Encyclopedia of Educational Psychology Neil J. Salkind 2008-01-17 The field of educational psychology draws from a variety of diverse disciplines including human development across the life span, measurement and statistics, learning and motivation, and teaching. And within these different disciplines, many other fields are featured including psychology, anthropology, education, sociology, public health, school psychology, counseling, history, and philosophy. In fact, when taught at the college or university level, educational psychology is an ambitious course that undertakes the presentation of many different topics all tied together by the theme of how the individual can best function in an "educational" setting, loosely defined as anything from pre-school through adult education. Educational psychology can be defined as the application of what we know about learning and motivation, development, and measurement and statistics to educational settings (both school- and community-based).

Building Teachers: A Constructivist Approach to Introducing Education David Jerner Martin 2013-06-25

Designed from the ground up with a constructivist framework, BUILDING TEACHERS: A

CONSTRUCTIVIST APPROACH TO INTRODUCING EDUCATION, 2nd Edition helps future teachers create their own understanding of education. As the authors address the key topics generally covered in an introductory book, they encourage readers to develop their own understandings by connecting their prior knowledge, experiences, and biases with new experiences to which they will be exposed during the course. Highlights of the new edition include stronger standards integration and expanded material on diversity and technology. By interacting with the materials presented, rather than merely memorizing the book's content, readers learn what teaching is all about in an exploratory, inquiring, constructivist-based manner. In turn, they can help the children in their classrooms learn meaningfully. Available with InfoTrac Student Collections <http://goengage.com/infotrac>. Testing Teacher Candidates National Research Council 2001-10-19 Americans have adopted a reform agenda for their schools that calls for excellence in teaching and learning. School officials across the

nation are hard at work targeting instruction at high levels for all students. Gaps remain, however, between the nation's educational aspirations and student achievement. To address these gaps, policy makers have recently focused on the qualifications of teachers and the preparation of teacher candidates. This book examines the appropriateness and technical quality of teacher licensure tests currently in use, evaluates the merits of using licensure test results to hold states and institutions of higher education accountable for the quality of teacher preparation and licensure, and suggests alternatives for developing and assessing beginning teacher competence. Teaching is a complex activity. Definitions of quality teaching have changed and will continue to change over time as society's values change. This book provides policy makers, teacher testers, and teacher educators with advice on how to use current tests to assess teacher candidates and evaluate teacher preparation, ensuring that America's youth are being taught by the most qualified candidates.
