Annual Report 2003-04 University of Mumbai 2004

The Local Impact of Globalization in South and Southeast Asia Bart Lambregts 2015-08-27 In the past two decades, several millions of IT-enabled services jobs have been relocated or 'offshored' from the US and Europe to, in particular, low cost economies around the world. Most of these jobs so far have landed in South and South-East Asia, with India and the Philippines receiving the bulk of them. This has caused profound changes in the international division of labour, and has had correspondingly wide social and economic effects. This book examines how this 'next wave in globalization' affects people and places in South and South-East Asia. It brings together twelve case studies from India, the Philippines, China, Hong Kong and Thailand, and explores how and for whom services offshoring creates opportunities, triggers local economic transformations and produces challenges. This book in addition compares how different countries take part in this 'second global shift', investigates service-sector driven economic development from a historical perspective, and engages with the question

whether and to what extent services offer a new promising avenue of sustained economic growth for developing countries. It argues that service-led development in developing countries is not easy for all the workers involved, or a guaranteed path to sustained economic development and prosperity. This volume stands out from other books in the field in its exploration of the social and economic outcomes in the cities and countries where services have been located. Based on cutting edge empirical research and original data, the volume offers a state-of-the-art contribution to this growing debate. The book provides valuable insights for students, scholars and professionals interested in services offshoring, socio-economic development and contemporary transformations in South and South-East Asia.

Design of Intelligent Applications using Machine Learning and Deep Learning Techniques Ramchandra Sharad Mangrulkar 2021-08-15 Machine learning (ML) and deep learning (DL) algorithms are invaluable resources for Industry 4.0 and allied areas and are considered as the future of computing. A subfield called neural networks, to recognize and understand patterns in data, helps a machine carry out tasks in a manner similar to humans. The intelligent models developed using ML and DL are effectively designed and are fully investigated - bringing in practical applications in many fields such as health care, agriculture and security. These algorithms can only be successfully applied in the context of data computing and analysis. Today, ML and DL have created conditions for potential developments in detection and prediction. Apart from these domains, ML and DL are found useful in analysing the social behaviour of humans. With the advancements in the amount and type of data available for use, it became necessary to build a means to process the data and that is where deep neural networks prove their importance. These networks are capable of handling a large amount of data in such fields as finance and images. This book also exploits key applications in Industry 4.0 including: · Fundamental models, issues and challenges in ML and DL. · Comprehensive analyses and probabilistic approaches for ML and DL. · Various applications in healthcare predictions such as mental health, cancer, thyroid disease, lifestyle disease and cardiac arrhythmia. · Industry 4.0 applications such as facial recognition, feather classification, water stress prediction, deforestation control, tourism and social networking. · Security aspects of Industry 4.0 applications suggest remedial actions against possible attacks and prediction of associated risks. - Information is presented in an accessible way for students, researchers and scientists, business innovators and entrepreneurs, sustainable assessment and management professionals. This book equips readers with a knowledge of data analytics, ML and DL techniques for applications defined under the umbrella of Industry 4.0. This book offers comprehensive coverage, promising ideas and outstanding research contributions, supporting further development of ML and DL approaches by applying intelligence in various applications.

Policies of Electronic Commerce: Challenges and Development Dr. Mahesh Baburao Patil 2017-05-01 E-Commerce or Electronics Commerce is a philosophy of current business, which addresses the prerequisites of business organizations. It can be comprehensively characterized as the way toward buying or selling of goods or services utilizing an electronic medium, for example, the Internet. In this edition of Electronic Commerce, gives finish scope of the key business what's more, technology components of electronic commerce. The book does not expect that readers have any past electronic commerce learning or experience. Subsequent to looking for a textbook that offered adjusted scope of both the business and technology components of electronic commerce, I reasoned that no such book existed. Electronic Commerce: First Edition introduces readers to both the theory and practical with regards to directing business over the Internet and World Wide Web. The most unmistakable change in this edition is the extended utilization of color in the design of the book. The publisher and I trust that this makes the representations in the book more helpful and the sky is the limit from there intriguing. This edition incorporates the standard updates to keep the substance current with the quickly happening changes in electronic commerce.

Gender, Development, and Citizenship Caroline Sweetman 2004 Focusing on citizenship means thinking about the relationships between individuals and the states in which they live. What difference does having citizenship rights mean for people's lives? Are structures of governance efficient, and responsive to people's needs? This collection of articles examines ways in which citizenship is denied, and argues that citizenship can be used to demand and advance human rights. Women often find themselves excluded from full citizenship by legal systems which leave men to look after the interests of their female dependants. But women need recognition as citizens in their own right, to protect them from exploitation and abuse. People from marginalized communities also often find that the state fails to respond to their needs and interests. Finally, migrants e" a growing group of women and men in our global economy e" live precariously as aliens in states which do not acknowledge their claims to basic security and services. Topics here include the tension between cultural sensitivity and universal concepts of rights; reinterpretations of citizenship in communities where the state has failed to guarantee political or economic rights; and projects that are helping to advance active citizenship by increasing people's voice in decisionmaking.

in India have been rallying against integrating the Indian economy into the world market, perceiving it as a phenomenon which will lead to increased feminisation of poverty and the commodification of women. This anthology explores the impact of globalisation on Indian women and the struggle for gender equality. Since urban India has taken the initial benefit and brunt of globalisation, the focus here is on urban women, particularly from the educated middle class. The two dozen essays in this book offer insights into: - gender identity, gender relations and conceptions of women - violence against women and conflict resolution - women and the media - neo-liberal globalisation, from beauty pageants to working conditions - women and information and communication technologies - politics and women's political participation 'Women`s work is never done,' said an African women`s rights activist, `Feminists` work will never ever be done.' This book reminds us that the road to the complete empowerment of women in India is still a long one.

Urban Development and Environmental History in Modern South Asia Ian Talbot 2022-11-04

This book provides a pioneering study of the historical interaction between the city and the natural environment from the colonial to the contemporary era in South Asia. The book provides a multi-disciplinary analysis examining the environmental history of the city and bringing together contributions from environmental experts and practitioners as well as academics. Focusing on case studies stretching from the Maldives and Sri Lanka to the Indian subcontinent, the chapters trace linkages between the contemporary and earlier patterns of urban expansion and their environmental effects and consider lessons that can be drawn with respect to preventing future environmental degradation and mitigating the effects of climate change. An important contribution to the field, this book studies the contemporary environmental issues arising from rapid South Asian urbanization. It will be of interest to researchers in the field of South Asian Studies, world history and environmental history.
