**Origami Dragons** Tom Stamm 2014-07-10 In the early heydays of the second revolution of origami Tom Stamm, a devoted fan and practitioner of origami design, went through a rich period of exploration and creativity in the development of origami Dragons. Including his wonderful "Sea Serpent Dragon" and "Multi-Piece Sea Serpent" as well as 3 wonderful "Flapping Dragon" variations. For the first time the most memorable of these are published here with loving re-diagramming as well as two small works of my own which were inspired during the redesign. *New Expressions in Origami Art* Meher McArthur 2017-03-07 This origami art book features the work of 25 contemporary master folders who are among the most

innovative origami artists working today. They are pushing the boundaries of origami vigorously in new directions in terms of style, scale, materials, subject and scope. This elite group includes: Joel Cooper Erik Demaine and Martin Demaine Paul Jackson Beth Johnson Michael G. LaFosse and Richard L. Alexander Robert J. Lang Linda Mihara Bernie Peyton Richard Sweeney And many more... The stunning photos and brilliant essays in this book demonstrate why origami is now an international art movement—largely through the efforts and artistic genius of a few contemporary masters. The trailblazing efforts of Japanese artist Akira Yoshizawa elevated the paper folding to an art form by showing how subtle shapes and figures could be created from a single sheet of paper through a variety of non-traditional folding techniques. Artists in other parts of the world—including the United States, France, England, China and Scandinavia—took Yoshizawa's cue and pushed these techniques further and further. The result has been the emergence of many new and surprising sculptural forms created through techniques such as wet folding, curved creasing, tessellating and the application of alternative materials besides paper.

**Preparing Teachers for a Changing World** Linda Darling-Hammond 2017-07-27 Based on rapid advances in what is known about how people learn and how to teach effectively, this important book examines the core concepts and central

pedagogies that should be at the heart of any teacher education program. Stemming from the results of a commission sponsored by the National Academy of Education, *Preparing Teachers for a Changing World* recommends the creation of an informed teacher education curriculum with the common elements that represent state-of-the-art standards for the profession. Written for teacher educators in both traditional and alternative programs, university and school system leaders, teachers, staff development professionals, researchers, and educational policymakers, the book addresses the key foundational knowledge for teaching and discusses how to implement that knowledge within the classroom. *Preparing Teachers for a Changing World* recommends that, in addition to strong subject matter knowledge, all new teachers have a basic understanding of how people learn and develop, as well as how children acquire and use language, which is the currency of education. In addition, the book suggests that teaching professionals must be able to apply that knowledge in developing curriculum that attends to students' needs, the demands of the content, and the social purposes of education: in teaching specific subject matter to diverse students, in managing the classroom, assessing student performance, and using technology in the classroom.

**The Praetorian STARShip : the untold story of the Combat Talon** 2001 Jerry Thigpen's study on the history of the Combat Talon is the first effort to tell the story of this wonderfully capable machine. This weapons system has performed virtually every imaginable tactical event in the spectrum of conflict and by any measure is the most versatile C-130 derivative ever produced. First modified and sent to Southeast Asia (SEA) in 1966 to replace theater unconventional warfare (UW) assets that were limited in both lift capability and speed the Talon I quickly adapted to theater UW tasking including infiltration and resupply and psychological warfare operations into North Vietnam. After spending four years in SEA and maturing into a highly respected UW weapons system the Joint Chief of Staff (JCS) chose the Combat Talon to lead the night low-level raid on the North Vietnamese prison camp at Son Tay. Despite the outcome of the operation the Talon I cemented its reputation as the weapons system of choice for long-range clandestine operations. In the period following the Vietnam War United States Air Force (USAF) special operations gradually lost its political and financial support which was graphically demonstrated in the failed Desert One mission into Iran. Thanks to congressional supporters like Earl Hutto of Florida and Dan Daniel of Virginia funds for aircraft upgrades and military construction projects materialized to meet the ever-increasing threat to our nation. Under the leadership of such committed hard-driven officers as Brenci Uttaro Ferkes Meller and Thigpen the crew force became the most disciplined in our Air Force. It was capable of penetrating hostile airspace at night in a low-level mountainous environment covertly to execute any number of unconventional warfare missions.

*Olongapo* Lawrence Burnett 2015-07-26 Olongapo was an extraordinary part of our world known to millions. This tiny section of the Far East served as playground for Vietnam. An amusement park for the American Seventh Fleet, contractors and other service members from around the world. Rides in this park featured people's lives, creating impassioned experiences. Written with deepest respect for those with their names etched into The Vietnam Veterans Memorial Wall. Many who experienced joy for the last time while in Olongapo. The Olongapo experience was a true phenomenon, a saturation of life. During the peak of Vietnam, the area grew from a population of 40,000 in 1964 to a bulging 138,000 plus by 1969. The undisputed king of liberty ports in Asia, Olongapo's nightclubs bloomed from 35 to over 300. Pay by play girls increased to over 8,000 while pay by the hour hotels zoomed to more than 200. All of this amazing expansion crammed into just over one acre of frenzy. Men who had been off the coast of Vietnam and people shore based made up the 9 to 14 thousand visitors to the city every night of the year. Most were on brief liberty passes after months at sea and others awaited transfer to Vietnam. The combination created a free spending environment that poured millions of dollars into Olongapo every month. My novel is not just for the millions who miss such a unique concentration of life, it is for those who never knew the Olongapo experience.

Becoming a Teacher of Language and Literacy Brenton Doecke 2014-09-23 Becoming a Teacher of Language and Literacy explores what it means to be a literacy educator in the 21st century. It promotes a reflective and inquiry-based approach to literacy teaching and examines three central questions: 1. How do teachers approach the teaching of reading and writing, speaking and listening within a digital age? 2. How do teachers approach the standardisation of literacy, including high-stakes testing? 3. How do teachers work within the framework of the Australian curriculum: English? The book covers a range of contemporary topics in language and literacy education, including reading and creating digital texts, supporting intercultural engagement in literacy education and developing community partnerships. Each chapter features teacher narratives, current theoretical perspectives, examples of practice and reflective questions. The narratives are designed to prompt reflection about teachers' professional practice within local school settings. They convey the voices of teachers as they grapple with the challenges of their professional practice.
