Frying of Food Dimitrios Boskou 2016-04-19 Frying of Food is the first reference to examine frying of food from the point of view of changes occurring to biologically-active constituents and the effects of such changes on the stability, performance and nutritive value of frying oil. It focuses on the nature of the frying media and discusses changes to non-glyceride components, especially nutritive and non-utritive antioxidants. This important resource concentrates mainly on two factors that influence the deterioration of a fat at elevated temperatures: the nature of the heated fat and the presence of oxidation retardants, especially those naturally occurring in oils or obtained from natural sources. Discussions include important biologically active ingredients present in oils and fats (such as antioxidant vitamins and carotenoids) and minor constituents (such as phytosterols, phospholipids and hydrocarbons), which appear to affect the performance of a heated oil and/or

may also be categorized as functional. Frying of Food also discusses olar phenolic compounds, which have an impact on the stability of oils at high temperatures. Food and lipid chemists, food technologists and product developers involved in the processing of foods by frying, and to those involved in fat and oil research, in quality assessment of heated fats, and in improving dietary fat intake profiles will find this book valuable.

Worst Pills, Best Pills Sid M. Wolfe 2009-04-14 "More than 100,000 people a year die in American hospitals from adverse reactions to medication, making drug reactions one of the leading causes of death in this country, researchers are reporting today..." -- Journal of the American Medical Association study, as quoted in The New York Times It is no longer a secret that adverse drug reactions can be dangerous or even fatal, or that doctors often prescribe two relatively safe drugs -- which may cause a life-threatening interaction if taken together. THIS IS THE BOOK THAT TELLS YOU WHAT OTHER PILL BOOKS WON'T ABOUT YOUR MEDICATION! Top-selling drugs that are among the 160 Do Not Use Drugs discussed inside: Ultram Darvoset-N Lopid Desogen & OrthoCept Elavil Ativan Restoril Flexeril Valium Bentyl Entex LA Glucophage Macrobid Patients fill more than 80 million prescriptions a year for these drugs! Consumer advocate Sidney M. Wolfe, M.D., director of Public Citizen's Health Research Group, has thoroughly revised and updated this accessible, indispensable bestseller that alerts you to the potential risks of hundreds of medications available today. Worst Pills, Best Pills gives you the information you need to become actively involved in caring for yourself -- by asking your doctor smart questions about the drugs prescribed for you. Arranged by disease/condition, it offers chapters on adverse drug reactions, alphabetical indexes listing pills by their brand and generic names, new information about commonly used drugs, guidelines for helping you to say "no" if your doctor prescribes a drug you should not take, and safer alternative choices. Worst Pills, Best Pills also includes startling information about certain drugs that can actually cause depression, hallucinations or psychoses, sexual dysfunction, dementia, auto accidents, insomnia, parkinsonism, and more. Caution: Call your doctor before stopping the use of any drug.

No other text and package offers a teaching and learning environment as rich and complete.

Manual del técnico en farmacia y parafarmacia. Test del temario general María José García Bermejo 2009-11

World Health Statistics 2008 World Health Organization 2008 This annual edition presents the most recent statistics since 1990 of over 80 health indicators for WHO's 193 Member States. This fourth edition includes an expanded set of over 76 key indicators and a section with 10 highlights in global health statistics in the past year. This book has been collated from publications and databases of WHO's technical programmes and regional offices. The core set of indicators was selected on the basis of relevance for global health, availability and quality of data, and accuracy and comparability of estimates. The statistics for the indicators are based on an interactive process of data collection, compilation, quality assessment, and estimation between WHO technical programmes and its Member States. In this process, WHO strives to maximize accessibility, accuracy, comparability, and transparency of country health statistics. In addition to national statistics, this publication presents statistics on the inequalities in health outcomes and interventions coverage within countries, disaggregated by urban/rural setting, wealth/assets, and educational level. Such statistics are primarily derived from the analysis of household surveys and are only available for a limited number of countries.

Nutrition and Development BISWAS M.. 1985 The links between nutrition and national development are complex, and developmental policies are often implemented without an appreciation of their nutritional implications. This long-needed study clarifies this relationship and examines the impact of government policy on nutrition. Nine chapters, written by experts with broad experience in policy formulation and implementation, consider the nature of malnutrition, the impact of research and development on food supply, the effect of increased industrialization on agricultural output, and the need to integrate nutrition, and health and population programs. Two final chapters present case studies of India and Indonesia.

Primeros auxilios 2ª edición 2021 PURIFICACIÓN DOLORES Conocer lo que no debemos hacer en primeros auxilios es tan importante como saber lo que sí podemos y debemos hacer. Este libro desarrolla los contenidos del módulo profesional de Primeros Auxilios, transversal para las familias y los Ciclos Formativos a través de los cuales se obtienen los siguientes títulos: Sanidad - -- Técnico en Farmacia y Parafarmacia. --- Técnico Superior en Higiene Bucodental. Servicios Socioculturales y a la Comunidad --- Técnico Superior en Animación Sociocultural y Turística. --- Técnico en Atención a Personas en Situación de Dependencia. --- Técnico Superior en Educación Infantil. --- Técnico Superior en Integración Social. --- Técnico Superior en Mediación Comunicativa. --- Técnico Superior en Promoción de Igualdad de Género. Esta nueva edición de Primeros auxilios incorpora las capacidades terminales establecidas por la normativa educativa. Además, ha sido adaptado a las recomendaciones internacionales actualmente vigentes por el Consejo Europeo de Resucitación (ERC) de 2015, ya que debido a la crisis producida por el SARS-CoV-2, solo se ha publicado una normativa sobre la práctica de RCP durante la pandemia de COVID-19, a la cual se hace referencia en este libro. En el texto se describen pormenorizadamente las técnicas más habituales en primeros auxilios. Los contenidos teóricos y prácticos han sido revisados, actualizados y complementados con resúmenes, enlaces web de interés, y gran cantidad de actividades que contribuyen a consolidar los conceptos aprendidos a lo largo de cada unidad. Se trata de una completa guía, que permite al alumnado conocer las técnicas de primeros auxilios que establecen la frontera entre la vida y la muerte en muchas ocasiones. Los autores conforman un equipo multidisciplinar ampliamente experimentado como profesores y autores de otros libros de texto de la familia profesional de Sanidad. Purificación D. Arriaza Romero, licenciada en Farmacia, y en Ciencia y Tecnología de los Alimentos, cuenta con más de 30 años de experiencia docente; Juan Fernando Martínez Atienza, licenciado en Medicina, desempeña su labor como docente desde hace 34 años; Cristina Sánchez Jiménez, diplomada en Enfermería, posee una extensa formación y una amplia experiencia profesional en el área de cuidados críticos.

Social Paediatrics Bengt Lindström 1995 This unique book take a completely fresh approach to child health. The authors address the challenges of child health as embodied in the UN Convention on the Rights of the Child and the positive health targets of WHO's Health for All 2000 initiative. Throughout the book they use these as a theme around which to examine the effects of adverse social, political, environmental, and family influences on child health. Social Paediatrics provides an essential theoretical and philosophical framework for those wishing to face the challenge of enhancing life quality for all children and gives practical guidelines for all involved in child health issues. It is an indispensable source of information for every pediatrician.

The Court Midwife Justine Siegemund 2007-11-01 First published in 1690, *The Court Midwife* made Justine Siegemund (1636-1705) the spokesperson for the art of midwifery at a time when most obstetrical texts were written by men. More than a technical manual, *The Court Midwife* contains descriptions of obstetric techniques of midwifery and its attendant social pressures. Siegemund's visibility as a writer, midwife, and proponent of an incipient professionalism accorded her a status virtually unknown to German women in the seventeenth century. Translated here into English for the first time, *The Court Midwife* contains riveting birthing scenes, sworn testimonials by former patients, and a brief autobiography.

The Last Crypt Fernando Gamboa 2014-08-15 Diver Ulysses Vidal finds a fourteenth-century bronze bell of Templar origin buried under a reef off the Honduras coast. It turns out it's been lying there for more than one century, prior to Christopher Columbus's discovery of America. Driven by curiosity and a sense of adventure, he begins the search for the legendary treasure of the Order of The Temple. Together with a medieval history professor and a daring Mexican archeologist they travel through Spain, the Mali desert, the Caribbean Sea and the Mexican jungle. They face innumerable riddles and dangers, but in the end this search will uncover a much more important mystery. A secret, kept hidden for centuries, which could transform the history of humankind, and the way we understand the Universe.

Patient Engagement Guendalina Graffigna 2016-01-01 Patient engagement should be envisaged as a key priority today to innovate healthcare services delivery and to make it more effective and sustainable. The experience of engagement is a key qualifier of the exchange between the demand (i.e. citizens/patients) and the supply process of healthcare services. To understand and detect the strategic levers that sustain a good quality of patients' engagement may thus allow not only to improve clinical outcomes, but also to increase patients' satisfaction and to reduce the organizational costs of the delivery of services. By assuming a relational marketing perspective, the book offers practical insights about the developmental process of patients' engagement, by suggesting concrete tools for assessing the levels of patients' engagement and strategies to sustain it. Crucial resources to implement these strategies are also the new technologies that should be (1) implemented according to precise guidelines and (2) designed according to a user-centered design process. Furthermore, the book describes possible fields of patients' engagement application by describing the best practices and experiences matured in different fields
