The Psychedelic Explorer's Guide James Fadiman 2011-05-18 Psychedelics for spiritual, therapeutic, and problem-solving use • Presents practices for safe and successful psychedelic voyages, including the benefits of having a guide and how to be a guide • Reviews the value of psychedelics for healing and self-discovery as well as how LSD has facilitated scientific and technical problem-solving • Reveals how microdosing (ultr-low doeses) improve cognitive functioning, emotional balance, and physical stamina • This year 600,000 people in the U.S. alone will try LSD for the the first time, joining the 23 million who have already experimented with this substance Called "America's wisest and most respected authority on psychedelics and their use," James Fadiman has been involved with psychedelic research since the 1960s. In this guide to the immediate and long-term effects of psychedelic use for spiritual (high dose), therapeutic (moderate dose), and problem-solving (low dose and microdose) purposes, Fadiman outlines best practices for safe, sacred entheogenic voyages learned through his more than 40 years of experience--from the benefits of having a sensitive guide during a session (and how to be one) to the importance of the setting and pre-session intention. Fadiman reviews the newest as well as the neglected research into the psychotherapeutic value of visionary drug use for increased personal awareness and a host of serious medical conditions, including his recent study of the reasons for and results of psychedelic use among hundreds of students and professionals. He reveals new uses for LSD and other psychedelics, including microdosing, extremely low doses, for improved cognitive functioning and emotional balance. Cautioning that psychedelics are not for everyone, he dispels the myths and misperceptions about psychedelics circulating in textbooks and clinics as well as on the internet. Exploring the life-changing experiences of Ram Dass, Timothy Leary, Aldous Huxley, and Huston Smith as well as Francis Crick and Steve Jobs, Fadiman shows how psychedelics, used wisely, can lead not only to healing but also to scientific breakthroughs and spiritual epiphanies.

Blue Horizons Beth Leonard 2006-09-26 Winner Of The National Outdoor Book Award For Literature When Beth Leonard and her partner, Evans Starzinger, returned from a three-year, 35,000 mile circumnavigation, they thought they were done with offshore voyaging. But neither realized how irrevocably they had been changed by their experience, nor how irresistible the siren song of the sea would prove. In comparison, life ashore seemed dull and monochrome, and within months, Beth knew she had to go back to sea in order to remain true to the person she had become. Four years later they set out on their 47-foot aluminum sloop *Hawk* for a journey that lasted six years and took them more than 50,000 miles. They voyaged to Newfoundland, Iceland, Norway, the Caribbean, Ireland, Scotland, Cape Horn, New Zealand, the South Pacific, British Columbia--to the ends of the earth and back. *Blue Horizons* is Beth Leonard's record of that journey. Compiled from her popular columns in *Blue Water Sailing* magazine, which she wrote along the way, *Blue Horizons* is more than an adventure saga, more than the log of an extended passage. As in all great travel writing, it's the product of an insatiable hunger to explore the world, and in so doing to explore one's own soul. It is, says Beth, "about pulling your dreams over the horizon to you, one sail change, one course correction at a time." But this is no dreamer's tale. Beth Leonard is both sailor and writer, well qualified to deal with and describe blue water voyaging. Her observations are as sharp as salt air and her prose as informed as it is insightful and entertaining. Beth also brings to *Blue Horizons* a uniquely feminine perspective, a combination of empathy, charm, and lyric grace. Her pages are suffused with emotion and a strong sense of immediacy. You're with Beth and Evans as *Hawk* pokes into a lonely and deserted outport on Newfoundland's barren northeast coast, and as they await hurricane Lenny in Antigua. And you sympathize as she burrows deep into her tilting berth, seeking that one, elusive interval of comfort that will bring sleep on a pounding windward passage, only to be dashed awake by the cold shock of a rogue wave spilling into her bunk. *Blue Horizons* is a rare journey, one to be savored by sailors and armchair adventurers alike. Praise for *Blue Horizons*: "In her new, wonderful book, Beth Leonard shows us a world in which 'perfection' is not bland, easy, escapist comfort in a crowded tropical harbor but a more insecure yet more rewarding existence of constant challenge--cold waters, rocky coves, old fishing villages, demanding seamanship, and the evolution of two sailors trying to manage a boat and also their own relationship." --John Rousmaniere, author of *Fastnet*, *Force 10*, *After the Storm*, and *The Annapolis Book of Seamanship* "Let Beth Leonard inspire you to sail around the world, explore the high latitudes, or discover your own capacity for adventure. Each nugget in this 'dream becomes reality' series of

revelations is worth a thousand pictures." --Gary Jobson, ESPN sailing commentator, America's Cup Hall of Famer, and author of Gary Jobson's Championship Sailing "Blue Horizons chronicles a remarkable adventure through some of the globe's most inhospitable waters. . . . Every account in this collection provides a taste and sometimes a feast. It is wise, perceptive, wonderful. If you have ever wondered what it might be like to exchange conventional comforts for an adventure not packaged with round-trip airfare, Beth Leonard has written these dispatches to you." --Don Casey, author of This Old Boat and Don Casey's Complete Illustrated Sailboat Maintenance Manual

Manoeuvring Bill Johnson 2013-07-05 This is a unique, practical, hands-on guide to boat manoeuvring. Manoeuvring a yacht under engine at close quarters in a marine of close to other (expensive!) boats can be a daunting prospect for the inexperienced skipper - but it has to be done in order to take your boat off a pontoon to go sailing, and to berth her after a day on the water. Throw in fast flowing tides, and wind which might blow from the bow or beam or stern, and the exercise becomes even more of a lottery - even for the experienced boat handler. Here at last is a well organised visual guide to coping in every possible combination of wind and tide. Laid out in a very clear fashion, with one manoeuvre per page and in a handy wiro format, this is the ideal teach yourself guide, and the perfect on-board aide memoire. It will be a godsend to every nervous helmsman, and a good talking point for crew!

The Scientific American Handbook of Travel Albert Allis Hopkins 2016-09-04 Excerpt from The Scientific American Handbook of Travel: With Hints for the Ocean Voyage, for European Tours, and a Practical Guide to London and Paris Here are no conditions of travel in which a few general hints 'as to

how to adjust one's self to surroundings can prove so useful as on a sea voyage, and it is with the object of preparing the traveler for his trip by telling him how to go, how much it will cost, how to amuse himself, and what to do on arrival at the coveted shore, that this book has been written. The writer believes that by giving just that sort of information which he himself and others of his acquaintance have wanted to know on various trans-atlantic voyages, he cannot fail to meet pretty closely the needs of the average voyager. The writer also hopes that the information contained in this volume will be augmented in subsequent editions by the voluntary experience of its readers, - an addition which cannot fail to greatly increase the value of the book. It may interest the reader to know that many hundreds of pamphlets, issued by various transportation companies throughout the world, were thrown into the alembic which produced this slender volume - a fact which will give the reader some idea of the difficulties which are entailed in editing a work of this character. Within the last two or three years steamship and railway companies have done much to annihilate space; it is now possible to make a complete circuit of the earth in 38 days, or less than one-half the proverbial 80 days of Jules Verne. The trip has been made from London to San Francisco in something less than ten days. It is possible to leave New York Wednesday morning and reach London Monday night in time to connect with trains which land passengers in Paris Very early on Tuesday morning. All of this represents substantial progress in transportation. All of these matters are referred to in the appropriate sections of this book. It is too early as yet to prophesy what may be done in aerial transportation of passengers, but from the various schemes which have been proposed and almost carried out, it is possible that the next five years may see important developments along this line. Voyaging With Kids Behan Gifford 2015-09-18 "A treasure-trove of useful, well-organized information on sea-going parenting." —Gary "Cap'n Fatty" Goodlander, Author of Buy, Outfit and Sail Choosing a boat that is right for your family; handling the naysayers; keeping your children safe, healthy and entertained afloat—this inspirational and comprehensive guide may be just what you need to turn your dream into a reality. The three authors, who have each voyaged thousands of miles with children on board, provide a factual and balanced look at the realities of family life on the sea. ensuring parents find the private time to keep their relationships in tune, and helping children make the eventual transition back to shore life. Added to the authors' voices are sidebars from other cruising parents with specialized information on subjects as diverse as handling special diets and how your children can keep in touch with friends around the world. A unique bonus chapter, written by a dozen former cruising kids, looks at the long-term effects of breaking away from shoreside normalcy. A substantial appendix of resources provides valuable further information on the subjects covered in this book. It is said that every parent inflicts their lifestyle choices on their children. Read this book to find why heading out to sea with your children may be the most rewarding infliction of all.
