*Knowledge Production and Contradictory Functions in African Higher Education* Cloete, Nico 2015-03-01  
Reviews "This volume brings together excellent scholarship and innovative policy discussion to demonstrate the essential role of higher education in the development of Africa and of the world at large. Based on deep knowledge of the university system in several African countries, this book will reshape the debate on development in the global information economy for years to come. It should be mandatory reading for academics, policy-makers and concerned citizens, in Africa and elsewhere." Manuel Castells, Professor Emeritus, University of California at Berkeley, Laureate of the Holberg Prize 2012 and of the Balzan Prize 2013 "The dominant global discourse in higher education now focuses on 'world-class' universities – inevitably located predominantly in North America, Europe and, increasingly, East Asia. The rest of the world, including Africa, is left to play 'catch-up'. But that discourse should focus rather on the tensions, even contradictions, between 'excellence' and 'engagement' with which all universities must grapple. Here the African experience has much to offer the high-participation and generously resourced systems of the so-called 'developed' world. This book offers a critical review of that experience, and so makes a major contribution to our understanding of higher education." Sir Peter Scott, former editor of Times Higher Education and Professor of Higher Education Studies, University College London, Institute of Education

**Public Interest Litigation in South Africa** Jason Brickhill 2018-08-31 Public Interest Litigation in South Africa

offers grounded accounts - by leaders in the field - of the campaigns, cases, and causes that have defined key areas of public interest litigation in the country since the constitutional transition. The authors share their perspectives on the struggles led by people, communities, activists, and civil society organisations to realise the vision of the Constitution. The book shares the legal narratives of those particular struggles in the hope that this will contribute to the broader continuous struggle for social justice. Part One of the book considers the history of public interest litigation, the public interest sector today, public interest litigation in the context of international law, the ethics and politics of public interest litigation, and procedure. Part Two addresses public interest litigation in key areas of law: property rights, gender, basic services, health care, LGBTI equality, children's rights, basic education, freedom of expression, access to information, and prisoners' rights. Public Interest Litigation in South Africa seeks to share more of the stories of what has been achieved in the courts, beyond the well-trodden, landmark appellate decisions, as a contribution to informed and critical engagement.

Mergers and Alliances in Higher Education Adrian Curaj 2015-03-31 This volume casts light on mergers and alliances in higher education by examining developments of this type in different countries. It combines the direct experiences of those at the heart of such transformations, university leaders and senior officials responsible for higher education policy, with expert analysts of the systems concerned. Higher education in Europe faces a series of major challenges. The economic crisis has accelerated expectations of an increased role in addressing economic and societal challenges while at the same time putting pressure on available finances. Broader trends such as shifting student demographics and expectations, globalisation and mobility and new ways of working with business have contributed to these increased pressures. In the light of these trends there have been moves, both from national or regional agencies and from individual institutions to respond by combining resources, either through collaborative arrangements or more fundamentally through mergers between two or more universities. After an introductory chapter by the editors which establishes the context for mergers and alliances, the book falls into two main parts. Part 1 takes a national or regional perspective to give some sense of the historical context, the wider drivers and the importance of these developments in these cases. Included are both systemic accounts (for countries as France, Sweden, Romania, Russia, Wales and England), and specific cross-cutting initiatives including a major facility at Magurele in Romania and a Spanish programme for promoting international campuses of excellence. Part 2 is built from specific cases of universities, either in mergers or alliances, with examples from different countries (such as France, UK, Romania, Spain, Germany, Denmark, Finland, Switzerland). A concluding chapter by the editors assesses these experiences and indicates the implications and future needs for understanding in this domain.

Research Universities in Africa Nico Cloete 2018-11-09 From the early 2000s, a new discourse emerged, in Africa and the international donor community, that higher education was important for development in Africa. Within this 'zeitgeist' of converging interests, a range of agencies agreed that a different, collaborative approach to linking higher education to development was necessary. This led to the establishment of the Higher Education Research and Advocacy Network in Africa (Herana) to concentrate on research and

advocacy about the possible role and contribution of universities to development in Africa. This book is the final publication to emerge from the Herana project. The project has also published more than 100 articles, chapters, reports, manuals and datasets, and many presentations have been delivered to share insights gained from the work done by Herana. Given its prolific dissemination, it seems reasonable to ask whether this fourth and final publication will offer the reader anything new. This book is certainly different from previous publications in several respects. First, it is the only book to include an analysis of eight African universities based on the full 15 years of empirical data collected by the project. Second, previous books and reports were published mid-project. This book has benefited from an extended gestation period allowing the authors and contributors to reflect on the project without the distractions associated with managing and participating in a large-scale project. For the first time, some of those who have been involved in Herana since its inception have had the opportunity to at least make an attempt to see part of the wood for the trees. Different does not necessarily mean new. An emphasis on the 'newness' of the data and perspectives presented in this book is important because it shows that it is more than a historical record of a donor-funded project. Rather, each chapter in this book brings, to a lesser or greater extent, something new to our understanding of universities, research and development in Africa.

**Aspects of Teaching Secondary Mathematics** Linda Haggarty 2003-09-02 If learners in the classroom are to be excited by mathematics, teachers need to be both well informed about current initiatives and able to see how what is expected of them can be translated into rich and stimulating classroom strategies. The book examines current initiatives that affect teaching mathematics and identifies pointers for action in the classroom. Divided into three major sections, it looks at: the changing mathematics classroom at primary, secondary and tertiary level major components of the secondary curriculum practical pedagogical issues of particular concern to mathematics teachers. Each issue is explored in terms of major underpinnings and research in that area, and practical ideas can be drawn from the text and implemented in the reader's classroom practice. Each chapter has been written by a well-respected writer, researcher and practitioner in their field and all share a common goal: to look thoughtfully and intelligently at some of the practical issues facing mathematics teachers and offer their perspectives on those issues.

**Mathematical Epidemiology** Fred Brauer 2008-04-30 Based on lecture notes of two summer schools with a mixed audience from mathematical sciences, epidemiology and public health, this volume offers a comprehensive introduction to basic ideas and techniques in modeling infectious diseases, for the comparison of strategies to plan for an anticipated epidemic or pandemic, and to deal with a disease outbreak in real time. It covers detailed case studies for diseases including pandemic influenza, West Nile virus, and childhood diseases. Models for other diseases including Severe Acute Respiratory Syndrome, fox rabies, and sexually transmitted infections are included as applications. Its chapters are coherent and complementary independent units. In order to accustom students to look at the current literature and to experience different perspectives, no attempt has been made to achieve united writing style or unified notation. Notes on some mathematical background (calculus, matrix algebra, differential equations, and probability) have been prepared and may be downloaded at the web site of the Centre for Disease Modeling ([www.cdm.yorku.ca](http://www.cdm.yorku.ca)).

**How Long Will South Africa Survive?** R.W. Johnson 2015-01-11 In 1977, Johnson's best selling *How Long Will South Africa Survive?* offered a controversial and highly original analysis of the survival prospects of apartheid. Now, after more than two decades of the ANC in government, he believes the question must be posed again. "The big question about ANC rule," Johnson writes, "is whether African nationalism would be able to cope with the challenges of running a modern industrial economy. Twenty years of ANC rule have shown conclusively that the party is hopelessly ill equipped for this task. Indeed, everything suggests that South Africa under the ANC is fast slipping backward and that even the survival of South Africa as a unitary state cannot be taken for granted. The fundamental reason why the question of regime change has to be posed is that it is now clear that South Africa can either choose to have an ANC government or it can have a modern industrial economy. It cannot have both."

*Principles and Practice of Clinical Virology* Arie J. Zuckerman 2004-08-13 The knowledge and practice of clinical virology continues to expand. This new fifth edition has thirty-six comprehensive chapters, each of which has been extensively revised or rewritten, with the addition of new colour plates. This updated version takes into account knowledge accumulated in molecular biology with its applications for laboratory diagnosis, immunisation and antiviral chemotherapy. Each chapter highlights the clinical features and epidemiological patterns of infection. Similarly, in response to the global concern of the threat posed by new viruses, a new chapter on Emerging Infections is included. There is also new material on Hospital Acquired Infections, including some advice relating to SARS, that will be of benefit to those dealing with the day-to-day management of patients in hospital.

**Physician Assistant: A Guide to Clinical Practice E-Book** Ruth Ballweg 2017-02-20 Entering its 6th edition, *Physician Assistant: A Guide to Clinical Practice* is the only text that covers all aspects of the physician assistant profession, the PA curriculum, and the PA's role in clinical practice. It is designed as a highly visual and practical resource to be used across the spectrum of lifelong learning, enabling students and practicing PAs to thrive in a rapidly changing health care system. Teaches how to prepare for each core clinical rotation and common electives, as well as how to work with atypical patient populations such as homeless patients and patients with disabilities. A succinct, bulleted writing style; convenient tables; practical case studies; and clinical application questions throughout enable you to master key concepts and clinical applications. Helps you master all the core competencies needed for certification or recertification. Addresses all six Physician Assistant Competencies, as well as providing guidance for the newly graduated PA entering practice. Includes quick-use resources, such as objectives and key points sections for each chapter, tip boxes with useful advice, abundant tables and images, and 134 updated case studies. Features chapters for the 7 core clinical rotations and 5 common electives, with key guidance on how to prepare effectively and what to expect. Provides updated health policy information, expanded information about international programs, cultural competencies, and pearls and pitfalls on working internationally as a PA. Outlines the basic principles of Interprofessional Education – an important new trend in medical education nationally. New chapters cover: Maximizing Your Education, Future of the Profession, Principles of PA Education, Managing Stress and Burnout, and many other topics.

*Management of Research Infrastructures: A South African Funding Perspective* Rakeshnie Ramoutar-Prieschl

2020-01-01 This open access book provides an overview of the building blocks necessary for managing, steering and guiding the establishment of a research infrastructure (RI). It offers valuable insights into RI investment, access and management at the academic, grants management, agency and policy level, and serves as a useful guide for the research community, students, and those in the private sector wishing to understand the approaches and opportunities involved in the establishment, maintenance and management of research infrastructure platforms. Presenting a holistic view of RI investment and granting cycles from a South African perspective, the books target audience includes those working in science diplomacy, policymaking and science grants councils (especially in Africa) as well as funders and donors.

Serving Higher Purposes Ihron Rensburg 2020-11-05 Universities of the 21st century and beyond must be about teaching, learning, research excellence, creativity and innovation as much as they must be about enabling the destiny of students, communities and nations to realize their potential. UJ succeeded in her vision and responsibilities to transform the divisions, prejudices and limitations that often restrain the advancement of society. The story of UJ's transition to an inclusive, diverse, dynamic, bold and purposeful institution of learning demands to be read by everyone, South African, African and beyond. It is a story of how to be an object rather than the subject of history, while dynamically shaping our shared futures, laying a solid foundation for future generations to be advocates and architects for social change and cohesion. It is a story of courageous and visionary leadership. The book offers our nation profound lessons in leadership that should enrich all our efforts to transform institutions in a sustainable way, to play a meaningful role in building ONE NATION. - DR WENDY LUHABE, Economic Activist, Social Entrepreneur, First Chancellor of the University of Johannesburg

*Assessment for Learning in Higher Education* Knight, Peter 2012-12-06 Combining a range of case studies with theoretical research, this volume analyzes current developments and best practice. The contributors discuss innovative approaches in assessment, peer assessment, the NCVQ model, the positive side of assessment, staff training for assessment, and much more.

*History for the IB Diploma Paper 1 Rights and Protest* Jean Bottaro 2015-08-31 Comprehensive second editions of History for the IB Diploma Paper 1, revised for first teaching in 2015.

**Catatonia** Max Fink 2006-11-23 Teaches the reader how to identify and treat catatonia successfully, and describes its neurobiology.

Politics and Community-Based Research Sarah Charlton 2019-10-01 Politics and Community-Based Research: Perspectives from Yeoville Studio, Johannesburg provides a textured analysis of a contested urban space that will resonate with other contested urban spaces around the world and challenges researchers involved in such spaces to work in creative and politicised ways This edited collection is built around the experiences of Yeoville Studio, a research initiative based at the School of Architecture and Planning at the University of the

Witwatersrand, Johannesburg. Through themed, illustrated stories of the people and places of Yeoville, the book presents a nuanced portrait of the vibrance and complexity of a post-apartheid, peri-central neighbourhood that has often been characterised as a 'slum' in Johannesburg. These narratives are interwoven with theoretical chapters by scholars from a diversity of disciplinary backgrounds, reflecting on the empirical experiences of the Studio and examining academic research processes. These chapters unpack the engagement of the Studio in Yeoville, including issues of trust, the need to align policy with lived realities and social needs, the political dimensions of the knowledge produced and the ways in which this knowledge was, and could be used.

Understanding Finance and Accounting David Flynn 2009

**University on the Border** Lis Lange 2021-08-27 The volume explores and thinks through the process of decolonising the South African higher education system by examining #MustFall. The text offers theoretical insights from a historical, contemporary and multidisciplinary lens, while examining the embedded meanings of the university as an institution, idea and set of practices to show the shifts and changes that were inaugurated by #MustFall along with the historicities that define the university both locally and globally. The retro- and prospective insights presented in the book surface the crisis of authority that places the university in a state of precarity, which is framed in the book as the 'border'. The volume proposes the concept of the 'border' (recognising its conceptual and analytical dynamism) as a generative space that can facilitate new imaginaries and articulations of this social institution: the university.

Doctoral Education in South Africa Nico Cloete 2015-12-08 Worldwide, in Africa and in South Africa, the importance of the doctorate has increased disproportionately in relation to its share of the overall graduate output over the past decade. This heightened attention has not only been concerned with the traditional role of the PhD, namely the provision of future academics; rather, it has focused on the increasingly important role that higher education and, particularly, high-level skills is perceived to play in national development and the knowledge economy. This book is unique in the area of research into doctoral studies because it draws on a large number of studies conducted by the Centre of Higher Education Trust (CHET) and the Centre for Research on Evaluation, Science and Technology (CREST), as well as on studies from the rest of Africa and the world. In addition to the historical studies, new quantitative and qualitative research was undertaken to produce the evidence base for the analyses presented in the book. The findings presented in *Doctoral Education in South Africa* pose anew at least six tough policy questions that the country has struggled with since 1994, and continues to struggle with, if it wishes to gear up the system to meet the target of 5 000 new doctorates a year by 2030. Discourses framed around the single imperatives of growth, efficiency, transformation or quality will not, however, generate the kind of policy discourses required to resolve these tough policy questions effectively. What is needed is a change in approach that accommodates multiple imperatives and allows for these to be addressed simultaneously.

**Handbook of Research on Records and Information Management Strategies for Enhanced Knowledge**

**Coordination** Chisita, Collence Takaingehamo 2021-01-15 The convergence of technologies and emergence of

interdisciplinary and transdisciplinary modus of knowledge production justify the need for research that explores the disinterestedness or interconnectivity of the information science disciplines. The quantum leap in knowledge production, increasing demand for information and knowledge, changing information needs, information governance, and proliferation of digital technologies in the era of ubiquitous digital technologies justify research that employs a holistic approach in x-raying the challenges of managing information in an increasingly knowledge- and technology-driven dispensation. The changing nature of knowledge production for sustainable development, along with trends and theory for enhanced knowledge coordination, deserve focus in current times. The Handbook of Research on Records and Information Management Strategies for Enhanced Knowledge Coordination draws input from experts involved in records management, information science, library science, memory, and digital technology, creating a vanguard compendium of novel trends and praxis. While highlighting a vast array of topics under the scope of library science, information science, knowledge transfer, records management, and more, this book is ideally designed for knowledge and information managers, library and information science schools, policymakers, practitioners, stakeholders, administrators, researchers, academicians, and students interested in records and information management.

Competency-Based Accounting Education, Training, and Certification Alfred Borgonovo 2019-06-06 This guide is designed to assist all those who are responsible for providing or overseeing formal education or practical experience that forms part of the initial professional development of aspiring professional accountants, or the continuing professional development of professional accountants. It is particularly relevant to professional accountancy organizations. It is also intended for policy makers and regulators who determine which organizations are licensed to certify professional accountants and related specializations, for example, audit professionals. The purpose of the guide is to • increase understanding of the gap between the current skills of many accountants in some regions and the skills that are relevant in increasingly digitized and globalized economies; • convey the essential features of Competency-Based Accounting Education, Training, and Certification (CBAETC); • provide a common reference framework for organizations pursuing CBAETC and the consultants working with them; • assist countries in developing in-country plans and implementing in-country processes that produce accountants with higher-order skills relevant to their economy's rapidly evolving needs; and • improve financial reporting, auditing, and regulation. This guide complements and builds on International Education Standards (IES<sup>TM</sup>) of the International Accounting Education Standards Board<sup>TM</sup> (IAESB<sup>TM</sup>).

**English Across the Curriculum** Bruce Morrison 2021 Inspired by papers presented at the second international English Across the Curriculum (EAC) conference, this book provides a platform for those involved in the EAC movement to exchange insights, explore new strategies and directions, and share experiences. It speaks not only to EAC practitioners but also to scholars in a range of related fields, whether they are considering starting an EAC-like initiative or are already involved in an established EAC, Content and Language Integrated Learning (CLIL), or Writing Across the Curriculum (WAC) program. The chapters in the book testify to challenges faced, opportunities presented, and a passion displayed for embedding academic English literacy in courses in a range of disciplines at institutions around the world. They also highlight the persistence and determination of teachers in creating and shaping valuable learning experiences and ongoing support for their

students.

*Interest Rate Benchmark Reform - Phase 2 2020*

**Global Strategic Management** Philippe Lasserre 2023-01-12 Seamlessly blending academic rigour and practicality, this textbook provides an introduction to global business strategy. Assuming a born global perspective, Global Strategic Management is supported by ample pedagogical features, including numerous case studies and examples featuring both established multinationals and unknown SMEs from across the globe. The book takes an applied approach to global business strategy, emphasising functional parts of international business (managing marketing, operations, HR and finance). New to this fifth edition is increased material on sustainability and corporate social responsibility, including discussion of climate change, NGOs and sustainable development goals. Subjects such as the impact of technology, cryptocurrency and global strategy in the digital space are discussed in more detail.

*Health Professionals for a New Century* 2011 One hundred years ago a series of seminal documents, starting with the Flexner Report of 1910, sparked an enormous burst of energy to harness the power of science to transform higher education in health. Professional education, however, has not been able to keep pace with the challenges of the 21st century. A new generation of reforms is needed to meet the demands of health systems in an interdependent world. The report of the Commission on the Education of Health Professionals for the 21st Century, a global independent initiative consisting of 20 leaders from diverse disciplinary backgrounds and institutional affiliations, articulates a fresh vision and recommends renewed actions. Building on a rich legacy of educational reforms during the past century, the Commission's findings and recommendations adopt a global and multi-professional perspective using a systems approach to analyze education and health, with a focus on institutional and instructional reforms.

**Welcoming New Americans?** Abigail Fisher Williamson 2018-08-28 Even as Donald Trump's election has galvanized anti-immigration politics, many local governments have welcomed immigrants, some even going so far as to declare their communities "sanctuary cities" that will limit cooperation with federal immigration authorities. But efforts to assist immigrants are not limited to large, politically liberal cities. Since the 1990s, many small to mid-sized cities and towns across the United States have implemented a range of informal practices that help immigrant populations integrate into their communities. Abigail Fisher Williamson explores why and how local governments across the country are taking steps to accommodate immigrants, sometimes despite serious political opposition. Drawing on case studies of four new immigrant destinations—Lewiston, Maine; Wausau, Wisconsin; Elgin, Illinois; and Yakima, Washington—as well as a national survey of local government officials, she finds that local capacity and immigrant visibility influence whether local governments take action to respond to immigrants. State and federal policies and national political rhetoric shape officials' framing of immigrants, thereby influencing how municipalities respond. Despite the devolution of federal immigration enforcement and the increasingly polarized national debate, local officials face on balance distinct legal and economic incentives to welcome immigrants that the public does not necessarily share. Officials' efforts to promote incorporation can therefore result in backlash unless they carefully attend to both

aiding immigrants and increasing public acceptance. Bringing her findings into the present, Williamson takes up the question of whether the current trend toward accommodation will continue given Trump's anti-immigrant rhetoric and changes in federal immigration policy.

*"ICT FOR RURAL DEVELOPMENT"* Dr. MOHANKUMR C. KAIMAL

**A Practical Guide for Medical Teachers** John Dent 2017-04-26 The Fifth Edition of the highly praised Practical Guide for Medical Teachers provides a bridge between the theoretical aspects of medical education and the delivery of enthusiastic and effective teaching in basic science and clinical medicine. Healthcare professionals are committed teachers and this book is an essential guide to help them maximise their performance. This highly regarded book recognises the importance of educational skills in the delivery of quality teaching in medicine. The contents offer valuable insights into all important aspects of medical education today. A leading educationalist from the USA joins the book's editorial team. The continual emergence of new topics is recognised in this new edition with nine new chapters: The role of patients as teachers and assessors; Medical humanities; Decision-making; Alternative medicine; Global awareness; Education at a time of ubiquitous information; Programmatic assessment; Student engagement; and Social accountability. An enlarged group of authors from more than 15 countries provides both an international perspective and a multi-professional approach to topics of interest to all healthcare teachers.

**Higher Education Research** Malcolm Tight 2018-11-15 Research into higher education has blossomed internationally during the last few decades, as participation in higher education has expanded and concern over delivering it effectively has increased. Higher Education Research offers an overview of what we have learnt through researching different aspects of higher education. Leading academic in the field Malcolm Tight codifies and classifies all research on higher education, offering an accessible but comprehensive guide to the field and its scope. Topics covered include: Teaching and learning Course and design Student experience Quality System policy Institutional management Academic work Knowledge and research Tight discusses the work of key researchers, and explores the varied use of methodologies, theoretical frameworks and research designs. He also identifies topics and areas where further research is needed.

Transition 116 IU Press Journals 2015-02-02 December 2014 marked a year since the passing of Nelson Mandela—a man who was as much myth as flesh and blood. Transition pays tribute to Mandela's worldly attainments and to his otherworldly sainthood. Featuring remembrances from Wole Soyinka, Xolela Mangcu, Pierre de Vos, and Adam Habib, this issue assembles Mandela's staunchest allies—for whom he approached saintliness—as well as his most entrenched critics. Other contributors consider the iconicity of Mandela—including his representations in films; the importance of boxing to his political career; his time studying with the revolutionary army in Algeria; his stance on children's rights; and even his ill-fated trip to Miami. Whoever you think Mandela was—or wasn't—this issue is the new required reading. Published three times per year by Indiana University Press for the Hutchins Center at Harvard University, Transition is a unique forum for the freshest, most compelling ideas from and about the black world. Since its founding in Uganda in 1961, the magazine has kept pace of the rapid transformation of the African Diaspora and has

remained a leading forum of intellectual debate. Transition is edited by Alejandro de la Fuente.

*Grace* Boswell, Barbara 2017-07-19 Family secrets run deep for Grace, a young girl growing up in Cape Town during the 1980s, spilling over into adulthood, and threatening to ruin the respectable life she has built for herself. When an old childhood friend reappears, Grace's memories of her childhood come rushing back, and she is confronted, once again, with the loss that has shaped her. She has to face up to the truth or continue to live a lie - but the choice is not straightforward. *Grace* is an intimate portrayal of violence, both personal and political, and its legacy on one person's life. It meditates on the long shadow cast by personal trauma, showing the inter-generational imprint of violence and loss on people's lives.

**Extended Curriculum Programmes** Tennyson Mgutshini 2022-04-30 The introduction of ECPs in South African Universities is seen by many as South Africa's key strategy for addressing the problem of poor patterns of student success and has its basis on the uncontested acceptance that an extended study duration may be necessary to bring some categories of learners to a level of parity with the readiness expectations of their course of study. Even so, this transformative strategic imperative has been plagued by a range of challenges that include poor systems readiness; poor selection mechanisms in the identification of ECP students; poor numeracy and literacy amongst students, and indifferent teacher involvement in ECPs. This volume offers a rare insight into many of the above-recognised challenges and in so doing provides critical matter for thought for educators within the higher education sector.

**Handbook of Research on Future Opportunities for Technology Management Education** Khan, Basheer Ahmed 2021-06-25 Technology management education and business education are visibly intertwined in the current educational system. Certain efforts that have taken place in the recent past are the interinstitutional discourse around the world. Technology management is a dynamic and evolving profession, driven by changes in technology, globalization, sustainability, and the increasing importance of the service economy. The *Handbook of Research on Future Opportunities for Technology Management Education* is a comprehensive reference book that enables readers to comprehend the trends in technological changes and the need to orient business education and technology management in workplaces. The book serves to support with the formation and implementation of appropriate policies for technology management. Covering topics such as big data analytics, cloud computing adoption, and massive open online courses (MOOCs), this text is an essential resource for managers, technologists, teachers, executives, instructional designers, libraries, university researchers, students, faculty, and industry taught leaders.

**Strategies for Facilitating Inclusive Campuses in Higher Education** Jaimie Hoffman 2019-07-25 This volume provides educators with a global understanding of the successes and challenges associated with facilitating inclusive campuses in higher education amidst the growing diversity of students by providing evidence-based strategies and ideas for implementing equity and inclusion at higher education institutions around the world.

Education for a Better World Olubayi Olubayi 2011-05-05 "Education for a better world cares deeply about what kinds of people we become. People who are educated for a better world are simultaneously knowledgeable, acutely concerned for the welfare of all of humanity and actively involved in our common work of making sure that our national and global systems respect and care for all human beings, and for all other living things with which we share our ecosystem. They are cognizant of our shared humanity and of the free benefits that are provided us by healthy ecosystems." -Education for a Better World Education for a Better World is both a commentary and critical analysis of education through its historical context and present-day relevance in the information age. The complex interplay between knowledge and tradition is examined to reveal the myriad ways in which education sculpts and defines society. What follows is a discussion on the importance of education as a principal means for effecting profound social and ecological change, with examples and analyses of service learning and sustainable development initiatives. Education for a Better World presents several suggestions for the consideration of both students and educators alike toward the aim of improving education and, consequently, our world as a whole.

How to Do Your Social Research Project Or Dissertation Tom Clark 2019-10 How to do your Social Research Project or Dissertation provides a straight-talking, easy-to-navigate, and reassuring guide to support final-year social science undergraduates. Uniquely shaped by real social science undergraduates from a range of institutions, the book includes their advice to help you through with what can be a daunting, but rewarding stage of your degree. From the look and feel of the book, to the development of the chapter content and the advice it provides, students have been involved at every stage of the book's development to ensure it is focused on what's important to you. Expert advice from real supervisors across the subject disciplines in the 'Working with your supervisor' feature also helps you to make the most of research supervision, and learn from the experience of real researchers in your chosen field. By providing anecdotes, words of wisdom, scenarios, or simply reminders, hints, and tips on how best to prepare for meetings, and communicate effectively, How to do your Social Research Project or Dissertation is the most complete guide to facilitate the student-supervisor working relationship. Dedicated chapters cover all the typical stages of a research project or dissertation in the social sciences, while their carefully constructed structure allows you to quickly and efficiently navigate the content. Throughout the book, you'll focus on three key questions: 'What do I need to know?', 'What do I need to think about?' and 'What do I need to do?'. In so doing, each chapter gives you a clear and direct checklist of actions as you progress through your dissertation or research project, keeping you organized, motivated, and confident. The book's online resources include a wealth of free-to-access materials, including: DT Author-led videos for each chapter of the book focussing on key areas of social research

including supervision, thinking up research questions and ethical challenges in social research among others. DT Student videos focussing on key issues in undertaking a research project or dissertation and how these have been overcome. DT 'Finding your Way' research pitfalls and how to avoid them. DT General dissertation template. DT Good and bad examples of various research tools: questionnaires, interview questions, observation plans. DT Good and bad examples of extracts from literature reviews. DT Downloadable research checklist. DT Further reading/research suggestions, broken down by chapter. DT A list of links to online time-management tools. DT Research plan templates. DT Links to freely available datasets. DT Tips on increasing your sample size. DT SPSS/NVIVO links/resources. DT Interactive activity to help narrow down research topics. DT Mind-mapping tool. DT Interactive editing exercise to practise writing-up, and making efficient use of word count.

*Higher Education Pathways* Ashwin, Paul 2018-12-14 In what ways does access to undergraduate education have a transformative impact on people and societies? What conditions are required for this impact to occur? What are the pathways from an undergraduate education to the public good, including inclusive economic development? These questions have particular resonance in the South African higher education context, which is attempting to tackle the challenges of widening access and improving completion rates in a system in which the segregations of the apartheid years are still apparent. Higher education is recognised in core legislation as having a distinctive and crucial role in building post-apartheid society. Undergraduate education is seen as central to addressing skills shortages in South Africa. It is also seen to yield significant social returns, including a consistent positive impact on societal institutions and the development of a range of capabilities that have public, as well as private, benefits. This book offers comprehensive contemporary evidence that allows for a fresh engagement with these pressing issues.
