Wood Coatings Franco Bulian 2009-06-02 Wood Coatings addresses the factors responsible for the performance of wood coatings in both domestic and industrial situations. The term 'wood coatings' covers a broad range of products including stains, varnishes, paints and supporting ancillary products that may be used indoors or outdoors. Techniques for coating wood go back many centuries but in recent decades there has been a move towards more environmentally-friendly materials, for example, the use of water-borne rather than solvent-borne chemicals. A major objective of Wood Coatings is to explain the underlying factors that influence selection, application and general operational issues. Basic information on the chemistry and technology of coatings is included for the benefit of students and laboratory technicians. Additionally, the book includes individual chapters of interest to architects, specifiers, and industrial users. * Offers up-to-date guidance on current availability and usage of wood coatings * Provides the reader with a basic understanding of both coating and substrate interactions * Covers both architectural (trade and DIY) and industrial sectors

The Ugly Duckling (Illustrated) Hans Christian Andersen 2018-10-14 Rare edition with unique illustrations. Hans Christian Andersen was a Danish author best known for writing children's stories including "The Little Mermaid" and "The Ugly Duckling." But he didn't just write short stories, and his intended audience wasn't restricted to children. In addition to his fairy tales, Andersen wrote poems, plays, novels, travel books, essays, and more. He hungered for recognition at home (Denmark) and abroad-and he got it! Eventually. Today, his stories can be read in over one hundred languages. But no matter what language they're in, Andersen's tales have got something for everyone. In them, you'll find beauty, tragedy, nature, religion, artfulness, deception, betrayal, love, death, judgment, penance, and-occasionally-a happy ending. They're complex tales, but since Andersen himself was pretty complex, we like to think that art imitates life. Or something like that. "The Ugly Duckling" is a literary fairy tale by Danish poet and author Hans Christian Andersen. The story tells of a homely little bird born in a barnyard who suffers abuse from the others around him until, much to his delight (and to the surprise of others), he matures into a beautiful swan, the most beautiful bird of all. The story is beloved around the world as a tale about personal transformation for the better.

A Forester's Log Angela Taylor 1998 *A Forester's Log* is a unique forest story, told from a forester's viewpoint--the view of John La Gerche, one of the first generation of foresters in Victoria, who managed the Ballarat-Creswick State Forest in the late nineteenth century. La Gerche's Letter Books and Pocket Books have survived to provide a rare insight into a bailiff-forester's burdens in the 1880s and 1890s. As a bailiff, he daily had to confront prop cutters and woodcarters, 'scamps and vagabonds' who constantly defied forest regulations. His pioneering work helped shape today's forested landscape around the Central Victorian goldfields town of Creswick, 'the home of forestry'. In the detailed correspondence between this amateur forester and his bureaucratic masters lies the human story of an ordinary yet remarkable man, endeavouring to strike a fair balance between the competing demands of local woodcutters and distant officials. Angela Taylor reads between the lines to create a beautifully perceptive portrait of a vanishing character type--the truly committed public servant. *A Forester's Log* is an illuminating and charming book which will appeal to a wide range of readers, both urban and rural, including those interested in conservation and landscape heritage.
