Politics of Affect Brian Massumi 2015-08-06 'The capacity to affect and to be affected'. This simple definition opens a world of questions - by indicating an openness to the world. To affect and to be affected is to be in encounter, and to be in encounter is to have already ventured forth. Adventure: far from being enclosed in the interiority of a subject, affect concerns an immediate participation in the events of the world. It is about intensities of experience. What is politics made of, if not adventures of encounter? What are encounters, if not adventures of relation? The moment we begin to speak of affect, we are already venturing into the political dimension of relational encounter. This is the dimension of experience in-the-making. This is the level at which politics is emergent. In these wide-ranging interviews, Brian Massumi explores this emergent politics of affect, weaving between philosophy, political theory and everyday life. The discussions wend their way 'transversally': passing between the tired oppositions which too often encumber thought, such as subject/object, body/mind and nature/culture. New concepts are gradually introduced to remap the complexity of relation and encounter for a politics of emergence: 'differential affective attunement', 'collective individuation', 'micropolitics', 'thinking-feeling', 'ontopower', 'immanent critique'. These concepts are not offered as definitive solutions. Rather, they are designed to move the inquiry still further, for an ongoing exploration of the political problems posed by affect. Politics of Affect offers an accessible entry-point into the work of one of the defining figures of the last quarter century, as well as opening up new avenues for philosophical reflection and political engagement.

In a Different Key John Donvan 2016-01-19 Finalist for the 2017 Pulitzer Prize in General Nonfiction An extraordinary narrative history of autism: the riveting story of parents fighting for their children's civil rights; of doctors struggling to define autism; of ingenuity, self-advocacy, and profound social change. Nearly seventy-five years ago, Donald Triplett of Forest, Mississippi, became the first child diagnosed with autism. Beginning with his family's odyssey, *In a Different Key* tells the extraordinary story of this often misunderstood condition, and of the civil rights battles waged by the families of those who have it. Unfolding over decades, it is a beautifully rendered history of ordinary people determined to secure a place in the world for those with autism—by liberating children from dank institutions, campaigning for their right to go to school, challenging expert opinion on what it means to have autism, and persuading society to accept those who are different. It is the story of women like Ruth Sullivan, who rebelled against a

medical establishment that blamed cold and rejecting “refrigerator mothers” for causing autism; and of fathers who pushed scientists to dig harder for treatments. Many others played starring roles too: doctors like Leo Kanner, who pioneered our understanding of autism; lawyers like Tom Gilhool, who took the families’ battle for education to the courtroom; scientists who sparred over how to treat autism; and those with autism, like Temple Grandin, Alex Plank, and Ari Ne’eman, who explained their inner worlds and championed the philosophy of neurodiversity. This is also a story of fierce controversies—from the question of whether there is truly an autism “epidemic,” and whether vaccines played a part in it; to scandals involving “facilitated communication,” one of many treatments that have proved to be blind alleys; to stark disagreements about whether scientists should pursue a cure for autism. There are dark turns too: we learn about experimenters feeding LSD to children with autism, or shocking them with electricity to change their behavior; and the authors reveal compelling evidence that Hans Asperger, discoverer of the syndrome named after him, participated in the Nazi program that consigned disabled children to death. By turns intimate and panoramic, *In a Different Key* takes us on a journey from an era when families were shamed and children were condemned to institutions to one in which a cadre of people with autism push not simply for inclusion, but for a new understanding of autism: as difference rather than disability.

Histories of Violence Brad Evans 2017-01-15 While there is a tacit appreciation that freedom from violence will lead to more prosperous relations among peoples, violence continues to be deployed for various political and social ends. Yet the problem of violence still defies neat description, subject to many competing interpretations. *Histories of Violence* offers an accessible yet compelling examination of the problem of violence as it appears in the corpus of canonical figures – from Hannah Arendt to Frantz Fanon, Michel Foucault to Slavoj Žižek – who continue to influence and inform contemporary political, philosophical, sociological, cultural, and anthropological study. Written by a team of internationally renowned experts, this is an essential interrogation of post-war critical thought as it relates to violence.

Thought in the Act Erin Manning 2014-05-01 “Every practice is a mode of thought, already in the act. To dance: a thinking in movement. To paint: a thinking through color. To perceive in the everyday: a thinking of the world’s varied ways of affording itself.” –from *Thought in the Act* Combining philosophy and aesthetics, *Thought in the Act* is a unique exploration of creative practice

as a form of thinking. Challenging the common opposition between the conceptual and the aesthetic, Erin Manning and Brian Massumi “think through” a wide range of creative practices in the process of their making, revealing how thinking and artfulness are intimately, creatively, and inseparably intertwined. They rediscover this intertwining at the heart of everyday perception and investigate its potential for new forms of activism at the crossroads of politics and art. Emerging from active collaborations, the book analyzes the experiential work of the architects and conceptual artists Arakawa and Gins, the improvisational choreographic techniques of William Forsythe, the recent painting practice of Bracha Ettinger, as well as autistic writers’ self-descriptions of their perceptual world and the experimental event making of the SenseLab collective. Drawing from the idiosyncratic vocabularies of each creative practice, and building on the vocabulary of process philosophy, the book reactivates rather than merely describes the artistic processes it examines. The result is a thinking-with and a writing-in-collaboration-with these processes and a demonstration of how philosophy co-composes with the act in the making. Thought in the Act enacts a collaborative mode of thinking in the act at the intersection of art, philosophy, and politics.

Non-Representational Theory and the Creative Arts Candice P. Boyd 2019-03-15
This book presents distinct perspectives from both geographically-oriented

creative practices and geographers working with arts-based processes. In doing so, it fills a significant gap in the already sizeable body of non-representational discourse by bringing together images and reflections on performances, art practice, theatre, dance, and sound production alongside theoretical contributions and examples of creative writing. It considers how contemporary art making is being shaped by spatial enquiry and how geographical research has been influenced by artistic practice. It provides a clear and concise overview of the principles of non-representational theory for researchers and practitioners in the creative arts and, across its four sections, demonstrates the potential for non-representational theory to bring cultural geography and contemporary art closer than ever before.

A Grand Gesture Holly Newman 2021-04-13 When Catherine Shreveton was invited to London to make her debut under the auspices of an aunt, her family insisted she go. In a pique, Catherine disguised herself to look as dull and drab as her aunt supposed her to be, and she kept everyone in the dark about her fortune. But Catherine had not counted on the dashing Marquis of Stefton. This nobleman knew she was an heiress, and he had his doubts about her drab appearance. Wouldn't it be a lark, he mused, to gain the little wren entrée into the most fashionable and prominent circles? And so two pretenders had set their traps unaware that love was the prize.

In this subtle yet accessible book, Haidt gives you the key to understanding the miracle of human cooperation, as well as the curse of our eternal divisions and conflicts. If you’re ready to trade in anger for understanding, read The Righteous Mind.

_____ (From the Playboy interview with Jay-Z, April 2003) PLAYBOY: Rap careers are usually over fast: one or two hits, then styles change and a new guy comes along. Why have you endured while other rappers haven't? JAY-Z: I would say that it's from still being able to relate to people. It's natural to lose yourself when you have success, to start surrounding yourself with fake people. In The 48 Laws of Power, it says the worst thing you can do is build a fortress around yourself. I still got the people who grew up with me, my cousin and my childhood friends. This guy right here (gestures to the studio manager), he's my friend, and he told me that one

The True Believer Eric Hoffer 2011-05-10 "Its theme is political fanaticism, with which it deals severely and brilliantly." –New Yorker The famous bestseller with "concise insight into what drives the mind of the fanatic and the dynamics of a mass movement" (Wall St. Journal) by the legendary San Francisco longshoreman. A stevedore on the San Francisco docks in the 1940s, Eric Hoffer wrote philosophical treatises in his spare time while living in the railroad yards. The True Believer—the first and most famous of his books—was made into a bestseller when President Eisenhower cited it during one of the earliest television press conferences. Called a "brilliant and original inquiry" and "a genuine contribution to our social thought" by Arthur Schlesinger, Jr., this landmark in the field of social psychology is completely relevant and essential for understanding the world today as it delivers a visionary, highly provocative look into the mind of the fanatic and a penetrating study of how an individual becomes one.

Always More Than One Erin Manning 2013-01-09 In *Always More Than One*, the philosopher, visual artist, and dancer Erin Manning explores the concept of the "more than human" in the context of movement, perception, and experience. Working from Whitehead's process philosophy and Simondon's theory of individuation, she extends the concepts of movement and relation developed in her earlier work toward the notion of "choreographic thinking." Here, she uses choreographic thinking to explore a mode of perception prior to the settling of experience into established categories. Manning connects this to the concept of "autistic perception," described by autistics as the awareness of a relational field prior to the so-called neurotypical tendency to "chunk" experience into predetermined subjects and objects. Autistics explain that, rather than immediately distinguishing objects—such as chairs and tables and humans—from one another on entering a given environment, they experience the environment as gradually taking form. Manning maintains that this mode of awareness underlies all perception. What we perceive is never first a subject or an object, but an ecology. From this vantage point, she proposes that we consider an ecological politics where movement and relation take precedence over predefined categories, such as the neurotypical and the neurodiverse, or the human and the nonhuman. What would it mean to embrace an ecological politics of collective individuation?

Nineteen Eighty-Four George Orwell 2021-01-09 "Nineteen Eighty-Four: A Novel", often published as "1984", is a dystopian social science fiction novel by English novelist George Orwell. It was published on 8 June 1949 by Secker & Warburg as Orwell's ninth and final book completed in his lifetime. Thematically, "Nineteen Eighty-Four" centres on the consequences of totalitarianism, mass surveillance, and repressive regimentation of persons and behaviours within society. Orwell, himself a democratic socialist, modelled the authoritarian government in the novel after Stalinist Russia. More broadly, the novel examines the role of truth and facts within politics and the ways in

which they are manipulated. The story takes place in an imagined future, the year 1984, when much of the world has fallen victim to perpetual war, omnipresent government surveillance, historical negationism, and propaganda. Great Britain, known as Airstrip One, has become a province of a totalitarian superstate named Oceania that is ruled by the Party who employ the Thought Police to persecute individuality and independent thinking. Big Brother, the leader of the Party, enjoys an intense cult of personality despite the fact that he may not even exist. The protagonist, Winston Smith, is a diligent and skillful rank-and-file worker and Outer Party member who secretly hates the Party and dreams of rebellion. He enters into a forbidden relationship with a colleague, Julia, and starts to remember what life was like before the Party came to power.

A Gesture Life Chang-rae Lee 2000-10-01 The second novel from the critically acclaimed New York Times–bestselling author Chang-rae Lee. His remarkable debut novel was called "rapturous" (The New York Times Book Review), "revelatory" (Vogue), and "wholly innovative" (Kirkus Reviews). It was the recipient of six major awards, including the prestigious Hemingway Foundation/PEN award. Now Chang-rae Lee has written a powerful and beautifully crafted second novel that leaves no doubt about the extraordinary depth and range of his talent. *A Gesture Life* is the story of a proper man, an upstanding citizen who has come to epitomize the decorous values of his New York suburban town. Courteous, honest, hardworking, and impenetrable, Franklin Hata, a Japanese man of Korean birth, is careful never to overstep his boundaries and to make his neighbors comfortable in his presence. Yet as his story unfolds, precipitated by the small events surrounding him, we see his life begin to unravel. Gradually we learn the mystery that has shaped the core of his being: his terrible, forbidden love for a young Korean Comfort Woman when he served as a medic in the Japanese army during World War II. In *A Gesture Life*, Chang-rae Lee leads us with dazzling control through a taut, suspenseful story about love, family, and community—and the secrets we harbor. As in *Native Speaker*, he writes of the ways outsiders conform in order to survive and the price they pay for doing so. It is a haunting, breathtaking display of talent by an acclaimed young author.

The Perfect Mango Erin Manning 2019-02-17 In 1994, at the age of twenty-five, when the "terrible brokenness that comes with sexual assault" was folded deep within her body and thoughts of suicide were always close by, Erin Manning wrote *The Perfect Mango* at an almost feverish pitch: nineteen chapters in nineteen days, a sort of self-rescue operation, where writing became a form of making (and feeling) life otherwise. Throughout those nineteen days, and although not able to fully articulate it to herself at the time, Manning wrote her way into a "composition that asks how else life might be lived." And in the rhythms of that composition, which was also a living, Manning was, and is, able to refuse the category and norm and stillness of "victim" (while still understanding the inheritances of violence) in order to follow instead the more-than-I as well as the joy of the "more-than of experience in the making." Twenty-five years later, Manning allows these earlier writings to find their way back into the world, which is also a way of giving "voice to those moments of messy survival" while also asking us, who share in (and help to bear) those moments as readers, to consider "other ways of listening to the urgency that is living." To (re)publish the book now is to give it a place in the world in a way that honors its force as something that is always beyond anyone's claim to it, even Manning's. In this sense, *The Perfect Mango* invites us, with Manning, to be in excess of ourselves, and also to consider, in Manning's words, "how to create conditions for living beyond humanism's fierce belief that we, the privileged, the neurotypicals, the as-yet-unscathed, the able-bodied, hold the key to all perspectives in the theatre of living." Ultimately, *The Perfect Mango* and Manning's reflections on its composition ask us to consider living "in the fierce celebration of a world invented by those modes of life which tear at the colonial, white, neurotypical fabric of life as we know it." "The Perfect Mango is a book about the body, about learning to see it as an entity that has no end, something that is never permanently marked by the violence of history, that can swim into a new skin. The sexual trauma that haunts this book is being painted and purged across its pages, and the young woman who refuses to remain caught in the capture of trauma is also learning to feed herself, to become a body-being that will endure in new forms and through new forms of mutual making. I know this girl, for she is many. I love this girl, as I love us all—we misfits whose hurt provokes us to live through other styles and modes of becoming-together." (Julietta Singh, "Afterward," *The Perfect Mango*) "How to confront victimization, while refusing the role of the victim? How, after trauma and abuse, can one regain a sense of life's possibilities and plunge headlong into their pursuit, without defensively hardening the boundaries of the self? Without immunizing it against the outside, knowing that it is in the great outside of the world's roil and commotion that potential radically resides – tooth-to-jowl with continued danger? How to grapple with the horrors of the past, without paradoxically binding oneself to them in a Sisyphean attempt to exorcize them through feats of memory and analysis (terminable or interminable)? How, not to own the past, but repossess the future of that past? In *The Perfect Mango*, Erin Manning charts a path of resistance, resilience, and journeying toward health that is starkly different from the currently dominant identity-based strategies. She writes survival, in what can best be described as a fabulatory autobiography that is rooted in real events but opens them up to each other, and out to a different future. The path is signposted with a

motto, implicit here, subsequently expressed in the title of one of her works of philosophy: always more than one. If this is me ... what else? If this is life ... once more!" (Brian Massumi)

Authoring Autism Melanie Yergeau 2017-12-22 In *Authoring Autism* Melanie Yergeau defines neurodivergence as an identity-neuroqueerness—rather than an impairment. Using a queer theory framework, Yergeau notes the stereotypes that deny autistic people their humanity and the chance to define themselves while also challenging cognitive studies scholarship and its reification of the neurological passivity of autistics. She also critiques early intensive behavioral interventions—which have much in common with gay conversion therapy—and questions the ableist privileging of intentionality and diplomacy in rhetorical traditions. Using storying as her method, she presents an alternative view of autistic rhetoricity by foregrounding the cunning rhetorical abilities of autistics and by framing autism as a narrative condition wherein autistics are the best-equipped people to define their experience. Contending that autism represents a queer way of being that simultaneously embraces and rejects the rhetorical, Yergeau shows how autistic people queer the lines of rhetoric, humanity, and agency. In so doing, she demonstrates how an autistic rhetoric requires the reconceptualization of rhetoric's very essence.

Pedagogy, Disability and Communication Michael S. Jeffress 2017-04-28 Research has long substantiated the fact that living with a disability creates significant and complex challenges to identity negotiation, the practice of communication, and the development of interpersonal relationships. Furthermore, individuals without disabilities often lack the knowledge and tools to experience self-efficacy in communicating with their differently-abled peers. So how do these challenges translate to the incorporation of disability studies in a classroom context and the need to foster an inclusive environment for differently-abled students? Bringing together a range of perspectives from communication and disability studies scholars, this collection provides a theoretical foundation along with practical solutions for the inclusion of disability studies within the everyday curriculum. It examines a variety of aspects of communication studies including interpersonal, intercultural, health, political and business communication as well as ethics, gender and public speaking, offering case study examples and pedagogical strategies as to the best way to approach the subject of disability in education. It will be of interest to students, researchers and educators in communication and disability studies as well as scholars of sociology and social policy, gender studies, public health and pedagogy. It will also appeal to anyone who has wondered how to bring about a greater degree of inclusion and ethics within the classroom.

Better Than the Movies Lynn Painter 2021-05-04 A USA TODAY BESTSELLER Perfect for fans of Kasie West and Jenn Bennett, this "sweet and funny" (Kerry Winfrey, author of *Waiting for Tom Hanks*) teen rom-com follows a hopelessly romantic teen girl and her cute yet obnoxious neighbor as they scheme to get her noticed by her untouchable crush. Now that he's back in town, Liz will do whatever it takes to get on his radar—and maybe snag him as a prom date—even befriend Wes Bennet. The annoyingly attractive next-door neighbor might seem like a prime candidate

for romantic comedy fantasies, but Wes has only been a pain in Liz's butt since they were kids. Pranks involving frogs and decapitated lawn gnomes do not a potential boyfriend make. Yet, somehow, Wes and Michael are hitting it off, which means Wes is Liz's in. But as Liz and Wes scheme to get Liz noticed by Michael so she can have her magical prom moment, she's shocked to discover that she likes being around Wes. And as they continue to grow closer, she must reexamine everything she thought she knew about love—and rethink her own ideas of what Happily Ever After should look like.

Discipline and Punish Michel Foucault 2012-04-18 In this brilliant work, the most influential philosopher since Sartre suggests that such vaunted reforms as the abolition of torture and the emergence of the modern penitentiary have merely shifted the focus of punishment from the prisoner's body to his soul.

The Minor Gesture Erin Manning 2016-06-03 In this wide-ranging and probing book Erin Manning extends her previous inquiries into the politics of movement to the concept of the minor gesture. The minor gesture, although it may pass almost unperceived, transforms the field of relations. More than a chance variation, less than a volition, it requires rethinking common assumptions about human agency and political action. To embrace the minor gesture's power to fashion relations, its capacity to open new modes of experience and manners of expression, is to challenge the ways in which the neurotypical image of the human devalues alternative ways of being moved by and moving through the world—in particular what Manning terms "autistic perception." Drawing on Deleuze and Guattari's schizoanalysis and Whitehead's speculative pragmatism, Manning's far-reaching analyses range from fashion to depression to the writings of autistics, in each case affirming the neurodiversity of the minor and the alternative politics it gestures toward.

The Minor Gesture Erin Manning 2016-05-19 In this wide-ranging and probing book Erin Manning extends her previous inquiries into the politics of movement to the concept of the minor gesture. The minor gesture, although it may pass almost unperceived, transforms the field of relations. More than a chance variation, less than a volition, it requires rethinking common assumptions about human agency and political action. To embrace the minor gesture's power to fashion relations, its capacity to open new modes of experience and manners of expression, is to challenge the ways in which the neurotypical image of the human devalues alternative ways of being moved by and moving through the world—in particular what Manning terms "autistic perception." Drawing on Deleuze and Guattari's schizoanalysis and Whitehead's speculative pragmatism, Manning's far-reaching analyses range from fashion to depression to the writings of autistics, in each case affirming the neurodiversity of the minor and the alternative politics it gestures toward.

Politics of Touch Erin Manning 2007 Political philosophy has long been bound by traditional thinking about the body. Through an engagement with the state-centered vocabulary of this discipline, *Politics of Touch* examines the ways in which bodies continually run up against existing political structures. In this groundbreaking work, Erin Manning reconsiders how politics attempts to paralyze the body through the idea of the national body politic. In *Politics of Touch*, Manning develops a new way to conceive the role of the senses, and of touch in particular. Exploring concepts of violence, gender, sexuality, security, democracy, and identity, she traces the ways in which touch informs the body. In an original and expansive analysis of tango — a tactile, rhythmic, and improvisational dance — Manning asserts the necessity of considering the sensing body in motion in order to think about its political implications. With a fresh vision and an original theoretical basis, Manning shows the body as its own ontological category, and in doing so redefines our understanding of the sense of touch in philosophical and political terms.

Relationescapes Erin Manning 2009 With *Relationescapes*, Erin Manning offers a new philosophy of movement challenging the idea that movement is simple displacement in space, knowable only in terms of the actual. Exploring the relation between sensation and thought through the prisms of dance, cinema, art, and new media, Manning argues for the intensity of movement. From this idea of intensity -- the incipency at the heart of movement -- Manning develops the concept of preacceleration, which makes palpable how movement creates relational intervals out of which displacements take form. Discussing her theory of incipient movement in terms of dance and relational movement, Manning describes choreographic practices that work to develop with a body in movement rather than simply stabilizing that body into patterns of displacement. She examines the movement-images of Leni Riefenstahl, Étienne-Jules Marey, and Norman McLaren (drawing on Bergson's idea of duration), and explores the dot-paintings of contemporary Australian Aboriginal artists. Turning to language, Manning proposes a theory of prearticulation claiming that language's affective force depends on a concept of thought in motion. *Relationescapes* takes a "Whiteheadian perspective," recognizing Whitehead's importance and his influence on process philosophers of the late twentieth century -- Deleuze and Guattari in particular. It will be of special interest to scholars in new media, philosophy, dance studies, film theory, and art history.

For a Pragmatics of the Useless Erin Manning 2020-11-06 What has a use in the future, unforeseeably, is radically useless now. What has an effect now is not necessarily useful if it falls through the gaps. In *For a Pragmatics of the Useless* Erin Manning examines what falls outside the purview of already-known functions and established standards of value, not for want of potential but for carrying an excess of it. The figures are various: the infrathin, the artful, proprioceptive tactility, neurodiversity, black life. It is around the latter two that a central refrain echoes: "All black life is neurodiverse life." This is not an equation, but an "approximation of proximity." Manning shows how neurotypicality and whiteness combine to form a normative baseline for existence. Blackness and neurodiversity "schizz" around the baseline, uselessly, pragmatically, figuring a more-than of life living. Manning, in dialogue with Félix Guattari and drawing on the black radical tradition's accounts of black life and the aesthetics of black sociality, proposes a "schizoanalysis" of the more-than, charting a panoply of techniques for other ways of living and learning.
