Hot Comb Ebony Flowers 2020-10-14 AN AUSPICIOUS DEBUT EXAMINING THE CULTURE OF HAIR FROM THE RONA JAFFE FOUNDATION AWARD-WINNING CARTOONIST Hot Comb offers a poignant glimpse into Black women’s lives and coming of age stories as seen across a crowded, ammonia-scented hair salon while ladies gossip and bond over the burn. The titular story “Hot Comb” is about a young girl’s first perm—a doomed ploy to look cool and to stop seeming “too white” in the all-black neighborhood her family has just moved to. In “Virgin Hair” taunts of “tender-headed” sting as much as the perm itself. It’s a scenario that repeats fifteen years later as an adult when, tired of the maintenance, Flowers shaves

her head only to be hurled new put-downs. The story “My Lil Sister Lena” traces the stress resulting from being the only black player on a white softball team. Her hair is the team curio, an object to be touched, a subject to be discussed and debated at the will of her teammates, leading Lena to develop an anxiety disorder of pulling her own hair out. Among the series of cultural touchpoints that make you both laugh and cry, Flowers recreates classic magazine ads idealizing women’s needs for hair relaxers and product. “Change your hair form to fit your life form” and “Kinks and Koils Forever” call customers from the page. Realizations about race, class, and the imperfections of identity swirl through Flowers’ stories and ads, which are by turns sweet, insightful, and heartbreaking. Flowers began drawing comics while earning her PhD, and her early mastery of sequential storytelling is nothing short of sublime. *Hot Comb* is a propitious display of talent from a new cartoonist who has already made her mark.

Never Touch a Huge Elephant! Rosie Greening 2021-04

Bones: Inside and Out Roy A. Meals MD 2020-10-20 A lively, illustrated exploration of the 500-million-year history of bone, a touchstone for understanding vertebrate life and human culture. Human bone is versatile and entirely unique: it repairs itself without scarring, it's lightweight but responds to stresses, and it's durable enough to survive for millennia. In *Bones*, orthopedic surgeon Roy A. Meals explores and extols this amazing material that both supports and records vertebrate life. Inside the body, bone proves itself the world's best building material. Meals examines the biological makeup of bones; demystifies how they grow, break, and heal; and compares the particulars of human bone to variations throughout the

animal kingdom. In engaging and clear prose, he debunks familiar myths—humans don't have exactly 206 bones—and illustrates common bone diseases, like osteoporosis and arthritis, and their treatments. Along the way, he highlights the medical innovations—from the first X-rays to advanced operative techniques—that enhance our lives and introduces the giants of orthopedic surgery who developed them. After it has supported vertebrate life, bone reveals itself in surprising ways—sometimes hundreds of millions of years later. With enthusiasm and humor, Meals investigates the diverse roles bone has played in human culture throughout history. He highlights allusions to bone in religion and literature, from Adam's rib to Hamlet's skull, and uncovers its enduring presence as fossils, technological tools, and musical instruments ranging from the Tibetan thighbone kangling horn to everyday drumsticks. From the dawn of civilization through to the present day, humankind has repurposed bone to serve and protect, and even to teach, amuse, and inspire. Approachable and entertaining, *Bones* richly illuminates our bodies' essential framework.
