*A Radical Guide for Women with ADHD* Sari Solden 2019-07-01 Live boldly as a woman with ADHD! This radical guide will show you how to cultivate your individual strengths, honor your neurodiversity, and learn to communicate with confidence and clarity. If you are a woman with attention deficit/hyperactivity disorder (ADHD), you've probably known—all your life—that you're different. As girls, we learn which behaviors, thinking, learning, and working styles are preferred, which are accepted and tolerated, and which are frowned upon. These preferences are communicated in innumerable ways—from media and books to our first-grade classroom to conversations with our classmates and parents. Over the course of a lifetime, women with ADHD learn through various channels that the way they think, work, speak, relate, and act does not match up with the preferred way of being in the world. In short, they learn that difference is bad. And, since these women know that they are different, they learn that they are bad. It's time for a change. *A Radical Guide for Women with ADHD* is the first guided workbook for women with ADHD designed to break the cycle of negative self-talk and shame-based narratives that stem from the common and limiting belief that brain differences are character flaws. In this unique guide, you'll find a groundbreaking approach that blends traditional ADHD treatment with contemporary treatment methods, such as acceptance and commitment therapy (ACT), to help you untangle yourself from the beliefs that have kept you from reaching your potential in life. If you're ready to develop a strong, bold, and confident sense of self, embrace your unique brain-based differences, and cultivate your individual strengths, this step-by-step workbook will help guide the way.

*ADHD 2.0* Edward M. Hallowell, M.D. 2021-01-12 A revolutionary new approach to ADD/ADHD featuring cutting-edge research and strategies to help readers thrive, by the bestselling authors of the seminal books *Driven to Distraction* and *Delivered from Distraction* “An inspired road map for living with a distractible brain . . . If you or your child suffer from ADHD, this book should be on your shelf. It will give you courage and hope.”—Michael Thompson, Ph.D., New York Times bestselling co-author of *Raising Cain* World-renowned authors Dr. Edward M. Hallowell and Dr. John J. Ratey literally “wrote the book” on ADD/ADHD more than two decades ago. Their bestseller, *Driven to Distraction*, largely introduced this diagnosis to the public and sold more than a million copies along the way. Now, most people have heard of ADHD and know someone who may have it. But lost in the discussion of both childhood and adult diagnosis of ADHD is the potential upside: Many hugely successful entrepreneurs and highly creative people attribute their achievements to ADHD. Also unknown to most are the recent research developments, including innovations that give a clearer understanding of the ADHD brain in action. In *ADHD 2.0*, Drs. Hallowell and Ratey, both of whom have this “variable attention trait,” draw on the latest science to provide both parents and adults with ADHD a plan for minimizing the downside and maximizing the benefits of ADHD at any age. They offer an arsenal of new strategies and lifestyle hacks for thriving with ADHD, including

- Find the right kind of difficult. Use these behavior assessments to discover the work, activity, or creative outlet best suited to an individual’s unique strengths.
- Reimagine environment. What specific elements to look for—at home, at school, or in the workplace—to enhance the creativity and entrepreneurial spirit inherent in the ADHD mind.
- Embrace innate neurological tendencies. Take advantage of new findings about the brain’s default mode network and cerebellum, which confer major benefits for people with ADHD.
- Tap into the healing power of connection. Tips for establishing and maintaining positive connection “the other Vitamin C” and the best antidote to the negativity that plagues so many people with ADHD.
- Consider medication. Gets the facts about the underlying chemistry, side effects, and proven benefits of all the pharmaceutical options. As inspiring as it is practical, *ADHD 2.0* will help you tap into the power of this mercurial condition and find the key that unlocks potential.

**Challenging Global Inequality** Alastair Greig 2007-01-16 This major introductory text written by 3 leading names in the field provides an accessible overview of the challenges faced in overcoming global poverty and inequality in the 21st century. Through an in-depth assessment of development theory and practice, the authors set out to advance two key arguments: the first being the importance of historically contextualizing contemporary developmental problems in order to assess policy proposals; and the second that inequality matters, and how this notion has continually remained a central feature of development debates from colonial times to present day. Ideal for undergraduate students taking development modules as part of political science and international relations degrees, this engaging text proves to be essential reading when exploring the impacts of development on today's international political economy. With each chapter covering inequalities from all different angles, the authors clearly outline the impact of models such as globalization and neoliberalism, as well as offering alternative views on the challenges posed by the UN's Millennium Development Goals. their relationship to fundamental processes of developmental biology. Leading investigators present their studies on various aspects of the two fields such as mechanisms underlying tumor transformation; cell proliferation, differentiation, and neoplasia; transformation of cells in culture; and role of embryonic and fetal antigens in cancer, lymphocyte differentiation, cell-mediated destruction of tumor cells, and the enhancement of the effects of antibodies through the process of immune surveillance. Oncologists, cell biologists, medical researchers, physiologists, molecular biologists, physicians, and students in the field of medicine will find the book insightful.

**Indispensable Outcasts** Frank Tobias Higbie 2003 Often overlooked in the history of Progressive Era labor, the hoboes who rode the rails in search of seasonal work have nevertheless secured a place in the American imagination. The stories of the men who hunted work between city and countryside, men alternately portrayed as either romantic adventurers or degenerate outsiders, have not been easy to find. Nor have these stories found a comfortable home in either rural or labor histories. *Indispensable Outcasts* weaves together history, anthropology, gender studies, and literary analysis to reposition these workers at the center of Progressive Era debates over class, race, manly responsibility, community, and citizenship. Combining incisive cultural criticism with the empiricism of a more traditional labor history, Frank Tobias Higbie illustrates how these so-called marginal figures were in fact integral to the communities they briefly inhabited and to the cultural conflicts over class, masculinity, and sexuality they embodied. He draws from life histories, the investigations of social reformers, and the organizing materials of the Industrial Workers of the World and presents a complex and compelling portrait of hobo life, from its often violent and dangerous working conditions to its ethic of "transient mutuality" that enabled survival and resistance on the road. More than a study of hobo life, this interdisciplinary book is also a meditation on the possibilities for writing history from the bottom up, as well as a frank discussion of the ways historians' fascination with personal narrative has colored their construction and presentation of history.

Determinants Of Emigration From Mexico, Central America, And The Caribbean Sergio Diaz-briquets 2019-03-07 The Immigration Reform and Control Act of 1986 (IRCA) was a manifestation of widespread public concern over the volume of undocumented immigration into the United States. The principal innovation of this legislation—the provision to impose penalties on employers who knowingly hire undocumented immigrants—was a response to this concern. This effort at restriction was tempered in IRCA by other provisions permitting the legalization of two types of undocumented immigrants: those who had resided in the United States since January 1, 1982; and what were called special agricultural workers (SAWs), persons who had worked in perishable crop agriculture for at least 90 days during specified periods from 1983 to 1986. Approximately 3.1 million persons sought legalization (what is popularly referred to as amnesty) under these two provisions. The breakdown was roughly 1.8 million under the regular program and 1.3 million as SAWs. Mexicans made up 75 percent of the combined legalization requests.

Compassion Fatigue and Burnout in Nursing Vidette Todaro-Franceschi 2012-09-20 Print+CourseSmart

**Compassion Fatigue and Burnout in Nursing, Second Edition** Vidette Todaro-Franceschi, PhD, RN, FT 2019-03-18 "Dr. Todaro-Franceschi calls us to look with open eyes, open hearts, and open minds at the good, the bad, the ugly, and the ugliest in health care so that together we can cultivate a healthcare world in which compassion prevails and our shared humanity is embraced... It is up to all of us to hold and safeguard each other in this sacred work. Dr. Todaro-Franceschi helps us in this mission through this extraordinary book." Mary Koloroutis, RN, MSN CEO Creative Health Care Management, Minneapolis, Minnesota Co-Creator of the Relationship-Based Care Model In this second edition of her seminal text, Dr. Todaro-Franceschi offers new insights on professional quality of life, incorporating current practice, research literature, and examples to show how contentment and happiness of the nursing workforce is related to quality of care. The book provides practical strategies for dealing with a myriad of issues, including compassion fatigue, burnout, moral distress, caring for the dying, PTSD, and workplace violence. This resource will help empower nurses so they can create a more compassionate work environment. Written by an acknowledged expert in end of life education, professional quality of life, and clinical leadership, the text addresses the complex nature of well-being in the nursing workforce. Supported by research but written from a holistic and personal perspective, the text includes case studies and exercises that will help the reader to identify negative patterns and explore ways to find purpose in one's life. New to the Second Edition: Expanded emphasis on how workforce well-being contributes to care quality Updated resources and information on national nursing initiatives related to professional quality of life New chapter on workplace violence (incivility, bullying and mobbing) New chapter on education related to improving PQOL and work environment Provides a Nurse Leaders Resource Toolkit to guide staff education Key Features: Articulates an ethic of care developed from a transdisciplinary perspective Increases nurse awareness of issues that might be hindering their PQOL Provides strategies for enhancing staff contentment and productivity, thereby promoting a healthy work environment Includes real-life examples from critical care, end-of-life care, hospice, oncology, and more Assists nurses with grief healing

### Unauthorized Migration 1990

*Population and Society in Contemporary Tibet* Rong Ma 2011-01-01 This extensive survey documents Tibetan society over five decades, including population structure in rural and urban areas, marriage and migration patterns, the maintenance of language and traditional culture, economic transitions relating to income and consumption habits, educational development, and the growth of civil society and social organizations. In addition to household surveys completed over twenty years, the book provides a systematic analysis of all available social and census data released by the Chinese government, and a thorough review of Western and Chinese literature on the topic. It is the first book on Tibetan society published in English by a mainland China scholar, and covers several sensitive issues in Tibetan studies, including population changes, Han migration into Tibetan areas, intermarriage patterns, and ethnic relations.--Ma Rong is a widely respected demographer and professor of sociology at Peking University. He spent five years in Inner Mongolia during the Cultural Revolution, and was one of the first Chinese students to study in the US after Deng Xiaoping's reforms, receiving his doctorate degree from Brown University.-- "The academic study of Tibet still suffers from a lack of accurate data and restrictions on access to Tibet for research. This very useful analysis will increase the quality of the discussion and help to correct many inaccurate Western impressions of Tibet." - Gerard Postiglione, University of Hong Kong-

**Cellular Responses to Molecular Modulators** Lee Mozes 2012-12-02 Miami Winter Symposia, Volume 18: Cellular Responses to Molecular Modulators is a collection of papers presented at the 13th Miami Winter Symposium held in Miami Beach in 1981 through the joint effort of the University of Miami School of Medicine and the Papanicolaou Cancer Research Institute. Separating 27 manuscripts into chapters, this book begins with a discussion on protein structure and function. This topic is followed by considerable chapters devoted to a whole series of molecules that precisely and specifically modulate a particular behavior and that can be studied in detail in isolated cells in culture. These chapters also look into the research studies on mitogen receptor cytochemistry, including special insertion properties and internal migratory fate after binding to effectors. Other chapters discuss the primary gene product containing the thymosin  $\alpha$ 1 sequence; the purification and production of interferons from cell cultures; the biochemical mechanisms by which interferons modulate cell behavior; and the ability of interferons to regulate natural killer lytic activity at the single cell or population level. The concluding chapters explore the distinct interferon classes by their antigenic, biological, and chemical properties. This book will be of great benefit to cell biologists and researchers.

Legacy and Policy Effects on Spatial Development in Hungary and Bulgaria Laszlo Kulcsar 2006 The dissertation's empirical project is to examine population distribution and urbanization dynamics in Eastern Europe. I investigate how spatial development occurred in the context of broader socioeconomic development, and how various policies and legacies affected settlement morphology and population redistribution. This analysis will use the cases of Hungary and Bulgaria. Hungary will be the central analytical case of this study, and I will use Bulgaria to demonstrate the intraregional heterogeneity of Eastern Europe.

**Place, Migration and Development in the Third World** Lawrence A. Brown 2002-09-11 Providing a fresh examination of the nature of Third World development, the author focuses on the characteristics of particular places and regions and their influences on behaviour. This is an important study of the relationship between population movements and regional and national changes.

**Abnormal Psychology** Ronald J. Comer 2012-02 Ron Comer's Abnormal Psychology continues to captivate students with its integrated coverage of theory, diagnosis, and treatment, its inclusive wide-ranging cross-cultural perspective, and its compassionate emphasis on the real impact of mental illness on the lives of patients and their families. Long acclaimed for being well attuned to the evolution of the field and changes in the classroom, Comer's bestselling text returns in a timely new edition, fully updated in anticipation of the DSM-5, and enhanced by powerful new media tools.

**Rural Development in South Korea** William W. Boyer 1991 After considering the problem of decentralizing rural development in South Korea generally, the authors analyze the proliferation period from 1970 to 1979 of Seemaun Undong--South Korea's so-called New Community Movement -- which was an attempt to achieve an integrated rural development program. The final chapter suggests directions for South Korea and draws implications for development elsewhere.

historical account of agricultural reforms in post-communist Romania in the light of more than a century of social and economic development experiments. Taking a 'dual economy' analytic perspective, the book examines the impact of structural and agricultural reforms on the country's economic development and provides an analysis of the ideas and models that stood behind policy reforms aiming at the modernization of an economy and society defined by dualism and late development.

*The Battle for Asia* Mark T. Berger 2004-03-01 Asia has long been an ideological battleground between capitalism and communism, between nationalism and Westernisation and between the nation-state and globalization. This book is a history of the Asian region from 1945 to the present day which delineates the various ideological battles over Asia's development. Subjects covered include: \* theories of development \* decolonization \* US political and economic intervention \* the effects of communism \* the end of the Cold War \* the rise of neo-liberalism \* Asia after the crisis \* Asia in the era of globalisation Broad in sweep and rich in theory and empirical detail, this is an essential account of the growth of 'Asian miracle' and its turbulent position in the global economy of the twenty-first century.

**Sources of Chinese Economic Growth, 1978-1996** Chris Bramall 2000-09-14 This analysis of the political economy of growth in the era of Deng Xiaoping takes issue with the growth-accounting methodologies and market-centred explanations which characterize so much of the literature on transition-era China. By adopting an approach which echoes the pioneering work of Chalmers Johnson, Alice Amsden, and Robert Wade on other East Asian Economies, and which makes full use of the rich statistical materials that have become available since 1978, this book shows that Chinese growth was driven by a combination of state-led industrial policy and the favourable infrastructural legacies of the Maoist era. And in giving due weight to the sheer complexity of the growth process by looking in detail at the experience of four very different Chinese regions, it avoids over-simplistic macroeconomic generalization. Nevertheless, even this type of approach is inadequate, because it fails to explain why industrial policy has been so much more successful in China than in other countries. This book therefore goes beyond the 'development state' approach to argue that state autonomy in China reflected the remarkably equal distribution of income and wealth at the end of the 1970s and, paradoxically, the destruction of party structures and institutions during the Cultural Revolution. The policy implications are stark. The Chinese experience demonstrates that industrial policy and state spending on physical and social infrastructure can produce rich rewards; conversely, slavish reliance on foreign direct investment and trade are likely to limit the pace of growth. But attempts to replicate China's success in Latin America, sub-Saharan Africa, and South Asia will fail because their governments will not resist rent-seeking by classes and interest groups. Moreover, as the state becomes weaker in the wake of the re-emergence of a powerful capitalist class, even Chinese growth may prove unsustainable.

**Planning for Ethnic Tourism** Li Yang 2016-04-22 Ethnic tourism has emerged as a means that is employed by many countries to facilitate economic and cultural development and to assist in the preservation of ethnic heritage. However, while ethnic tourism has the potential to bring economic and social benefits it can also significantly impact traditional cultures, ways of life and the sense of identity of ethnic groups. There is growing concern in many places about how to balance the use of ethnicity as a tourist attraction with the protection of minority cultures and the promotion of ethnic pride. Despite the fact that a substantial literature is devoted to the impacts of ethnic tourism, little research has been done on how to plan ethnic tourism attractions or to manage community impacts of tourism. This book addresses the need for more research on planning for ethnic tourism by exploring the status and enhancement of planning strategies for ethnic tourism development. The book develops the case of a well-known ethnic tourist destination in China -Xishuangbanna, Yunnan. It analyzes how ethnic tourism has been planned and developed at the study site and examines associated socio-cultural and planning issues. The authors evaluate the perspectives of four key stakeholder groups (the government, tourism entrepreneurs, ethnic minorities and tourists) on ethnic tourism through on-site observation, interviews with government officials, planners and tourism entrepreneurs, surveys of tourists and ethnic minority people, and evaluation of government policies, plans and statistics. This book is unique in its emphasis on planning and in its focus on China, rapidly emerging as a major player in tourism, with applications for tourism around the world.

**Tropical Deforestation** C. J. Jepma 2014-02-04 The depletion of the tropical rain forests has attracted considerable attention in recent times, and the serious consequences for the global biosphere are widely acknowledged. Yet deforestation continues apace, and in some areas (for example, southeast Asia) the very existence of the forests is seriously threatened. Contrary to popular belief, evidence suggests that local economic and living conditions are more significant in this than timber exploitation for exports to the Northern countries. *Tropical Deforestation - A Socio-Economic Approach* offers a new perspective on the economic imperatives which encourage indigenous populations to encroach upon their own forests, and shows how action against deforestation must form part of a wider movement to improve both the living conditions of the local inhabitants and the durability of their national economies. Part 1 offers an overview of the processes surrounding deforestation, and an assessment of the current situation. Part 2 analyses the land-use issues, and explains the socioeconomic imperatives in the affected regions. In an absorbing conclusion. Part 3 guides the reader through a series of hypothetical policy scenarios, using a specially adapted economic computer model, to predict which combinations of policies and trade arrangements might bring about a more beneficial state of affairs.
