Productive Digression Anselm Haverkamp 2017-05-08 Productive Digression is a translation of the ancient term poetics: as a practice of theory. The products produced in the mode of poesis are 'digressive' in that they operate off track; they resist the main stream of every day prose. They do so for various reasons and in various respects. Mostly, they are explained historically, relative to historical contexts and, that is, contrary to what they are meant to resist. Instead, this book investigates the modes of resistance, their epistemology of production, in short, the logic of digression. The method addresses the singular exemplarity of art and literature; it elucidates the impact of poesis as an epistemological challenge and redefines the analysis of literature and art as branches of an Historical Epistemology. Proceeding from the state of affairs in 20th century criticism and aesthetics (Benjamin, Adorno, Blumenberg, Merleau-Ponty), the epistemology of representation (Whitehead, Canguilhem, Bachelard, Rheinberger) is revised in, and with respect to critical consequences (Derrida, Marin, de Man, Agamben). From literary criticism and critical legal studies to the scenario of the life sciences, the essays collected here redirect the logic of research towards the epistemological grounds of an aesthetics underneath the hermeneutics of every day life.

New Queries in Aesthetics and Metaphysics Anna-Teresa Tymieniecka 2012-12-06 This collection is the final volume of a four book survey of the state of phenomenology fifty years after the death of Edmund Husserl. Its publication represents a landmark in the comprehensive treatment of contemporary phenomenology in all its vastness and richness. The diversity of the issues raised here is dazzling, but the main themes of Husserl's thought are all either explicitly treated, or else they underlie the ingenious approaches found here. Time, historicity, intentionality, eidos, meaning, possibility/reality,

and teleology are the main concerns of this collection devoted to studies in aesthetics, metaphysics and literary interpretation, written by such authors as, among others, R. Cobb-Stevens, C. Moreno Marquez, J. Swiecinski, Sitansu Ray and M. Kronegger. These original studies of phenomenological aesthetics and literary theory by scholars from all parts of the world were gathered by the World Institute for Advanced Phenomenological Research and Learning during the year 1988/89 during its assessment of the phenomenological movement, fifty years after Husserl's death. Pompeii's Ashes Eric Moormann 2015-03-10 Although there are many works dealing with Pompeii and Herculaneum, none of them try to encompass the entire spectrum of material related to its reception in popular imagination. *Pompeii's Ashes* surveys a broad variety of such works, ranging from travelogues between ca. 1740 and 2010 to 250 years of fiction, including stage works, music, and films. The first two chapters provide an in-depth analysis of the excavation history and an overview of the reflections of travelers. The six remaining chapters discuss several clearly-defined genres: historical novels with pagan tendencies, and those with Christians and Jews as protagonists, contemporary adventures, time traveling, mock manuscripts, and works dedicated to Vesuvius. "*Pompeii's Ashes*" demonstrates how the eternal fascination with the oldest still-running archaeological projects in the world began, developed, and continue until now.

Paideia: The World of the Second Sophistic Barbara E. Borg 2008-08-22 In the World of the Second Sophistic, education, paideia, was a crucial factor in the discourse of power. Knowledge in the fields of medicine, history, philosophy, and poetry joined with rhetorical brilliance and a presentable manner became the outward appearance of the elite of the Eastern Roman Empire. This outward appearance guaranteed a high social status as well as political and economical power for the individual and major advantages for their hometowns in interpolis competition. Since paideia was related particularly to Classical Greek antiquity, it was, at the same time, fundamental to the new self-confidence of the Greek East. This book presents, for the first time, studies from a broad range of disciplines on various fields of life and on different media, in which this ideology became manifest. These contributions show that the Sophists and their texts were only the most prominent exponents of a system of thoughts and values structuring the life of the elite in general.

Anaesthesia Joseph Ruprecht 2012-12-06 Thesiologist, were not included. Perhaps the next symposium will have a paper on his many contributions. Even though his dates are not quite modern (1813-1858), his accomplishments were, especially his book On Chloroform and Other Anaesthetics (1858), the first comprehensive textbook on anaesthesia [2]. There has been a real renaissance of interest in the history of anaesthesia. Among those responsible for this rebirth, besides Dr. Ruprecht and Dr. Erdmann, are Dr. Selma Calmes and Dr. Rod Calverley, now on the Board of the new American society, the Anesthesia History Association. It held its inaugural meeting in Atlanta, Georgia, during the annual meeting of the American Society of Anesthesiologists, on 9 October 1983. The meeting was well attended, and the evening was profitable and delightful. Mention should also be made of the accomplishments of the nurse anaesthetists [3]. They are many in number, and generally they work under the direction of a physician anaesthesiologist. Although modern anaesthesia was America's first great medical discovery, it soon traversed the globe and found worldwide acceptance. The British, for example, have made many coeval and historical contributions. Besides Dr. Duncan one thinks of Prof. T. Cecil Gray, who pioneered the British use of ether [4], and Dr. J. Alfred Lee, who was a pioneer in the use of spinal anaesthesia and is currently working on the fifth edition of a textbook on spinal analgesia [7]. Dr.

On the Ruins of Babel Daniel Purdy 2011-03-15 The eighteenth century struggled to define architecture as either an art or a science—the image of the architect as a grand figure who synthesizes all other disciplines within a single master plan emerged from this discourse. Immanuel Kant and Johann Wolfgang Goethe described the architect as their equal, a genius with godlike creativity. For writers from Descartes to Freud, architectural reasoning provided a method for critically examining consciousness. The architect, as philosophers liked to think of him, was obligated by the design and construction process to mediate between the abstract and the actual. In *On the Ruins of Babel*, Daniel Purdy traces this notion back to its wellspring. He surveys the volatile state of architectural theory in the Enlightenment, brought on by the newly emerged scientific critiques of Renaissance cosmology, then shows how German writers redeployed Renaissance terminology so that "harmony," "unity," "synthesis," "foundation," and "orderliness" became states of consciousness, rather than terms used to describe the built world. Purdy's distinctly new interpretation of German theory reveals how metaphors constitute interior life as an architectural space to be designed, constructed, renovated, or demolished. He elucidates the close affinity between Hegel's Romantic aesthetic of space and Daniel Libeskind's deconstruction of monumental architecture in Berlin's Jewish Museum. Through a careful reading of Walter Benjamin's writing on architecture as myth, Purdy details how classical architecture shaped Benjamin's modernist interpretations of urban life, particularly his elaboration on Freud's archaeology of the unconscious. Benjamin's essays on dreams and architecture turn the individualist sensibility of the Enlightenment into a collective and mythic identification between humans and buildings.

Writing the Revolution Raphael Hörmann 2011 This study investigates German and English revolutionary literary discourse between 1819 and 1848/49. Marked by dramatic socioeconomic transformations, this period witnessed a pronounced transnational shift from the concept of political revolution to one of social revolution. *Writing the Revolution* engages with literary authors, radical journalists, early proletarian pamphleteers, and political theorists, tracing their demands for social liberation, as well as their struggles with the specter of proletarian revolution. The book argues that these ideological battles translated into competing "poetics of revolution." (Series: *Kulturgeschichtliche Perspektiven* – Vol. 10)

Lyric Orientations Hannah Vandegrift Eldridge 2015 In *Lyric Orientations*, Hannah Vandegrift Eldridge explores the power of lyric poetry to stir the social and emotional lives of human beings in the face of the ineffable nature of our mortality. She focuses on two German-speaking masters of lyric prose and poetry: Friedrich Hölderlin (1770–1843) and Rainer Maria Rilke (1875–1926). While Hölderlin and Rilke are stylistically very different, each believes in

the power of poetic language to orient us as social beings in contexts that otherwise can be alienating. They likewise share the conviction that such alienation cannot be overcome once and for all in any universal event. Both argue that to deny the uncertainty created by the absence of any such event (or to deny the alienation itself) is likewise to deny the particularly human condition of uncertainty and mortality. By drawing on the work of Stanley Cavell, who explores how language in all its formal aspects actually enables us to engage meaningfully with the world, Eldridge challenges poststructuralist scholarship, which stresses the limitations—even the failure—of language in the face of reality. Eldridge provides detailed readings of Hölderlin and Rilke and positions them in a broader narrative of modernity that helps make sense of their difficult and occasionally contradictory self-characterizations. Her account of the orienting and engaging capabilities of language reconciles the extraordinarily ambitious claims that Hölderlin and Rilke make for poetry—that it can create political communities, that it can change how humans relate to death, and that it can unite the sensual and intellectual components of human subjectivity—and the often difficult, fragmented, or hermetic nature of their individual poems.

Dialogue Analysis: Units, relations and strategies beyond the sentence Edda Weigand 1997-01-01 The topic of this volume was discussed at a Round Table of the International Association for Dialogue Analysis (IADA) at the University of Bologna in March 1995. The Round Table was intended to make a scientific contribution in honour of the president's 65th birthday. The topic refers on the one hand to the central problem of 'Dialogue Analysis' which is to discover a new, communicatively functioning unit after having left behind the unit of the sentence which can be considered the unit par excellence of structural linguistics. On the other hand, it includes the manifold units, relations, and strategies, i.e. the specific problems of dialogue analysis.

Social Ontology of Whoness Michael Eldred 2018-10-26 How are core social phenomena to be understood as modes of being? This book offers an alternative approach to social ontology. Recent interest in social ontology on the part of mainstream philosophy and the social sciences presupposes from the outset that the human being can be cast as a conscious subject whose intentionality can be collective. By contrast, the present study insistently poses the crucial question of who the human being is and how they sociate as whos. Such whoness is a clean-cut departure from the venerable tradition of questioning whatness

(quidditas, essence) in philosophical thinking. Casting human being hermeneutically as whoness opens up new insights into how human beings sociate in interplays of mutual estimation that are simultaneously social power plays. Hitherto, the ontology of social power in all its various guises, has only ever been implicit. This book makes it explicit. The kind of social power prevalent in capitalist societies is that of the reified value embodied in commodities, money, capital, & co. Reified value itself is constituted through an interplay of mutual estimation among things that reflects back on the power interplay among whos. In this way a new critique of capitalism becomes possible.

The Turning Points of the New Phenomenological Era Anna-Teresa Tymieniecka 2012-12-06 orbit and far beyond it. Indeed, the immense, painstaking, indefatigable and ever-improving effort of Husserl to find ever-deeper and more reliable foundations for the philosophical enterprise (as well as his constant critical re-thinking and perfecting of the approach and so called "method" in order to perform this task and thus cover in this source-excavation an ever more far-reaching groundwork) stands out and maintains itself as an inexhaustible reservoir for philosophical reflection in which all the above-mentioned work has either its core or its source. In fact, in his undertaking to re-think the entire philosophical enterprise as such and to recreate philosophy upon what he sought to be at least a satisfactorily legitimated basis, Husserl, through his already systematised and "authorized" work, and his courses, and later on in his spontaneous reflection (which did not find its way into a definitive corpus but was nevertheless sufficiently coherent with his previously established body of thought to be considered a continuation of it), uncovers perspectives upon the universe of man and projects their new philosophical thematisation that brings together all the attempts by philosophers (e. g. , Merleau-Ponty, who drew upon this material and found there his own inspiration) who succeeded him with foundational intentions; it also gives a core of philosophical ideas and insights for the younger generation of philosophers today.
