John F. Kennedy and the New Pacific Community, 1961–63 Timothy P. Maga 1990-04-09 Charismatic and committed, John F. Kennedy remains one of the most revered, and most disliked, of US Presidents. Dedicated to changing 'the look' of the American Presidency, Kennedy was also pledged to changing the nature of US foreign policy-making. Victory in the Cold War was possible, he said, and the greatest challenge to that victory was in the Asian/Pacific region. Success there would signal the end of the communist versus capitalist confrontation. America 'can do it', he vowed. This book describes the Kennedy administration's desperate efforts to achieve the impossible dream: an American Cold War victory throughout Asia and the Pacific.

*Post-War Borneo, 1945-1950* Ooi Keat Gin 2013-05-29 This book examines Borneo, both British Borneo – Brunei, Sarawak and North Borneo – and Dutch Borneo in the period 1945-1950. Borneo then was at the crossroads. Following the Japanese Occupation, the likely future status of the various Bornean territories was not at all clear, and the book discusses the various factions and powers, both local and international, who were contending for control in this period. It examines the effects of the Japanese surrender, the impact of the subsequent interregnum and Australian and British military administrations, the reassertion of Dutch control, the struggle for Indonesian independence, and movements for local autonomy, reassertion of ethnic rights, interests and identity. It charts developments throughout this volatile and uncertain period, up to the point at which the newly independent Republic of Indonesia emerged and a more settled period began.

**Civil-Military Relations in Indonesia** Muhamad Haripin 2019-09-23 This book examines military operations other than war (MOOTW) of the Indonesian military in the post-Suharto period and argues that the twin development of democratic consolidation, marked by ‘stable’ civil–military relations from 2004 to 2014 under Susilo Bambang Yudhoyono’s presidency, and internationalization of the military have not yet entirely depoliticized the armed forces. This book shows how peacekeeping, humanitarian assistance and disaster relief, and counter-terror missions have been reinvented by the Indonesian military (Tentara Nasional Indonesia, TNI) to adhere to its politico-institutional interests rather than to divert military attention from politics. In contrast with conventional arguments about the rationale of MOOTW in promoting military professionalism, this book provides the first critical analysis of the development of these missions and correlates them with TNI’s concerted effort to preserve territorial command structure – a military network that parallels the civilian bureaucracy down to the village level. The book argues that the military in Indonesia remains domestically political amidst high intensity of international activism. A detailed investigation of civil–military relations in Indonesia, this book will be of interest to scholars in the fields of Southeast Asian studies and Asian politics, and more generally to those interested in civil–military relations, military politics, and MOOTW.

**Young Soeharto** David Jenkins 2021-05-06 When a reluctant President Sukarno gave Lt Gen Soeharto full executive authority in March 1966, Indonesia was a deeply divided nation, fractured along ideological, class, religious and ethnic lines. Soeharto took a country in chaos, the largest in Southeast Asia, and transformed it into one of the “Asian miracle” economies—only to leave it back on the brink of ruin when he was forced from office thirty-two years later. Drawing on his astonishing range of interviews with leading Indonesian generals, former Imperial Japanese Army officers and men who served in the Dutch colonial army, as well as years of patient research in Dutch, Japanese, British, Indonesian and US archives, David Jenkins brings vividly to life the story of how a socially reticent but exceptionally determined young man from rural Java began his rise to power—an ascent which would be capped by thirty years (1968–98) as President of Indonesia, the fourth most populous nation on earth. Soeharto was one of Asia’s most brutal, most durable, most avaricious and most successful dictators. In the course of examining those aspects of his character, this book provides an accessible, highly readable introduction to the complex, but dramatic and utterly absorbing, social, political, religious, economic and military factors that have shaped, and which continue to shape, Indonesia.

*Gender, Violence and Power in Indonesia* Katharine McGregor 2020-04-06 This book uses an interdisciplinary

approach to chart how various forms of violence – domestic, military, legal and political – are not separate instances of violence, but rather embedded in structural inequalities brought about by colonialism, occupation and state violence. The book explores both case studies of individuals and of groups to examine experiences of violence within the context of gender and structures of power in modern Indonesian history and Indonesia-related diasporas. It argues that gendered violence is particularly important to consider in this region because of its complex history of armed conflict and authoritarian rule, the diversity of people that have been affected by violence, as well as the complexity of the religious and cultural communities involved. The book focuses in particular on textual narratives of violence, visualisations of violence, commemorations of violence and the politics of care.

*The Oxford Handbook of International Law in Asia and the Pacific* Simon Chesterman 2019-09-04 The growing economic and political significance of Asia has exposed a tension in the modern international order. Despite expanding power and influence, Asian states have played a minimal role in creating the norms and institutions of international law; today they are the least likely to be parties to international agreements or to be represented in international organizations. That is changing. There is widespread scholarly and practitioner interest in international law at present in the Asia-Pacific region, as well as developments in the practice of states. The change has been driven by threats as well as opportunities. Transnational issues such as climate change and occasional flashpoints like the territorial disputes of the South China and the East China Seas pose challenges while economic integration and the proliferation of specialized branches of law and dispute settlement mechanisms have also encouraged greater domestic implementation of international norms across Asia. These evolutions join the long-standing interest in parts of Asia (notably South Asia) in post-colonial theory and the history of international law. The Oxford Handbook of International Law in Asia and the Pacific brings together pre-eminent and emerging specialists to analyse the approach to and influence of key states of the region, as well as whether truly 'Asian' trends can be identified and what this might mean for international order.

**The Key to the Asian Miracle** Jose Edgardo Campos 2001-06-07 "Easily the most informed and comprehensive analysis to date on how and why East Asian countries have achieved sustained high economic growth rates, [this book] substantially advances our understanding of the key interactions between the governors and governed in the development process. Students and practitioners alike will be referring to Campos and Root's series of excellent case studies for years to come." Richard L. Wilson, The Asia Foundation Eight countries in East Asia--Japan, South Korea, Taiwan, Hong Kong, Singapore, Thailand, Malaysia, and Indonesia--have become known as the "East Asian miracle" because of their economies' dramatic growth. In these eight countries real per capita GDP rose twice as fast as in any other regional grouping between 1965 and 1990. Even more impressive is their simultaneous significant reduction in poverty and income inequality. Their success is frequently attributed to economic policies, but the authors of this book argue that those economic policies would not have worked unless the leaders of the countries made them credible to their business communities

and citizens. Jose Edgardo Campos and Hilton Root challenge the popular belief that East Asia's high performers grew rapidly because they were ruled by authoritarian leaders. They show that these leaders had to collaborate with various sectors of their population to create an environment that was conducive to sustained growth. This required them to persuade the business community that their investments would not be expropriated and to convince the broader population that their short-term sacrifices would be rewarded in the future. Many of the countries achieved business cooperation by creating consultative groups, which the authors call deliberation councils, to enhance accountability and stability. They also obtained popular support through a variety of wealth-sharing measures such as land reform, worker cooperatives, and wider access to education. Finally, to inhibit favoritism and corruption that would benefit narrow interest groups at the expense of broad-based development, these countries' leaders constructed a competent bureaucracy that balanced autonomy with accountability to serve all interests, including the poor. This important book provides useful lessons about how developing and newly industrialized countries can build institutions to implement growth-promoting policies.

Asia's Cauldron Robert D. Kaplan 2015-01-06 NAMED ONE OF THE BEST BOOKS OF THE YEAR BY FINANCIAL TIMES From Robert D. Kaplan, named one of the world's Top 100 Global Thinkers by Foreign Policy magazine, comes a penetrating look at the volatile region that will dominate the future of geopolitical conflict. Over the last decade, the center of world power has been quietly shifting from Europe to Asia. With oil reserves of several billion barrels, an estimated nine hundred trillion cubic feet of natural gas, and several centuries' worth of competing territorial claims, the South China Sea in particular is a simmering pot of potential conflict. The underreported military buildup in the area where the Western Pacific meets the Indian Ocean means that it will likely be a hinge point for global war and peace for the foreseeable future. In *Asia's Cauldron*, Robert D. Kaplan offers up a vivid snapshot of the nations surrounding the South China Sea, the conflicts brewing in the region at the dawn of the twenty-first century, and their implications for global peace and stability. One of the world's most perceptive foreign policy experts, Kaplan interprets America's interests in Asia in the context of an increasingly assertive China. He explains how the region's unique geography fosters the growth of navies but also impedes aggression. And he draws a striking parallel between China's quest for hegemony in the South China Sea and the United States' imperial adventure in the Caribbean more than a century ago. To understand the future of conflict in East Asia, Kaplan argues, one must understand the goals and motivations of its leaders and its people. Part travelogue, part geopolitical primer, *Asia's Cauldron* takes us on a journey through the region's boom cities and ramshackle slums: from Vietnam, where the superfueled capitalism of the erstwhile colonial capital, Saigon, inspires the geostrategic pretensions of the official seat of government in Hanoi, to Malaysia, where a unique mix of authoritarian Islam and Western-style consumerism creates quite possibly the ultimate postmodern society; and from Singapore, whose "benevolent autocracy" helped foster an economic miracle, to the Philippines, where a different brand of authoritarianism under Ferdinand Marcos led not to economic growth but to decades of corruption and crime. At a time when every day's news seems to contain some new story—large or small—that directly relates to conflicts over the

South China Sea, *Asia's Cauldron* is an indispensable guide to a corner of the globe that will affect all of our lives for years to come. Praise for *Asia's Cauldron* "Asia's Cauldron is a short book with a powerful thesis, and it stands out for its clarity and good sense. . . . If you are doing business in China, traveling in Southeast Asia or just obsessing about geopolitics, you will want to read it."—The New York Times Book Review "Kaplan has established himself as one of our most consequential geopolitical thinkers. . . . [*Asia's Cauldron*] is part treatise on geopolitics, part travel narrative. Indeed, he writes in the tradition of the great travel writers."—The Weekly Standard "Kaplan's fascinating book is a welcome challenge to the pessimists who see only trouble in China's rise and the hawks who view it as malign."—The Economist "Muscular, deeply knowledgeable . . . Kaplan is an ultra-realist [who] takes a non-moralistic stance on questions of power and diplomacy."—Financial Times

*Minority Stages* Josh Stenberg 2019-08-31 *Minority Stages: Sino-Indonesian Performance and Public Display* offers intriguing new perspectives on historical and contemporary Sino-Indonesian performance. For the first time in a major study, this community's diverse performance practices are brought together as a family of genres. Combining fieldwork with evidence from Indonesian, Chinese, and Dutch primary and secondary sources, Josh Stenberg takes a close look at Chinese Indonesian self-representation, covering genres from the Dutch colonial period to the present day. From glove puppets of Chinese origin in East Java and Hakka religious processions in West Kalimantan, to wartime political theatre on Sumatra and contemporary Sino-Sundanese choirs and dance groups in Bandung, this book takes readers on a tour of hybrid and diverse expressions of identity, tracing the stories and strategies of minority self-representation over time. Each performance form is placed in its social and historical context, highlighting how Sino-Indonesian groups and individuals have represented themselves locally and nationally to the archipelago's majority population as well as to Indonesian state power. In the last twenty years, the long political suppression of manifestations of Chinese culture in Indonesia has lifted, and a wealth of evidence now coming to light shows how Sino-Indonesians have long been an integral part of Indonesian culture, including the performing arts. Valorizing that contribution challenges essentialist readings of ethnicity or minority, complicates the profile of a group that is often considered solely in socioeconomic terms, and enriches the understanding of Indonesian culture, Southeast Asian Chinese identities, and transnational cultural exchanges. *Minority Stages* helps counter the dangerous either/or thinking that is a mainstay of ethnic essentialism in general and of Chinese and Indonesian nationalisms in particular, by showing the fluidity and adaptability of Sino-Indonesian identity as expressed in performance and public display.

[World War II and Southeast Asia](#) Gregg Huff 2020-10-22 From December 1941, Japan, as part of its plan to build an East Asian empire and secure oil supplies essential for war in the Pacific, swiftly took control of Southeast Asia. Japanese occupation had a devastating economic impact on the region. Japan imposed country and later regional autarky on Southeast Asia, dictated that the region finance its own occupation, and sent almost no consumer goods. GDP fell by half everywhere in Southeast Asia except Thailand. Famine and forced labour accounted for most of the 4.4 million Southeast Asian civilian deaths under Japanese occupation. In this

ground-breaking new study, Gregg Huff provides the first comprehensive account of the economies and societies of Southeast Asia during the 1941-1945 Japanese occupation. Drawing on materials from 25 archives over three continents, his economic, social and historical analysis presents a new understanding of Southeast Asian history and development before, during and after the Pacific War.

**Politics and the Press in Indonesia** Angela Rose Romano 2003 This book explores the evolving political culture in Indonesia, by discussing the country's dominant political philosophies, then showing how those philosophies affect the working lives of ordinary Indonesian citizens. It focuses in particular on the working lives of news journalists, a group that occupies a strategic social and political position. The author discusses the philosophies of 'Pancasila', the official national ideology, as well as paternalism, integrationism and corporatism. Romano also explores the 32-year period of New Order government and the rapid changes that followed President Suharto's resignation in 1998, concentrating on how the day-to-day workings of the news media are affected by paternalism, corporatism, corruption, and evolution of the prevailing political culture.

Japan's Occupation of Java in the Second World War Ethan Mark 2018-07-12 Japan's Occupation of Java in the Second World War draws upon written and oral Japanese, Indonesian, Dutch and English-language sources to narrate the Japanese occupation of Java as a transnational intersection between two complex Asian societies, placing this narrative in a larger wartime context of domestic, regional, and global crisis. Japan's occupation of Java is here revealed in a radically new and nuanced light, as an ambiguous encounter revolutionary in the degree of mutual interests that drew the two sides together, fascinating and tragic in its evolution, and profound in the legacies left behind. Mark structures his study around a diverse group of Japanese and Indonesians captivated by the wartime vision of a 'Greater Asia.' The book is not only the first transnational study of Japan's wartime occupation of Java, but the first to focus on the Second World War experience in transnational terms 'on the ground' anywhere in Asia. Breaking new ground interpretatively, thematically and narratively, Mark's monumental study is of vital significance for students and scholars of modern Asian and global history. This book is published in partnership with Columbia University's Weatherhead East Asian Institute (<http://weai.columbia.edu/japans-occupation-of-java/>).
