**Government Communicators' Handbook 200?**

Public International Law Gideon Boas 2012-01-01 'Gideon Boas's experience as an international litigator and his renown as an academic practitioner means he was well-placed to write a book on international law that both covers this growing field and enters it at key moments to illustrate important themes. This book accomplishes the difficult task of offering a wide-ranging perspective on the whole field, as well as conveying the ferment that surrounds it. Students of international law will derive great benefit from it.' – Gerry Simpson, University of Melbourne, Australia Public International Law offers a comprehensive understanding of international law as well as a fresh and highly accessible approach. While explaining the theory and development of international law, this work also examines how it functions in practice. Case studies and recent examples are infused in the discussion on each topic, and critical perspectives on the principles are given prominence, building an understanding of how and why the international legal system operates in the way it does and where it is heading. For each principle, the book starts by explaining the theoretical foundations in detail before illustrating how these principles function in practice. Features include: • a focus on fundamental principles of international law rather than specialist sub-topics; • integrated and contextual explanation of political and extra-legal dimension of international legal system; • principles of international law placed within a contemporary real-life context; • traditional and contemporary case studies explained in the context of legal principles; and • uniform structure to facilitate understanding. With insight founded on the author's many years of experience as a practitioner and academic in the field of international law, this work will offer legal practitioners, policy makers and students, both undergraduate and postgraduate, an invaluable insight into the field of international law.

**The Chaos Scenario** Bob Garfield 2009 What happens when the old mass media/mass marketing model collapses and the Brave New World is unprepared to replace it? In this fascinating, terrifying, instructive and often hilarious book, Bob Garfield of NPR and Ad Age, chronicles the disintegration of traditional media and marketing but also travels five continents to discover how business can survive--and thrive--in a digitally connected, Post-Media Age. He calls this the art and science of Listenomics. You should listen, too.

**Animals and us** Jennifer Brown 2016-07-12 Can we improve the health and welfare of livestock while increasing production? Can we maintain animal biodiversity in the face of increasing demands for

resources and expanding agriculture? Can we use animal behaviour to reduce the carbon footprint of livestock production? Applied ethology is a young, multidisciplinary science that is relevant to these and other pressing issues. This book celebrates the history and science of applied ethology, and commemorates the 50th anniversary of the International Society for Applied Ethology. Through themes such as human-animal interaction, play behaviour, cognition, evolutionary theory and the relationship between applied ethology and animal welfare science, the book examines why ethologists are so passionate about their work, and why this field remains more exciting now than ever. Chapter authors include world renowned ethologists such as Don Broom, Ian Duncan, Ruth Newberry, and many others. The history of the ISAE and development of the field is presented with engaging profiles of founding members and pioneers in the field. New methods and emerging issues in behaviour research are discussed, along with the development of ethology around the globe. The book concludes with thoughts on future directions for applied ethology in addressing global issues of animal production, welfare, biodiversity, and the role of the ISAE. The book provides an exciting overview of this emerging field of science, and is intended for academics, students and anyone who takes pleasure in observing animals.

From Empiricism to Expressivism Robert Brandom 2015 Wilfrid Sellars ranks as one of the leading critics of empiricism—a philosophical approach to knowledge that seeks to ground it in human sense experience. Robert Brandom clarifies what Sellars had in mind when he talked about moving analytic philosophy from its Humean to its Kantian phase and why such a move might be of crucial importance today.

a less anthropocentric way of looking at policies and governance. The chapters discuss the geologic impact that people have had on the globe, both positive and negative, and brings awareness to the anthropocentric interventions that have influenced life on Earth during the Holocene era. Based on these observations, the authors discuss original ideas and critical reviews on ways to govern those who interpret the world in terms of human values and experience, and to conduct an egalitarian lifestyle. These ideas address the growing rise in the size of the ecological footprints of some at the expense of the majority, the growth in unsustainable food choices and of displaced people, and the need for a new sense of relationship with nature and other animals, among other issues. The chapters included in *Balancing Individualism and Collectivism: Social and Environmental Justice* encourage readers to challenge the sustainability agenda of the anthropocentric life. Proposed solutions to these unsustainable actions include structuralized interventions and volunteerism through encouragement and education, with a focus on protecting current and future generations of life through new governmental etiquette and human cognizance.

**Judges, Judging and Humour** Jessica Milner Davis 2018-07-20 This book examines social aspects of humour relating to the judiciary, judicial behaviour, and judicial work across different cultures and eras, identifying how traditionally recorded wit and humorous portrayals of judges reflect social attitudes to the judiciary over time. It contributes to cultural studies and social science/socio-legal studies of both

humour and the role of emotions in the judiciary and in judging. It explores the surprisingly varied intersections between humour and the judiciary in several legal systems: judges as the target of humour; legal decisions regulating humour; the use of humour to manage aspects of judicial work and courtroom procedure; and judicial/legal figures and customs featuring in comic and satiric entertainment through the ages. Delving into the multi-layered connections between the seriousness of the work of the judiciary on the one hand, and the lightness of humour on the other hand, this fascinating collection will be of particular interest to scholars of the legal system, the criminal justice system, humour studies, and cultural studies.

**Marine Mammal Welfare** Andy Butterworth 2017-06-19 Marine mammals attract human interest – sometimes this interest is benign or positive – whale watching, conservation programmes for whales, seals, otters, and efforts to clear beaches of marine debris are seen as proactive steps to support these animals. However, there are many forces operating to affect adversely the lives of whales, seals, manatees, otters and polar bears – and this book explores how the welfare of marine mammals has been

affected and how they have adapted, moved, responded and sometimes suffered as a result of the changing marine and human world around them. Marine mammal welfare addresses the welfare effects of marine debris, of human traffic in the oceans, of noise, of hunting, of whale watching and tourism, and of some of the less obvious impacts on marine mammals – on their social structures, on their behaviours and migration, and also of the effects on captivity for animals kept in zoos and aquaria. There is much to think and talk about – how marine mammals respond in a world dramatically influenced by man, how are their social structures affected and how is their welfare impacted?

*Britain's Olympic Women* Jean Williams 2020-07-27 Britain has a long and distinguished history as an Olympic nation. However, most Olympic histories have focused on men's sport. This is the first book to tell the story of Britain's Olympic women, how they changed Olympic spectacle and how, in turn, they have reinterpreted the Games. Exploring the key themes of gender and nationalism, and presenting a wealth of new empirical, archival evidence, the book explores the sporting culture produced by British women who aspired to become Olympians, from the early years of the modern Olympic movement. It shines new light on the frameworks imposed on female athletes, individually and as a group, by the International Olympic Committee (IOC), the British Olympic Association (BOA) and the various affiliated sporting international federations. Using oral history and family history sources, the book tells of the social processes through which British Olympic women have become both heroes and anti-heroes in the public consciousness. Exploring the hidden narratives around women such as Charlotte Cooper, Lottie Dod, Audrey Brown and Pat Smythe, and bringing the story into the modern era of London 2012, Dina Asher-Smith and Katarina Johnson-Thompson, the book helps us to better understand the complicated relationship between sport, gender, media and wider society. This is fascinating reading for anybody with an interest in sport history, Olympic history, women's history, British history or gender studies.
