*A Place in the Sun* Sean Mills 2016-02-01 What is the relationship between migration and politics in Quebec? How did French Canadians' activities in the global south influence future debates about migration and Quebec society? How did migrants, in turn, shape debates about language, class, nationalism and sexuality? *A Place in the Sun* explores these questions through overlapping histories of Quebec and Haiti. From the 1930s to the 1950s, French-Canadian and Haitian cultural and political elites developed close intellectual bonds and large numbers of French-Canadian missionaries began working in the country. Through these encounters, French-Canadian intellectual and religious figures developed an image of Haiti that would circulate widely throughout Quebec and have ongoing cultural ramifications. After first exploring French-Canadian views of Haiti, Sean Mills reverses the perspective by looking at the many ways that Haitian migrants intervened in and shaped Quebec society. As the most significant group seen to integrate into francophone Quebec, Haitian migrants introduced new perspectives into a changing public sphere during decades of political turbulence. By turning his attention to the ideas and activities of Haitian taxi drivers, exiled priests, aspiring authors, dissident intellectuals, and feminist activists, Mills reconsiders the historical actors of Quebec intellectual and political life, and challenges the traditional tendency to view migrants as peripheral to Quebec history. Ranging from political economy to discussions about sexuality, *A Place in the Sun* demonstrates the ways in which Haitian migrants opened new debates, exposed new tensions, and forever altered Quebec society.

*National Manhood and the Creation of Modern Quebec* Jeffery Vacante 2017-06-15 This perceptive intellectual history explores the role of manhood in French Canadian culture and nationalism. In the late nineteenth century, Quebec was still an agrarian society and masculinity was rooted in the land and the family and informed by Catholic principles of piety and self-restraint. As the industrial era took hold, a new model of manhood was forged, built on the values of secularism and individualism. Vacante's analysis reveals how French Canadian intellectuals defined masculinity in response to imperialist English Canadian ideals. This "national manhood" enabled French Canadian men to participate in a modern, industrial economy while asserting their cultural authority.

**Jews and French Quebecers** Jacques Langlais 2010-10-30 Jews and French Quebecers recounts a saga of intense interest for the whole of Canada, let alone societies elsewhere. This work, now translated into English, represents the viewpoints of two friends from

differing cultural and religious traditions. One is a French Quebecer and a Christian; the other is Jewish and also calls Quebec his home. Both men are bilingual. Jacques Langlais and David Rome examine the merging — through alterations of close co-operation and socio-political clashes — of two Quebec ethno-cultural communities: one French, already rooted in the land of Quebec and its religio-cultural tradition; the other, Jewish, migrating from Europe through the last two centuries, equally rooted in its Jewish-Yiddish tradition. In Quebec both communities have learned to build and live together as well as to share their respective cultural heritages. This remarkable experience, two hundred years of intercultural co-existence, in a world fraught with ethnic tensions serves as a model for both Canada and other countries.

**The Palgrave Handbook of History and Social Studies Education** Christopher W. Berg 2020-04-03 This Handbook presents an international collection of essays examining history education past and present. Framing recent curriculum reforms in Canada and in the United States in light of a century-long debate between the relationship between theory and practice, this collection contextualizes the debate by exploring the evolution of history and social studies education within their state or national contexts. With contributions ranging from Canada, Finland, New Zealand, Sweden, the Netherlands, the Republic of South Africa, the United Kingdom, and the United States, chapters illuminate the ways in which curriculum theorists and academic researchers are working with curriculum developers and educators to translate and refine notions of historical thinking or inquiry as well as pedagogical practice.

*Champlain's Dream* David Hackett Fischer 2009-10-06 Traces the story of Quebec's founder while explaining his influential perspectives about peaceful colonialism, in a profile that also evaluates his contributions as a soldier, mariner, and cultural diplomat.

*Intolerance* Lise Noël 1994-04-21 Since the sixteenth century intolerance has been defined primarily as the undue condemnation of an opinion or behaviour. Liberation movements of the 1960s extended the notion of intolerance to the dimension of identity the oppression of another human being on the basis of what that person is. Noël argues that comparative analysis of the relationships of domination must therefore focus on all six parameters. She analyses these parameters from the perspective of discourse (the social production of meaning) and finds that the discourse of intolerance validates the most brutal forms of oppression: intolerance is the theory and domination and oppression are the practice. She finds common patterns from one parameter to another and also from one country to another, including Canada, the United States, Great Britain, and France. Noël attempts to demystify the dominant discourse and to pick apart the logic of the dynamics which intolerance engenders. She reveals the shared and distinguishing features of dominated groups, examines the nature of relations between dominated groups and the Left, and challenges the validity of using concepts such as "difference" to defend the rights of the oppressed. Awarded the Governor-General's Award for Non-Fiction (French) in 1989, *Intolerance* serves as both a practical guide and a theoretical work for activists and those who help define the discourse.

Mindscapes of Montreal Ceri Morgan 2012-10-15 In examining a number of francophone Montréal novels from 1960 to 2005, this interdisciplinary study considers the ways in which these connect with material landscapes to produce a city of neighbourhoods. In so doing, it reflects on how Montréal has been seen as both home and not home for francophone Quebecers. Morgan offers an overview of the fiction; examines micro and macro geographies of Montréal, and identifies some key literary trends. In so doing, it reflects on the importance of the imaginary in our experiencing and understanding of the urban.

**Families in Transition** Peter Gossage 1999 Using a family-reconstruction method, Gossage (history, U. de Sherbrooke) explores how the rise of industrial capitalism transformed the lives of the Quebec town's French-speaking, Catholic families. He draws on local registers and manuscript census schedules to focus on marriage, household organization, and family size in the context of the social and economic change. Among his findings are a growing divergence between bourgeois and proletarian families in regard to marriage and fertility patterns. Annotation copyrighted by Book News Inc., Portland, OR

**The Routledge Companion to Literary Urban Studies** Lieven Ameel 2022-08-10 Over the past decades, the growing interest in the study of literature of the city has led to the

development of literary urban studies as a discipline in its own right. The Routledge Companion to Literary Urban Studies provides a methodical overview of the fundamentals of this developing discipline and a detailed outline of new directions in the field. It consists of 33 newly commissioned chapters that provide an outline of contemporary literary urban studies. The Companion covers all of the main theoretical approaches as well as key literary genres, with case studies covering a range of different geographical, cultural, and historical settings. The final chapters provide a window into new debates in the field. The three focal issues are key concepts and genres of literary urban studies; a reassessment and critique of classical urban studies theories and the canon of literary capitals; and methods for the analysis of cities in literature. The Routledge Companion to Literary Urban Studies provides the reader with practical insights into the methods and approaches that can be applied to the city in literature and serves as an important reference work for upper-level students and researchers working on city literature.

**Vingt ans apres, Habitants et marchands** Sylvie Dépatie 1998-06-12 *Habitants et marchands, Twenty Years Later* includes eleven essays, seven of which are in French, that highlight current research in Quebec studies. Danielle Gauvreau, Dale Miquelon, and Louis Michel survey recent developments on population, merchants, and rural society respectively. Allan Greer studies Kateri Tekakwitha, the first Amerindian to be beatified. William Wicken analyses relations between Mi'kmaq and Acadians. Bruce White and Thomas Wien examine the fur trade, with White focusing on the Lake Superior region and Wien on the St Lawrence Valley. Catherine Desbarats looks at the role of the state as a buyer of goods and services in Canada. Mario Lalancette and Alan M. Stewart study the evolution of Montreal's urban geography in the seventeenth century. Geneviève Postolec analyses matrimonial practices at Neuville, and Sylvie Dépatie examines the urban and peri-urban countryside in Montreal's gardens and orchards. The collection offers valuable perspectives on both the history of New France and the socio-economic history of colonial societies.

Who Ran the Cities? Robert Beachy 2007 This volume furthers our understanding of who actually ran cities in the eighteenth, nineteenth and twentieth centuries, and develops greater understanding of the relationship between elite and power in cities. To develop answers, two fields of research, which have often remained separate, have been brought together: the economic, social and cultural history of elite and the political history of power resources and decision-making. By looking at specific case studies through the lens of these issues, the volume will encourage the reader to challenge common perceptions of a monolithic elite and to replace them with a more sophisticated view of urban power as an interplay between various economic, social, political and cultural elite groups.

**Metropolitan Natures** Stéphane Castonguay 2011 One of the oldest metropolitan areas in North America, Montreal has evolved from a remote fur trading post in New France into an international center for services and technology. A city and an island located at the confluence of the Ottawa and St. Lawrence Rivers, it is uniquely situated to serve as an international port while also providing rail access to the Canadian interior. The historic capital of the Province of Canada, once Canada's foremost metropolis, Montreal has a multifaceted cultural heritage drawn from European and North American influences. Thanks to its rich past, the city offers an ideal setting for the study of an evolving urban environment. *Metropolitan Natures* presents original histories of the diverse environments that constitute Montreal and its region. It explores the agricultural and industrial transformation of the

metropolitan area, the interaction of city and hinterland, and the interplay of humans and nature. The fourteen chapters cover a wide range of issues, from landscape representations during the colonial era to urban encroachments on the Kahnawake Mohawk reservation on the south shore of the island, from the 1918–1920 Spanish flu epidemic and its ensuing human environmental modifications to the urban sprawl characteristic of North America during the postwar period. Situations that politicize the environment are discussed as well, including the economic and class dynamics of flood relief, highways built to facilitate recreational access for the middle class, power-generating facilities that invade pristine rural areas, and the elitist environmental hegemony of fox hunting. Additional chapters examine human attempts to control the urban environment through street planning, waterway construction, water supply, and sewerage.

The Empire Within Sean Mills 2010 In a brilliant history of a turbulent time and place, Mills pulls back the curtain on the decade's activists and intellectuals, showing their engagement both with each other and with people from around the world. He demonstrates how activists of different backgrounds and with different political aims drew on ideas of decolonization to rethink the meanings attached to the politics of sex, race, and class and to imagine themselves as part of a broad transnational movement of anti-colonial and anti-imperialist resistance. The temporary unity forged around ideas of decolonization came undone in the 1970s, however, as many were forced to come to terms with the contradictions and ambiguities of applying ideas of decolonization in Quebec. From linguistic debates to labour unions, and from the political activities of citizens in the city's poorest neighbourhoods to its Caribbean intellectuals, *The Empire Within* is a political tour of Montreal that reconsiders the meaning and legacy of the city's dissident traditions. It is also a fascinating chapter in the history of postcolonial thought.

*The Ties that Bind* John Erik Fossum 2009 Modern states - and novel multinational polities such as the European Union - have to contend with greater degrees, and more complex forms, of diversity. What elements keep complex, «post-national», political entities together? What are the ties that bind people together in a world where they cannot rely on the safety of established national identifications (if they ever could)? This collection of essays by leading political scientists, philosophers and legal academics from Canada and Europe provides a transatlantic dialogue on the ways in which complex states (such as Canada) and non-states (the EU) may broach the modes of difference and diversity that confront them. Authors engage in insightful «diagnoses» of contemporary forms and modes of diversity, as well as critical appraisals of a number of normative responses meant to answer these challenges. These responses range from «reasonable accommodation» and multinationalism to cosmopolitanism. They include the recognition of «post-national», «multinational» or «deterritorialised» democracy and constitutional patriotism, as well as plural or «denationalised» citizenship.

**The Social Origins of the Welfare State** Dominique Marshall 2011-04-07 The Social Origins of the Welfare State traces the evolution of the first universal laws for Québec families, passed during the Second World War. In this translation of her award-winning *Aux origines sociales de l'État-providence*, Dominique Marshall examines the connections between political initiatives and Québécois families, in particular the way family allowances and compulsory schooling primarily benefited teenage boys who worked on family farms and girls who stayed home to help with domestic labour. She demonstrates that, while the promises of a minimum of welfare and education for all were by no means completely fulfilled, the laws helped to uncover the existence of deep family poverty. Further, by exposing the problem of unequal access of children of different classes to schooling, these programs paved the way for education and funding reforms of the next generation. Another consequence was that in their equal treatment of both genders, the laws fostered the more egalitarian language of the war, which faded from other sectors of society, possibly laying groundwork for feminist claims of future decades. The way in which the poorest families influenced the creation of public, educational, and welfare institutions is a dimension of the welfare state unexamined until this book. At a time when the very idea of a universal welfare state is questioned, *The Social Origins of the Welfare State* considers the fundamental reasons behind its creation and brings to light new perspectives on its future.

**Peopling the North American City** Sherry H. Olson 2011 Many North American cities trace their population booms to the nineteenth century when immigrants and migrants flooded emerging industrializing urban centres in search of better lives. *Peopling the North American City* examines this phenomenon in Montreal through the eyes of a thousand couples to construct both an intimate portrait and a compelling overview of life in a nineteenth-century metropolis. Benefiting from Montreal's remarkable archival records, Sherry Olson and Patricia Thornton use an ingenious sampling of twelve surnames to track the comings and goings, births, deaths, and marriages of the city's inhabitants. The book demonstrates the importance of individual decisions by outlining the circumstances in which people decided where to move, when to marry, and what work to do. Integrating social and spatial analysis, the authors provide insights into the relationships among the city's three cultural communities, show how inequalities of voice, purchasing power, and access to real property were maintained, and provide first-hand evidence of the impact of city living and poverty on families, health, and futures. The findings challenge presumptions about the cultural "assimilation" of migrants as well as our understanding of urban life in nineteenth-century North America. The culmination of twenty-five years of work, *Peopling the North American City* is an illuminating look at the humanity of cities and the elements that determine whether their citizens will thrive or merely survive.

L'historien futur de la rue Notre-Dame devra me faire causer. Je lui fournirai des renseignements précieux, des souvenirs piquants (...) car la rue Notre-Dame se dépouille de sa vieille physionomie, la rue Notre-Dame des anciens jours s'en va rapidement. Elle n'est plus étroite et resserrée sur tout son parcours ; le chemin de fer urbain augmente le nombre des passants, trouble les conciliabules des flâneurs au coin des rues, et leur donne le scandale de la vitesse. (...) Que de souvenirs dans cet étroit espace, que de flâneurs y ont promené leur curiosité, leurs caprices, leurs ennuis. Demandez à vos grands-parents qui voguent dans les eaux de la soixantaine sous pavillon neutre, comme on y flânait autrefois, plus gaiement, plus familièrement qu'aujourd'hui. La ville n'avait alors qu'une rue, la rue Notre-Dame, il y avait une rivière dans la rue Craig ; on allait à la chasse rue Sherbrooke ; il fallait être armé jusqu'aux dents pour se risquer vers le Beaver Hall. L'été on faisait des parties de canots, de la Place-Viger au Griffintown ; on pouvait pêcher à la ligne Place-à-Foin.
