Teaching in the Fourth Industrial Revolution Armand Doucet 2018-02-19 In this visionary book, written by six internationally recognized Global Teacher Prize finalists, the authors create a positive and hope-filled template for the future of education. They address the hard moral, ethical and pedagogical questions facing education today so that progress can serve society, rather than destroying it from within our classrooms. This blueprint for education finally brings forward what has always been missing in education reform: a strong collective narrative with authentic examples from teachers on the front line. It is a holistic, personalized approach to education that harnesses the disruptions of the Fourth Industrial Revolution to better shape the future for the next generation, and ensure that every child can benefit from the ongoing transformations. A great read for anyone who has an interest in educating our youth for these uncertain times, highlighting why teachers will always matter.

Building a Bridge to the 18th Century Neil Postman 2011-06-08 At a time when we are reexamining our values, reeling from the pace of change, witnessing the clash between good instincts and "pragmatism," dealing with the angst of a new millennium, Neil Postman, one of our most distinguished observers of contemporary society, provides for us a source of guidance and inspiration. In Building a Bridge to the Eighteenth Century he revisits the Enlightenment, that great flowering of ideas that provided a humane direction for the future -- ideas that formed our nation and that we would do well to embrace anew. He turns our attention to Goethe, Voltaire, Rousseau, Diderot, Kant, Edward Gibbon, Adam Smith, Thomas Paine, Jefferson, and Franklin, and to their then-radical thinking about inductive science, religious and political freedom, popular education, rational commerce, the nation-state, progress, and happiness. Postman calls for a future connected to traditions that provide sane authority and meaningful purpose -- as opposed to an overreliance on technology and an increasing disregard for the lessons of history. And he argues passionately for specific new guidelines in the education of our children, with renewed emphasis on developing the intellect as successfully as we are developing a computer-driven world. Witty, provocative, and brilliantly reasoned, Building a Bridge to the Eighteenth Century is Neil Postman's most radical,

and most commonsensical, book yet.

Zero to One Peter Thiel 2014-09-16 #1 NEW YORK TIMES BESTSELLER • "This book delivers completely new and refreshing ideas on how to create value in the world."—Mark Zuckerberg, CEO of Meta "Peter Thiel has built multiple breakthrough companies, and *Zero to One* shows how."—Elon Musk, CEO of SpaceX and Tesla The great secret of our time is that there are still uncharted frontiers to explore and new inventions to create. In *Zero to One*, legendary entrepreneur and investor Peter Thiel shows how we can find singular ways to create those new things. Thiel begins with the contrarian premise that we live in an age of technological stagnation, even if we're too distracted by shiny mobile devices to notice. Information technology has improved rapidly, but there is no reason why progress should be limited to computers or Silicon Valley. Progress can be achieved in any industry or area of business. It

comes from the most important skill that every leader must master: learning to think for yourself. Doing what someone else already knows how to do takes the world from 1 to n, adding more of something familiar. But when you do something new, you go from 0 to 1. The next Bill Gates will not build an operating system. The next Larry Page or Sergey Brin won't make a search engine. Tomorrow's champions will not win by competing ruthlessly in today's marketplace. They will escape competition altogether, because their businesses will be unique. Zero to One presents at once an optimistic view of the future of progress in America and a new way of thinking about innovation: it starts by learning to ask the questions that lead you to find value in unexpected places.

The Bridge to Brilliance Nadia Lopez 2017-11-07 Be inspired by the magnetic young principal who "stands on the front line of the fight to educate America's children." (Brandon Stanton, author of Humans of New York) and the book that Essence calls "Essential reading." In 2010, Nadia Lopez started her middle-grade public school, Mott Hall Bridges Academy, in one of America's poorest communities, in a record heat wave—and crime wave. Everything was an uphill battle—to get the school approved, to recruit faculty and students, to solve a million new problems every day, from violent crime to vanishing supplies—but Lopez was determined to break the downward spiral that had trapped too many inner-city children. The lessons came fast: unengaged teachers, wayward students, and the educational system itself, rarely in tune with the already disadvantaged and underprepared. Things were at a low ebb for everyone when one of her students told a photographer that his principal, "Ms. Lopez," was the person who most influenced his life. The posting on Brandon Stanton's Humans of New York site was the pebble that started a lucky landslide for Lopez and her team. Lopez found herself in the national spotlight and headed for a meeting with President Obama, as well as the beneficiary of a million-dollar campaign for the school, to fund her next dream: a field trip for her students to visit another school—Harvard. The Bridge to Brilliance is a book filled with common sense and caring that will carry her message to communities and classrooms far from Brooklyn. As she says, modestly, "There are hundreds of Ms. Lopezes around this country doing good work for kids. This honors all of them."

The Cave José Saramago 2003-10-15 An unassuming family struggles to keep up with the ruthless pace of progress in "a genuinely brilliant novel" from a Nobel Prize winner (Chicago Tribune). A Los Angeles Times Best Book of the Year and a New York Times Notable Book Cipriano Algor, an elderly potter, lives with his daughter Marta and her husband Marçal in a small village on the outskirts of The Center, an imposing complex of shops, apartments, and offices. Marçal works there as a security guard, and Cipriano drives him to work each day before delivering his own humble pots and jugs. On one such trip, he is told not to make any more deliveries. People prefer plastic, apparently. Unwilling to give up his craft, Cipriano tries his hand at making ceramic dolls. Astonishingly, The Center places an order for hundreds, and Cipriano and Marta set to work—until the order is cancelled and the penniless trio must move from the village into The Center. When mysterious sounds of digging emerge from beneath their new apartment, Cipriano and Marçal investigate; what they find transforms the family's life, in a novel that is both "irrepressibly funny" (The Christian Science Monitor) and a "triumph" (The Washington Post Book World). "The struggle of the individual against

bureaucracy and anonymity is one of the great subjects of modern literature, and Saramago is often matched with Kafka as one of its premier exponents. Apt as the comparison is, it doesn't convey the warmth and rueful human dimension of novels like *Blindness* and *All the Names*. Those qualities are particularly evident in his latest brilliant, dark allegory, which links the encroaching sterility of modern life to the parable of Plato's cave . . . [a] remarkably generous and eloquent novel." —Publishers Weekly Translated from the Portuguese by Margaret Jull Costa

For White Folks Who Teach in the Hood... and the Rest of Y'all Too Christopher Emdin 2017-01-03 A New York Times Best Seller Merging real stories with theory, research, and practice, a prominent scholar offers a new approach to teaching and learning for every stakeholder in urban education. Drawing on his own experience of feeling undervalued and invisible in classrooms as a young man of color and merging his experiences with more than a decade of teaching and researching in urban America, award-winning educator Christopher Emdin offers a new lens on an approach to teaching and learning in urban schools. *For White Folks Who Teach in the Hood...and the Rest of Y'all Too* is the much-needed antidote to traditional top-down pedagogy and promises to radically reframe the landscape of urban education for the better. He begins by taking to task the perception of urban youth of color as unteachable, and he challenges educators to embrace and respect each student's culture and to reimagine the classroom as a site where roles are reversed and students become the

experts in their own learning. Putting forth his theory of Reality Pedagogy, Emdin provides practical tools to unleash the brilliance and eagerness of youth and educators alike—both of whom have been typecast and stymied by outdated modes of thinking about urban education. With this fresh and engaging new pedagogical vision, Emdin demonstrates the importance of creating a family structure and building communities within the classroom, using culturally relevant strategies like hip-hop music and call-and-response, and connecting the experiences of urban youth to indigenous populations globally. Merging real stories with theory, research, and practice, Emdin demonstrates how by implementing the “Seven C’s” of reality pedagogy in their own classrooms, urban youth of color benefit from truly transformative education. For *White Folks Who Teach in the Hood...and the Rest of Y’all Too* has been featured in *MotherJones.com*, *Education Week*, *Weekend All Things Considered* with Michel Martin, *Diverse: Issues in Higher Education*, *PBS NewsHour.com*, *Slate*, *The Washington Post*, *Scholastic Administrator Magazine*, *Essence Magazine*, *Salon*, *ColorLines*, *Ebony.com*, *Huffington Post Education*

Principles Ray Dalio 2018-08-07 #1 New York Times Bestseller “Significant...The book is both instructive and surprisingly moving.” —The New York Times Ray Dalio, one of the world’s most successful investors and entrepreneurs, shares the unconventional principles that he’s developed, refined, and used over the past forty years to create unique results in both life and business—and which any person or organization can adopt to help achieve their goals. In 1975, Ray Dalio founded an investment firm, Bridgewater Associates, out of his two-bedroom apartment in New York City. Forty years later, Bridgewater has made more money for its clients than any other hedge fund in history and grown into the fifth most important private company in the United States, according to *Fortune* magazine. Dalio himself has been named to *Time* magazine’s list of the 100 most influential people in the world. Along the way, Dalio discovered a set of unique principles that have led to Bridgewater’s exceptionally effective culture, which he describes as “an idea meritocracy that strives to achieve meaningful work and meaningful relationships through radical transparency.” It is these principles, and not anything special about Dalio—who grew up an ordinary kid in a middle-class Long Island neighborhood—that he believes are the reason behind his success. In *Principles*, Dalio shares what he’s learned over the course of his remarkable career. He argues that life, management, economics, and investing can all be systemized into rules and understood like machines. The book’s hundreds of practical lessons, which are built around his cornerstones of “radical truth” and “radical transparency,” include Dalio laying out the most effective ways for individuals and organizations to make decisions, approach challenges, and build strong teams. He also describes the innovative tools the firm uses to bring an idea meritocracy to life, such as creating “baseball cards” for all employees that distill their strengths and weaknesses, and employing computerized decision-making systems to make believability-weighted decisions. While the book brims with novel ideas for organizations and institutions, *Principles* also offers a clear, straightforward approach to decision-making that Dalio believes anyone can apply, no matter what they’re seeking to achieve. Here, from a man who has been called both “the Steve Jobs of investing” and “the philosopher king of the financial universe” (*CIO* magazine), is a rare opportunity to gain proven advice unlike anything you’ll find in the conventional business press.

In the Shadow of the Ivory Tower Davarian L Baldwin 2021-03-30 Across America, universities have become big businesses—and our cities their company towns. But there is a cost to those who live in their shadow. Urban universities play an outsized role in America's cities. They bring diverse ideas and people together and they generate new innovations. But they also gentrify neighborhoods and exacerbate housing inequality in an effort to enrich their campuses and attract students. They maintain private police forces that target the Black and Latinx neighborhoods nearby. They become the primary employers, dictating labor practices and suppressing wages. In the Shadow of the Ivory Tower takes readers from Hartford to Chicago and from Phoenix to Manhattan, revealing the increasingly parasitic relationship between universities and our cities. Through eye-opening conversations with city leaders, low-wage workers tending to students' needs, and local activists fighting encroachment, scholar Davarian L. Baldwin makes clear who benefits from unchecked university power—and who is made vulnerable. In the Shadow of the Ivory Tower is a wake-up call to the reality that higher education is no longer the ubiquitous public good it was once thought to be. But as Baldwin shows, there is an alternative vision for urban life, one that necessitates a more equitable relationship between our cities and our universities.

Three Cups of Tea Greg Mortenson 2006-03-02 The astonishing, uplifting story of a real-life Indiana Jones and his humanitarian campaign to use education to combat terrorism in the Taliban's backyard Anyone who despairs of the individual's power to change lives has to read the story of Greg Mortenson, a homeless mountaineer who, following a 1993 climb of Pakistan's treacherous K2, was inspired by a chance encounter with impoverished mountain villagers and promised to build them a school. Over the next decade he built fifty-five schools—especially for girls—that offer a balanced education in one of the most isolated and dangerous regions on earth. The Prince of the Marshes Rory Stewart 2007-02-01 An adventurous diplomat's "engrossing and often darkly humorous" memoir of working with Iraqis after the fall of Saddam Hussein (Publishers Weekly). In August 2003, at the age of thirty, Rory Stewart took a taxi from Jordan to Baghdad. A Farsi-speaking British diplomat who had recently completed an epic walk from Turkey to Bangladesh, he was soon appointed deputy governor of Amarah and then Nasiriyah, provinces in the remote, impoverished marsh regions of southern Iraq. He spent the next eleven months negotiating hostage releases, holding elections, and splicing together some semblance of an infrastructure for a population of millions teetering on the brink of civil war. The Prince of the Marshes tells the story of Stewart's year. As a participant he takes us inside the occupation and beyond the Green Zone, introducing us to a colorful cast of Iraqis and revealing the complexity and fragility of a society we struggle to understand. By turns funny and harrowing, moving and incisive, it amounts to a unique portrait of heroism and the tragedy that intervention inevitably courts in the modern age.

Banks's seminal science fiction series, *The Culture*. *Consider Phlebas* introduces readers to the utopian conglomeration of human and alien races that explores the nature of war, morality, and the limitless bounds of mankind's imagination. The Idirans fought for their Faith; the Culture for its moral right to exist. Principles were at stake. There could be no surrender. Within the cosmic conflict, an individual crusade. Deep within a fabled labyrinth on a barren world, a Planet of the Dead proscribed to mortals, lay a fugitive Mind. Both the Culture and the Idirans sought it. It was the fate of Horza, the Changer, and his motley crew of unpredictable mercenaries, human and machine, actually to find it, and with it their own destruction.

Troublemakers Carla Shalaby 2017-03-07 A radical educator's paradigm-shifting inquiry into the accepted, normal demands of school, as illuminated by moving portraits of four young "problem children" In this dazzling debut, Carla Shalaby, a former elementary school teacher, explores the everyday lives of four young "troublemakers," challenging the ways we identify and understand so-called problem children. Time and again, we make seemingly endless efforts to moderate, punish, and even medicate our children, when we should instead be concerned with transforming the very nature of our institutions, systems, and structures, large and small. Through delicately crafted portraits of these memorable children—Zora, Lucas, Sean, and Marcus—Troublemakers allows us to see school through the eyes of those who know firsthand what it means to be labeled a problem. From Zora's proud individuality to Marcus's open willfulness, from Sean's struggle with authority to Lucas's tenacious imagination, comes profound insight—for educators and parents alike—into how schools engender, exclude, and then try to erase trouble, right along with the young people accused of making it. And although the harsh disciplining of adolescent behavior has been called out as part of a school-to-prison pipeline, the children we meet in these pages demonstrate how a child's path to excessive punishment and exclusion in fact begins at a much younger age. Shalaby's empathetic, discerning, and elegant prose gives us a deeply textured look at what noncompliance signals about the environments we require students to adapt to in our schools. Both urgent and timely, this paradigm-shifting book challenges our typical expectations for young children and with principled affection reveals how these demands—despite good intentions—work to undermine the pursuit of a free and just society.

How The Other Half Learns Robert Pondiscio 2020-06-02 An inside look at America's most controversial charter schools, and the moral and political questions around public education and school choice. The promise of public education is excellence for all. But that promise has seldom been kept for low-income children of color in America. In How the Other Half Learns, teacher and education journalist Robert Pondiscio focuses on Success Academy, the network of controversial charter schools in New York City founded by Eva Moskowitz, who has created something unprecedented in American education: a way for large numbers of engaged and

ambitious low-income families of color to get an education for their children that equals and even exceeds what wealthy families take for granted. Her results are astonishing, her methods unorthodox. Decades of well-intended efforts to improve our schools and close the "achievement gap" have set equity and excellence at war with each other: If you are wealthy, with the means to pay private school tuition or move to an affluent community, you can get your child into an excellent school. But if you are poor and black or brown, you have to settle for "equity" and a lecture--about fairness. About the need to be patient. And about how school choice for you only damages public schools for everyone else. Thousands of parents have chosen Success Academy, and thousands more sit on waiting lists to get in. But Moskowitz herself admits Success Academy "is not for everyone," and this raises uncomfortable questions we'd rather not ask, let alone answer: What if the price of giving a first-rate education to children least likely to receive it means acknowledging that you can't do it for everyone? What if some problems are just too hard for schools alone to solve?

The Worth of the University Richard C. Levin 2013-04-15 DIV Published on the occasion of Richard C. Levin's retirement as president of Yale University, this captivating collection of speeches and essays from the past decade reflects both his varied intellectual passions and his deep commitment to university life and leadership. Whether discussing the economic implications of climate change or speaking to an incoming class of Yale freshmen, he argues for the vital importance of scholarship and the critical role that universities play in educating students and promoting the overall well-being of our society. This collection is a sequel to *The Work of the University*, which contained the principal writings from Levin's first decade as Yale's president, and it enunciates many of the same enduring themes: forging a strong partnership with the city of New Haven, rebuilding Yale's physical infrastructure, strengthening science and engineering, and internationalizing the university. But this companion volume also captures the essence of university leadership. In addressing topics as varied as his personal sources of inspiration, the development of Asian universities, and the university's role in promoting innovation and economic growth, Levin challenges the reader to be more engaged, more creative, more innovative, and above all, a better global citizen. Throughout, his commitment to and affection for Yale shines through. /div

Reclaiming Our Health Michelle A. Gourdine 2011-04-26 “An interactive and empowering book” to help African American men and women create a new vision of better health and navigate the health care system (BET.com). According to the federal Office of Minority Health, African Americans “are affected by serious diseases and health conditions at far greater rates than other Americans.” In fact, African Americans suffer an estimated 85,000 excess deaths every year from diseases we know how to prevent: heart disease, stroke, cancer, high blood pressure, and diabetes. In this important and accessible book, Dr. Michelle Gourdine provides African Americans with the knowledge and guidance they need to take charge of their wellbeing. *Reclaiming Our Health* begins with an overview of the primary health concerns facing African Americans and explains who is at greatest risk of illness. Expanding on her career and life experiences as an African American physician, Dr. Gourdine presents key insights into the ways African American culture shapes health choices—how beliefs, traditions, and values can influence eating choices, exercise habits, and even the decision to seek medical attention. She translates extensive research into practical information and presents readers with concrete steps for achieving a healthier lifestyle, as well as strategies for navigating the health-care system. This interactive guide with illustrations is a vital resource for every African American on how to live a healthier and more empowered life, and an indispensable handbook for health-care providers, policy makers, and others working to close the health gap among people of color. Says Gourdine, “I wrote this book to empower our community to solve our own health problems and save our own lives.”
