Objects of Remembrance Monroe E. Price 2009-07-01 This is a memoir about the power of American assimilation and opportunity in the face of persisting refugee realities. Like Isaac Bashevis Singer, Monroe Price recounts the continuing impact of European identities as families, cast from their homes by the rise of Hitler and the Third Reich, struggle to find their way in a new and challenging environment. In a series of reflections, Price, who was born to a Jewish family in Vienna in 1938 and left when he was seven months old, seeks to create the Vienna of his infancy, including Jewish life, anti-Semitism, the Anschluss, and Kristallnacht (during which his father was arrested). He shifts to scenes of

American socialization in the places he moved with his parents: Macon, Georgia, Cincinnati, Ohio, and the experience of New York City. Through these reflections, Price illuminates ideas about family, religion, friends and schooling as well as deeply personal issues such as home, food and intimacy. Price's memoir weaves complicated strands—his Viennese origins, campaigns to distribute Jewish refugees away from New York City, the special qualities of Midwestern Ohio life in the 1950s—and the contrasting patterns of adjustment by different generations in his family in the American landscape. As he traces the particular path of his own life, Price reveals a more universal story of adjustment, and the relationship between a marginal community and the drama of American citizenship.

Engaged Research and Practice Betty Overton 2016-11-30 What practices can researchers use to gain a more nuanced understanding of educational issues in the community and be part of the solution to those issues? Engaged Research and Practice is about two prevailing and complementary ideas that have surfaced in the higher education arena: engaged research and higher education for the public good. Engaged research is scholarship that not only attempts to open up new knowledge, but it does so with a sense that the new knowledge, insight and directions have a direct relationship to needs and problems within our communities, institutions, and policy arenas. Engaged, actionable, or participatory research and scholarship attempts to tackle the identified issues of our communities and society. This handbook offers important insights and tangible examples of how higher education leaders may work directly with communities and in policy settings to understand the deeper meanings often lost in conversations about educational opportunity. Each chapter addresses the ways in which faculty, community and administrative leaders may connect research and practice through unique research projects. The authors offer clear explanations of "how" their engaged research was conducted to illustrate explicit pathways for practitioners. This book also includes short narratives where authors involved with this research reflect on their experiences and the lessons they have learned while immersed in community and policy related work.

Exam Schools Chester E. Finn, Jr. 2012-09-16 An in-depth look at academically selective public high schools in America What is the best education for exceptionally able and high-achieving youngsters? Can the United States strengthen its future intellectual leadership, economic vitality, and scientific prowess without sacrificing equal opportunity? There are no easy answers but, as Chester Finn and Jessica Hockett show, for more than 100,000 students each year, the solution is to enroll in an academically selective public high school. Exam Schools is the first-ever close-up look at this small, sometimes controversial, yet crucial segment of American public education. This groundbreaking book discusses how these schools work--and their critical role in nurturing the country's brightest students. The 165 schools identified by Finn and Hockett are located in thirty states, plus the District of Columbia. While some are world renowned, such as Boston Latin and Bronx Science, others are known only in their own communities. The authors survey the schools on issues ranging from admissions and student diversity to teacher selection. They probe sources of political support, curriculum, instructional styles, educational effectiveness, and institutional autonomy. Some of their findings are surprising: Los

Angeles, for example, has no "exam schools" while New York City has dozens. Asian-American students are overrepresented—but so are African-American pupils. Culminating with in-depth profiles of eleven exam schools and thoughtful reflection on policy implications, Finn and Hockett ultimately consider whether the country would be better off with more such schools. At a time of keen attention to the faltering education system, *Exam Schools* sheds positive light on a group of schools that could well provide a transformative roadmap for many of America's children.

When Angels Walk the Earth, Lives Are Changed Ernest N. Love 2016-07-21 When Angels Walk the Earth, Lives Are Changed By Ernest N. Love Do you ever feel like someone's watching out for you? Have you ever been saved just in time from being harmed or making a grave mistake? The amazing and marvelous truth is that angels are real, and their mission is to serve as God's messengers and our protectors. As such, all of those little incidents that happened just in time to save our lives were guided and directed by angels whose strength and direction was through the mighty hand of God. Discover one man's encounter with his own guardian angels and look at other angelic meetings that occur in the Bible—from Moses to Job to Hagar—to learn more about God's special force of spiritual warriors. Every day, these ministering spirits are battling evil so that goodness can prevail, and when you begin to recognize the signs of their presence, you can start standing with them in prayer.

Sarah's Ten Fingers Isabelle Stamler 2013 In the early 1900s, Sarah, a single mother of six children, is trapped in the bloody upheaval marking the death of Czarist Russia and the birth of the Soviet Union. Facing bigotry, poverty, and bloody revolution, Sarah determines to escape the catastrophe engulfing her and her family. She vows to bring them to America. In this memoir, author Isabelle Stamler traces her family's roots back to the small Belarussian hamlet of Vashisht, telling their story of the journey from Russia to a new life in New York City. From the Great Depression through World War II and beyond, *Sarah's Ten Fingers* narrates the trials and tribulations faced by this determined mother seeking a better existence for her family. *Sarah's Ten Fingers* recalls Sarah's tenacity, strength, and intelligence traits that have been replicated in her progeny, who are now teachers, lawyers, doctors, accountants, business owners, and writers. It portrays fifty years in the lives of a family that was brought out of hell by a pious Jewish woman seeking to attain the Golden Land.

My Sum, "The Doctor" Jonathan Singer 2002-01-25 My Sum, "The Doctor" is a collection of stories based on life experiences of the author. The confessed vignettes, that shaped his personal maturation and professional career, are humorously and introspectively drawn together as the sum of his existence. The memoirs of experience are assembled into five sections. "Unprincipled Beginnings, " a curious amalgam of adolescent naivete and frivolity, details the struggle for acceptance. With a felicitous style, "Humbled During Medical School" reveals the four yea path of discovery that lays the foundation for growth. "Opportunities within Internship, Residency" coalesces formative torments and triumphs. "Aspiring to a Career" transitions from a planted seed to a search for forgiveness. "Illuminations from the Family" selectively navigates the uncontrolled course of individuals held dear. The autobiographical souvenirs of Dr. Singer's distant and more recent memory are presented in colorful prose and poetry. The reflective, nourishing adventures will stimulate all with interest in character development.
