Dalton Trumbo Larry Ceplair 2015-01-13 James Dalton Trumbo (1905--1976) is widely recognized for his work as a screenwriter, playwright, and author, but he is also remembered as one of the Hollywood Ten who opposed the House Un-American Activities Committee. Refusing to answer questions about his prior involvement with the Communist Party, Trumbo sacrificed a successful career in Hollywood to stand up for his rights and defend political freedom. In *Dalton Trumbo*, authors Larry Ceplair and Christopher Trumbo present their extensive research on the famed writer, detailing his work, his membership in the Communist Party, his long campaign against censorship during the domestic cold war, his ten-month prison sentence for contempt of Congress, and his thirteen-year struggle to break the blacklist. The blacklist ended for Trumbo in 1960, when he received screen credits for *Exodus* and *Spartacus*. Just before his death, he received a long-delayed Academy Award for *The Brave One*, and in 1993, he was posthumously given an Academy Award for *Roman Holiday* (1953). This comprehensive biography provides insights into the many notable people with whom Trumbo worked, including Stanley Kubrick, Otto Preminger, and Kirk Douglas, and offers a fascinating look at the life of one of Hollywood's most prominent screenwriters and his battle against persecution.

The 1903 Lowell Lectures Ahti-Veikko Pietarinen 2021-05-10 In three comprehensive volumes, Logic of the Future presents a full panorama of Charles S. Peirce's important late writings. Among the most influential American thinkers, Peirce took his existential graphs to be his greatest contribution to human thought. The manuscripts from 1895–1913, most of which are published here for the first time, testify the

richness and open-endedness of his theory of logic and its applications. They also invite us to reconsider our ordinary conceptions of reasoning as well as the conventional stories told about the evolution of modern logic. This second volume collects Peirce's writings on existential graphs related to his Lowell Lectures of 1903, the annus mirabilis of his that became decisive in the development of the mature theory of the graphical method of logic.

The Last Lecture Randy Pausch 2008-04-08 "We cannot change the cards we are dealt, just how we play the hand."---Randy Pausch A lot of professors give talks titled "The Last Lecture." Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave--"Really Achieving Your Childhood Dreams"--wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because "time is all you have...and you may find one day that you have less than you think"). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.
