exceeds 70 million. Since the inception of the Library in 1906, nearly 1200 unique volumes have been published, constantly placing the world's greatest books before a large public. A few of these titles proved unpopular and were never reprinted. But most were reprinted dozens of times, packaged in numerous ways, and benefited from updated editorial work and book design over the last century. Terry Seymour has studied and researched every aspect of this great mass of books. He now captures and distills this knowledge in *A Printing History of Everyman's Library 1906-1982*. A critical feature, of course, is to update the various collecting factoids that have emerged since 2005 when his *Guide to Collecting Everyman's Library* was published. The meat of the new book, however, is the Bibliographical Entries section. Each volume that has ever been printed receives its own entry, detailing every printing, each dust jacket variation, any new introductions, updated scarcity numbers, and all relevant notes. Typically an entry contains at least six lines of information, but often much more. In essence, each entry is a story written exclusively about each volume. Armed with this resource, collectors and booksellers can know reliably everything about the Everyman's Library volume that sits on their shelf or is ready to be purchased or sold. They will see how a book fits into the total printing history of that title, and be able to describe and value the book with precision. To further enhance the value of this book, color images illustrate all of the key collecting points. An extensive index of editors, translators and artists is now included. Not just a solo effort, the *Printing History* has been vetted by other expert collectors, ensuring greater accuracy and comprehensiveness.

*Canon Constitution and Canon Change in Children's Literature* Bettina Kümmerling-Meibauer 2016-12-01 This volume focuses on the (de)canonization processes in children's literature, considering the construction and cultural-historical changes of canons in different children's literatures. Chapters by international experts in the field explore a wide range of different children's literatures from Great Britain, Germany, Scandinavia, the Low Countries, Eastern and Central Europe, as well as from Non-European countries such as Australia, Israel, and the United States. Situating the inquiry within larger literary and cultural studies conversations about canonicity, the contributors assess representative authors and works that have encountered changing fates in the course of canon history. Particular emphasis is given to sociological canon theories, which have so far been under-represented in canon research in children's literature. The volume therefore relates historical changes in the canon of children's literature not only to historical changes in concepts of childhood but to more encompassing political, social, economic, cultural, and ideological shifts. This volume's comparative approach takes cognizance of the fact that, if canon formation is an important cultural factor in nation-building processes, a comparative study is essential to assessing transnational processes in canon formation. This book thus renders evident the structural similarities between patterns and strategies of canon formation emerging in different children's literatures.
