*Five by Five: No Surrender* William C. Dietz 2012-10-11 TARGETS ARE LOCKED! Five short novels by five masters of military SF capture the excitement, and hell, of fantastic future war—on and off the battlefield. Stories of terrifying monsters, dangerous aliens and staggering cosmic dreadnaughts march alongside far-flung courtroom dramas and cautionary tales involving man and his devices. Michael A. Stackpole—The Star Tigers are commandeered by a powerful alien overseer on a covert mission to a world long abandoned by an ancient species. There, the ruins of a forgotten war will tip the balance of their war, unless the Star Tigers can prevent it. Sarah A. Hoyt—Lucius Dante Maximilian Keeva is a well-respected leader of the Usaian Revolution, but treason in the ranks can cost him everything that makes life worth living—unless he takes justice into his own hands and breaks every military regulation in its pursuit. Doug Dandridge—Faced with an enemy more than two hundred times her own size, Cinda Klerk has two options: hide, and let it destroy the planet she is supposed to protect, or find a way to even the odds and kill the enemy, even at the cost of her ship and crew. Eytan Kollin and Dani Kollin—As the Unincorporated War envelops the entire solar system, a father must come to the rescue of a daughter he never raised. But he'll have to convince her to save herself first. Kevin J. Anderson—In the war against an alien menace, Earth's greatest military commanders risk themselves on the front lines, but with an escape hatch: If the situation goes terribly wrong, they can switch places with a safe soldier far from the battlefield. But the cannon-fodder volunteers don't consider that such a good deal. Set your cross-hairs on the Target Zone.

*Kinetic Garment Construction* Rickard Lindqvist 2015-03-27 Fashion designers are presented with a range of methods and concepts for pattern cutting are presented, the main body of these methods, both traditional and contemporary, is predominately based on a theoretical approximation of the body that is derived from horizontal and vertical measurements of the body in an upright position: the tailoring matrix. As a consequence, there is a lack of interactive and dynamic qualities in methods connected to this paradigm of garment construction, from both expressional and functional perspectives. This work proposes and explores an alternative paradigm for pattern cutting that includes a new theoretical approximation of the body as well as a more kinetic method for garment construction that, unlike the prevalent theory and its related methods, takes as its point of origin the interaction between the anisotropic fabric and the biomechanical structure of the body. As such, the research conducted here is basic research, aiming to identify fundamental principles for garment construction. Based on some key principles found in the works of Geneviève Sevin-Doering and in pre-tailoring methods for constructing garments, the proposed theory for – and method of – garment construction was developed through concrete experiments by cutting and draping fabrics on live models. Instead of a static matrix of a non-moving body, the result is a kinetic construction theory of the body that is comprised of balance directions and key biomechanical points, along with an alternative draping method for dressmaking. This methodology challenges the fundamental relationship between dress, garment construction, and the body, working from the body outward, as opposed to the methods that are based on the prevalent paradigm of the tailoring matrix, which work from the outside toward the body. This alternative theory for understanding the body and the proposed method of working allows for diverse expressions and enhanced functional possibilities in dress.

The Dingo's Got My Baby Lindy Chamberlain-Creighton 2012-03-10 In 1980, nine-week-old Azaria Chamberlain was taken by a dingo from her family's tent near Uluru in Australia's remote Northern Territory. Her body was never found. In a terrible miscarriage of justice, her mother Lindy was wrongfully convicted of her daughter's murder and sentenced to life in prison. It was seven years before the conviction was overturned. This is the true story behind a tragedy whose echoes reverberated around the world. "This is the story of a little girl who lived, and breathed, and loved, and was loved. She was part of me. She grew within my body and when she died, part of me died, and nothing will ever alter that fact. This is her story, and mine." – Lindy Chamberlain-Creighton "Page after page demolishes the myth and fables that have been spun around a nation's obsession with the baby's disappearance." – The Sydney Morning Herald "What first struck me on meeting Lindy was her sense of humour and surprising lack of bitterness. Here is a woman who has been under such macabre and intense public scrutiny and yet through all the tabloid hysteria they haven't managed to capture the real Lindy at all. There are so many myths about Lindy and the Chamberlain case that have still not been dispelled and to read this book is to get closer to the truth behind the story that has continued to fascinate Australia for the past 24 years." –Miranda Otto, Actress, Lord of the Rings Trilogy Previously published as Through My Eyes in 2004.
