**The Possibility of Cooperation** Michael Taylor 1987-08-13 This 1987 book offers a critique of the liberal theory of the state, focusing on a detailed study of cooperation in the absence of the state and of other kinds of coercion. The discussion includes an analysis of collective action and of the Prisoners' Dilemma supergame. It is a revised and expanded edition of the author's classic work of rational choice theory *Anarchy and Cooperation*, originally published with John Wiley in 1976. The analysis has been recast and developed here to make it more accessible to non-mathematical readers and to provide a more comprehensive and self-contained treatment of the theory of collective action. The book will be of interest to a range of readers in political and social philosophy and in economics.

**Internal Combustion Engines** Institution of Mechanical Engineers 2014-10-10 This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets

**Two Squatters** Martin J. Playne 2013 The social history of the Port Phillip District between 1839 and 1854 is explored by following in detail the lives of two early pioneers. These two men took up occupancy of the large Campaspe Plains Station in central Victoria. One was a rich, but eccentric land agent, Daniel Jennings; the other, a surgeon from Gloucestershire, Dr George Playne. Jennings remained a squatter and land investor until 1851, when he returned to England. Playne moved to Melbourne to practise medicine in 1844. He played important roles in efforts to improve tenure for squatters, to form a new colony separate from NSW, to establish a medical association and a hospital. He was a magistrate from 1843 until 1854. He returned to England in 1854. Their lives in England and Australia from birth to death and that of their families have been explored in depth. 444 pages, 85 illustrations with 10 in colour, fully indexed, paperback, A5

**Allying beyond Social Divides** Yasmine Berriane 2020-11-26 This book offers a fresh look at the role of coalitions in contentious politics in North Africa and the Middle East, based on conceptual reflexions and empirical case studies by researchers who have conducted extensive fieldwork in the region. Coalitions of actors that have traditionally not been allies have become a key feature of the protest movements that have emerged across North Africa and the Middle East since 2011. But what happens when Islamists ally with Leftists, workers with student unions and young engineers with local tribesmen? How do coalitions form across ideological, generational, professional, ethnic and class divides? Are such collaborations transformative? The authors seek to show that it is important to go beyond analyses that focus mainly on identifying the factors that led to a coalition's success or failure: coalitions are moments of transformative encounter that can lead to changes affecting relations with political authorities, ideological learnings, repertoires of action and understandings of the notion of right. Instead of analyzing coalitions and social divides as two opposite processes, this book further argues that studying the alliance of social groups goes hand in hand with exploring processes

of differentiation that are engineered by both political regimes and social actors. Focusing on the role of coalitions in contentious politics, before and after the Arab uprisings, this book proposes a sociology of coalitions in the Middle East based on key empirical examples, to analyze the transformations that emerged out of such alliances at the levels of repertoires of action, forms of organization, relations to political authorities and ideological learnings. The chapters in this book were originally published as a special issue of the journal, *Mediterranean Politics*.

[International Governance](#) Oran R. Young 2018-05-31 How can the global environment be safeguarded in the absence of a world government? In the vanguard of efforts to address this critical question, Oran R. Young draws on environmental issues to explore the nature of international governance. Young's analysis invokes the distinction between "governance," a social function involving the management of interdependent individuals or groups, and "government," a set of formal organizations that makes and enforces rules.

*A Biographical Dictionary of Modern Rationalists* Joseph McCabe 1920 The term 'rationalism', dating from around the middle of the seventeenth century, is usually understood as the philosophical outlook which stresses the power of reason over faith, emotion or instinct. In his *Biographical Dictionary*, McCabe collects together thousands of men and women who throughout history have championed the cause of rationalism, upholding 'the right of reason against the authority of Church or tradition'. Covering over three centuries, the

Dictionary gathers together theists, pantheists, atheists, materialists, agnostics, secularists, monists, and positivists. It contains not only philosophers, but teachers of science, political theorists, historians, and artists. Each entry lists the subject's birth and death dates, details of their education and occupation, and evidence of their rationalist views. Including European and American figures, the Dictionary is full of minor figures rarely found in other reference works. McCabe (1867-1955) was one of the foremost modern atheists. A prolific writer, he produced nearly 250 books and pamphlets, was a founding member of Britain's Rationalist Press Association, and a much-respected public speaker. Formerly a monk, he left the priesthood to devote his life to furthering the cause of rationalism and freethought. He had no doubt that when human knowledge was complete materialism would prove to be the correct theory of reality. --covers the period 1548 to 1920 --the only work of its kind in English --major and minor Western thinkers i--ncludes philosophers, scientists, economists, doctors, sociologists, political theorists, poets, and novelists from Europe and the USA

Towards New Developmentalism Shahrukh Rafi Khan 2010-10-04 The global financial and economic crisis starting in 2007 has provoked the exploration of alternatives to neo-liberalism. Although neo-liberalism has been critiqued from various perspectives, these critiques have not coalesced into a concrete alternative in development economics literature. The main objective of this book is to name and formulate this alternative, identify what is new about this viewpoint, and project it on to the academic landscape. This book includes contributions from many prominent development economists who are unified by a form of "developmental pragmatism". Their concern is with the problems of development that preoccupied the pioneers of economic development in the mid-twentieth century, known as the developmentalists. Like the developmentalists, the contributors to *Towards New Developmentalism* are policy-oriented and supportive of institutional development and engagement with economic globalization. This collection has an over-arching concern with promoting social justice, and holds the general view of the market as the means to affecting an alternative program of development rather than as a master whose dictates are to be obeyed without question. This important collection sets the agenda for new developmentalism, drawing on issues such as industrial policy, technology, competition, growth and poverty. In broad terms, the economic development debate is cast in terms of whether the market is the master, an ideological neo-liberal perspective, or the means to affect change as suggested by the pragmatic perspective that is being termed neo-developmentalism. This book will be valuable reading to postgraduates and researchers specialising in the area of development studies including within economics, international relations, political science and sociology.

**Phantom Buddha** Alvaro Cardona-Hine 2013-05-07 *Phantom Buddha* is a portrait of the experiences of a man not quite made for this conventional world, beginning with his dead-end job in an insurance company for nine long years, which the author describes with a wicked humor. Married, with four children, he meets and falls in love with another woman and leaves his family to be with her, finding the freedom to be himself he so yearns for. But, when he introduces his new love to the zen practice that has long interested him, she becomes totally involved, both in the practice and with the Japanese zen master who uses his position to seduce many of his female students. Forced out of the zen center when he expresses his unhappiness with this situation, he sinks into despair and a hopeless pursuit of his beloved. Written in some parts with broad humor, Cardona-Hine also captures the ephemeral beauty of a new love and the depths of despair at its loss. Based on real events, the author intertwines dreams that he had during these years, dreams which reveal to an even greater extent the emotional intensity of his situation as well as the states of mind that sweep through him. Intensely

written and felt, the novel shimmers with an authenticity and passion seldom seen in writing today.

**Gunbearer** Jan Merlin 2002-01-01 Sidi Mubarak Mumbai, a Yao tribesman, trekked many years with legendary British explorers on their dangerous marches into the Dark Continent--his first employers for such expeditions were Richard Burton, John Hanning Speke, and James Augustus Grant. Mumbai began his journeys with them when he was barely eighteen years of age. He was serving in the Seyyid's army at a minor jungle river post on the vast mainland when hired as Speke's gunbearer for his new and future profession--and during the next six turbulent years, grew to full manhood amidst tribal wars, safari mutinies, and the enticements of generous women. This two volume saga of Equatorial Africa's early history is a vivid account of seeking what was not lost, as related by a candid African observer--a moving counterpoint to the often evasive personal reports constructed by travelers of the Victorian era. He openly reveals what has been kept prudishly hidden or removed from former journals about British 'gentlemen'--whose smoldering passions, petty jealousies, and quarrels endangered their own lives, and those of their hired bearers. Unfortunately, the enmity between two was also borne home to England--where it was deliberately fanned into flame by a malicious mutual friend, resulting in the sudden death of Speke--and even that was a debated mystery. In these two companion volumes, Part One and Part Two of GUNBEARER--the journal of S.M. Mumbai, an African delivers a unique recital of his fateful encounter with Captains Speke, Burton, and Grant, unfolding their diverse relationships--and knowing "Spikka sahib" better than any, he records how the resulting tragedy truly occurred. These two volumes give a unique evocation of what it was like to safari in Africa in the mid-19th Century. The author's "voice" allows us to saturate ourselves in the colors, textures, odors, sounds, and sensations of treks through wildest Africa, transporting the reader to a long-vanished world. The novel tries to do justice to a long forgotten historical pair of figures, one being the explorer, Speke, whose untimely death and rivalry with the more famous Burton cheated him of almost all credit for his incredible exploits. But the second character you won't soon forget is the narrator, Sidi Mubarak Mumbai, better known as "Bombay", whose vocabulary and viewpoint are quite unique to English literature. These are two epic journeys... to suffer and travel with the Captains and their sad little companion creates a haunting effect. As a cautionary tale for our own lives, GUNBEARER presents us with a message that we may be powerless to adapt to the desperate and trivial vanities in our personal lives. It is the hardest lesson of all to learn. Jan Merlin has presented the story in the form of a masterpiece of literature.

International Business Law and Its Environment Richard Schaffer 2011-03-21 INTERNATIONAL BUSINESS LAW AND ITS ENVIRONMENT, 8e, International Edition centers on the basic market-entry strategies most firms deploy as they expand into international markets: trade in goods and services, protecting and licensing intellectual property, and foreign direct investment. Interweaving the law with ethics-related issues, the text shows how individual firms manage these strategies in different ways while discussing the latest political, economic, and legal developments around the world. Helpful features such as case examples, end-of-chapter questions, and ethics activities help solidify your understanding of the material.

*Driving from Japan* Wanda James 2015-08-13 This study chronicles the success of the Japanese car in America. Starting with Japan's first gasoline-powered car, the Takuri, it examines early Japanese inventors and

automotive conditions in Japan; the arrival of Japanese cars in California in the late 1950s; consumer and media reactions to Japanese manufacturers; what obstacles they faced; initial sales; and how the cars gained popularity through shrewd marketing. Toyota, Honda, Datsun (Nissan), Mazda, Subaru, Isuzu, and Mitsubishi are profiled individually from their origins through the present. An examination follows of the forced cooperation between American and Japanese manufacturers, the present state of the industry in America, and the possible future of this union, most importantly in the race for a more environmentally-sound vehicle.

**Compliance & Public Authority** Oran R. Young 2013-10-18 Offers a theory of compliance and authority that would be applicable to behavior concerning economic contracts, law, enforcement, and international relations. It examines the problem of compliance in centralized (e.g. national and state laws) and decentralized (international treaties) systems. Applies the theory to explain the level of compliance with Partial Nuclear Test Ban Treaty and the International North Pacific Fisheries Convention. Originally published in 1979

The Evolving Global Trade Architecture Dilip K. Das 2007 This book is useful for scholars and practitioners who did not follow the GATT/WTO negotiations and who desire to acquire a comprehensive background on the subject. Mordechai E. Kreinin, Journal of Economic Literature This comprehensive and accessible book examines the evolution of the multilateral trade regime in the ever-changing global economic environment, particularly during the WTO era and the ongoing Doha Round. Professor Das explores how the creation of the multilateral trade regime, or the GATT/WTO system, has been fraught with difficulties. He describes the ways, by means of various rounds of negotiations, the multilateral trade regime has constantly adjusted itself to the new realities of the global economy. One glance at the recent history indicates that the evolution of the

multilateral trade regime was far from even-handed and steady. The GATT/WTO system was repeatedly pushed to the brink of utter and ignominious disaster. Yet, as the author illustrates, the participating economies persevered. Consequently, the fabric of multilateral trade regime is stronger, its foundation deeper and its framework wider now than it was a generation ago. Unlike the GATT era, membership of the present trade regime is close to universal. The author concludes that of the two phases, the latter has turned out to be the more arduous, intricate and complex phase of evolution. Students and scholars of economics, international trade, international political economy and international relations will find this study of great interest. The definitions and explanations of terminology and advanced concepts make the book accessible to those without an extensive economic background.
