Understanding Anger Disorders Raymond DiGiuseppe 2007 Since classical times, philosophers and physicians have identified anger as a human frailty that can lead to violence and human suffering, but with the development of a modern science of abnormal psychology and mental disorders, it has been written off as merely an emotional symptom and excluded from most accepted systems of psychiatric diagnosis. Yet despite the lack of scientific recognition, anger-related violence is often in the news, and courts are increasingly mandating anger management treatment. It is time for a fresh scientific examination of one of the most fundamental human emotions and what happens when it becomes pathological, and this thorough, persuasive book offers precisely such a probing analysis. Using both clinical data and a variety of case studies, esteemed anger researchers Raymond A. DiGiuseppe and Raymond Chip Tafrate argue for a new diagnostic classification, Anger Regulation and Expression Disorder, that will help bring about clinical improvements and increased scientific understanding of anger. After situating anger in both historical and emotional contexts, they report research that supports the existence of several subtypes of the disorder and review treatment outcome studies and new interventions to improve treatment. The first book that fully explores anger as a clinical phenomenon and provides a reliable set of assessment criteria, it represents a major step toward establishing the clear definitions and scientific basis necessary for assessing, diagnosing, and treating anger disorders.

World of the Gift Jacques T. Godbout 1998-10-21 The anthropologist Marcel Mauss, in his famous exploration of the gift in "primitive" and archaic societies, showed that the essential aspect of the exchange of presents involved the establishment of a social tie that bound the parties together above and beyond any material value of the objects exchanged. He argued that these intangible mutual "debts" constituted the social fabric. Godbout and Caillé show that, contrary to the modern assumption that societies function on the basis of market exchange and the pursuit of self-interest, the gift still constitutes the foundation of our social fabric. The authors describe the gift not as an object but as a social connection, perhaps the most important social connection because it creates a sense of obligation to respond in kind. They examine the gift in a broad range of cases such as blood and organ donation; volunteer work; the bonds between friends, couples, and family; Santa Claus; the interaction between performers and their audience; and the relation of the artist to society. Written in an engaging manner, *The World of the Gift* will appeal to anyone who is interested in how the world really operates.

The Rejection of Consequentialism Samuel Scheffler 1994-08-11 In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

Lost Downtown Peter Hugar 2016-02 It's a vanished world, and Peter Hugar was right there in it. The Lower East Side between 1972 and 1985 -- filled with artists, wannabe artists and hangers-on -- was a community of the misbegotten gathered from every town in America and relocated in the mean streets between Broadway and the Bowery. Nothing but their talent, their flamboyance, their rank gender-bending mockery and their arch irony supported them. Some made their names. Many came to grief. A few made art. In those days, the gutted streets of the Lower East Side looked like a war zone. Everyone lived and worked on the extreme outer margins of money and art, penniless and unknown. As a community, Downtown was a counterstatement to the rich New York of the banks, museums, media, corporations ... and the art world itself. That Downtown is forever gone. Time, gentrification, disease and death have taken their toll and turned this vibrant epoch into a chapter of art history. But before it vanished, its extravagant cast sat for Peter Hugar's camera -- and is now alive again in front of our eyes. Featured among others: Joe Brainard, William Burroughs, Remy Charlip, Edwin Denby, Divine, Ray Johnson, Fran Lebowitz, Charles Ludlum, Susan Sontag, Paul Thek, John Waters, Robert Wilson, David Wojnarowicz.

themselves. "What do I do now?" Going from the abstractions to the actions is not always clear. The Practice of Rational Emotive Behavior Therapy represents a compilation of years of theoretical and clinical insights distilled into a specific theory of disturbance and therapy and deductions for specific clinical strategies and techniques....The structure of this books focuses on an explication of the theory, a chapter on basic practice, and a chapter on an in depth case study. A detailed chapter follows on the practice of individual psychotherapy. Although the book is not broken into sections, the next four chapters represent a real treasure. The authors focus on using REBT in couples, family, group, and marathons sessions. Doing REBT with one person is difficult to learn. Once the clinician adds more people to the room with different and sometimes competing agendas things get more complicated. These chapters will not only help the novice clinician but also the experienced REBT therapists work better in these types of sessions. So, consider yourself lucky for having picked up this book. Reading it will help many people get better." - From the Foreword by Raymond DiGiuseppe, PhD, ScD, Director of Professional Education, Albert Ellis Institute; Professor and Chair, Department of Psychology, St. John's University This edition, involving a unique collaboration between Albert Ellis and the world's greatest Ellis scholar, Windy Dryden, modernizes Ellis's pioneering theories. The book begins with an explanation of rational emotive behavior therapy as a general treatment model and then addresses different treatment modalities, including individual, couple, family, and sex therapy. The authors have added material new since the book's original edition on teaching the principles of unconditional self-acceptance in a structured group setting. With extensive use of actual case examples to illustrate each of the different settings, and a new brand new foreword by Raymond DiGiuseppe that sets the book into its 21st-century context.

Father of the Comic Strip David Kunzle 2007 Sixty years before the comics entered the American newspaper press, Rodolphe Töpffer of Geneva (1799-1846), schoolmaster, university professor, polemical journalist, art critic, landscape draftsman, and writer of fiction, travel tales, and social criticism, invented a new art form: the comic strip, or "picture story," that is now the graphic novel. At first he resisted publishing what he called his "little follies." When he did, they became instantly popular, plagiarized, and imitated throughout Europe and the United States. Töpffer developed a graphic style suited to his poor eyesight: the doodle, which he systematized and also theorized. The drawings, with their "modernist" spontaneous, flickering, broken lines, forming figures in mad hyperactivity, run above deft, ironic captions and propel narratives of surreal absurdity. The artist's maniacal protagonists mix social satire with myth. By the mid-nineteenth century, Messrs. Jabot, Festus, Cryptogame, and other members of the crazy family, comprising eight picture stories in all, were instant folk heroes. In a biographical framework, Kunzle situates the comic strips in the Genevan and European culture of the time as well as in relation to Töpffer's other work, notably his hilarious travel tales, and recounts their curious genesis (with an initial imprimatur from Goethe, no less) and their controversial success. Kunzle's study, the first in English on the writer-artist, accompanies Rodolphe Töpffer: *The Complete Comic Strips*, a facsimile edition of the strips themselves, with the first-ever translation of these into English. David Kunzle is a professor of art history at the University of California, Los Angeles, and the author of many books on popular culture and graphic arts, including *History of the Comic*

Abolitionism Joaquim Nabuco 1977

Music and Manipulation Steven Brown 2006 Since the beginning of human civilization, music has been used as a device to control social behavior, where it has operated as much to promote solidarity within groups as hostility between competing groups. Music is an emotive manipulator that influences attitude, motivation and behavior at many levels and in many contexts. This volume is the first to address the social ramifications of music's behaviorally manipulative effects, its morally questionable uses and control mechanisms, and its economic and artistic regulation through commercialization, thus highlighting not only music's diverse uses at the social level but also the ever-fragile relationship between aesthetics and morality.
