**The Shape of Ancient Thought** Thomas C. McEvilley 2012-02-07 This revolutionary study by the renowned classical philologist reveals the interplay of Greek and Indian thought at the roots of Western culture. Thomas C. McEvilley's magisterial work demonstrates that Eastern and Western civilizations have not always had separate, autonomous metaphysical schemes, but have mutually influenced each other over a long period of time. Examining ancient trade routes, imperialist movements, and migration currents, he shows how some of today's key philosophical ideas circulated freely in the triangle between Greece, India, and Persia, leading to an intense metaphysical interchange between Greek and Indian cultures. While scholars have sensed a philosophical kinship between Eastern and Western cultures for many decades, *The Shape of Ancient Thought* is the first study to provide the empirical evidence. Covering a period ranging from 600 B.C. until the era of Neoplatonism and a geographical expanse reaching across the ancient world, McEvilley explores the key philosophical paradigms of these cultures, such as Monism, Pluralism, and reincarnation, to reveal striking similarities between the two metaphysical systems. Based on 30 years of intense intellectual inquiry and research and on hundreds of early historical, philosophical, spiritual, and Buddhist texts, the study offers a scope and an interdisciplinary perspective that has no equal in the scholarly world.

*The Creative South* Andrea Acri 2022-04-12 This edited volume programmatically reconsiders the creative contribution of the littoral and insular regions of Maritime Asia to shaping new paradigms in the Buddhist and Hindu art and architecture of the mediaeval Asian world. Far from being a mere southern conduit for the maritime circulation of Indic religions, in the period from ca. the 7th to the 14th century

those regions transformed across mainland and island polities the rituals, icons, and architecture that embodied these religious insights with a dynamism that often eclipsed the established cultural centres in Northern India, Central Asia, and mainland China. This collective body of work brings together new research aiming to recalibrate the importance of these innovations in art and architecture, thereby highlighting the cultural creativity of the monsoon-influenced Southern rim of the Asian landmass. "Although Maritime Asia in mediaeval times was not as densely populated as the agrarian hinterland, Asia's coasts were highly urbanized. The region from southern India to south China was a heterogeneous blend of cultures, leavened with a strong interest in trade. This cosmopolitan society afforded plentiful opportunities for artists to find patrons and develop individual styles and aesthetic sensibilities. In the bustling ports of Asia's south coast, rulers sought to embellish their prestige and attract foreign merchants by sponsoring the development of monumental complexes and centres of learning and debate. These educational institutions attracted teachers from all over Asia, and in their cloisters they developed new intellectual frameworks which were reflected in works of art and architecture. Scholars moved frequently by sea, influencing and being influenced by other foreigners such as Japanese and central Asians who were also attracted to these places. This very variety has hindered scholarly research in the past. This volume contributes to the endeavour to show how Maritime Asia was not an incoherent jumble of misunderstood influences from better-known civilizations; there was a pattern to this creativity, which the authors in this collection clarify for us. The maritime world of Asia may have lain on the margins of the land, but it provided a physical and intellectual medium through which artistic ideas from east and west flowed freely. Maritime Asia also made significant original contributions which hold their own with those of the hinterland of the Asian continent. Unconstrained by the burden of static hierarchical courts, the peoples of Maritime Asia built on the inspiration provided by a hybrid society to demonstrate a high degree of artistic originality while testing but not breaking the link with conventional iconography."-- Professor John Miksic, Department of Southeast Asian Studies, Faculty of Arts and Social Sciences, National University of Singapore (NUS) "The collective objective of this two-volume work is to give substance to the oft cited mantra that mediaeval maritime Southeast Asia was as much an innovative contributor to, as a recipient, in the cultural conversations that took place across the Bay of Bengal and South China Sea. In bracketing these studies between the 7th and 14th centuries, the editors have drawn into focus two key traditions that are explicated in texts, ritual art and architecture and religious landscapes of this period: tantric Buddhism and esoteric Shaivism. A great strength of these studies is this focus, for which the editors are to be commended. The chapters contain much that represents significant milestones in building new understanding in the field, including overdue recognition of the importance of Southeast Asian esoteric Buddhist practice in shaping Chinese Buddhism. Nowhere did the architects of the religious landscape of early Southeast Asia think of themselves as being on the periphery, or as outsiders, looking in. Rather, they knowingly imbued their tirthas and sacred centres with the same authority as those in India and created religious edifices that were on occasions beyond India's experience. I highly commend this publication to anyone with an interest in bringing a wider lens to the study of Indian esoteric religious practices and to understanding the relationship of early Hindu-Buddhist Southeast Asia to the wider Asian world." -- John Guy, Senior Curator of South and Southeast Asian Art, The Metropolitan Museum of Art, New York "The Creative South is a rich compendium of scholarship concerning the religious art of Southeast Asia and its ties to India in the period beginning in the 8th century. It was a time when merchants were crisscrossing the seas from India to China and when advocates of innovative doctrines and rituals were finding ready support among the rulers of the varied kingdoms. From the identification of images embraced by the seafarers to the mysteries of the fire shrines in Cambodian temples, from the funerary beliefs of Odisha to the unique character of the Javanese Ramayana, these eighteen studies provide fresh understandings of the patterns of reception and innovation." -- Hiram Woodward, Mr. and Mrs. Thomas Quincy Scott Curator of Asian Art Emeritus, The Walters Art Museum

*Through the Northern Looking Glass* Lorelei A. Lambert 1996 These Northern Native Women survive in spite of the harshness of their lives in the boreal forest and tundra. [They] care for and deliver newborn infants far from cities, clinics, hospitals, malls, and pharmacies...Throughout history, women have healed one another. Among Native Peoples, oral histories and traditional storytelling have always been essential to cultural survival. In this book, thirteen Northern Native women relate their experiences as survivors of breast cancer. They speak about how they adapted to the disease, and look in particular at the ties they have built with family, friends, and their environment. The book also examines the clashing and blending of medical technology with traditional Native healing methods. An unusual and unique book.

*The Archaeology of Myth* N. Wyatt 2017-07-05 Myth as a category is often explicitly denied as being present in the Bible. Studies of Israelite religion take a largely historical approach. 'The Archaeology of Myth' highlights the importance of mythological categories in discussing any religion, and especially Israelite religion. The essays explore key biblical narratives and themes - Jacob's dream, the story of Dinah and Shechem, the seventy sons of Athirat, the old men of Deuteronomy - tracing their development from primitive forms to biblical text. The book offers a theoretical analysis of the biblical treatment of myth and its role in the shaping of memories and values.

Historical Biblical Archaeology and the Future Thomas Evan Levy 2016-04-08 Joint winner of the 2011 Biblical Archaeology Society Publication Award in the category "Best Scholarly Book on Archaeology" The archaeology of the Holy Land is undergoing major change. 'Historical Biblical Archaeology and the Future' describes the paradigm shift brought about by objective science-based dating methods, geographic information systems, anthropological models, and digital technology tools. The book serves as a model for how researchers can investigate the relationship between ancient texts (both sacred and profane) and the archaeological record. Influential archaeologists and biblical scholars examine a range of texts, materials and cultures: the Vedas and India; the Homeric legends and Greek Classical Archaeology; the Sagas and Icelandic archaeology; Islamic Archaeology; and the Umayyad, Abbasid, and Ayyubid periods. The groundbreaking essays offer a foundation for future research in biblical archaeology, ancient Jewish history and biblical studies.

*Harlem's Theaters* Adrienne Macki Braconi 2015-10-31 Honorable Mention, 2016 Errol Hill Book Award for Outstanding Scholarship in African American Theater, Drama and/or Performance Based on a vast amount of archival research, Adrienne Macki Braconi's illuminating study of three important community-based theaters in Harlem shows how their work was essential to the formation of a public identity for African Americans and the articulation of their goals, laying the groundwork for the emergence of the Civil Rights movement. Macki Braconi uses textual analysis, performance reconstruction, and audience reception to examine the complex dynamics of productions by the Krigwa Players, the Harlem Experimental Theatre, and the Negro Theatre of the Federal Theatre Project. Even as these theaters demonstrated the extraordinary power of activist art, they also revealed its limits. The stage was a site in which ideological and class differences played out, theater being both a force for change and a collision of contradictory agendas. Macki Braconi's book alters our understanding of the Harlem Renaissance, the roots of the Civil Rights movement, and the history of community theater in America.

The Scramble for the Amazon and the "Lost Paradise" of Euclides da Cunha Susanna B. Hecht 2013-05-14

The fortunes of the late nineteenth century's imperial and industrial powers depended on a single raw material—rubber—with only one source: the Amazon basin. And so began the scramble for the Amazon—a decades-long conflict that found Britain, France, Belgium, and the United States fighting with and against the new nations of Peru, Bolivia, and Brazil for the forest's riches. In the midst of this struggle, Euclides da Cunha, engineer, journalist, geographer, political theorist, and one of Brazil's most celebrated writers, led a survey expedition to the farthest reaches of the river, among the world's most valuable, dangerous, and little-known landscapes. *The Scramble for the Amazon* tells the story of da Cunha's terrifying journey, the unfinished novel born from it, and the global strife that formed the backdrop for both. Haunted by his broken marriage, da Cunha trekked through a beautiful region thrown into chaos by guerrilla warfare, starving migrants, and native slavery. All the while, he worked on his masterpiece, a nationalist synthesis of geography, philosophy, biology, and journalism he named the *Lost Paradise*. Da Cunha intended his epic to unveil the Amazon's explorers, spies, natives, and brutal geopolitics, but, as Susanna B. Hecht recounts, he never completed it—his wife's lover shot him dead upon his return. At once the biography of an extraordinary writer, a masterly chronicle of the social, political, and environmental history of the Amazon, and a superb translation of the remaining pieces of da Cunha's project, *The Scramble for the Amazon* is a work of thrilling intellectual ambition.

History of the Caucasus Christoph Baumer 2021-08-26 "Rich and illuminating." *Literary Review A* landscape of high mountains and narrow valleys stretching from the Black to the Caspian Seas, the Caucasus region has been home to human populations for nearly 2 million years. In this richly illustrated 2-volume series, historian and explorer Christoph Baumer tells the story of the region's history through to the present day. It is a story of encounters between many different peoples, from Scythians, Turkic and Mongol peoples of the East to Greeks and Romans from the West, from Indo-European tribes from the West as well as the East, and to Arabs and Iranians from the South. It is a story of rival claims by Empires and nations and of how the region has become home to more than 50 languages that can be heard within its borders to this very day. This first volume charts the period from the emergence of the earliest human populations in the region – the first known human populations outside Africa – to the Seljuk conquests of 1050CE. Along the way the book charts the development of Neolithic, Iron and Bronze Age cultures, the first recognizable Caucasian state and the arrival of a succession of the great transnational Empires, from the Greeks, the Romans and the Armenian to competing Christian and Muslim conquerors. *The History of the Caucasus: Volume 1* also includes more than 200 full colour images and maps bringing the changing cultures of these lands vividly to life.
