**Emerson's English Traits and the Natural History of Metaphor** David LaRocca 2013-09-26 Metaphors are ubiquitous and yet-or, for that very reason-go largely unseen. We are all variously susceptible to a blindness or blurry vision of metaphors; yet even when they are seen clearly, we are left to situate the ambiguities, connotations and contradictions they regularly present-logically, aesthetically and morally. David LaRocca's book serves as a set of 'reminders' of certain features of the natural history of our language-especially the tropes that permeate and define it. As part of his investigation, LaRocca turns to Ralph Waldo Emerson's only book on a single topic, *English Traits* (1856), which teems with genealogical and generative metaphors-blood, birth, plants, parents, family, names and race. In the first book-length study of *English Traits* in over half a century, LaRocca considers the presence of metaphors in Emerson's fertile text-a unique work in his expansive corpus, and one that is

regularly overlooked. As metaphors are encountered in Emerson's book, and drawn from a long history of usage in work by others, a reader may realize (or remember) what is inherent and encoded in our language, but rarely seen: how metaphors circulate in speech and through texts to become the lifeblood of thought.

**The General in the Garden** Adam T. Erby 2015-04-20 The General in the Garden provides an engaging, informative, and richly illustrated introduction to George Washington's landscape at Mount Vernon—arguably the best-documented, best-preserved complex of gardens and grounds to survive from eighteenth-century America. The book's three essays, by Adam T. Erby, J. Dean Norton, and Esther C. White, chronicle Washington's transformation of the estate in the years between the American Revolution and the Constitutional Convention of 1787, the stewardship of its gardens by the Mount Vernon Ladies' Association since 1860, and the archaeology that led to the recent restoration of Washington's showplace upper garden. Mount Vernon assistant curator Adam Erby examines Washington's critical role in developing Mount Vernon's landscape, arguing that the general drew on British design sources and gardening manuals but adapted them to his own circumstances, creating a truly American garden. J. Dean Norton, Mount Vernon's director of horticulture, traces the evolution of the estate's landscape and recreated gardens across the two centuries since Washington's death. And Esther White, Mount Vernon's director of historic preservation and research, shows how groundbreaking archaeological methods facilitated the discovery of Washington-era garden beds and borders of flowers, shrubs, and vegetables in his upper garden—a remarkable find that yielded one of the most significant eighteenth-century garden recreations of our time. Also included is a lavishly illustrated guide to Mount Vernon's landscape features, introducing Washington's beloved estate to a modern audience. This book will appeal to many readers—from students of American history and culture to gardening enthusiasts to Mount Vernon visitors curious to know more about the estate to which George Washington devoted intense and sophisticated care. The World of the American Revolution: A Daily Life Encyclopedia [2 volumes]  
Merril D. Smith 2015-08-28 This two-volume set brings to life the daily thoughts and routines of men and women—rich and poor, of various cultures, religions, races, and beliefs—during a time of great political, social, economic, and legal turmoil. What was life really like for ordinary people during the American Revolution? What did they eat, wear, believe in, and think about? What did they do for fun? This encyclopedia explores the lives of men, women, and children—of European, Native American, and African descent—through the window of social, cultural, and material history. The two-volume set spans the period from 1774 to 1800, drawing on the most current research to illuminate people's emotional lives, interactions, opinions, views, beliefs, and intimate relationships, as well as connections between the individual and the greater world. The encyclopedia features more than 200 entries divided into topical sections, each dealing with a different aspect of cultural life—for example, Arts, Food and Drink, and Politics and Warfare. Each section opens with an introductory essay, followed by A–Z entries on various aspects of the subject area. Sidebars and primary documents enhance the learning experience. Targeting high school and college students, the title supports the American history core curriculum and the current emphasis on social history. Most importantly, its focus on the realities of daily life, rather than on dates and battles, will help students identify with and learn about this formative period of American history. • Provides summaries of what people ate, wore, and read and also includes topics such as apprenticeships, camp life and military training • Covers ordinary routines of daily life, such as cleanliness, use of privies, and menstruation • Starts each thematic section with a brief introduction • Includes primary documents that bring the past to life and are an important resource for students • Offers further reading suggestions after each entry as well as a bibliography of print books, online sources, and relevant films

**Garden Revolution** Larry Weaner 2016-05-18 AHS Book Award winner This lushly-photographed reference is an important moment in horticulture that will be embraced by anyone looking for a better, smarter way to garden. Larry Weaner is an icon in the world of ecological landscape design, and now his revolutionary approach is available to all gardeners. Garden Revolution shows how an ecological approach to planting can lead to beautiful gardens that buck much of conventional gardening's counter-productive, time-consuming practices. Instead of picking the wrong plant and then constantly tilling, weeding, irrigating, and fertilizing, Weaner advocates for choosing plants that are adapted to the soil and climate of a specific site and letting them naturally evolve over time. Allowing the plants to find their own niches, to spread their seed around until they find the microclimate and spot that suits them best, creates a landscape that is vibrant, dynamic, and gorgeous year after year.
