and analyzing the construction of public opinion in mediated electronic warfare, this book clearly shows the difference in perspectives between public opinion in the US and the rest of the world. Moving away from popular assumptions that societies in the West are democratic and progressive and those in the Middle East and Asia are either authoritarian or under-developed, this examination of the media in those countries suggests the exact opposite. In combining an examination of the general, theoretical issues concerning the use of the media as an instrument of warfare with rich, geographically diverse case studies, the editors are able to provide a diverse and intriguing analysis of the impact and inter-connectedness of national and global medias. Bringing together contributions from academics, journalists and media practioners from all over the world, Media, War and Terrorism is an essential read for all of those seeking an informed, non-Western perspective on the events following 9/11.

Win Every Day Mark Miller 2020-03-10 All high performance organizations have one thing in common: execution. The men and women who work there sustain performance at seemingly otherworldly levels of precision, accuracy, and consistency. In the fifth and final book of Mark Miller's High Performance series, he uses his trademark business fable format to show how any organization can cultivate the kind of everyday habits that yield extraordinary results. Miller tells the story of Blake Brown, a CEO who learns how to help his team to consistently excel at execution from a perhaps unlikely source: his son's high school football coach. The story is fictional, but the principles

and practices are very real, derived from years of research led by a team from Stanford University. Miller and his team interviewed leaders and employees from numerous world-class organizations, including the Navy SEALs, Starbucks, Apple, Southwest Airlines, the Seattle Seahawks, Mayo Clinic, Cirque du Soleil, and more. The lessons learned were then field-tested with over seventy businesses employing over 7,000 people. Miller gives you proven tools to release the untapped potential in your people, create a strong competitive advantage, and win not just on game day but every day.

Emotions and Modernity in Colonial India Margrit Pernau 2019-08-22 With this pioneering project, Margrit Pernau brings the 'history of emotions' approach to South Asian studies. A theoretically sophisticated and erudite investigation, *Emotions and Modernity in Colonial India* maps the history of emotions in India between the uprising of 1857 and World War I. Situating the prevalent experiences, interpretations, and practices of emotions of the time within the context of the major political events of colonial India, Pernau goes beyond the dominant narrative of colonial modernity and its fixation with discipline and restraint, and traces the contemporary transformation from a balance in emotions to the resurgence of fervor. The current volume is based on a large archive of sources in Urdu, many being explored for the first time. Pernau grounds her work on such diverse sources as philosophical and theological treatises on questions of morality, advice literature, journals and newspapers, nostalgic

descriptions of courtly culture, and even children's literature. This close look into individual experiences, practices, and interpretations reveals the myriad emotions of the day, and the importance of these micro-histories in presenting an alternative account of colonial India.

**Lucknow** Violette Graff 1997 Lucknow, the city of nawabi grandeur, has served as the backdrop for a number of historical and social studies, but not as a theme of exploration in itself. This book focuses on Lucknow and covers 250 years of its eventful history. It deals with the position Lucknow held in the panorama

of Mughal politics; its rise to grandeur during the days of the nawabs; the trials and tribulations of its populace during the Mutiny and the conflicts which emerged as part of Lucknow's transformation into a colonial city. Its rise to political pre-eminence after Independence, the large-scale influx of refugees and migrants, the changing fortunes of the erstwhile aristocracy and the elite are analysed in this volume with remarkable candour. This volume is for connoisseurs of Indian culture as well as scholars interested in the urban history of South Asia.

*They Too Fought for India's Freedom* Asghar Ali Engineer 2006 This is a rejoinder to suppressed histories. The role of minorities in India's struggle for freedom has been praise-worthy in every sense of the term. They played an immensely important role there. Unfortunately, however, that brilliant role does not occupy any meaningful space in our historical discourses. The present work corrects the distortion and draws the picture of the minorities role in India's freedom struggle in colours true to history. Almost all the minorities Muslims, Sikhs, Parsis, Christians, etc. have been given their due space here.

**Text in Education and Society** Desmond Allison 1998-09-09 The central place of "text" as a means of organising language in order to construct what people come to think of as "knowledge" is a phenomenon affecting all educators, students, and citizens of modern societies. This volume offers various voices and perspectives including those of Ron Carter and Michael Halliday on the role of text in education and society. The chapters on text in education explore some ways in which texts can create bonds or raise barriers between educational knowledge and common-sense knowledge, while the chapters on text in society focus on how personalities and societies are themselves constructed through texts. Learning to unpack texts, and to consider alternatives, is a crucial goal for education and growth, especially so in the context of fast-changing contemporary societies. This book should be of special interest to educators, students of language, and readers interested in the dynamic relationship between text, education and society.
