**Political Power and Corporate Control** Peter A. Gourevitch 2010-06-20 Why does corporate governance--front page news with the collapse of Enron, WorldCom, and Parmalat--vary so dramatically around the world? This book explains how politics shapes corporate governance--how managers, shareholders, and workers jockey for advantage in setting the rules by which companies are run, and for whom they are run. It combines a clear theoretical model on this political interaction, with statistical evidence from thirty-nine countries of Europe, Asia, Africa, and North and South America and detailed narratives of country cases. This book differs sharply from most treatments by explaining differences in minority shareholder protections and ownership concentration among countries in terms of the interaction of economic preferences and political institutions. It explores in particular the crucial role of pension plans and financial intermediaries in shaping political preferences for different rules of corporate governance. The countries examined sort into two distinct groups: diffuse shareholding by external investors who pick a board that monitors the managers, and concentrated blockholding by insiders who monitor managers directly. Examining the political coalitions that form among or across management, owners, and workers, the authors find that certain coalitions encourage policies that promote diffuse shareholding, while other coalitions yield blockholding-oriented policies. Political institutions influence the probability of one coalition defeating another.

**The State at Work** Hans-Ulrich Derlien 2009-01-01 Representing the most extensive research on public employment, these two volumes explore the radical changes that have taken place in the configuration of national public services due to a general expansion of public employment that was followed by stagnation and decreases. Part-time employment

and the involvement of women also increased as a component of the public sector and were linked to the most important growth areas such as the educational, health care and personal social services sectors. The two volumes that make up this study shed important insight on these changes. Volume 1 offers a unique internationally comparative multi-dimensional analysis of ten public service systems belonging to different families of major advanced western countries. It contains the most comprehensive and comparable quantitative analyses available anywhere of ten public service systems; Britain, New Zealand, Australia, Canada, the US, Germany, Spain, France, Denmark and Sweden. Volume 2 is a comprehensive analysis of the ten public service systems, with in-depth comparisons of the systems along eight dimensions including central-regional-local government employment proportions and the change of the services since the 1950s with respect to social composition (gender, minorities, elites, career groups). Scholars and professionals in the fields of public administration, politics and economics will find this two-volume compendium informative and practical.

**Academic Strategy** George Keller 1983-03 Alone among America's major institutions, colleges and universities have traditionally refused to adopt modern management and planning. Now they have entered a perilous new era of declining enrollments, inflated costs, and shifting academic priorities. The result: higher education is going through a planning and management revolution. This path breaking book describes in detail the nature and dimensions of education's dramatic reversal and the reasons behind it. It examines the new role of strategic planning and the resulting changes in the role of professors, trustees, and college presidents. It describes how colleges and universities can introduce the latest planning and management methods for their own benefit.

"This legal system was established & passed on to future generations as a common law by Leke Dukagjini, a co-fighter of the legendary Skenderbeg." "The 'Besa' or the 'word of honor' as stated in THE CODE OF LEKE DUKAGJINI which means peace & protection to those whom it is given, has become today an

important fighting tool in the political struggle of Kosovo's Albanians against Serb oppression."--Victor Meier, *The Frankfurter Allgemeine Zeitung*. "The legal Code of the Albanians known by them for a thousand years, is one of the most original in the history of mankind. Among the basic pillars of this code are the equality of men before the code & the non-abuse of justice." [Ethics and Public Administration](#) H George Frederickson 2015-03-04 "Ethics and Public Administration" refutes the arguments that administrative ethics cannot be studied in an empirical manner and that empirical analysis can deal only with the trivial issues in administrative ethics. Within a theoretical perspective, the authors qualify their findings and take care not to over-generalise results. The findings are relevant to the practice of public administration. Specific areas addressed include understanding public corruption, ethics as control, and ethics as administration and policy

**Sourcebook on Criminal Law** Michael T. Molan 2001 The second edition of the Criminal Law Sourcebook has been significantly expanded in order to provide law students with a

comprehensive selection of key materials drawn from law reports, statutes, Law Commission Consultation Papers and Reports, and Home Office publications. The materials reflect the range of topics taught on the vast majority of undergraduate and CPE criminal law modules, and provide a platform from which the reader can embark upon a more critical evaluation of both theory and doctrine. Extensive extracts are included from a number of recent landmark rulings, including decisions by the House of Lords in *B v DPP* (defence of mistake), *R v Smith* (objective test for the defence of provocation), *R v Hinks* (whether the recipient of a gift can be a thief), and *R v Powell and Daniels*; *R v English* (scope of accessorial liability for murder), and the Court of Appeal's ruling in *In Re A* (conjoined twins). Recent statutory initiatives that have been incorporated include the Protection from Harassment Act 1997, the Criminal Justice (Terrorism and Conspiracy) Act 1998, and the Sexual Offences (Amendment) Act 2000. The impact of the Human Rights Act 1998, in so far as it relates to substantive criminal law, is also covered. Substantial extracts are provided from all relevant Law Commission and Home Office law reform publications. In addition to the draft Criminal Code Bill, materials have been selected dealing with reform of sexual offences, consent, conspiracy to defraud, deception offences, offences against the person, accessorial liability and involuntary manslaughter.

**A Girl in Exile** Ismail Kadare 2018-01-01 A New York Times Book Review Editors' Choice "Erotic, paranoiac and lightly fantastical." —The Wall Street Journal "Ismail Kadare's readers are astonished every year when the Nobel committee overlooks him. . . . A Girl in Exile, published in Albanian in 2009, may rekindle the worldwide hopes." —The New York Times Book Review During the bureaucratic machinery of Albania's 1945-1991 dictatorship, playwright Rudian Stefa is called in for questioning by the Party Committee. A girl—Linda B.—has been found dead, with a signed copy of his latest book in her possession. He soon learns that Linda's family, considered suspect, was exiled to a small town far from the capital. Under the influence of a paranoid regime, Rudian finds himself swept along on a surreal quest to discover what really happened to Linda B. "At a time when parts of the world are indulging nostalgia for communism, Kadare's novel confronts the infuriating impossibility of art in an autocratic, anti-individualist system." —The Washington Post "A Girl in Exile confirms Kadare to be the best writer at work today who remembers—almost aggressively so, refusing to forget—European totalitarianism." —The New Republic

Everyday Life in the Balkans David W. Montgomery 2018-11-26 Everyday Life in the Balkans gathers the work of leading scholars across disciplines to provide a broad overview of the countries of Albania, Bosnia and Herzegovina, Bulgaria, Croatia, Greece, Kosovo, Macedonia, Romania, Serbia, and Turkey. This region has long been characterized as a place of instability and political turmoil, from World War I, through the Yugoslav Wars, and even today as debate continues over issues such as the influx of refugees or the expansion of the European Union. However, the work gathered here moves beyond the images of war and post-socialist stagnation which dominate Western media coverage of the region to instead focus on the lived experiences of the people in these countries. Contributors consider a wide range of

issues including family dynamics, gay rights, war memory, religion, cinema, fashion, and politics. Using clear language and engaging examples, *Everyday Life in the Balkans* provides the background context necessary for an enlightened conversation about the policies, economics, and culture of the region.

**Teaching and the Case Method** Carl Roland Christensen 1987 *Teaching and the Case Method* delves into the special role of teacher and students in the case method learning process. Schools that want to use the case method more effectively can use this book to teach groups of faculty how to apply case method techniques. For the first time, too, a book about case method teaching attempts to show how the method can be applied in a liberal arts setting. A liberal arts module in the book presents an innovative program for instructors who want to experiment with discussion teaching in traditional arts and science areas. The book focuses on a wide range of knotty problems faced by most instructors, experienced or new, creating an opportunity for them to learn from each other. It's main purpose is to provide a rich opportunity for both professional school and liberal arts instructors to develop their own discussion leadership skills, and to further the process of learning for both themselves and their students. **Functional Metabolism** Kenneth B. Storey 2005-02-25 *Functional Metabolism of Cells* is the first comprehensive survey of metabolism, offering an in-depth examination of metabolism and regulation of carbohydrates, lipids, and amino acids. It provides a basic background on metabolic regulation and adaptation as well as the chemical logic of metabolism, and covers the interrelationship of metabolism to life processes of the whole organism. The book lays out a structured approach to the metabolic basis of disease, including discussion of the normal pathways of metabolism, altered pathways leading to disease, and use of molecular genetics in diagnosis and treatment of disease. It also takes a unique comparative approach in which human metabolism is a reference for metabolism in microorganisms and plant design, and presents novel coverage of development and aging, and human health and animal adaptation. The final chapter reviews the past and future promise of new genetic approaches to treatment and bioinformatics. This, the most exhaustive treatment of metabolism currently available, is a useful text for advanced undergraduates and graduates in biochemistry, cell/molecular biology, and biomedicine, as well as biochemistry instructors and investigators in related fields.

*A Manual of Hebrew Poetics* Luis Alonso Schökel 1988 "This manual closes a circle which began almost thirty-five years ago (November, 1954) with the beginning of work on a doctoral dissertation defended at the Pontifical Biblical Institute in April, 1957 (published in Spanish in 1962). During three decades of teaching and writing the author has kept an active interest in poetics and stylistics and the resulting accumulated knowledge has been concentrated in the present manual. The primary purpose of the book is not to serve as a source of information about facts and authors but rather to initiate the reader into the stylistic analysis of poetry. To obtain information and to classify it the reader can turn to recent works (Watson), earlier works (Knig, Hempel), or reprinted works (Bullinger). Among the poetic techniques discussed are sound and sonority, rhythm, imagery, figures of speech, dialogue and monologue, development and composition"--Page 4 of cover.

Advanced methods for solution of electromagnetic scattering problems and new data processing techniques are also presented. Readers will come to appreciate that GPR is a safe, advanced, non destructive and noninvasive imaging technique that can be effectively used for the inspection of composite structures and the performance of diagnostics relevant to the entire life cycle of civil engineering works.

**The Last Superpower Summits** Svetlana Savranskaya 2016-11-01 This book publishes for the first time in print every word the American and Soviet leaders – Ronald Reagan, Mikhail Gorbachev, and George H.W. Bush – said to each other in their superpower summits from 1985 to 1991. Obtained by the authors through the Freedom of Information Act in the U.S., from the Gorbachev Foundation and the State Archive of the Russian Federation in Moscow, and from the personal donation of Anatoly Chernyaev, these previously Top Secret verbatim transcripts combine with key declassified preparatory and after-action documents from both sides to create a unique interactive documentary record of these historic highest-level talks – the conversations that ended the Cold War. The summits fueled a process of learning on both sides, as the authors argue in contextual essays on each summit and detailed headnotes on each document. Geneva 1985 and Reykjavik 1986 reduced Moscow's sense of threat and

unleashed Reagan's inner abolitionist. Malta 1989 and Washington 1990 helped dampen any superpower sparks that might have flown in a time of revolutionary change in Eastern Europe, set off by Gorbachev and by Eastern Europeans (Solidarity, dissidents, reform Communists). The high level and scope of the dialogue between these world leaders was unprecedented, and is likely never to be repeated.
