What We Are Becoming Greg Giberson 2010 Greg Giberson and Tom Moriarty have collected a rich volume that offers a state-of-the-field look at the question of the undergraduate writing major, a vital issue for compositionists as the discipline continues to evolve. *What We Are Becoming* provides an indispensable resource for departments and WPAs who are building undergraduate majors. Contributors to the volume address a range of vital questions for undergraduate programs, including such issues as the competition for majors within departments, the job market for undergraduates, varying focuses and curricula of such majors, and the formation of them in departments separate from English. Other chapters discuss the importance of flexibility, consider arguments for a rhetorical or civic discourse core for the writing major, address the relationship between rhetoric and composition majors, and review the role of multiliteracies in the major. The field of composition has not come to a consensus on the shape, content, or focus of the undergraduate major. But as individual programs develop and refine their curricula, one thing has become clear: we must think about them in ways that go beyond our particular circumstances, theorize them in ways that secure their place on our campuses and in our discipline for years to come. *What We Are Becoming* is an effort to do just that.

Rereading Schleiermacher: Translation, Cognition and Culture Teresa Seruya 2015-11-30 This book celebrates the bicentenary of Schleiermacher's famous Berlin conference "On the

Different Methods of Translating" (1813). It is the product of an international Call for Papers that welcomed scholars from many international universities, inviting them to discuss and illuminate the theoretical and practical reception of a text that is not only arguably canonical for the history and theory of translation, but which has moreover never ceased to be present both in theoretical and applied Translation Studies and remains a mandatory part of translator training. A further reason for initiating this project was the fact that the German philosopher and theologian Friedrich Schleiermacher, though often cited in Translation Studies up to the present day, was never studied in terms of his real impact on different domains of translation, literature and culture.

Powerful Prose R. L. Victoria Pöhls 2021-10-31 What makes a reading experience »powerful«? This volume brings together literary scholars, linguists, and empirical researchers to elucidate the effects and reader responses to investigate just that. The thirteen contributions theorize this widely-used, but to date insufficiently studied notion, and provide insights into the therefore still mysterious-seeming power of literary fiction. The collection investigates a variety of stylistic as well as readerly and psychological features responsible for short- and long-term effects - topics of great interest to those interested or specialized in literary studies and narratology, (cognitive) stylistics, empirical literary studies and reader response theory.

Empirical Wonder Riccardo Capoferro 2010 "Empirical Wonder" focuses on the emergence of the fantastic in seventeenth- and eighteenth-century British culture. To do so, it preliminarily formulates an inclusive theory of the fantastic centering on nineteenth- and twentieth-century genres. The origins of such genres, this study argues, reside in the epistemological shift that attended the rise of empiricism, and their formal and historical identity becomes fully visible against the backdrop of pre-modern culture. While in pre-modern world-views no clear-cut distinction between the natural and the super- or the non-natural existed, the new epistemology entailed the emergence of boundaries between the empirical and the non-empirical, which determined, on the level of literary production, the opposition between the realistic and the non-realistic. Along with these boundaries, however,

emerged the need to overcome them. In the seventeenth century, the religious supernatural and the existence of monsters were increasingly being questioned by modern science, and a variety of attempts were made to enact a mediation between what was perceived as unmistakably real and the problematic phenomena that were threatened by the empirical outlook: apparition narratives were used, for instance, to persuade skeptics of the presence of otherworldly beings, and travelogues often presented monsters as if they were empirical entities. Most of these attempts became soon incompatible with scientific culture, more and more normative, so the task of mediation was assumed by literature. Apparition narratives, originally conceived as factual texts, were progressively aestheticized; analogously, imaginary voyages grew different from fictionalized travelogues -- the success of Gulliver's Travels resetting the genre's main conventions and establishing a distinctly fictional model. Both apparition narratives and imaginary voyages emerged as self-consciously literary, that is, aesthetic, genres, bridging the gap between the empirical and the non-empirical. The origins of the fantastic ended when its mediatory task gave way to other concerns. Although on a residual level the mediation between the empirical and the non-empirical persisted, the fantastic's main preoccupations changed: in imaginary voyages its distinctive devices were used to dramatize or validate colonial practices, and Gothic fiction disconnected itself from the moral framework typical of apparition narratives.

Phenomenology to the Letter Philippe P. Haensler 2020-11-23 Regarding philosophical importance, Edmund Husserl is arguably "the" German export of the early twentieth century. In the wake of the linguistic turn(s) of the humanities, however, his claim to return to the "Sachen selbst" became metonymic for the neglect of language in Western philosophy. This view has been particularly influential in post-structural literary theory, which has never ceased to attack the supposed "logophobie" of phenomenology. "Phenomenology to the Letter. Husserl and Literature" challenges this verdict regarding the poetological and logical implications of Husserl's work through a thorough re-examination of his writing in the context of literary theory, classical rhetoric, and modern art. At issue is an approach to phenomenology and literature that does not merely coordinate the two discourses but explores their mutual implication. Contributions to the volume attend to the interplay between phenomenology and literature (both fiction and poetry), experience and language, as well as images and embodiment. The volume is the first of its kind to chart a phenomenological approach to literature and literary approach to phenomenology. As such it stands poised to make a novel contribution to literary studies and philosophy.

The Cambridge Companion to Xenophon Michael A. Flower 2016-12-22 This Companion, the first dedicated to the philosopher and historian Xenophon of Athens, gives readers a sense of why he has held such a prominent place in literary and political culture from antiquity to the present and has been a favourite author of individuals as diverse as Machiavelli, Thomas Jefferson, and Leo Tolstoy. It also sets out the major problems and issues that are at stake in the study of his writings, while simultaneously pointing the way forward to newer methodologies, issues, and questions. Although Xenophon's historical, philosophical, and technical works are usually studied in isolation because they belong to different modern genres, the emphasis here is on themes that cut across his large and varied body of writings. This volume is accessible to students and general readers, including those previously unfamiliar with Xenophon, and will also be of interest to scholars in various fields.

Empire of Magic Geraldine Heng 2003 Empire of Magic offers a genesis and genealogy for medieval romance and the King Arthur legend through the history of Europe's encounters

with the East in crusades, travel, missionizing, and empire formation. It also produces definitions of "race" and "nation" for the medieval period and posits that the Middle Ages and medieval fantasies of race and religion have recently returned. Drawing on feminist and gender theory, as well as cultural analyses of race, class, and colonialism, this provocative book revises our understanding of the beginnings of the nine hundred-year-old cultural genre we call romance, as well as the King Arthur legend. Geraldine Heng argues that romance arose in the twelfth century as a cultural response to the trauma and horror of taboo acts -- in particular the cannibalism committed by crusaders on the bodies of Muslim enemies in Syria during the First Crusade. From such encounters with the East, Heng suggests, sprang the fantastical episodes featuring King Arthur in Geoffrey of Monmouth's chronicle *The History of the Kings of England*, a work where history and fantasy collide and merge, each into the other, inventing crucial new examples and models for romances to come. After locating the rise of romance and Arthurian legend in the contact zones of East and West, Heng demonstrates the adaptability of romance and its key role in the genesis of an English national identity. Discussing Jews, women, children, and sexuality in works like the romance of Richard Lionheart, stories of the saintly Constance, Arthurian chivalric literature, the legend of Prester John, and travel narratives, Heng shows how fantasy enabled audiences to work through issues of communal identity, race, color, class and alternative sexualities in socially sanctioned and safe modes of cultural discussion in which pleasure, not anxiety, was paramount. Romance also engaged with the threat of modernity in the late medieval period, as economic, social, and technological transformations occurred and awareness grew of a vastly enlarged world beyond Europe, one encompassing India, China, and Africa. Finally, Heng posits, romance locates England and Europe within an empire of magic and knowledge that surveys the world and makes it intelligible -- usable -- for the future. *Empire of Magic* is expansive in scope, spanning the eleventh to the fifteenth centuries, and detailed in coverage, examining various types of romance -- historical, national, popular, chivalric, family, and travel romances, among others -- to see how cultural fantasy responds to changing crises, pressures, and demands in a number of different ways. Boldly controversial, theoretically sophisticated, and historically rooted, *Empire of Magic* is a dramatic restaging of the role romance played in the culture of a period and world in ways that suggest how cultural fantasy still functions for us today.
