109 East Palace Jennet Conant 2007-11-01 From the bestselling author of Tuxedo Park, the fascinating story of the 3,000 people who lived together in near confinement for more than two intense and conflicted years under J. Robert Oppenheimer and the world's best scientists to produce the Atomic Bomb and win World War II. They were told as little as possible. Their orders were to go to Santa Fe, New Mexico, and report for work at a classified Manhattan Project site, a location so covert it was known to them only by the mysterious address: 109 East Palace. There, behind a wrought-iron gate and narrow passageway just off the touristy old plaza, they were greeted by Dorothy McKibbin, an attractive widow who was the least likely person imaginable to run a front for a clandestine defense laboratory. They stepped across her threshold into a parallel universe--the desert hideaway where Robert Oppenheimer and a team of world-famous scientists raced to build the first atomic bomb before Germany and bring World War II to an end. Brilliant, handsome, extraordinarily charismatic, Oppenheimer based his unprecedented scientific enterprise in the high reaches of the Sangre de Cristo mountains, hoping that the land of enchantment would conceal and inspire their bold mission. Oppenheimer was as arrogant as he was inexperienced, and few believed the thirty-eight-year-old theoretical physicist would succeed. Jennet Conant captures all the exhilaration and drama of those perilous twenty-seven months at Los Alamos, a secret city cut off from the rest of society, ringed by barbed wire, where Oppenheimer and his young recruits lived as virtual prisoners of the U.S. government. With her dry humor and eye for detail, Conant chronicles the chaotic beginnings of Oppenheimer's by-the-seat-of-his-pants operation, where freshly minted secretaries and worldly scientists had to contend with living conditions straight out of pioneer days. Despite all the obstacles, Oppie managed to forge a vibrant community at Los Alamos through the sheer force of his personality. Dorothy, who fell for him at first sight, devoted herself to taking care of him and his crew and supported him through the terrifying preparations for the test explosion at Trinity and the harrowing aftermath of Hiroshima and Nagasaki. Less than a decade later, Oppenheimer became the focus of suspicion during the McCarthy witch hunts. When he and James B. Conant, one of the top administrators of the

Manhattan Project (and the author's grandfather), led the campaign against the hydrogen bomb, Oppenheimer's past left-wing sympathies were used against him, and he was found to be a security risk and stripped of his clearance. Though Dorothy tried to help clear his name, she saw the man she loved disgraced. In this riveting and deeply moving account, drawing on a wealth of research and interviews with close family and colleagues, Jennet Conant reveals an exceptionally gifted and enigmatic man who served his country at tremendous personal cost and whose singular achievement, and subsequent undoing, is at the root of our present nuclear predicament.

The Beautiful Music All Around Us Stephen Wade 2012-08-10 The Beautiful Music All Around Us presents the extraordinarily rich backstories of thirteen performances captured on Library of Congress field recordings between 1934 and 1942 in locations reaching from Southern Appalachia to the Mississippi Delta and the Great Plains. Including the children's play song "Shortenin' Bread," the fiddle tune "Bonaparte's Retreat," the blues "Another Man Done Gone," and the spiritual "Ain't No Grave Can Hold My Body Down," these performances were recorded in kitchens and churches, on porches and in prisons, in hotel rooms and school auditoriums. Documented during the golden age of the Library of Congress recordings, they capture not only the words and tunes of traditional songs but also the sounds of life in which the performances were embedded: children laugh, neighbors comment, trucks pass by. Musician and researcher Stephen Wade sought out the performers on these recordings, their families, fellow musicians, and others who remembered them. He reconstructs the sights and sounds of the recording sessions themselves and how the music worked in all their lives. Some of these performers developed musical reputations beyond these field recordings, but for many, these tracks represent their only appearances on record: prisoners at the Arkansas State Penitentiary jumping on "the Library's recording machine" in a rendering of "Rock Island Line"; Ora Dell Graham being called away from the schoolyard to sing the jump-rope rhyme "Pullin' the Skiff"; Luther Strong shaking off a hungover night in jail and borrowing a fiddle to rip into "Glory in the Meetinghouse." Alongside loving and expert profiles of these performers and their locales and communities, Wade also untangles the histories of these iconic songs and tunes, tracing them through slave songs and spirituals, British and homegrown

ballads, fiddle contests, gospel quartets, and labor laments. By exploring how these singers and instrumentalists exerted their own creativity on inherited forms, "amplifying tradition's gifts," Wade shows how a single artist can make a difference within a democracy. Reflecting decades of research and detective work, the profiles and abundant photos in *The Beautiful Music All Around Us* bring to life largely unheralded individuals--domestics, farm laborers, state prisoners, schoolchildren, cowboys, housewives and mothers, loggers and miners--whose music has become part of the wider American musical soundscape. The paperback edition does not include an accompanying CD.

Nicomachean Ethics Aristotle 2021-11-13 *Nicomachean Ethics* Aristotle - The *Nicomachean Ethics* is one of Aristotle's most widely read and influential works. Ideas central to ethics—that happiness is the end of human endeavor, that moral virtue is formed through action and habituation, and that good action requires prudence—found their most powerful proponent in the person medieval scholars simply called "the Philosopher." Drawing on their intimate knowledge of Aristotle's thought, Robert C. Bartlett and Susan D. Collins have produced here an English-language translation of the *Ethics* that is as remarkably faithful to the original as it is graceful in its rendering. Aristotle is well known for the precision with which he chooses his words, and in this elegant translation his work has found its ideal match. Bartlett and Collins provide copious notes and a glossary providing context and further explanation for students, as well as an introduction and a substantial interpretive essay that sketch central arguments of the work and the seminal place of Aristotle's *Ethics* in his political philosophy as a whole. The *Nicomachean Ethics* has engaged the serious interest of readers across centuries and civilizations—of peoples ancient, medieval, and modern; pagan, Christian, Muslim, and Jewish—and this new edition will take its place as the standard English-language translation.

Animals plainly know where they're going, but how they know has remained a stubborn mystery—until now. Supernavigators is a globe-trotting voyage of discovery alongside astounding animals of every stripe: dung beetles that steer by the Milky Way, box jellyfish that can see above the water (with a few of their twenty-four eyes), sea turtles that sense Earth's magnetic field, and many more. David Barrie consults animal behaviorists and Nobel Prize-winning scientists to catch us up on the cutting edge of animal intelligence—revealing these wonders in a whole new light.

Strange Rebels Christian Caryl 2014-03-11 Few moments in history have seen as many seismic transformations as 1979. That single year marked the emergence of revolutionary Islam as a global political force, the beginning of market revolutions in China and Britain that would radically alter the international economy, and the first stirrings of the resistance movements in Eastern Europe and Afghanistan that ultimately led to the collapse of the Soviet Union. In *Strange Rebels*, veteran journalist Christian Caryl shows how the world we live in today and the problems that plague it began to take shape in this pivotal year. Weaving the story of each of these counterrevolutions into a brisk, gripping narrative, *Strange Rebels* is a groundbreaking account of how these upheavals marked a startling conservative challenge to communist and socialist systems around the globe, giving birth to our modern age in the process.

A Good War Seth Klein 2020-09-01 "This is the roadmap out of climate crisis that Canadians have been waiting for." — Naomi Klein, activist and New York Times bestselling author of *This Changes Everything* and *The Shock Doctrine* • One of Canada's top policy analysts provides the first full-scale blueprint for meeting our climate change commitments • Contains the results of a national poll on Canadians' attitudes to the climate crisis • Shows that radical transformative climate action can be done, while producing jobs and reducing inequality as we retool how we live and work. • Deeply researched and targeted specifically to Canada and Canadians while providing a model that other countries could follow Canada needs to reduce its greenhouse gas emissions by 50% to prevent a catastrophic 1.5 degree increase in the earth's average temperature — assumed by many scientists to be a critical "danger line" for the planet and human life as we know it. It's 2020, and Canada is not on track to meet our targets. To do so, we'll need radical systemic change to how we live and work—and fast. How can we ever achieve this? Top policy analyst and author Seth Klein reveals we can do it now because we've done it before. During the Second World War, Canadian citizens and government remade the economy by retooling factories, transforming their workforce, and making the war effort a common cause for all Canadians to contribute to. Klein demonstrates how wartime thinking and community efforts can be repurposed today for Canada's own Green New Deal. He shares how we can create jobs and reduce inequality while tackling our climate obligations for a climate neutral—or even climate zero—future. From enlisting broad public support for new economic models, to job creation through

investment in green infrastructure, Klein shows us a bold, practical policy plan for Canada's sustainable future. More than this: *A Good War* offers a remarkably hopeful message for how we can meet the defining challenge of our lives. COVID-19 has brought a previously unthinkable pace of change to the world—one which demonstrates our ability to adapt rapidly when we're at risk. Many recent changes are what Klein proposes in these very pages. The world can, actually, turn on a dime if necessary. This is the blueprint for how to do it.

Beyond the Messy Truth Van Jones 2017-10-10 NEW YORK TIMES BESTSELLER • A passionate manifesto that exposes hypocrisy on both sides of the political divide and points a way out of the tribalism that is tearing America apart—from the CNN host hailed as “a star of the 2016 campaign” (*The New York Times*), now seen on *The Van Jones Show* Van Jones burst into the American consciousness during the 2016 presidential campaign with an unscripted, truth-telling style and an already established history of bridge-building across party lines. His election night commentary, during which he coined the term “whitelash,” became a viral sensation. A longtime progressive activist with deep roots in the conservative South, Jones has made it his mission to challenge voters and viewers to stand in one another’s shoes and disagree constructively. In *Beyond the Messy Truth*, he offers a blueprint for transforming our collective anxiety into meaningful change. Jones urges both parties to abandon the politics of accusation. He issues a stirring call for a new “bipartisanship from below,” pointing us toward practical answers to problems that affect us all regardless of region or ideology. He wants to tackle rural and inner-city poverty, unemployment, addiction, unfair incarceration, and the devastating effects of the pollution-based economy on both coal country and our urban centers. Along the way, Jones shares memories from his decades of activism on behalf of working people, inspiring stories of ordinary citizens who became champions of their communities, and little-known examples of cooperation in the midst of partisan conflict. In his quest for positive solutions, Van Jones encourages us to set fire to our old ways of thinking about politics and come together to help those most in need. Includes an invaluable resource of contacts, books, media, and organizations for bipartisan bridge-building and problem solving. “Van Jones is a light in the darkness when we need it most. In the tradition of the great bridge builders of our past, Van’s love for this country and all its people shines through.”—Cory Booker, U.S. senator, New Jersey “Van Jones’s voice has become an integral part of our national political debate. He is one of the most provocative and interesting political figures in the country.”—Bernie Sanders, U.S. senator, Vermont

Rescuing Socrates Roosevelt Montás 2021-11-16 A Dominican-born academic tells the story of how the Great Books transformed his life—and why they have the power to speak to people of all backgrounds What is the value of a liberal education? Traditionally characterized by a rigorous engagement with the classics of Western thought and literature, this approach to education is all but extinct in American universities, replaced by flexible distribution requirements and ever-narrower academic specialization. Many academics attack the very idea of a Western canon as chauvinistic, while the general public increasingly doubts the value of the humanities. In Rescuing Socrates, Dominican-born American academic Roosevelt Montás tells the story of how a liberal education transformed his life, and offers an intimate account of the relevance of the Great Books today, especially to members of historically marginalized communities. Montás emigrated from the Dominican Republic to Queens, New York, when he was twelve and encountered the Western classics as an undergraduate in Columbia University's renowned Core Curriculum, one of America's last remaining Great Books programs. The experience changed his life and determined his career—he went on to earn a PhD in English and comparative literature, serve as director of Columbia's Center for the Core Curriculum, and start a Great Books program for low-income high school students who aspire to be the first in their families to attend college. Weaving together memoir and literary reflection, Rescuing Socrates describes how four authors—Plato, Augustine, Freud, and Gandhi—had a profound impact on Montás's life. In doing so, the book drives home what it's like to experience a liberal education—and why it can still remake lives.

Making Magic Briana Saussy 2019-06-04 Re-enchanted your life with this book of rituals, ceremonies, and practices for personal growth—anchored in the hidden power of everyday things. "We all have a deep

capacity to make magic and to do it as easily as we breathe or open our eyes. This is not a matter of belief. You can discover your own capacity for magic in your own direct experience.” —Briana Saussy

When you think of magic, do you imagine something supernatural, extraordinary, or beyond your everyday reality? Many of us are drawn to magic because we think there’s something “out there” that can bring enchantment and wonder back into our lives. Braiding Sweetgrass Robin Wall Kimmerer 2013-09-16 As a botanist, Robin Wall Kimmerer has been trained to ask questions of nature with the tools of science. As a member of the Citizen Potawatomi Nation, she embraces the notion that plants and animals are our oldest teachers. In *Braiding Sweetgrass*, Kimmerer brings these two lenses of knowledge together to take us on “a journey that is every bit as mythic as it is scientific, as sacred as it is historical, as clever as it is wise” (Elizabeth Gilbert). Drawing on her life as an indigenous scientist, and as a woman, Kimmerer shows how other living beings—asters and goldenrod, strawberries and squash, salamanders, algae, and sweetgrass—offer us gifts and lessons, even if we've forgotten how to hear their voices. In reflections that range from the creation of Turtle Island to the forces that threaten its flourishing today, she circles toward a central argument: that the awakening of ecological consciousness requires the acknowledgment and celebration of our reciprocal relationship with the rest of the living world. For only when we can hear the languages of other beings will we be capable of understanding the generosity of the earth, and learn to give our own gifts in return.

Weave Us Together Rosemary Crow 2021-09-07

Let your dreams show you the way.

Musician and songwriter, Rosemary Crow, believes music comes from deep within the soul. One day, a beautiful song, "Speak to me in Holy Silence," came to her while she slept. She immediately went to her piano, wrote down the words and music and composed a song for the first time in her life.

As time went by, she composed more and more songs and finally resigned from her job as Director of Music at Trinity Episcopal church in order to pursue her new career as a composer and performer. People's response to her popular song "Weave" gave her the opportunity to travel across the country and perform at the General Convention of the Episcopal Church, the Democratic Convention Prayer Breakfast and even a maximum security men's prison. All this because she was willing to follow where the Spirit led her.

In Crow's new memoir, *Weave Us Together: My Musical Journey*, she shares with readers the excitement and inspiration of her creative process. She also guides readers through hiring musicians, partnering with a studio, and recording and producing her albums. Her musical journey, complete with obstacles and successes brought her great joy that she hopes to share with others. She took a nap and woke up with the creativity to change her entire life.

Imagine what you can do.
