Cross-Disciplinary Approaches to the English Language Crina Herăg 2011-09-22 Cross-Disciplinary Approaches to the English Language: Theory and Practice provides an overview of a less tackled field of research, namely the main issues at stake when teaching English Language and Culture in Romania. The approach is an interdisciplinary and cross-cultural one, as the authors investigate problems, offering and probing solutions from a cross-curricular perspective. The book is a collection of 10 contributions by teachers and researchers from Romania which draw on theoretical and applied methodological explorations into the challenges posed by teaching/learning English in a globalised context. Organised into

three main chapters, the volume addresses the multifacetedness of language education as a cross-discipline. The complexity and universality of the research enquiries and practical insights make the topics addressed valid across the contemporary globalising educational context. *Cross-Disciplinary Approaches to the English Language: Theory and Practice* will be a useful tool to specialists and practitioners from ESP and CLIL domains alike, as well as graduate and postgraduate students in foreign language teaching.

English Language Teaching in Pakistan Naziha Ali Raza 2022-02-05 This book presents empirical research on teaching, learning and assessment, and teacher development practices in Pakistan. Despite extensive academic research conducted in Pakistan over the last decade, there is a dearth of internationally published literature on English language teaching in the country. This book covers current research priorities and initiatives concerning English language teaching, learning and assessment, empirical developments, and major professional development initiatives, both in Pakistan and involving the work of Pakistani scholars based in abroad. It highlights the impacts that development efforts are having in the ELT world in Pakistan. The respective chapters cover a diverse range of topics, including: continuous professional development (CPD), identity construction, English language policy, curriculum development, and innovative ELT approaches and methodologies used in Pakistan. This volume provides valuable insights for TESOL and applied linguistics scholars and practitioners working in the field of ELT, both in Pakistan and elsewhere in the globalized world.

Digital Rhetoric Douglas Eyman 2015-06-01 What is “digital rhetoric”? This book aims to answer that question by looking at a number of interrelated histories, as well as evaluating a wide range of methods and practices from fields in the humanities, social sciences, and information sciences to determine what might constitute the work and the world of digital rhetoric. The advent of digital and networked communication technologies prompts renewed interest in basic questions such as What counts as a text? and Can traditional rhetoric operate in digital spheres or will it need to be revised? Or will we need to invent new rhetorical practices altogether? Through examples and consideration of digital rhetoric theories, methods for both researching and making in digital rhetoric fields, and examples of digital rhetoric pedagogy, scholarship, and public performance, this book delivers a broad overview of digital rhetoric. In addition, Douglas Eyman provides historical context by investigating the histories and boundaries that arise from mapping this emerging field and by focusing on the theories that have been taken up and revised by digital rhetoric scholars and practitioners. Both traditional and new methods are examined for the tools they provide that can be used to both study digital rhetoric and to potentially make new forms that draw on digital rhetoric for their persuasive power.

Technical Communication Today Richard Johnson-Sheehan 2017-01-09 This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. For courses in Technical Communication. Fully centralizes the computer in the technical workplace, presenting how writers use computers throughout their communication process. The networked computer, from smartphone to mainframe, has become the central hub of written, spoken, and visual communication in today’s scientific and technical workplace. Firmly rooted in core rhetorical principles, Technical Communication Today presents computers as thinking tools that powerfully influence

how we develop, produce, design, and deliver technical documents and presentations. This popular text helps communicators draft and design documents, prepare material for print and web publication, and make oral presentations. Speaking to today's readers, the narrative is “chunked,” so that readable portions of text are combined with graphics and can be “raided” by readers seeking the information they need. Retaining these features, the 6th Edition of *Technical Communication Today* also marks an important shift to drawing readers’ attention to the centralization of innovation and entrepreneurship in the technical workplace. Revised chapters, new case studies, and new exercises and projects demonstrate that those who know how to write clearly, speak persuasively, and design functional and attractive texts will be the most likely to succeed in today’s innovation-based and entrepreneurial workplace. *Technical Communication Today*, 6th Edition is also available via Revel™, an interactive learning environment that enables students to read, practice, and study in one continuous experience. White Noise Don DeLillo 1999-06-01 A brilliant satire of mass culture and the numbing effects of technology, *White Noise* tells the story of Jack Gladney, a teacher of Hitler studies at a liberal arts college in Middle America. Jack and his fourth wife, Babette, bound by their love, fear of death, and four ultramodern offspring, navigate the rocky passages of family life to the background babble of brand-name consumerism. Then a lethal black chemical cloud, unleashed by an industrial accident, floats over their lives, an "airborne toxic event" that is a more urgent and visible version of the white noise engulfing the Gladneys—the radio transmissions, sirens, microwaves, and TV murmurings that constitute the music of American magic and dread.

Professional Development in Online Teaching and Learning in Technical Communication Beth L. Hewett 2020-05-18 Technical communication instructors need professional development opportunities that will aid them in creating their online courses; in developing curricula; and in teaching in what may be a new environment. Although instructors can turn to instructional design teams for assistance in using Learning Management System and its functions, they specifically need their own first-hand, immersive learning within their pedagogical training. In other words, teachers need to learn in an online context like the environment that their students will use; such direct training helps instructors to facilitate student learning in a technologically distributed classroom. Beyond learning technological skills to facilitate a course, these teachers need to learn to use the technology effectively to keep students on track and to teach them skills and material. This collection—which includes three contributions from 2007 and 10 from 2017—focuses on the types of professional development instructors need to be successful in the online technical communication classroom. Formed as a 10-year retrospective of the field and its advances in online education professional development, the book offers instructors theoretical and practical suggestions for creating and teaching successful online courses and managing entire online technical communication programs. This book was originally published as a special issue of *Technical Communication Quarterly* (TCQ).

Perspectives on Teaching and Learning English Literacy in China Jiening Ruan 2012-11-29 This is one of two volumes by the same editors that explore historical, philosophical, and cultural perspectives on literacy in China. This volume focuses on English literacy in China, while the other volume is on Chinese literacy. In modern day China, English has enjoyed an increasingly important status in education, but not without challenges. The essays in this volume provide a comprehensive, cross-disciplinary look at changes in English literacy practices and literacy instruction in China from the first English school in the 19th century to recent curriculum reform efforts to modernize English instruction from basic education through higher education. Together, the essays address a wide array of topics, including early childhood English education, uses of information technology to teach English, and teaching English to Chinese minority students. This work is essential reading for those who want to expand their understanding of English literacy education in China.

Contemporary Foundations for Teaching English as an Additional Language Polina Vinogradova

2020-10-29 This engaging volume on English as an Additional Language (EAL), argues persuasively for the importance of critical participatory pedagogies that embrace multilingualism and multimodality in the field of TESOL. It highlights the role of the TESOL profession in teaching for social justice and advocacy and explores how critical participatory pedagogies translate into English language teaching and teacher education around the world. Bringing together diverse scholars in the field and practicing English language teachers, editors Polina Vinogradova and Joan Kang Shin present 10 thematically organized units that demonstrate that language teaching pedagogy must be embedded in the larger sociocultural contexts of teaching and learning to be successful. Each unit covers one pedagogical approach and includes three case studies to illustrate how English language teachers across the world implement these approaches in their classrooms. The chapters are supplemented by discussion questions and a range of practical sources for further exploration. Addressing established and emerging areas of TESOL, topics covered include: Critical and postmethod pedagogies Translingualism Digital literacy and multiliteracies Culturally responsive pedagogy Advocacy Featuring educators implementing innovative approaches in primary, secondary, and tertiary contexts across borders, *Contemporary Foundations for Teaching English as an Additional Language* is an ideal text for methods and foundational courses in TESOL and will appeal to in-service and preservice English language teachers as well as students and teacher educators in TESOL

and applied linguistics.

Technical Communication. Perspectives for the Eighties, Part 2 1981

Exchanging Writing, Exchanging Cultures Sarah Warshauer Freedman 1994 What can teachers in British and American inner-city schools learn from each other about literacy training? To explore this question, Sarah Warshauer Freedman and her British colleagues set up a writing exchange that matched classes from four middle and high schools in the San Francisco Bay area with their London equivalents. *Exchanging Writing, Exchanging Cultures* offers concrete lessons to school reformers, policymakers, and classroom teachers about the value and effectiveness of different approaches to teaching writing. Freedman goes beyond the specific subject matter of this study, looking anew at Vygotsky's and Bakhtin's theories of social interaction and addressing the larger questions of the relationship between culture and education.
