The Ascent of Information Caleb Scharf 2021-06-15 "Full of fascinating insights drawn from an impressive range of disciplines, *The Ascent of Information* casts the familiar and the foreign in a dramatic new light." –Brian Greene, author of *The Elegant Universe* Your information has a life of its own, and it's using you to get what it wants. One of the most peculiar and possibly unique features of humans is the vast amount of information we carry outside our biological selves. But in our rush to build the infrastructure for the 20 quintillion bits we create every day, we've failed to ask exactly why we're expending ever-increasing amounts of energy, resources, and human effort to maintain all this data. Drawing on deep ideas and frontier thinking in evolutionary biology, computer science, information theory, and astrobiology, Caleb Scharf argues that information is, in a very real sense, alive. All the data we create—all of our emails, tweets, selfies, A.I.-generated text and funny cat videos—amounts to an aggregate lifeform. It has goals and needs. It can control our behavior and influence our well-being. And it's an organism that has evolved right alongside us. This symbiotic relationship with information offers a startling new lens for looking at the world. Data isn't just something we produce; it's the reason we exist. This powerful idea has the potential to upend the way we think about our technology, our role as humans, and the fundamental nature of life. *The Ascent of Information* offers a humbling vision of a universe built of and for information. Scharf explores how our relationship with data will affect our ongoing evolution as a species. Understanding this relationship will be crucial to preventing our data from becoming more of a burden than an asset, and to preserving the possibility of a human future.

We Begin Our Ascent Joe Mungo Reed 2019-05-14 "Exceptional...fast and smart, funny and sad, this is an outstanding sports novel, and Joe Mungo Reed is an author to watch" (Kirkus Reviews, starred review). Sol and Liz are a couple on the cusp. He's a professional cyclist in the Tour de France, a workhorse, but not yet a star. She's a geneticist on the brink of a major discovery, either that or a loss of funding. They've just welcomed their first child into the world, and their bright future lies just before them—if only they can reach out and grab it. But as Liz's research slows, as Sol starts doping, their dreams grow murkier and the risks graver. Over the whirlwind course of the Tour, they enter the orbit of an extraordinary cast of conmen and aspirants, and the young family is brought ineluctably into the depths of an illegal drug smuggling operation. As Liz and Sol flounder to discern right from wrong, up from down, they are forced to decide: What is it we're striving for? And what is it worth? "Joe Mungo Reed's unforgettable debut novel introduces us to a powerful new literary voice—as riveting as Don DeLillo's or Toni Morrison's" (Mary Karr, author of *The Liars' Club*). *We Begin Our Ascent* dances nimbly between tragic and comic, exploring the cost of ambition and the question of what gives our lives meaning. Reed melds the powerful themes of great marital dramas like *Revolutionary Road* with the humor, character, and heart of a George Saunders collection. Throughout, we're drawn inside the cycling world and treated to the brilliant literary sports-writing of modern classics like *The Art of Fielding* or *End Zone*.

The Yellow Jersey Ralph Hurne 2016-04-24 "This is sports fiction at its very best. Mr. Hurne has a cool, downbeat style descended from Lardner and Hemingway, and a fine hand with the hairpin turns of suspense." –The New York Times Book Review "The greatest cycling novel ever written. . . . An underground classic. . . . A cycling book that follows a different course—one with drama and characters you can relate to, whose actions raise questions about life on and off the bicycle. . . . The heart of *The Yellow Jersey* is the Tour de France itself, which Hurne views as a metaphor for life. . . . Thoroughly entertaining." –Bicycling "Full of wit, charm, excitement, and intelligence." –Publishers Weekly Terry Davenport is nearly washed up. After a career of good but never great bicycle racing in Europe, he is past his prime, and given lately to chasing women rather than leading the pack through the Alps. He contemplates how he might find a comfortable retirement, and is wallowing in an existential crisis. But his final Tour de France—which he rides only as a favor to his young protégé, to pace him through the early stages—develops by a series of accidents into the chance of a lifetime. And though Davenport is old, he is wily and tough and fearless. His arduous, painful, heroic performance in the face of impossible odds is unforgettable. A sports thriller—with stunning descriptions of competitive cycling—and a keen meditation on mortality, *The Yellow Jersey* is an extraordinary novel.

Hammer Joe Mungo Reed 2022-03-22 An art auction house employee helps a Russian oligarch sell his prized collection, ensnaring himself in a dangerous romance and an even more treacherous political plot. It's 2013, and much of the world still reels from the global economic collapse. Yet in the auction rooms of London, artworks are selling for record-breaking prices. Seeking a place in this gilded world is Martin, a junior specialist at a prestigious auction house. Martin spends his days catering to the whims of obscenely wealthy

clients and his nights drinking in grubby pubs with his demoralized roommate. However, a chance meeting with Marina, an old university friend, presents Martin with a chance to change everything. Pursuing distraction from her failing marriage and from a career she doesn't quite believe in, Marina draws Martin into her circle and that of her husband, Oleg, an art-collecting oligarch. Shaken by the death of his mother and chafing against his diminishing influence in his homeland, Oleg appears primed to change his own life—and perhaps to relinquish his priceless art collection long coveted by London's auction houses. Martin is determined to secure the sale and transform his career. But his ambitions are threatened by factors he hasn't reckoned with: a dangerous attraction between himself and Marina, and half-baked political plans through which Oleg aims to redeem himself and Russia but which instead imperil the safety of the oligarch and all those around him. Hammer is a riveting, ambitious novel—at once a sharp art world exposé, a tense geopolitical thriller, and a brooding romance—that incisively explores the intersection of wealth, power, and desire.

The Ascent of Babel Gerry T. M. Altmann 1998-09-03 Language is one of the faculties that sets humans apart from animals, the crucial thing which makes our complex social interactions possible. *The Ascent of Babel* explores the ways in which the mind produces and understands language: the ways in which the sounds of language evoke meaning, and the ways in which the desire to communicate causes us to produce those sounds to begin with. The 'ascent' symbolises different things: the progression from sound to meaning, the ascent that we each undergo, from birth onwards, as we learn our mother tongue, and the quest to understand the mental processes which underlie our use of

language. Gerry Altmann leads the reader on this ascent - a fascinating tour which takes us from babies learning to say words to the production of spoken and written language, the effects of brain damage on language, and the ways in which computer simulations of interconnecting nerve cells can learn language. The Ascent of Babel is a journey of discovery, written in an engaging and witty style, at the end of which it becomes clear that Babel's summit - the secret of language - may actually lie at its foundations, where babies play and language is learned.

Ascent Jed Mercurio 2007-03-13 The Sun swings behind the world. Night engulfs him. The dull metal craft plunges through space, its portholes pale beacons containing the silhouette of a man, and the only other lights are the stars themselves. Can one act define a man? Or his country? Ascent is the spellbinding thriller by critically acclaimed British novelist Jed Mercurio. Inspired by the secrets still surrounding the USSR's race against the United States to put a man on the moon, Mercurio asks the chilling question, What if the Americans weren't first? Ascent takes us on the perilous journey of its singular hero, the brave and determined Yefgenii Yeremin. Yefgenii rises from the privation of a Stalingrad orphanage in 1946 to the heights of the cosmonaut corps. During the Korean War he joins an elite Soviet squadron conducting a secret air war against the famous aces of the U.S. Air Force. Dubbed Ivan the Terrible, he amasses more jet kills than any fighter pilot in history, but his feats must remain unknown to his countrymen, his victories un-celebrated. After the war, his achievements are scrubbed from the records and he is exiled to a base above the Arctic Circle, where he flies patrols on the edge of American airspace. There he learns that Yuri Gagarin has become the first man in space, the greatest of all heroes. And then, as America's Apollo astronauts prepare to reach the Moon, he is given a new name and sent into cosmonaut training. Throughout his career, he has craved a place in history, in the climactic clash between the two great powers. At last his country calls him. And somewhere between the Earth and the Moon, Ivan the Terrible finds his mission to create history, to exceed his own life. With one of the most fascinating heroes in recent fiction, Ascent builds a terrifying scenario within the shadowy history of the space race. Haunting, tragic, boldly inventive, Ascent is a tour de force of imagination.

galaxy at the speed of light, killing everything in its path. The countdown to when the death wave will reach Earth and the rest of the solar system is at two thousand years. Humans were helped by the Predecessors, who provided shielding generators that can protect the solar system. In return, the Predecessors asked humankind's help to save other intelligent species that are in danger of being annihilated. But what of Earth? With the Death Wave no longer a threat to humanity, humans have spread out and colonized all the worlds of the solar system. The technology of the Predecessors has made Earth a paradise, at least on the surface. But a policy of exiling discontented young people to the outer planets and asteroid mines has led to a deep divide between the new worlds and the homeworld, and those tensions are about to explode into open war. A Journey Through Existence: the Way of Worldly Love Norm Prigge 2012-04-18
Preface I explicitly do not affirm the truth of any statement made or implied herein concerning any actual people, including myself; or any actual relationships, including my own; or any concrete situations depicted. Everything I have written is either about or based upon my perceptions, memories, imagining, suppositions, assessments of poetic and dramatic appropriateness, and the like, all such, qua sources of factual truth, being notoriously fallible. The only truth that I do affirm herein is that of the universals that can be abstracted from the particulars of my subjective experience, the universals call them poetic truths whereby my audience can better understand and perfect themselves as I, hopefully, have been able to do for myself in the living and subsequent describing of all that follows. If anything I have written happens to occasion any people pain, I express in anticipation my deepest compassion; such people must know, however, that I would not have written as I have if I did not suppose that I would thereby have caused, in potentiality, far greater good than harm. The Ascent of Humanity Charles Eisenstein 2013-02-05 Charles Eisenstein explores the history and potential future of civilization, tracing the converging crises of our age to the illusion of the separate self. In this limited hardcover edition of Eisenstein's landmark book, he argues that our disconnection from one another and the natural world has mislaid the foundations of science, religion, money, technology, economics, medicine, and education as we know them. It has fired our near-pathological pursuit of technological Utopias even as we push ourselves and our planet to the brink of collapse. Fortunately, an Age of Reunion is emerging out of the birth pangs of an earth in crisis. Our journey of separation hasn't been a terrible mistake

but an evolutionary process and an adventure in self-discovery. Even in our darkest hour, Eisenstein sees the possibility of a more beautiful world--not through the extension of millennia-old methods of management and control but by fundamentally reimagining ourselves and our systems. We must shift away from our Babelian efforts to build ever-higher towers to heaven and instead turn out attention to creating a new kind of civilization--one designed for beauty rather than height. Breathtaking in its scope and intelligence, *The Ascent of Humanity* is a landmark book showing what it truly means to be human. "A tour-de-force filled with astounding insight, wit, wisdom and heart." --Christopher Uhl, author of *Developing Ecological Consciousness: Paths to a Sustainable Future* "Quite marvelous, a hugely important work. This book is truly needed in this time of deepening crisis." --John Zerzan, author of *Future Primitive and Elements of Refusal*

The Ascent of Money Niall Ferguson 2008-11-13 The 10th anniversary edition, with new chapters on the crash, Chimerica, and cryptocurrency "[An] excellent, just in time guide to the history of finance and financial crisis." –The Washington Post "Fascinating." –Fareed Zakaria, Newsweek In this updated edition, Niall Ferguson brings his classic financial history of the world up to the present day, tackling the populist backlash that followed the 2008 crisis, the descent of "Chimerica" into a trade war, and the advent of cryptocurrencies, such as Bitcoin, with his signature clarity and expert lens. *The Ascent of Money* reveals finance as the backbone of history, casting a new light on familiar events: the Renaissance enabled by Italian foreign exchange dealers, the French Revolution traced back to a stock market bubble, the 2008 crisis traced from America's bankruptcy capital, Memphis, to China's boomtown, Chongqing. We may resent the plutocrats of Wall Street but, as Ferguson argues, the evolution of finance has rivaled the importance of any technological innovation in the rise of civilization. Indeed, to study the ascent and descent of money is to study the rise and fall of Western power itself.

The Ascent to Truth Thomas Merton 2002-11-04 The author of *The Seven Storey Mountain* explores the mysticism of Saint John of the Cross. The only thing that can save the world from complete moral collapse is a spiritual revolution. . . . The desire for unworldliness, detachment, and union with God is the most fundamental expression of this revolutionary spirit. In *Ascent to Truth*, author and Trappist Monk Thomas Merton makes an impassioned case for the importance of contemplation. Drawing on a range of thinkers—from Carl Jung to Pope Pius XII—Merton defines the nature of contemplative experience and shows how the Christian mysticism of sixteenth-century Spanish Carmelite Saint John of the Cross offers essential answers to our disquieting and troubling times. "For any who have the desire to look into meditation and contemplation . . . this is the book for which they have waited." –New York Herald Tribune Book Review "For those who may be curious about mysticism, and for those who may be called to a life of contemplation, this is an excellent book." –Catholic World

Dialogues with Davidson Jeff Malpas 2011-06-24 Leading scholars discuss Donald Davidson's work in relation to a wide range of contemporary philosophical issues and approaches. The work of the philosopher Donald Davidson (1917–2003) is not only wide ranging in its influence and vision, but also in the breadth of issues that it encompasses. Davidson's work includes seminal contributions to philosophy of language and mind, to philosophy of action, and to epistemology and metaphysics. In *Dialogues with Davidson*, leading scholars engage with Davidson's work as it connects not only with aspects of current analytic thinking but also with a wider set of perspectives, including those of hermeneutics, phenomenology, the history of philosophy, feminist epistemology, and contemporary social theory. They link Davidson's work to other thinkers, including Collingwood, Kant, Derrida, Heidegger, and Gadamer. The essays
