The Loss of the SS Titanic Lawrence Beesley 2009 The circumstances in which this book came to be written are as follows. Some five weeks after the survivors from the Titanic landed in New York, I was the guest at luncheon of Hon. Samuel J. Elder and Hon. Charles T. Gallagher, both well-known lawyers in Boston. After luncheon I was asked to relate to those present the experiences of the survivors in leaving the Titanic and reaching the Carpathia. When I had done so, Mr. Robert Lincoln O'Brien, the editor of the Boston Herald, urged me as a matter of public interest to write a correct history of the Titanic disaster, his reason being that he knew several publications were in preparation by people who had not been present at the disaster, but from newspaper accounts were piecing together a description of it. He said that these publications would probably be erroneous, full of highly coloured details, and generally calculated to disturb public thought on the matter. He was supported in his request by all present, and under this general pressure I accompanied him to Messrs. Houghton Mifflin Company, where we discussed the question of publication. Messrs. Houghton Mifflin Company took at that time exactly the same view that I did, that it was probably not advisable to put on record the Loss of the SS. Titanic, by Lawrence Beesley 4 incidents connected with the Titanic's sinking: it seemed better to forget details as rapidly as possible. However, we decided to take a few days to think about it. At our next meeting we found ourselves in agreement again, --but this time on the common ground that it would probably be a wise thing to write a history of the Titanic disaster as correctly as possible. I was supported in this decision by the fact that a short account, which I wrote at intervals on board the Carpathia, in the hope that it would calm public opinion by stating the truth of what happened as nearly as I could recollect it, appeared in all the American, English, and Colonial papers and had exactly the effect it was i

The Ship of Dreams Gareth Russell 2020-11-03 This original and "meticulously researched retelling of history's most infamous voyage" (Denise Kiernan, New York Times bestselling author) uses the sinking of the Titanic as a prism through which to examine the end of the Edwardian era and the seismic shift modernity brought to the Western world. "While there are many Titanic books, this is one readers will consider a favorite" (Voyage). In April 1912, six notable people were among those privileged to experience the height of luxury—first class passage on "the ship of dreams," the RMS Titanic: Lucy Leslie, Countess of Rothes; son of the British Empire Tommy Andrews; American captain of industry John Thayer and his son Jack; Jewish-American immigrant Ida Straus; and American model and movie star Dorothy Gibson. Within a week of setting sail, they were all caught up in the horrifying disaster of the Titanic's sinking, one of the biggest news stories of the century. Today, we can see their stories and the Titanic's voyage as the beginning of the end of the established hierarchy of the Edwardian era. Writing in his signature elegant prose and using previously unpublished sources, deck plans, journal entries, and surviving artifacts, Gareth Russell peers through the portholes of these first-class travelers to immerse us in a time of unprecedented change in British and American history. Through their intertwining lives, he examines social, technological, political, and economic forces such as the nuances of the British class system, the explosion of competition in the shipping trade, the birth of the movie industry, the Irish Home Rule Crisis, and the Jewish-American immigrant experience while also recounting their intimate stories of bravery, tragedy, and selflessness. Lavishly illustrated with color and black and white photographs, this is "a beautiful requiem" (The Wall Street Journal) in which "readers get the story of this particular floating Tower of Babel in riveting detail, and with all the wider context they could want" (Christian

Science Monitor).

The Rescue of the Third Class on the Titanic David Gleicher 2006 This work seeks to understand why a disproportionately large number of third class passengers, particularly women and children, died during the sinking of the Titanic in relation to the first and second classes. It examines the gender, class, social, and cultural factors that influenced this disparity. It aims to uncover both why and how five hundred and thirty one third class passengers died on the night of April 14th 1912. A key area of focus is the difficult relationship between the ship's authorities and the men of the third class, and the extent to which this determined the fate of passengers during the rescue efforts. The introduction asks 'Who were the third class passengers?' and uses ethnic and economic backgrounds to suggest the third class belonged to the 'Old Immigration' wave of migrants, rather than the contemporary 'New Immigration' of the first and second. The first chapter concerns the exclusion of third class narratives in the 'popular story' of the Titanic. Chapters two through seven determine the whereabouts of the third class during every stage of evacuation, and flags the discrepancies in testimonies from both the British and American inquiries. Chapter eight provides a conclusion, which claims the 'popular story' includes a great many falsehoods with regard to the third class - including their treatment by crew, their behaviours, and their survival rates. The first appendix tables nationalities into regions; the second outlines the twenty routes to the lifeboats, as testified by one of the Titanic design architects; and the third provides deck plans for every level of the ship.

Behavioral Finance: The Second Generation Meir Statman 2019-12-02 Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants—restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational"—succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.

Law's Ideal Dimension Robert Alexy 2021-07-16 Law's Ideal Dimension provides a comprehensive account in English of renowned legal theorist Robert Alexy's understanding of jurisprudence, as expanded upon from his publications *A Theory of Legal Argumentation* (OUP 1989), *A Theory of Constitutional Rights* (OUP 1985), and *The Argument from Injustice* (OUP 1992). The collection is divided into three parts. Part One concerns the nature of law: it explores its real and

ideal dimensions and how the ideal dimension of law is sometimes employed but does not play a systematically important role. Part Two discusses constitutional rights, human rights, and proportionality. It defends the construction of constitutional rights as principles against objections raised by the rule construction and elaborates on the nature of constitutional rights as well as the mathematical balancing of those rights. Part Three concerns the relation between argumentation, correctness, and law. The author concludes this volume with a biographical reflection.

Passage Connie Willis 2009-12-09 One of those rare, unforgettable novels that are as chilling as they are insightful, as thought-provoking as they are terrifying, award-winning author Connie Willis's *Passage* is an astonishing blend of relentless suspense and cutting-edge science unlike anything you've ever read before. It is the electrifying story of a psychologist who has devoted her life to tracking death. But when she volunteers for a research project that simulates the near-death experience, she will either solve life's greatest mystery -- or fall victim to its greatest terror. At Mercy General Hospital, Dr. Joanna Lander will soon be paged -- not to save a life, but to interview a patient just back from the dead. A psychologist specializing in near-death experiences, Joanna has spent two years recording the experiences of those who have been declared clinically dead and lived to tell about it. It's research on the fringes of ordinary science, but Joanna is about to get a boost from an unexpected quarter. A new doctor has arrived at Mercy General, one with the power to give Joanna the chance to get as close to death as anyone can. A brilliant young neurologist, Dr. Richard Wright has come up with a way to manufacture the near-death experience using a psychoactive drug. Dr. Wright is convinced that the NDE is a survival mechanism and that if only doctors understood how it worked, they could someday delay the dying process, or maybe even reverse it. He can use the expertise of a psychologist of Joanna Lander's standing to lend credibility to his study. But he soon needs Joanna for more than just her reputation. When his key volunteer suddenly drops out of the study, Joanna finds herself offering to become Richard's next subject. After all, who better than she, a trained psychologist, to document the experience? Her first NDE is as fascinating as she imagined it would be -- so astounding that she knows she must go back, if only to find out why this place is so hauntingly familiar. But each time Joanna goes under, her sense of dread begins to grow, because part of her already knows why the experience is so familiar, and why she has every reason to be afraid... And just when you think you know where she is going, Willis throws in the biggest surprise of all -- a shattering scenario that will keep you feverishly reading until the final climactic page is turned.

Titanic Survivor Violet Jessop 2012-04-04 Violet Jessop's life is an inspiring story of survival. Born in 1887 in Argentina, the eldest child of Irish immigrants, at the age of 21 she became the breadwinner for her widowed mother and five siblings when she commenced a career as a stewardess and nurse on some of the most famous ocean going vessels of the day. Throughout her 40 year time at sea she survived an unbelievable series of events including the sinking of the TITANIC. "One awful moment of empty, misty blackness enveloped us in its loneliness, then an unforgettable, agonizing cry went up from 1500 despairing throats, a long wail and then silence and our tiny craft tossing about at the mercy of the ice field." For most people one sinking would be enough. But four years later Violet, now a nurse with the British Red Cross, was on board the World War I hospital ship BRITANNIC when it struck a mine and sank to the bottom of the Aegean. To her, this disaster was even more horrifying-- "Just as life seeming nothing but a whirling, choking ache, I rose to the light of day, my nose barely above the little lapping waves. I opened my eyes on an indescribable scene of slaughter, which made me shut them again to keep it out." By the end of her story we have met a woman who could handle whatever life threw at her with determination and good humor. She knew that only by her own strength of character would she survive. But Titanic Survivor is much more. A unique autobiography for those who want to know how it really felt, a story that could be told only by a Titanic Survivor.

Human Struggle Mona Siddiqui 2021-03-04 Many of the great thinkers and poets in Christianity and Islam led lives marked by personal and religious struggle. Indeed, suffering and struggle are part of the human condition and constant themes in philosophy, sociology and psychology. In this thought-provoking book, acclaimed scholar Mona Siddiqui ponders how humankind finds meaning in life

during an age of uncertainty. Here, she explores the theme of human struggle through the writings of iconic figures such as Dietrich Bonhoeffer, Muhammad Ghazali, Rainer Maria Rilke and Sayyid Qutb - people who searched for meaning in the face of adversity. Considering a wide range of thinkers and literary figures, her book explores how suffering and struggle force the faithful to stretch their imagination in order to bring about powerful and prophetic movements for change. The moral and aesthetic impulse of their writings will also stimulate inter-cultural and interdisciplinary conversations on the search for meaning in an age of uncertainty.
