Tina Grenville Tina Grenville 2012-06-01 The extraordinary life of a former top model and television star. tina Grenville always wanted to be an actress. Widowed at the age of 20, in mysterious and still unresolved circumstances, she was forced to find work as a housekeeper on a remote Hawke's Bay farm. Eventually able to move to Auckland with her young son, she became first a radio actress, then a leading photographic and catwalk model. One of Paddy's Girls, an elite stable of top models, in 1964 she won 'Model of the Year'. Encouraged to move to Australia, she was a resounding success, in demand with leading couturiers and top fashion magazines. Finally achieving her childhood ambition, she became a long-standing cast member on Logie award-winning series THE GODFATHERS. A regular guest on television game shows and Paramount telemovies, she stayed in Australia for 14 years before moving back to New Zealand in 1980, to host her own show, GOOD MORNING, for Northern television. A panellist on BEAUTY AND THE BEAST, with the legendary Selwyn toogood, and a regular at Wellington's Downstage theatre, she has continued working as an actress, having recently completed a supporting role in the movie adaptation of Ronald Hugh Morrieson's work PREDICAMENT. this is her story - tragic, absorbing, funny, poignant and uplifting, and her insights into life, love and the lives of the lovely will have you laughing and crying in equal measure.

Time of the Assassins Hugh Holton 2001-06-18 Hugh Holton, the highest-ranking active police officer writing books today, is well-known for powerful, passion-charged novels. Reviewers compare his books to hurricanes and firestorms, descriptions that are especially apt in the case of *Time of the Assassins*. The most controversial story in today's inner cities is the CIA's apparent funding of counterinsurgent druglords in Latin America, who, instead of fighting revolutionaries, have used that funding to wholesale crack cocaine in this country's ghettos. In this exciting new novel, Commander Larry Cole battles these Agency-funded druglords. Their "personal representative" is Baron von Rianocek, a hitman. A well-paid professional, known as a world-class "problem solver," he has successfully eliminated both high-profile British industrialists and South American dictators. The CIA, the FBI, and Interpol, all suspect him of being behind various incidents, but they have never been able to pin anything on the slippery millionaire, who claims to be descended from European royalty. Police detective Larry Cole has unwittingly crossed paths several times with the notorious assassin. Appearing at the wrong place at the wrong time, he had twice foiled the assassin's work. Now the well-heeled assassin has a new target. He has set his telescopic sights on the CPD chief of detectives-Cole himself. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Time of the Locust Morowa Yejide 2015-10-06 " . . . A novel about an autistic boy whose drawings represent something much deeper than even the doctors who study can grasp; his father, serving 25 to life for murder; his mother, trying to hold herself together and fix her broken child. It's a supernatural journey of crime and punishment, retribution and redemption that ultimately leads to a father saving his son, a mother connecting with her child, and an American family reclaiming itself"--

Time Series Analysis, Modeling and Applications Witold Pedrycz 2012-11-29 Temporal and spatiotemporal data form an inherent fabric of the society as we are faced with streams of data coming from numerous sensors, data feeds, recordings associated with numerous areas of application embracing physical and human-generated phenomena (environmental data, financial markets, Internet activities, etc.). A quest for a thorough analysis, interpretation, modeling and prediction of time series comes with an ongoing challenge for developing models that are both accurate and user-friendly (interpretable). The volume is aimed to exploit the conceptual and algorithmic framework of Computational Intelligence (CI) to form a cohesive and comprehensive environment for building models of time series. The contributions covered in the volume are fully reflective of the wealth of the CI technologies by bringing together ideas, algorithms, and numeric studies, which convincingly demonstrate their relevance, maturity and visible usefulness. It reflects upon the truly remarkable diversity of methodological and algorithmic approaches and case studies. This volume is aimed at a broad audience of researchers and practitioners engaged in various branches of operations research, management, social sciences, engineering, and economics. Owing to the nature of the material being covered and a way it has been arranged, it establishes a comprehensive and timely picture of the ongoing pursuits in the area and fosters further developments.

Timesnatch Robert Swindells 2011-09-30 Once a creature is extinct, it's gone for ever, isn't it? Not any more - as a butterfly from the past proves. The physicist mother of Kizzy Rye and Fraser Rye has invented an amazing time machine that can travel back into the past, snatch a plant or animal now extinct and bring it back into the present. It's a wonderful achievement, a real scientific breakthrough. But the machine - 'Rye's Apparatus' - has a horrifying potential. Suddenly Kizzy and Fraser find

themselves caught up in a terrifying spiral of events - events that lead finally to a monstrous demand from a sinister and violent organization... WINNER OF THE 1995 EARTHWORM AWARD, 7-11 YEAR-OLD CATEGORY

The Queen's Adept Rodolfo Martínez 2015-04-01 The People's Covenant and God's Hammer have raged a Cold War that has lasted for over twenty years. A war without armies, where battles are fought in the dark and information is the most dangerous weapon. In this world —which sometimes seems the Middle Ages, sometimes the Renaissance and sometimes the Nineteenth Century— lives Yáxtor Brandan, empirical adept at the service of the Queen of Alboné. A relentless, amoral and unscrupulous character, Yáxtor fights to recover his own past as he tries to prevent a new player in the espionage game to end the world, as he knows it. A fascinating fast-moving and complex plot, full of tension and surprises and excellently paced; a main character for whom it should be impossible to feel the slightest sympathy, and yet somehow we do, even as his cruelty disturbs us more and more -an extremely difficult feat to pull off so successfully; powerful secondary actors, who either leave you with a sense of uneasiness with regard to their motivations and loyalties, or make you want to shout out -as people did in the early days of cinema- "Look out, don't trust him!"; and a pervading atmosphere of tragedy, especially in a final unexpected and shocking, yet on reflection almost inevitable, scene. In short, a totally addictive and highly original novel set in a world that is at once both strangely familiar and disturbingly alien. —Steve Redwood, author of Fisher of Devils.

New Polymeric Materials Ezio Martuscelli 1987 The development of new polymeric materials has caused a considerable expansion in the field of reactive processing. These new materials are very competitive compared to the traditional ones with respect to production costs and performance. The reports published in this volume present the recent developments and emerging trends in the field of reactive processing and the physical properties of the resulting polymeric materials. Special attention is given to the chemical, kinetic and rheological aspects of reactive processing.

White-Handed Gibbons Luigi Zuccante 2019-12-07 Gibbons are anthropoidal primates. Monogamous, they fiercely defend the territory they need, and perhaps this is the only thing which is truly necessary for them to live freely. Hunted by poachers to be resold as pets, driven out by deforestation in order to develop industrial crops, their extinction is drawing near. Yet, gibbons are beings apart which generate our curiosity, together with the desire to know and understand them. These outstanding acrobats do not try to seduce, yet they seduce thanks to their graceful movements, the depth of their singing, as well as their natural discretion. They are great apes in all their splendour... This book describes these great apes and reviews our ethnocentrism. Animals are sentient beings just like humans...

Time Multiplexed Beam-Forming with Space-Frequency Transformation Wei Deng 2012-08-23 This book describes a unique approach to smart receiver system design. It starts with the analysis of a very basic, single-path receiver structure, then using similar methods, extends the analysis to a more complicated multi-path receiver. Within the multi-path structure, two different types of phased -array architectures are discussed: Analog beam-forming, and digital beam-forming. The pros and cons are studied, and the

gaps are identified. Whereas previous books in this area focus mainly on phased-array circuit implementations, this book fills a gap by providing a system-level approach and introduces new methods for developing smart systems.

Timor Leste Andrea Katalin Molnar 2009-12-17 This book provides a comprehensive country overview of Southeast Asia's newest nation, Timor Leste (East Timor). This book focuses on its cultural and ethno-linguistic diversity, and its political history from the pre-Portuguese period up to 2009. The book pays particular attention to the historical roots of the current challenges to nation-building by reviewing the Indonesian occupation; guerrilla warfare by the Timorese against the occupiers; the politics leading up to the United Nations' popular consultation and the vote for independence in 2002. Explaining the structure of the government and its parliamentary system, this book highlights the problems and historical and cultural underpinnings of the challenges Timor Leste faces in building a stable viable nation. The author presents a synopsis of selected issues including: language, truth and reconciliation, the Catholic Church's political activism, internal security problems, the 'politics of oil', and the fact that violent conflicts, from 2005 to date, have made it necessary for the United Nation's peacekeeping forces to return. Thus far, the book argues, Timor Leste's nation-building efforts have been hampered by the dynamic interaction of number of national and international factors. The first comprehensive political and cultural history of East Timor to date, this book fills a gap and will be an important single reference resource for students and researchers in the field of Southeast Asian Studies, Anthropology and Political Science.

The Meaning of Dreams Anna Mancini 2007-03 Dreams are at the heart of a process where tangible and intangible worlds are intimately intermingled. Indeed, a dream is an intangible phenomenon occurring in a physical body that stands in an environment both material and informational (intangible). A systematic investigation of the connections between dreams and reality sheds new light on the dream process and on the functioning of the mind. This book invites you, the reader, to discover the results you can achieve through a more comprehensive and unified approach to the dream process. It gives you advice on how to carry out your own research. Reading this book will help you become better aware of the role played by your body at the meeting point between dreams and reality, between the tangible and the intangible (Chapter 1). The book describes an efficient method for observing the dream process (Chapter 2) and explains the results you can achieve with it through your own experimentation (Chapter 3). Through your personal exploration of the whole dream process you will be able to verify for yourself the reality of certain faculties of the mind which are commonly considered to be "paranormal". You will see that they can be explained rationally. Chapter 4 of the book explains how you can use the dream process to find answers to your questions, whether they regard your daily life (health, work, relationships, life guidance) or your artistic or scientific creativity. The last chapter (Chapter 5) explains why faculties today considered to be paranormal are destined to a natural collective awakening. With this book, I invite you to observe your dreams and their connections with your reality, with a mind as neutral as possible. This is the best way to understand the meaning of your dreams. Try, then, to forget all you have ever heard about dreams, and just look at them and observe the whole dream process, and not only the dreams. Everything I assert in the book can be verified through personal experience by using the proposed method of observation. With this method everyone, even the most skeptical person, can verify the existence of unusual faculties of the mind, and learn to develop and use them. Key words: dreams and reality, precognitive dreams, future in dreams, premonitory dreams, dream interpretation, meaning of dreams, paranormal faculties, telepathy, dreams and health, dreams and abundance, dreams and the past, mind and body, nightmares, dreaming brain, lucid dreams

Time, Space and Philosophy Christopher Ray 2002-09-11 This book provides a comprehensive, up-to-date and accessible introduction to the philosophy of space and time. Ray considers in detail the central questions of space and time which arise from the ideas of Zeno, Newton, Mach, Leibniz and Einstein. Time, Space and Philosophy extends the debate in many areas: absolute simultaneity is examined as well as black holes, the big bang and even time travel. Time, Space and Philosophy will be invaluable to the student of philosophy and science and will be of considerable interest to mathematics students. The clear, non-technical approach should also make it suitable to for the general reader.

Proverbs Walter C. Kaiser 1995 The book of Proverbs is the world's greatest treasury of wisdom. It offers practical insights for day-to-day discussions and provides moral guidelines for living in an immoral world. As you unearth the riches of Proverbs, you will discover why "the fear of the Lord is the beginning of wisdom" for all the affairs of everyday life.

Microbiology Handbook Rhea Fernandes 2009-11-23 Animal flesh consumed as food is labelled 'meat'; it refers mainly to skeletal muscle and associated fat, but it may also refer to organs. As it has a high water and protein content, and contains other water-soluble constituents, it makes a suitable medium for growth of microorganisms. The animal itself, environment, and processing condition all have a bearing on the diversity of microflora of these products.

My Mother's Spirit Dolores Eastenuni Stanfield 2004-04-30 The fact that Agnes Jacobs, a half-breed North American Mohawk Indian, aspired to greatness and succeeded, for a time, is a story worth telling. A liberated woman way before the term became fashionable, at seventeen, she cohabited with a young, full-blooded Mohawk, who in her opinion showed no gumption. She took off to make her fortune at the St. George Hotel in Ottawa, Ontario. She returned to her village and opened up the busiest, little speakeasy on the New York State and Canada border...at the height of the Prohibition Era. There she met a man worthy of her admiration—a state trooper who came to raid her speakeasy. She dared to show her feminine side, only to lose him to her youngest daughter Mary. Mary, needy for her mother's affections, endured her mother's wrath. Despondent over losing her two little girls to scarlet fever and pneumonia, she gave up and joined her two precious angels. She left her youngest, Eastenuni, age three, for her mother, Agnes, to bring up.

Mediocracy Alain Deneault 2018-05-15 There was no Reichstag fire. No storming of the Bastille. No mutiny on the Aurora. Instead, the mediocre have seized power without firing a single shot. They rose to power on the tide of an economy where workers produce assembly-line meals without knowing how to cook at home, give customers instructions over the phone that they themselves don't understand, or sell books and newspapers that they never read. Canadian intellectual juggernaut Alain Deneault has taken on all kinds of evildoers: mining companies, tax-dodgers, and corporate criminals. Now he takes on the most menacing threat of all: the mediocre.

To Desire a Devil Elizabeth Hoyt 2009-11-01 NOTHING IS MORE INTOXICATING- Reynaud St. Aubyn has spent the last seven years in hellish captivity. Now half mad with fever he bursts into his ancestral home and demands his due. Can this wild-looking man truly be the last earl's heir, thought murdered by Indians years ago? OR DANGEROUS- Beatrice Corning, the niece of the present earl, is a proper English miss. But she has a secret: No real man has ever excited her more than the handsome youth in the portrait in her uncle's home. Suddenly, that very man is here, in the flesh-and luring her into his bed. THAN SURRENDERING TO A DEVIL. Only Beatrice can see past Reynaud's savagery to the noble man inside. For his part, Reynaud is drawn to this lovely lady, even as he is suspicious of her loyalty to her uncle. But can Beatrice's love tame a man who will stop at nothing to regain his title-even if it means sacrificing her innocence?

Time Management with SAP ERP HCM Brian Schaer 2009 Learn how to optimize the planning and administration of your employees' working times and activities using SAP ERP HCM Time Management. This detailed reference will teach you everything you need for understanding, implementing, and configuring Time Management. Beginning with an overview, the book progresses through the basics of implementation, including what is important during the blueprinting stage, and how to integrate Time Management with other components. From there it moves on to cover the segments of Time Management configuration and customization that an implementer will follow. It also includes design considerations on how to use each infotype and which infotypes are required based on particular decisions. In addition, the book offers insight into how to configure the particular components, and how the items of the configuration fit together. The book concludes with a chapter on more advanced topics, including incentive wages, concurrent employment, web applications, and security and authorizations.

there's no question of foul play. The murder of a Home Timer is about as likely as unauthorized interference with the work of a Correspondent. . . . Isfahan, Arabia, 1029: Abu Ali was startled. He hadn't heard the stranger enter. The Correspondent was even more alarmed—his enhanced senses would have picked up the arrival of any normal human. Then the stranger spoke, and it was the language of the Home Time. Seconds later, Correspondent RC/1029's world went dark. The Home Time, 2000 Years Later: Field Operative Rico Garron is about to have a very bad day.

Tin City David Housewright 2005-05-01 Mac McKenzie is rich. So rich that he's left his job as a Twin Cities police officer and spends his time doing favors large and small for friends. So when an old Marine buddy of his father's calls with a request Mac takes the time to help him out. And it is one of the stranger favors he's ever been asked: the elderly Mr. Mosley, a beekeeper, wants Mac to find out why his bees are suddenly dying in droves. Mac does some digging and before long turns up a hornet's nest of trouble in the person of Frank Crosetti, a new neighbor on the property abutting Mosley's bees. What started out as an innocent investigation into some unregulated pesticide quickly turns lethal. Crosetti sticks around long enough to make some very specific threats, then disappears into the wind leaving behind a vicious rape, a lifeless body, and a very angry McKenzie bursting for someone to blame. With only the faintest of trails to follow and a suspicious group of federal agents gunning for him, Mac dives underground, taking only a stash of cash and a small arsenal with him on his undercover mission. Before long Mac's deep in the forgotten corners of Minneapolis sniffing for any sign of Crosetti, unable to rest until he gets results. Combining engaging humor and wit with action-packed storytelling, Edgar Winner David Housewright's second Mac McKenzie novel is clever, compelling, and thoroughly enjoyable.

Harmonisation of EU Competition Law Enforcement Jurgita Malinauskaite 2019-11-15 This book explores how the EU's enforcement of competition law has moved from centralisation to decentralisation over the years, with the National Competition Authorities embracing more enforcement powers. At the same time, harmonisation has been employed as a solution to ensure that the enforcement of EU competition rules is not weakened and the internal market remains a level playing field. While employing a comparative law argument, the book, accordingly, analyses the need for harmonisation throughout the different stages of development of the EU's competition law enforcement (save Merger control and State Aid), the underlying rationale, and the extent to which comparative studies have been undertaken to facilitate the harmonisation process from an historical perspective. It also covers the Directives, such as the Antitrust Damages Directive and the ECN+ Directive. Investigating both public and private enforcement, it also examines the travaux préparatoires for the enforcement legislation in order to discover the drafters' intent. The book addresses the European and the Member States' perspectives, namely, the Central and Eastern European (CEE) countries, as harmonisation proceeds through dialogue and cooperation between the two levels. Lastly, it explores the extent to which harmonisation of the competition law enforcement framework has been accepted and implemented in the Member States' legal systems, or has led to the fragmentation of the national systems of the CEE countries.

Time Travelers Never Die Jack McDevitt 2009-11-03 When physicist Michael Shelborne mysteriously vanishes, his son Shel discovers that he had constructed a time travel device. Fearing his father may be stranded in time—or worse—Shel enlists the aid of linguist Dave MacElroy to accompany him on the rescue mission. Their journey through history takes them from the enlightenment of Renaissance Italy through the American Wild West to the civil-right upheavals of the 20th century. Along the way, they encounter a diverse cast of historical greats, sometimes in unexpected situations. Yet the elder Shelborne remains elusive. And then Shel violates his agreement with Dave not to visit the future. There he makes a devastating discovery that sends him fleeing back through the ages, and changes his life forever.

Tiny Acts of Love Lucy Lawrie 2014-03-06 Surviving motherhood? It's all about having the right support network. Lawyer Cassie has a new baby, a husband who converses mainly through jokes, a best friend on the other side of the world, and a taskforce of Babycraft mums who make her feel she has about as much maternal aptitude as a jellyfish. Husband Jonathan dismisses Cassie's maternal anxieties, but is he really paying attention to his struggling wife? He's started sleep talking and it seems there's more on his mind than he's letting on. Then sexy, swaggering ex-boyfriend Malkie saunters into Cassie's life again. Unlike Jonathan, he 'gets' her. He'd like to get her into bed again, too... And on top of all her emotional turmoil, she also finds herself advising a funeral director on ghost protocol and becomes involved in an act of hotel spa fraud, never mind hiding cans of wasp spray all over the house to deal with the stalker who seems to be lurking everywhere she looks. Marriage and motherhood isn't the fairytale Cassie thought it would be. Will her strange new world fall apart around her or will tiny acts of love be enough to get her through? Funny, perceptive and real, *Tiny Acts of Love* portrays the rawness of motherhood, the flipside of love and the powerful lure of paths not taken. PRAISE FOR TINY ACTS OF LOVE 'A beautiful portrayal of the tribulations of becoming a new mum, it's a fantastic debut.' OK MAGAZINE 'Funny, poignant and honest, this is a cracker of a debut novel.' Time Present and Time Past Deirdre Madden 2013-05-28 Fintan Buckley is a pleasant, rather conventional and unimaginative man, who works as a legal adviser in an import/export firm in Dublin. He lives in Howth and is married to Colette. They have two sons who are at university, and a small daughter. As he goes about his life, working and spending time with his family, Fintan begins to experience states of altered consciousness and auditory hallucinations, which seem to take him out of a linear experience of time. He becomes interested in how we remember or imagine the past, an interest triggered by becoming aware of early photography, particularly early colour photography. He also finds himself thinking more about his own past, including time spent holidaying in the north of Ireland as a child with his father's family. Over the years he has become distanced from them, and in the course of the novel this link is re-established and helps to bring him understanding and peace, although in a most

unexpected way. Time Present and Time Past, Deirdre Madden's eighth novel for adults, is about time: about how not just daily life and one's own, or one's family's past, intersect with each other.

Titan #6: Synthesis James Swallow 2009-10-27 The Starship Titan continues on her outward voyage of discovery. Ranging farther and farther from Federation space, Captain William Riker and the crew look forward to living Starfleet's mission: seeking out new life, discovering new civilizations. Striking a "sandbank" -- a spatial distortion -- the Titan is knocked out of warp, her crew shaken up but uninjured. Titan has stumbled across a battlefield, and floating in it, shattered and in pieces, are the remains of a ship. Searching for survivors, they discover the ship never had a crew. The away team removes the computer core, looking for answers. Once the device is restored, it becomes clear this is not just a computer, but a thinking, reasoning artificial intelligence. It identifies itself as SecondGen White-Blue, and it comes from a civilization composed entirely of sentient computers. Eons ago these artificial intelligences were charged to be the first line of defense against The Null -- a destructive force so all-consuming that generation upon generation have waged unending war trying to find a way to beat back this terror. Captain Riker offers to assist them, but years of war have left the AIs distrustful and suspicious, especially of organics. The tide of the battle is turning, and The Null is winning. Set free, it will destroy everything in this system and then, unchecked, spread its mindless destruction into the heart of the Federation.
