**Contractual Estoppel** Alexander Trukhtanov 2017-07-20 This book is the first comprehensive account of contractual estoppel. Contractual estoppel is a new and exciting development in the common law, widely employed and of considerable practical utility. The concept has been noticed by academics, mostly to be criticised as anomaly, misnomer and an objectionable policy choice, and commentary on the concept has been limited to recitation and critique of a few principal cases. Yet this book examines

numerous judicial decisions which apply or discuss contractual estoppel, and offers a full and systematic exploration of its origin, principled basis, practical applications and limits. In this new title, the author, Alexander Trukhtanov, responds to policy objections and seeks to answer the charge that contractual estoppel is a misnomer, anomaly or distortion of reliance-based categories of estoppel, by showing that contractual estoppel is its own category of legal estoppel. The book is a single point of reference for a systematic and organised exposition of the subject and an explanation of how it fits into existing law. It is practice-oriented but engages with important conceptual points. Contractual Estoppel will be of interest to practitioners, whether draftsmen, litigators or advocates, as well as academics and post-graduate students of contract law.

**Chinese Outward Foreign Direct Investment** Peter J. Buckley 2020 "The rapid international expansion of Chinese businesses has evoked mixed perceptions in host countries and among policymakers. This volume brings together rigorous studies on the motivation, background, strategy, and impact of Chinese outward foreign direct investment and the emergence of Chinese multinational enterprises (MNEs). It is thus informative for the next wave of academic research on Chinese and emerging market MNEs in international business, political economy, economic geography and political sciences. Together with an original introduction by the editors, this valuable collection provides an important backdrop for academics who intend to understand emerging market MNEs in order to advise policymakers"--
