Cognitive Interference Management in Heterogeneous Networks Dania Marabissi 2015-06-24 This brief investigates the role of interference management in Heterogeneous Networks (Het Nets), focusing on cognitive approaches and the use of beamforming. Key concepts of Het Nets are introduced and different deployment strategies are examined, such as sharing the same frequency band of the macro cells or using new high frequency bands. Particular attention is devoted to co-channel deployment and to the problem of interference management, addressing various strategies that can be adopted to handle the interference between the cells. In addition, the brief explores cognitive small cells which are able to avoid or limit interference by using suitable beamforming and resource allocation schemes. The suggested solutions are supported by numerical results in terms of performance evaluations and comparisons.

**Multimodal Composing in Classrooms** Suzanne M. Miller 2013-06-19 Taking a close look at multimodal composing as an essential new literacy in schools, this volume draws from contextualized case studies across educational contexts to provide detailed portraits of teachers and students at work in classrooms. Authors elaborate key issues in transforming classrooms with student multimodal composing, including changes in teachers, teaching, and learning. Six action principles for teaching for embodied learning through multimodal composing are presented and explained. The rich illustrations of practice encourage both discussion of practical challenges and dilemmas and conceptualization beyond the specific cases. Historically, issues in New Literacy Studies, multimodality, new literacies, and multiliteracies have primarily been addressed theoretically, promoting a shift in educators' thinking about what constitutes literacy teaching and learning in a world no longer bounded by print text only. Such theory is necessary (and beneficial for re-thinking practices). What Multimodal Composing in Classrooms contributes to this scholarship are the voices of teachers and students talking about changing practices in real classrooms.
