**The Midas Touch** Tom Logsdon 2000-11-17 Simple, creative solutions can be worth more than gold. And all of us can learn how to become more creative. All we have to do is master and use the six specific thought processes or "winning strategies" creative individuals instinctively employ when they make major breakthroughs. In this book those winning strategies are arranged on the arc of creativity, which forms the organizing structure for the six middle chapters. The first chapter tells you how to get yourself into the proper frame of mind to become more creative, how to surround yourself with supportive people, and how to persuade them to help you polish and perfect your midas-touch solutions. Each of the six middle chapters opens with a description of a billion-dollar breakthrough made by a single individual armed with one simple, creative solution. The next part describes the specific thought process ("winning strategy") that individual used, and the last part explains how you can use that same thought process in developing solutions to your own personal and professional problems. The final chapter shows you how to polish and refine your most promising solutions and how to entice your colleagues to help you convert them into 24-carat gold. Creative solutions are a jewel-like commodity in today's exciting marketplace of ideas. By mastering and using the six winning strategies on the arc of creativity, you can lead a more stimulating life, help America's competitive posture, and enhance the value of your own career.

**Indra's Net and the Midas Touch** Leslie Paul Thiele 2011-08-19 An exploration of the impact of unintended consequences in an interdependent world and of the opportunities for creativity and community. We live today in a global web of interdependence, connected technologically, economically, politically, and socially. As a result of these expanding and deepening interdependencies, it has become impossible fully to control—or foretell—the effects of our actions. The world is rife with unintended consequences. The first law of human ecology—which declares that we can never do merely one thing—is a truth we ignore at our peril. In *Indra's Net and the Midas Touch*, Leslie Paul Thiele explores the impact of interdependence and unintended consequences on our pursuit of sustainability. Unfortunately, good intentions provide no antidote to the law of unintended consequences, and proffered cures often prove worse than the disease. Biofuels developed for the purpose of reducing carbon emissions, for example, have had the unintended effect of cutting off food supplies to the needy and destroying rain forests. We must fundamentally transform our patterns of thinking and behavior. Thiele offers the intellectual and moral foundations for this transformation, drawing from ecology, ethics, technology, economics, politics, psychology, physics, and metaphysics. Awareness of our interconnectedness, he writes, stimulates creativity and community; it is a profound responsibility and a blessing beyond measure.

**The Triumph of Venus** Jeanne L. Schroeder 2004-02-23 "Central to Schroeder's case is the conviction that reason and passion are two sides of the same coin. Rationality represents the human potential actualized only through desire, she argues; and passion functions only insofar as it preserves the rationality that makes desire possible. Far from being anti-erotic, market relations are, in this analysis, the most basic form of eroticism. Disclosing a fundamental similarity between erotic and economic behavior, *The Triumph of Venus* reveals that, while the former cannot be reduced to the latter, the latter can only be explained in terms of the former. Venus triumphs over the market."--BOOK JACKET.
