The Early Latin Verb System Wolfgang David Cirilo de Melo 2007-09-27 This is the first comprehensive treatment of Latin extra-paradigmatic verb forms, that is, verb forms which cannot easily be assigned to any particular tense in the Latin verbal system. In order to see what functions such forms fulfil, one has to compare their usage to that of the regular verb forms. In Part 1, Wolfgang de Melo outlines the usage of regular verb forms, which, surprisingly, has not always been described adequately in the standard grammars. In Part 2, the central part of the book, he compares the usage of the extra-paradigmatic verb forms to that of the regular ones, restricting himself to Archaic Latin (roughly before 100 BC); here he makes many new and unexpected discoveries. In Part 3, de Melo shows how synchronic usage can help us to reconstruct earlier stages of the language which are not attested; he also points out that, while most of the extra-paradigmatic forms die out after 100 BC, some survive - and that such survival is by no means a matter of chance.

Decentralization and Intrastate Struggles Kristin M. Bakke 2015-06-04 There is no one-size-fits-all decentralized fix to deeply divided and conflict-ridden states. One of the hotly debated policy prescriptions for states facing self-determination demands is some form of decentralized governance - including regional autonomy arrangements and federalism - which grants minority groups a degree of self-rule. Yet the track record of existing decentralized states suggests that these have widely divergent capacity to contain conflicts within their borders. Through in-depth case studies of Chechnya, Punjab and Québec, as well as a statistical cross-country analysis, this book argues that while policy, fiscal approach, and political decentralization can, indeed, be peace-preserving at times, the effects of these institutions are conditioned by traits of the societies they (are meant to) govern. Decentralization may help preserve peace in one country or in one region, but it may have just the opposite effect in a country or region with different ethnic

and economic characteristics.

World Investment Report 2020 United Nations Conference on Trade and Development (UNCTAD) 2020-07-15 The 30th edition of the World Investment Report looks at the prospects for foreign direct investment and international production during and beyond the global crisis triggered by the COVID-19 (coronavirus) pandemic. The Report not only projects the immediate impact of the crisis on investment flows, but also assesses how it could affect a long-term structural transformation of international production. The theme chapter of the Report reviews the evolution of international production networks

over the past three decades and examines the configuration of these networks today. It then projects likely course changes for the next decade due to the combined effects of the pandemic and pre-existing megatrends, including the new industrial revolution, the sustainability imperative and the retreat of laissez faire policies. The system of international production underpins the economic growth and development prospects of most countries around the world. Governments worldwide will need to adapt their investment and development strategies to a changing international production landscape. At the request of the UN General Assembly, the Report has added a dedicated section on investment in the Sustainable Development Goals, to review global progress and propose possible courses of action.

Neem National Research Council 1992-02-01 The neem tree, one of the most promising of all plants, may eventually benefit every person on the planet. Probably no other plant yields as many varied products or has as many exploitable by-products. Indeed, as foreseen by some scientists, this tree may usher in a new era in pest control; provide millions with inexpensive medicines; cut the rate of population growth; and perhaps even reduce erosion, deforestation, and the excessive temperature of an overheated globe. On the other hand, although the enthusiasm may be justified, it is largely founded on exploratory investigations and empirical and anecdotal evidence. The purpose of this book is to marshal the various facts about this little-known species, to help illuminate its future promise, and to speed realization of its potential.

Dictionary Of Word Roots Donald Borrer 1960-09-01 One of the outstanding problems of the biologist, whether he be beginning student or specialists, is that of understanding technical terms. The best way to understand and remember technical terms is to understand first their component parts, or roots. This dictionary has been designed primarily to meet the needs of the beginning student, the medical student, and the taxonomist, but it should be of value to all biologists.

Robinson Crusoe Illustrated Daniel Defoe 2020-08-09 Robinson Crusoe is a novel by Daniel Defoe, first published on 25 April 1719. The first edition credited the work's protagonist Robinson Crusoe as its author, leading many readers to believe he was a real person and the book a travelogue of true incidents. Epistolary, confessional, and didactic in form, the book is presented as an autobiography of the title character (whose birth name is Robinson Kreutznaer)-a castaway who spends 28 years on a remote tropical desert island near Trinidad, encountering cannibals, captives, and mutineers, before ultimately being rescued. The story has been thought to be based on the life of Alexander Selkirk, a Scottish castaway who lived for four years on a Pacific island called "Más a Tierra", now part of Chile, which was renamed Robinson Crusoe Island in 1966

The State of the World's Land and Water Resources for Food and Agriculture Food and Agriculture Organization of the United Nations 2013-06-17 The State of the World's Land and Water Resources for Food and Agriculture is FAO's first flagship publication on the global status of land and water resources. It is an 'advocacy' report, to be published every three to five years, and targeted at senior level decision makers in agriculture as well as in other sectors. SOLAW is aimed at sensitizing its target audience on the

status of land resources at global and regional levels and FAO's viewpoint on appropriate recommendations for policy formulation. SOLAW focuses on these key dimensions of analysis: (i) quantity, quality of land and water resources, (ii) the rate of use and sustainable management of these resources in the context of relevant socio-economic driving factors and concerns, including food security and poverty, and climate change. This is the first time that a global, baseline status report on land and water resources has been made. It is based on several global spatial databases (e.g. land suitability for agriculture, land use and management, land and water degradation and depletion) for which FAO is the world-recognized data source. Topical and emerging issues on land and water are dealt with in an integrated rather than sectoral manner. The implications of the status and trends are used to advocate remedial interventions which are tailored to major farming systems within different geographic regions.

Automatic Text Simplification Horacio Saggion 2017-04-25 Thanks to the availability of texts on the Web in recent years, increased knowledge and information have been made available to broader audiences. However, the way in which a text is written—its vocabulary, its syntax—can be difficult to read and understand for many people, especially those with poor literacy, cognitive or linguistic impairment, or those with limited knowledge of the language of the text. Texts containing uncommon words or long and complicated sentences can be difficult to read and understand by people as well as difficult to analyze by machines. Automatic text simplification is the process of transforming a text into another text which, ideally conveying the same message, will be easier to read and understand by a broader audience. The process usually involves the replacement of difficult or unknown phrases with simpler equivalents and the

transformation of long and syntactically complex sentences into shorter and less complex ones. Automatic text simplification, a research topic which started 20 years ago, now has taken on a central role in natural language processing research not only because of the interesting challenges it possesses but also because of its social implications. This book presents past and current research in text simplification, exploring key issues including automatic readability assessment, lexical simplification, and syntactic simplification. It also provides a detailed account of machine learning techniques currently used in simplification, describes full systems designed for specific languages and target audiences, and offers available resources for research and development together with text simplification evaluation techniques.

Global Trends 2030 National Intelligence Council (U.S.) 2012 This report is intended to stimulate thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories over the next 15 years. As with the NIC's previous Global Trends reports, we do not seek to predict the future, which would be an impossible feat, but instead provide a framework for thinking about possible futures and their implications. In-depth research, detailed modeling and a variety of analytical tools drawn from public, private and academic sources were employed in the production of Global Trends 2030. NIC leadership engaged with experts in nearly 20 countries, from think tanks, banks, government offices and business groups, to solicit reviews of the report.
