**Key Concepts in Substance Misuse** Aaron Pycroft 2015-02-23 Drug use is a major challenge for public services, healthcare professionals and policy-makers all over the world. This book offers a complete overview of the issues associated with substance misuse from an interdisciplinary perspective. It begins by providing a reference guide to the different psychoactive substances, looking at the biological and psychological impact of their use. Key issues in the effect drugs have on society are then addressed, before outlining methods of recovery and therapy. Chapters include: Reflective questions to challenge readers' assumptions Case studies to help students understand the impact of substances on individuals Links to further resources to expand readers' knowledge It will be valuable reading for those studying on degrees in criminology, health, nursing, social work and counselling.

**Space Mission Analysis and Design** Wiley J. Larson 1992 This volume, appropriate as a textbook for either advanced undergraduate or beginning graduate courses, or as a reference for those already working in space technology, addresses the art and science of preliminary space mission design--beginning with a "blank sheet of paper" and creating a space mission to meet a set of broad, often poorly defined objectives. This revised and updated edition adds new sections on defining the overall mission concept, subject trades, guidance and navigation, and applying the mission analysis and design process to reduce cost and risk in later program stages. This volume also inaugurates the Space Technology Series, a cooperative activity of the US Dept. of Defense and NASA. Annotation copyright by Book News, Inc., Portland, OR

Fire Safety Engineering Design of Structures, Third Edition John A. Purkiss 2013-12-05 Designing structures to withstand the effects of fire is challenging, and requires a series of

complex design decisions. This third edition of Fire Safety Engineering Design of Structures provides practising fire safety engineers with the tools to design structures to withstand fires. This text details standard industry design decisions, and offers expert design advice, with relevant historical data. It includes extensive data on materials' behaviour and modeling -- concrete, steel, composite steel-concrete, timber, masonry, and aluminium. While weighted to the fire sections of the Eurocodes, this book also includes historical data to allow older structures to be assessed. It extensively covers fire damage investigation, and includes as far back as possible, the background to code methods to enable the engineer to better understand why certain procedures are adopted. What's new in the Third Edition? An overview in the first chapter explains the types of design decisions required for optimum fire performance of a structure, and demonstrates the effect of temperature rise on structural performance of structural elements. It extends the sections on less common engineering materials. The section on computer modelling now includes material on coupled heat and mass transfer, enabling a better understanding of the phenomenon of spalling in concrete. It includes a series of worked examples, and provides an extensive reference section. Readers require a working knowledge of structural mechanics and methods of structural design at ambient conditions, and are helped by some understanding of thermodynamics of heat transfer. This book serves as a resource for engineers working in the field of fire safety, consultants who regularly carry out full fire safety design for structure, and researchers seeking background information. Dr John Purkiss is a chartered civil and structural engineer/consultant and former lecturer in structural engineering at Aston University, UK. Dr Long-Yuan Li is Professor of Structural Engineering at Plymouth University, UK, and a Fellow of the Institution of Structural Engineers.

A Practical Introduction to Homeland Security Bruce Oliver Newsome 2020-03-12 This text provides students with a practical introduction to the concepts, structure, politics, law, hazards, threats, and practices of homeland security everywhere, focusing on US "homeland security," Canadian "public safety," and European "domestic security." It is a conceptual and practical textbook, not a theoretical work. It is focused on the knowledge and skills that will allow the reader to understand how homeland security is and should be practiced. Globalization, population growth, migration, technology, aging infrastructure, and the simple trend to higher expectations are making homeland security more challenging. Yes, homeland security really is a global problem. The hyperconnectivity of today's world has reduced the capacity of the United States to act unilaterally or to solve homeland risks from within the borders alone. Newsome and Jarmon explain the relevant concepts, the structural authorities and responsibilities that policymakers struggle with and within which practitioners must work, the processes that practitioners and professionals choose between or are obliged to use, the actual activities, and the end-states and outputs of these activities. Moreover, this book presents the concept of homeland security as an evolving experience rather than an artifact of life since 2001. It is a profession that requires some forming from the ground up as well as the top down.

NVQ 3 (CARE) an Easy Reading Guide Kelsey Allsopp 2012-07-11 I AM AN EXPERIENCED NVQ ASSESSOR AND HOLD NVQ 3 AND 4 AWARDS ALSO. I ALSO HAVE A DIPLOMA IN SOCIAL WORK (ENGLAND). I HAVE WRITTEN THIS 72 PAGE GUIDE FOR CANDIDATES IN ORDER TO GUIDE THEM THROUGH THEIR NVQ. THE CANDIDATE GUIDE INCLUDES: SECTION 1- WHY NVQ (How completing your NVQ will help you in your role and your future career.) SECTION 2- STARTING YOUR PORTFOLIO (How to set up your files and what all the different paperwork is for. Examples of paperwork included). SECTION 3- NVQ EVIDENCE (What are pc's and knowledge specification?) SECTION 4- DIFFERENT TYPES OF EVIDENCE (What types of evidence can be used for an NVQ 3? Examples given). SECTION 5- YOUR ASSESSOR AND INTERNAL VERIFIER (Who are they, what are their roles?What can i expect from them and what do they expect from me?). SECTION 6- THE MANDATORY UNITS (This section works step by step through mandatory units HSC 31, 32, 33, 34 and 35. It explains the performance criteria in basic language, gives examples of evidence and guides you through all the required legislation and policies that you need to be aware of in order to complete the NVQ successfully.) At the end of the guide there is a list of current legislation that Assessors will expect you to demonstrate knowledge of within your evidence.

The Dynamics of Strategy Duncan A. Robertson 2009-10-08 As the life span of business models reduces, firms have had to review their strategic intent, develop strategic initiatives in fast and imaginative ways, and engage in major reorganization. This book examines the dynamics of strategy and helps to make sense of the processes of strategizing and organizing in a dynamic environment. The Dynamics of Strategy draws on theoretical perspectives that enable readers to describe and understand the dynamics of the firm's competitive landscape, the dynamics of the organizational landscape, and the interdependencies between these landscapes. The book combines research rooted in economics and organizational theory, and also builds on interdisciplinary studies using a wide range of research paradigms and methods. This broad range of theoretical perspectives allows a comprehensive analysis of the complex and multidimensional problems facing the contemporary firm. In order to help the reader connect sound theory with the reality of strategy, theoretical discussion is illustrated with case studies of firms from a wide range of industries. Written for managers and management students, The Dynamics of Strategy provides a roadmap to understanding the dynamics of organizing and strategizing.

Umbilical Cord Blood Banking for Clinical Application and Regenerative Medicine Ana Colette Maurício 2017-01-11 Umbilical cord blood (UCB) and, more recently, umbilical cord tissue (UCT) have been stored cryopreserved in private and public cord blood and tissue banks worldwide, since the umbilical cord blood was used for the first time in a child with Fanconi anemia with his HLA-identical sibling, following strict guidelines that imply high-quality standards and total rastreability of these units. The hematopoietic stem cells (HSCs) are clinically used in hematopoietic treatments for blood disorders and hemato-oncological diseases. Also, the mesenchymal stem cells (MSCs) isolated from the UCT and UCB, nowadays, can be used as adjuvants of hematopoietic transplants. In the near future, these stem cells will have a crucial role in regenerative medicine. For this reason, these cells have been tested in several clinical trials and compassionate treatments in children and adults, concerning a wide range of pathologies and diseases, for instance, for the treatment of cerebral paralysis. Considering the worldwide availability of UCB and UCT units and the absence of ethical concerns will probably become the best sources for cell-based therapies for hematological and nonhematological pathologies. The UCB will also have a crucial role in neonatology-predictive analysis in the near future.

*Cancer Care for the Whole Patient* Institute of Medicine 2008-03-19 Cancer care today often provides state-of-the-science biomedical treatment, but fails to address the psychological and social (psychosocial) problems associated with the illness. This failure can compromise the effectiveness of health care and thereby adversely affect the health of cancer patients. Psychological and social problems created or exacerbated by cancer--including depression and other emotional problems; lack of information or skills needed to manage the illness; lack of transportation or other resources; and disruptions in work, school, and family life--cause additional suffering, weaken adherence to prescribed treatments, and threaten patients' return to health. Today, it is not possible to deliver high-quality cancer care without using existing approaches, tools, and resources to address patients' psychosocial health needs. All patients with cancer and their families should expect and receive cancer care that ensures the provision of appropriate psychosocial health services. Cancer Care for the Whole Patient recommends actions that oncology providers, health policy makers, educators, health insurers, health planners, researchers and research sponsors, and consumer advocates should undertake to ensure that this standard is met.

**Subsystem and Transaction Monitoring and Tuning with DB2 11 for z/OS** Paolo Bruni 2015-07-29 This IBM® Redbooks® publication discusses in detail the facilities of DB2® for z/OS®, which allow complete monitoring of a DB2 environment. It focuses on the use of the DB2 instrumentation facility component (IFC) to provide monitoring of DB2 data and events and includes suggestions for related tuning. We discuss the collection of statistics for the verification of performance of the various components of the DB2 system and accounting for tracking the behavior of the applications. We have intentionally omitted considerations for
