The Fundamental Role of Science and Technology in International Development National Research Council 2006-05-24 In October 2003 the U.S. Agency for International Development (USAID) and the National Research Council (NRC) entered into a cooperative agreement. The agreement called for the NRC to examine selected aspects of U.S. foreign assistance activities-primarily the programs of the USAID-that have benefited or could benefit from access to strong science, technology, and medical capabilities in the United States or elsewhere. After considering the many aspects of the role of science and technology (S&T) in foreign assistance, the study led to the publication of The Fundamental Role of Science and Technology in International Development. In the book special attention is devoted to partnerships that involve the USAID together with international, regional, U.S. governmental, and private sector organizations in fields such as health care, agriculture and nutrition, education and job creation, and energy and the environment. This book explores specific programmatic, organizational, and personnel reforms that would increase the effective use of S&T to meet the USAID's goals while supporting larger U.S. foreign policy objectives.

Culture and Imperialism Edward W. Said 2012-10-24 A landmark work from the author of Orientalism that explores the long-overlooked connections between the Western imperial endeavor and the culture that both reflected and reinforced it. In the nineteenth and early twentieth centuries, as the Western powers built empires that stretched from Australia to the West Indies, Western artists created masterpieces ranging from Mansfield Park to Heart of Darkness and Aida.

Yet most cultural critics continue to see these phenomena as separate. Edward Said looks at these works alongside those of such writers as W. B. Yeats, Chinua Achebe, and Salman Rushdie to show how subject peoples produced their own vigorous cultures of opposition and resistance. Vast in scope and stunning in its erudition, *Culture and Imperialism* reopens the dialogue between literature and the life of its time.

By comparing these documentaries to late-colonial films on 'progress', the author highlights continuities with and departures from colonial notions of development in modern India.

Communities in Action National Academies of Sciences, Engineering, and Medicine 2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures,

policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Documentary Film in India Giulia Battaglia 2017-11-22 This book maps a hundred years of documentary film practices in India. It demonstrates that in order to study the development of a film practice, it is necessary to go beyond the classic analysis of films and filmmakers and focus on the discourses created around and about the practice in question. The book navigates different historical moments of the growth of documentary filmmaking in India from the colonial period to the present day. In the process, it touches upon questions concerning practices and discourses about colonial films, postcolonial institutions, independent films, filmmakers and filmmaking, the influence of feminism and the articulation of concepts of performance and performativity in various films practices. It also reflects on the centrality of technological change in different historical moments and that of film festivals and film screenings across time and space. Grounded in anthropological fieldwork and archival research and adopting Foucault's concept of 'effective history', this work searches for points of origin that creates ruptures and deviations taking distance from conventional ways of writing film histories. Rather than presenting a univocal set of arguments and conclusions about changes or new developments of film techniques, the originality of the book is in offering an open structure (or an open archive) to enable the reader to engage with mechanisms of creation, engagement and participation in film and art practices at large. In adopting this form, the book conceptualises 'Anthropology' as also an art practice, interested, through its theoretico-methodological approach, in creating an open archive of engagement rather than a representation of a distant 'other'. Similarly, documentary filmmaking in India is seen as primarily a process of creation based on engagement and participation rather than a practice interested in representing an objective reality. Proposing an innovative way of perceiving the growth of the documentary film genre in the

subcontinent, this book will be of interest to film historians and specialists in Indian cinema(s) as well as academics in the field of anthropology of art, media and visual practices and Asian media studies.

Administering Colonialism and War Colin R. Alexander 2019-05-15 Colonialism is a dehumanizing experience for all those at the mercy of its power structures. The officers of the Indian Civil Service (ICS) were no exception. This book focuses on the role of ICS in World War II and engages in a wider debate about colonialism's impact on its administrators and subjects. The author looks at the events of World War II specifically in the province of Assam in India's North-East. It is here that the British and American troops were stationed as they attempted to retake Burma following Japan's invasion in 1942 and supply the Allied Chinese by road and air. The volume also focuses on how radio broadcasting was used to manufacture the Indian public's consent for the war effort and explores the horrors of the Bengal Famine and the controversies surrounding the British responses to it. The central character in the book's narrative is Sir Andrew Clow who was a career civil servant in India. He was the Minister for Communications during the late 1930s and early 1940s before he became the Governor of Assam in 1942. The book is partly a biography of his fascinating career.

New Indian Cinema in Post-Independence India Anuradha Dingwaney Needham 2013-11-26 Shyam Benegal is an Indian director and screenwriter whose work is

considered central to New Indian cinema. By closely analysing several of Benegal's films, this book provides an understanding of India's post-independence history. The book examines the filmmaker's focus on women by highlighting his subtle and critical engagement with a truism of Indian nationalism: women's centrality to the (nation-) state's negotiation with modernity. It looks at the importance Benegal accords to history – its little known, contested, or iconic events and figures – in crafting national culture and identities, and goes on to discuss the filmmaker's nuanced representation of the developmental agendas of the nation-state. The book presents an account of the relationship of historical film and fiction to official history, and provides a fuller understanding of Indian cinema, and how it is shaped by as well as itself shapes national imperatives. Filling a gap in the literature, the book offers an analysis of cinematic treatment of post-independence narratives and gives important insights into the imagination of the time. It is a useful contribution for students and scholars of Film Studies, South Asian History and South Asian Culture.

Text and Tradition in South India Velcheru Narayana Rao 2017-06-01 Essays on Telugu and South Indian literature and culture by distinguished Telugu scholar Narayana Rao. Velcheru Narayana Rao's contribution to understanding Indian cultural history, literary production, and intellectual life—specifically from the vantage of the Andhra region—has few parallels. He is one of the very rare scholars to be able to reflect magisterially on the precolonial and colonial periods. He moves easily between Sanskrit and the vernacular traditions, and between the worlds of orality and script. This is because of his mastery of the “classical” Telugu tradition. As Sanjay Subrahmanyam puts it in his Introduction, “To command nearly a thousand years of a literary tradition is no small feat, but more important still is VNR's ability constantly to offer fresh readings and provocative frameworks for interpretation.” The essays and reflections in *Text and Tradition in South India* bring together the diverse and foundational contributions made by Narayana Rao to the rewriting of India's cultural and literary history. The book is for anyone interested in the history of Indian ideas, the social and cultural history of South India, and the massive intellectual traditions of the subcontinent. Velcheru Narayana Rao is Visweswara Rao and Sita Koppaka Professor in Telugu Culture, Literature, and History at Emory University. His many books include a translation (with David Shulman) of Piṅgaḷi Sūranna's *The Demon's Daughter: A Love Story from South India*, also published by SUNY Press, and *Textures of Time: Writing History in South India 1600–1800* (coauthored with David Shulman and Sanjay Subrahmanyam).

Revisiting India's Partition Amritjit Singh 2016-06-15 *Revisiting India's Partition: New Essays on Memory, Culture, and Politics* brings together scholars from across the globe to provide diverse perspectives on the continuing impact of the 1947 division of India on the eve of independence from the British Empire. The Partition caused a million deaths and displaced well over 10 million people. The trauma of brutal violence and displacement still haunts the survivors as well as their children and grandchildren. Nearly 70 years after this cataclysmic event, *Revisiting India's Partition* explores the impact of the “Long Partition,” a concept developed by Vazira Zamindar to underscore the ongoing effects of the 1947 Partition upon all South Asian nations. In our collection, we extend and expand Zamindar's notion of the Long Partition to examine the cultural, political, economic, and psychological impact the Partition continues to have on communities throughout the South Asian diaspora. The nineteen interdisciplinary essays in this book provide a multi-vocal, multi-focal, transnational commentary on the Partition in relation to motifs, communities, and regions in South Asia that have received scant attention in previous scholarship. In their individual essays, contributors offer new engagements on South Asia in relation to several topics, including

decolonization and post-colony, economic development and nation-building, cross-border skirmishes and terrorism, and nationalism. This book is dedicated to covering areas beyond Punjab and Bengal and includes analyses of how Sindh and Kashmir, Hyderabad, and more broadly South India, the Northeast, and Burma call for special attention in coming to terms with memory, culture and politics surrounding the Partition.

Routledge Handbook of Indian Cinemas K. Moti Gokulsing 2013-04-17 India is the largest film producing country in the world and its output has a global reach. After years of marginalisation by academics in the Western world, Indian cinemas have moved from the periphery to the centre of the world cinema in a comparatively short space of time. Bringing together contributions from leading scholars in the field, this Handbook looks at the complex reasons for this remarkable journey. Combining a historical and thematic approach, the Handbook discusses how Indian cinemas need to be understood in their historical unfolding as well as their complex relationships to social, economic, cultural, political, ideological, aesthetic, technical and institutional discourses. The thematic section provides an up-to-date critical narrative on diverse topics such as audience, censorship, film distribution, film industry, diaspora, sexuality, film music and nationalism. The Handbook provides a comprehensive and cutting edge survey of Indian cinemas, discussing Popular, Parallel/New Wave and Regional cinemas as well as the spectacular rise of Bollywood. It is an invaluable resource for students and academics of South Asian Studies, Film Studies and Cultural Studies.

A Fly in the Curry K. P. Jayasankar 2015-12-01 An engaging read that explores independent documentary film in India as a site of resistance. This book looks at how independent Indian documentary film reworks the relationship between film-makers, their narratives, their subjects and their audience, challenging the dominant idea of documentary as a discourse of the real. Based on close textual analysis, conversations with film-makers and drawing on Breittrose's cinéma-vérité film-maker as a 'fly in the soup', this work explores the place of documentary within the Indian public sphere.

The Global Road Movie José Duarte 2018-04-09 The road movie is one of the most tried and true genres, a staple since the earliest days of cinema. This book looks at the road movie from a wider perspective than ever before, exploring the motif of travel not just in American films—where it has been most

prominent—but via movies from other nations as well. Gathering contributions from around the world, the book shows how the road movie, altered and refracted in every new international iteration, offers a new way of thinking about the ever-shifting sense of place and space in the globalized world. Through analyses of such films as *Guantanamo* (Cuba), *Wrong Side of the Road* (Australia), *Five Golden Flowers* (China), *Africa United* (South Africa), and *Sightseers* (England), *The Global Road Movie* enables us to think afresh about how today's road movies fit into the history of the genre and what they can tell us about how people move about in the world today.

Beyond Belief Srirupa Roy 2007-05-07 *Beyond Belief* is a bold rethinking of the formation and consolidation of nation-state ideologies. Analyzing India during the first two decades following its foundation as a sovereign nation-state in 1947, Srirupa Roy explores how nationalists are turned into nationals, subjects into citizens, and the colonial state into a sovereign nation-state. Roy argues that the postcolonial nation-state is consolidated not, as many have asserted, by efforts to imagine a shared cultural community, but rather by the production of a recognizable and authoritative identity for the state. This project—of making the state the entity identified as the nation's authoritative representative—emphasizes the natural cultural diversity of the nation and upholds the state as the sole unifier or manager of the “naturally” fragmented nation; the state is unified through diversity. Roy considers several different ways that identification with the Indian nation-state was produced and consolidated during the 1950s and 1960s. She looks at how the Films Division of India, a state-owned documentary and newsreel production agency, allowed national audiences to “see the state”; how the “unity in diversity” formation of nationhood was reinforced in commemorations of India's annual Republic Day; and how the government produced a policy discourse claiming that scientific development was the ultimate national need and the most pressing priority for the state to address. She also analyzes the fate of the steel towns—industrial townships built to house the workers of nationalized steel plants—which were upheld as the exemplary national spaces of the new India. By prioritizing the role of actual manifestations of and encounters with the state, Roy moves beyond theories of nationalism and state formation based on collective belief.
