Teacher Shocks and Student Learning 2005 "A large literature examines the link between shocks to households and the educational attainment of children. The authors use new data to estimate the impact of shocks to teachers on student learning in mathematics and English. Using absenteeism in the 30 days preceding the survey as a measure of these shocks they find large impacts: A 5 percent increase in the teacher's absence rate reduces learning by 4 to 8 percent of average gains over the year. This reduction in learning achievement likely reflects both the direct effect of increased absenteeism and the indirect effects of less lesson preparation and lower teaching quality when in class. The authors document that health problems-primarily teachers' own illness and the illnesses of their family members-account for more than 60 percent of teacher absences; not surprising in a country struggling with an HIV/AIDS epidemic. The relationship between shocks to teachers and student learning suggests that households are unable to substitute adequately for teaching inputs. Excess teaching capacity that allows for the greater use of substitute teachers could lead to larger gains in student learning. "--World Bank web site.

Practice Guideline for the Treatment of Patients with Schizophrenia American Psychiatric Association 1997 Developed by experts on schizophrenia and exhaustively reviewed by APA members, the "American Psychiatric Association Practice Guideline for the Treatment of Patients With Schizophrenia" provides therapists with a set of patient care strategies that will aid their clinical decision making. The guideline describes the best and most appropriate treatments available to patients with schizophrenia, including psychopharmacological treatments, ECT, and psychosocial and community interventions. It delineates the process of treatment planning and identifies areas in which research may improve our understanding and management of this condition. This guideline will also help managed care organizations develop more scientifically based and clinically sensitive criteria for the utilization and reimbursement of psychiatric services. Armed with these guidelines, clinicians can improve the care of their patients with schizophrenia and enable them to lead happier and more productive lives.

Classwide Positive Behavior Interventions and Supports Brandi Simonsen 2015-01-27 A vital classroom management resource, this book shows how to implement positive behavior interventions and supports (PBIS) in K-12 classrooms, regardless of whether PBIS is adopted schoolwide. The primary focus is universal (Tier 1) support for all students. Practical, step-by-step guidelines are provided for structuring the classroom environment, actively engaging students in instruction, teaching positive expectations, and establishing a continuum of strategies to reinforce positive behavior and respond to inappropriate behavior. Numerous real-world examples and learning exercises are included. In a large-size format with lay-flat binding for easy photocopying, the book includes reproducible tools for classwide PBIS planning and implementation. Purchasers get access to a Web page where they can download and print the reproducible materials.

Core Entrustable Professional Activities for Entering Residency Association of American Medical Colleges 2014-05-28 This landmark publication published by the AAMC identifies a list of integrated activities to be expected of all M.D. graduates making the transition from medical school to residency. This guide delineates 13 Entrustable Professional Activities (EPAs) that all entering residents should be expected to perform on day 1 of residency without direct supervision regardless of specialty choice. The Core EPAs for Entering Residency are designed to be a subset of all of the graduation requirements of a medical school. Individual schools may have additional mission-specific graduation requirements, and specialties may have specific EPAs that would be required after the student has made the specialty decision but before residency matriculation. The Core EPAs may also be foundational to an EPA for any practicing physician or for specialty-specific EPAs. Update: In August 2014, the AAMC selected ten institutions to join a five-year pilot to test the implementation of the Core Entrustable Professional Activities (EPAs) for Entering Residency. More than 70 institutions, representing over half of the medical schools accredited by the U.S. Liaison Committee on Medical Education (LCME), applied to join the pilot, demonstrating the significant energy and enthusiasm towards closing the gap between expectations and performance for residents on day one. The cohort reflects the breadth and diversity of the applicant pool, and the institutions selected are intended to complement each other through the unique qualities and skills that each team and institution brings to the pilot. Faculty and Learners' Guide (69 pages) - Developing faculty: The EPA descriptions, the expected behaviors, and the vignettes are expected to serve as the foundation for faculty development. Faculty can use this guide as a reference for both feedback and assessment in pre-clinical and clinical settings.- Developing learners: Learners can also use this document to understand the core of what is expected of them by the time they graduate. The EPA descriptions themselves delineate the expectations, while the developmental progression laid out from pre-entrustable to entrustable behaviors can serve as the roadmap for achieving them.

What Matters for Staying On-Track and Graduating in Chicago Public High Schools Elaine Allensworth 2013-04-05 Almost half of all Chicago Public School students fail to graduate, and in some CPS high schools more students drop out than graduate. It is a problem that can sometimes feel overwhelming to address because the causes of dropout are myriad and complex. What is often lost in discussions about dropping out is the one factor that is most directly related to graduation-students' performance in their courses. In this research report, CCSR authors Elaine Allensworth and John Q. Easton look into the elements of course performance that predict whether students will graduate and suggest what schools and families can do to keep more teens in school. Building on earlier CCSR research of "on-track indicators" that demonstrated a connection between failing freshman classes and dropping out, the authors found that a number of freshman-year factors can be used to predict high school graduation. Grades are as predictive as on-track indicators; almost all students with a "B" average or better at the end of their freshman year graduate, compared to only a quarter of those with a "D" average. The

research also revealed how critical attendance is for freshman success. Conventional wisdom holds that eighth grade test scores are good predictors of students' likelihood to do well in high school courses. However, course attendance is eight times more predictive of course failure in the freshman year than test scores. Just one week of absence is associated with a much greater likelihood of failure, regardless of incoming achievement. The authors also examine how school practices affect students' grades, failure rates and attendance. Students' grades and attendance are particularly better than expected in schools characterized by two features-supportive relationships between teachers and students, and a perception among students that the work they are doing in high school is preparing them for the future.

Monitoring Educational Equity National Academies of Sciences, Engineering, and Medicine 2019-09-30 Disparities in educational attainment among population groups have characterized the United States throughout its history. Education is sometimes characterized as the "great equalizer," but to date, the country has not found ways to successfully address the adverse effects of socioeconomic circumstances, prejudice, and discrimination that suppress performance for some groups. To ensure that the pursuit of equity encompasses both the goals to which the nation aspires for its children and the mechanisms to attain those goals, a revised set of equity indicators is needed. Measures of educational equity often fail to account for the impact of the circumstances in which students live on their academic engagement, academic progress, and educational attainment. Some of the contextual factors that bear on learning include food and housing insecurity, exposure to violence, unsafe neighborhoods, adverse childhood experiences, and exposure to environmental toxins. Consequently, it is difficult to identify when intervention is necessary and how it should function. A revised set of equity indicators should highlight disparities, provide a way to explore potential causes, and point toward possible improvements. *Monitoring Educational Equity* proposes a system of indicators of educational equity and presents recommendations for implementation. This report also serves as a framework to help policy makers better understand and combat inequity in the United States' education system. Disparities in educational opportunities reinforce, and often amplify, disparities in outcomes throughout people's lives. Thus, it is critical to ensure that all students receive comprehensive supports that level the playing field in order to improve the well-being of underrepresented individuals and the nation.

All potential jurors will receive a copy when they attend for jury service.

Looking Forward to High School and College Elaine Allensworth 2014-09-01 Grades and attendance-not test scores-are the middle grade factors most strongly connected with both high school and college success. In fact, grades and attendance matter more than test scores, race, poverty, or other background characteristics for later academic success. This report follows approximately 20,000 Chicago Public Schools students as they transition from elementary to high school. It is designed to help answer questions about which markers should be used to gauge whether students are ready to succeed in high school and beyond. It also considers the performance levels students need to reach in middle school to have a reasonable chance of succeeding in high school.

Preschool Attendance in Chicago Public Schools Stacy B. Ehrlich 2014-05-05 Students who attend preschool regularly are significantly more likely than chronically absent preschoolers, those who missed at least 10 percent of the school year, to be ready for kindergarten and to attend school regularly in later grades. The study, which followed 25,000 three- and four-year-olds served by Chicago Public Schools (CPS) school-based preschool programs, finds chronic absenteeism is rampant among preschoolers in Chicago. In 2011-2012, almost half of three-year-olds and more than one-third of four-year-olds were chronically absent. This report examines the extent of preschool absenteeism and the reasons preschool students are absent. It also examines the relationship between preschool absences and students' scores

on measures of kindergarten readiness in math, letter recognition, and social-emotional development, as well as assessments of second-grade reading fluency. Ultimately, students who miss more preschool have lower kindergarten readiness scores, and students who are chronically absent in preschool are more likely to be chronically absent in kindergarten and have lower second grade reading scores. However, students who enter preschool with the weakest skills benefit the most from regular attendance.

Planning Guide for Maintaining School Facilities Tom Szuba 2003 This title is no longer available in print. However, please visit the NCES website at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2003347> to view an electronic version of the text. As America's school buildings age, we face the growing challenge of maintaining the nation's education facilities at a level that enables our teachers to meet the needs of the 21st century learners. This tool has been developed to help readers better understand why and how to develop, implement, and evaluate a facilities maintenance plan. It focuses on: maintenance as a vital task in the responsible management of an education organization, the needs of an education audience, strategies and procedures for planning, implementing, and evaluating maintenance programs, a process to be followed, rather than a canned set of "one size fits all" solutions, and recommendations based on "best practices", rather than mandates. The document offers recommendations on the following important issues, which serve as chapter headings: Introduction to School Facilities Maintenance Planning Planning for School Facilities Maintenance Facilities Audits (Knowing What You Have) Providing a Safe Environment for Learning Maintaining School Facilities and Grounds Effectively Managing Staff and Contractors Evaluating Facilities Maintenance Efforts

Keywords for Disability Studies Rachel Adams 2015-08-14 Introduces key terms, concepts, debates, and histories for Disability Studies Keywords for Disability Studies aims to broaden and define the conceptual framework of disability studies for readers and practitioners in the field and beyond. The volume engages some of the most pressing debates of our time, such as prenatal testing, euthanasia, accessibility in public transportation and the workplace, post-traumatic stress, and questions about the beginning and end of life. Each of the 60 essays in Keywords for Disability Studies focuses on a distinct critical concept, including "ethics," "medicalization," "performance," "reproduction," "identity," and "stigma," among others. Although the essays recognize that "disability" is often used as an umbrella term, the contributors to the volume avoid treating individual disabilities as keywords, and instead interrogate concepts that encompass different components of the social and bodily experience of disability. The essays approach disability as an embodied condition, a mutable historical phenomenon, and a social, political, and cultural identity. An invaluable resource for students and scholars alike, Keywords for Disability Studies brings the debates that have often remained internal to disability studies into a wider field of critical discourse, providing opportunities for fresh theoretical considerations of the field's core presuppositions through a variety of disciplinary perspectives. unique needs of a campus and design a comprehensive school counseling program to meet those needs. Recognizing the important roles of the entire educational community, the Texas Model for Comprehensive School Counseling Programs provides examples of how parents, teachers, administrators, principals and school counselors can best contribute to implementation of each of the four components of comprehensive school counseling programs. It provides a developmental framework for a school counseling program curriculum that includes activities at each grade level to enhance students' educational, career, personal and social development.

Digest of Education Statistics 2012 Thomas D. Snyder 2014-04 Digest of Education Statistics 2012 is the 48th in a series of publications initiated in 1962. Its primary purpose is to provide a compilation of statistical information covering the broad field of American education--from pre-kindergarten through graduate school--drawn from government and private sources, but especially from surveys and other activities led by NCES (National Center for Education Statistics) part of the Institute for Education Sciences (IES). The digest contains data on the number of schools, students, and teachers, as well as statistics on educational attainment, finances, libraries, technology, and international comparisons. Details on population trends, education attitudes, labor force characteristics, and federal aid supplies helpful background for evaluating the education data. This statistical reference could be helpful to parents choosing schools for their children as well as for teachers, librarians, and public administrators as it tracks enrollment, population trends and key areas of studies with student progress. It also tracks the post-secondary/college level detailing undergraduate tuition and room/board ESTIMATE costs at private nonprofit institutions, private for profit institutions and public institutions. It also tallies the number of postsecondary degrees and provides some gender demographics in this area. The Digest contains seven chapters: All Levels of Education, Elementary and Secondary Education, Postsecondary Education, Federal Programs for Education and Related Activities, Outcomes of Education, International Comparisons of Education, and Libraries and Adult Education. Preceding these chapters is an Introduction that provides a brief overview of current trends in American education, which supplements the tabular materials in chapters 1 through 7. The Digest concludes with three appendixes. The first appendix, Guide to Sources, provides a brief synopsis of the surveys used to generate the Digest tables; the second, Definitions, is included to help readers understand terms used in the Digest; and the third, Index of Table Numbers, allows readers to quickly locate tables on specific topics. In addition to updating many of the statistics that have appeared in previous years, this edition contains new material, including: Percentage distribution of 6- to 18-year olds, by parent's highest level of educational attainment, household type (either two-parent or single-parent), and child's race/ethnicity (table 12); Enrollment and percentage distribution of enrollment in public elementary and secondary schools, by race/ethnicity and region (table 44); Number and percentage of public school students participating in programs for English language learners, by state (table 47); Children 3 to 21 years old served under Individuals with Disabilities Education Act, Part B, by age group and race/ethnicity (table 49); Percentage of 3-, 4-, and 5-year-old children enrolled in preprimary programs, by attendance status, level of program, and selected child and family characteristics (table 57); Number and enrollment of public elementary and secondary schools that have closed, by school level and type (table 109); Number and percentage distribution of public school students eligible for free or reduced-price lunch, by school level, locale, and student race/ethnicity (table 112); Public elementary and secondary charter schools and enrollment, by state (table 117); First-time kindergartners' reading, mathematics, science, cognitive flexibility, and approaches to learning scale scores in fall and spring of the kindergarten year, by selected child, family, and school characteristics (table 135); Number and percentage distribution of kindergartners, by kindergarten entry status (i.e., early entrant, on-time entrant, delayed entrant, or kindergarten repeater) and selected child, family, and school characteristics (table 136); Kindergartners' reading, mathematics, science, cognitive flexibility, and approaches to learning scale scores in fall and spring of the kindergarten year, by

kindergarten entry status (table 137); Percentage of 9th-grade students participating in various school-sponsored and non-school-sponsored activities, by sex and race/ethnicity (table 183); Percentage of 4th-, 8th-, and 12th-graders absent from school in the last month, by selected student and school characteristics and number of days absent (table 187); Total and current expenditures per pupil in fall enrollment in public elementary and secondary schools, by function and subfunction (table 214); Total fall enrollment in all postsecondary institutions participating in Title IV programs, by degree-granting status and control of institution (table 222); Percentage of recent high school completers enrolled in 2-year and 4-year colleges, by income level (table 236); Number of postsecondary students who entered the student loan repayment phase, number of students who defaulted, and 2-year student loan cohort default rates, by level and control of institution (table 400); Number and percentage of persons 16 to 24 years old who were neither enrolled in school nor working, by educational attainment, age group, family poverty status, and race/ethnicity (table 429); Employment to population ratios of all persons, males, and females 16 to 64 years old, by age group and educational attainment (tables 431, 432, and 433); Unemployment rates of all persons, males, and females 16 to 64 years old, by age group and educational attainment (tables 434, 435, and 436); Percentage of high school students age 16 over who were employed, by age group, sex, race/ethnicity, family income, nativity, and hours worked per week (table 441); and Average reading literacy scale scores of fourth-graders and percentage whose schools emphasize reading skills and strategies at or before second grade or at third grade, by sex and country or other education system (table 462).

The Tongue and Quill Air Force 2019-10-11 The Tongue and Quill has been a valued Air Force resource for decades and many Airmen from our Total Force of uniformed and civilian members have contributed their talents to various editions over the years. This revision is built upon the foundation of governing directives and user's inputs from the unit level all the way up to Headquarters Air Force. A small team of Total Force Airmen from the Air University, the United States Air Force Academy, Headquarters Air Education and Training Command (AETC), the Air Force Reserve Command (AFRC), Air National Guard (ANG), and Headquarters Air Force compiled inputs from the field and rebuilt The Tongue and Quill to meet the needs of today's Airmen. The team put many hours into this effort over a span of almost two years to improve the content, relevance, and organization of material throughout this handbook. As the final files go to press it is the desire of The Tongue and Quill team to say thank you to every Airman who assisted in making this edition better; you have our sincere appreciation!
