Art Making with Moma? Cari Frisch 2018-05-29 Art Making with MoMA, from the educators at The Museum of Modern Art, New York, presents 20 interactive activities that encourage kids (and adults!) to discover how modern and contemporary artists experiment with materials and techniques. Drawing on over 15 years of research and hands-on experience engaging families in multi-sensory programs at MoMA, this colorful activity book provides opportunities for creative exploration and art making at home, in a group or alone, while providing real examples of the tools, techniques, and ideas used by contemporary and modern artists whose works can be found in MoMA's collection. Each project is inspired by a particular artist, movement, or design concept, and features full-color reproductions of artwork from the likes of Diego Rivera, Vassily Kandinsky, Berenice Abbott, and Charles and Ray Eames. Step-by-step instructions, handy tips and open-ended questions encourage kids to think like artists and develop their own techniques and ideas for art making.

Deck the Halls Nancy Alexander 2014-03-01 Deck The Halls is an Instructional Christmas Wreath-Making Book. Nancy planned, took many close-up, color photos, and wrote precise instructions as she created this gorgeous Christmas wreath. She then wrote "Deck The Halls," which equips and encourages you to find your own uniquely different style. To find your style, it is imperative that you first learn the basics of wreath design. Nancy's goal and desire is to equip you with these basics in addition to all you need to assure your very first wreath will be as breathtaking as this one. She will teach you these basics, along with all tips, ideas and a technique, she alone, has developed during her close to thirty years in the floral & home decor industry. You can be assured that a professional with many years of experience is teaching you to do it the "right way." A beginner with no experience to a professional designer will benefit from this beautiful, well-written, and easy to follow book. Nancy starts with a Christmas Green base. She then adds many loops and curls of a beautiful Christmas ribbon in addition to extra Christmas and everyday greens. Nancy is known for her attention to her fine details in each and every one of her designs - and her Christmas wreaths are no exception - they are SPECTACULAR! Nancy's instructions teach you how to securely attach a pick to a stem, make sure your "critters" such as a birds, ladybugs, nests, & bird houses are anchored securely. And she certainly does not leave out how to tie a beautiful single, double, or triple ribbon bow for which she is so well known. Nancy is delighted to be able to share with you her tips and secrets. She is sure that "You Can Do It," which you now hear so often as her encouraging tag line.

The Afterlives of Monuments Deborah Cherry 2015-09-07 South Asia is famous for its monuments, past and present. Monuments have been created, destroyed and rescued by competing communities and incoming empires in the making and re-making of history, identity and memory. This collection brings together an international cohort of senior scholars and younger researchers to examine the vast diversity of monuments (and conceptions of monuments) in South Asia from the 1850s to the present. The chapters investigate what constitutes a monument, and interrogate the conditions for its survival, demise or recycling. To explore the afterlives of monuments is to investigate how, where, when, and why monuments have been remodelled, re-sited, destroyed, defaced, or abandoned. It is to investigate the theories of memory, history and community, as well as new forms of artistic practice and global media. As different South-Asian communities claim a stake in the making of national, religious, cultural and local identities and histories, the status of monuments and debates about cultural memory have become increasingly urgent. This book was published as a special issue of *South Asian Studies*.

Polystyrene Cole Lynwood 2014-01-01 Polystyrene represents one of the oldest and the most widespread polymers in the world. Its starts as far back as 1839 when a German apothecary Edmon Simon distilled an oily liquid named styrol from the resin of Turkish sweet gum trees. In several days, the sterol converted into a jelly product that he thought resulted from the oxidation process. For that reason, the jelly product received the name styroloxide. This book discusses the synthesis of polystyrene, as well as the characteristics and applications of this polymer.

Polymer Science and Engineering National Research Council 1994-01-01 Polymers are used in everything from nylon stockings to commercial aircraft to artificial heart valves, and they have a key role in addressing international competitiveness and other national issues. *Polymer Science and Engineering* explores the universe of polymers, describing their properties and wide-ranging potential, and presents the state of the science, with a hard look at downward trends in research support. Leading experts offer findings, recommendations, and research directions. Lively vignettes provide snapshots of polymers in everyday applications. The volume includes an overview of the use of polymers in such fields as medicine and biotechnology, information and communication, housing and construction, energy and transportation, national defense, and environmental protection. The committee looks at the various classes of polymers—"plastics, fibers, composites, and other materials, as well as polymers used as membranes and coatings"—and how their composition and specific methods of processing result in unparalleled usefulness. The reader can also learn the science behind the technology, including efforts to model polymer synthesis after nature's methods, and breakthroughs in characterizing polymer properties needed for twenty-first-century applications. This informative volume will be important to chemists, engineers, materials scientists, researchers, industrialists, and policymakers interested in the role of polymers, as well as to science and engineering educators and students.

Teaching about Magnets & Magnetism Jane Bray Nelson 2013 The demonstrations and activities concerning magnets and magnetism described in this guide have been developed over many years. Most involve inexpensive and simple materials that are commonly available and easily put together. The teaching approach has students thinking about, and put into writing, what they expect to happen before they do the activities.

Written in a simple, straightforward, and concise manner, readers will learn the state of the art of 3D reconstruction and modeling." —Professor Takeo Kanade, Carnegie Mellon University The computer vision and graphics communities use different terminologies for the same ideas. This book provides a translation, enabling graphics researchers to apply vision concepts, and vice-versa, independence of chapters allows readers to directly jump into a specific chapter of interest, compared to other texts, gives more succinct treatment overall, and focuses primarily on vision geometry. *Image-Based Modeling* is for graduate students, researchers, and engineers working in the areas of computer vision, computer graphics, image processing, robotics, virtual reality, and photogrammetry.

Next Time You See the Moon Emily Rachel Morgan 2014-07-01 This fascinating book will stay with children every time they gaze up at the night sky. Through vivid pictures and engaging explanations, children will learn about many of the Moon's mysteries: what makes it look like a silvery crescent one time and a chalk-white ball a few nights later, why it sometimes appears in the daytime, where it gets its light, and how scientists can predict its shape on your birthday a thousand years from now. *Next Time You See the Moon* is an ideal way to explain the science behind the shape of the Moon and bring about an evening outing no child—or grown-up—will soon forget. Awaken a sense of wonder in a child with the *Next Time You See* series from NSTA Kids. The books will inspire elementary-age children to experience the enchantment of everyday phenomena such as sunsets, seashells, fireflies, pill bugs, and more. Free supplementary activities are available on the NSTA website. Especially designed to be experienced with an adult—be it a parent, teacher, or friend—*Next Time You See* books serve as a reminder that you don't have to look far to find something remarkable in nature.

Brunching with Ophelia Angshukanta Chakraborty 2008 *Brunching with Ophelia* presents a slice of life entrenched in cultural schizophrenia in our capital city, New Delhi. As Ivy Roy, a lecturer of English literature, virtually resurrects Ophelia, the almost aphasic woman behind the universal man screaming *Words, Words, Words*, her now husband and erstwhile chat-friend Shumonto Roy retreats into the deep well of wordlessness, mourning the loss of his ex-girlfriend Irene Scott. Is Shumonto turning into a later-day Prince Hamlet of the virtual world? Will today's Ophelia speak up, turn into a voracious wordsmith to counter his oppressive silence? Suddenly the characters who had met in a nebulous world of the Internet are confronted by the perils of the real. Which is the fantasy world? Or do they inhabit a placeless space somewhere in between? Do they live multiple lives giving births to newer selves every time they give themselves a new screen name? In her debut novel, the author lets loose a refraction of university life, heavily coloured by pigments of imagination. And the refracting prism of this overground campus life is the netherworld of anonymous chat-windows and webcam-facilitated screen-dalliances.

Spiritual Direction Janet K. Ruffing 2000 The modern resurgence of interest in spiritual direction comes from every occupation and lifestyle, not just those in the religious life. But while some books cover the

basic topic, almost none consider the subject of advanced direction. What are the special issues of someone who's been offering spiritual direction for more than five years? And of someone who's been receiving spiritual direction for more than five years? Written by a well-known practitioner, researcher and theoretician of the art, this clear and insightful book fills the gap by providing concrete help for both veteran directors and veteran directees. The book offers a theological basis for the process of direction then moves onto such advanced themes as resistance, desire in prayer, transference and counter-transference, love mysticism and mutuality with God. It also focuses on the special concerns of women in direction. Each chapter includes a section on theory, some illustrative case material, verbatims, and suggested discussion questions. *Spiritual Direction: Beyond the Beginnings* is for a wide ecumenical audience of both directors and directees. It's of particular interest to women clergy, retreat directors, pastors, and all religious and clergy who find themselves spiritual directors "by default."
